WOOL.

There is, at the present time, some inquiry as to the prospects of wool during the ensuing few years, and many are in doubt whether to increase or diminish their flocks. The "Wool Grower" has a valuable article by S. B. Rockwell, intended to throw light on this subject, which we copy. We would call attention to that part of it which touches upon the importation of Australian wool:

"It is a fact worthy of the most profound consideration, by every grower of wool, that his occupation, for the next ten years, promises rich returns for invested capital and labor. During the last decade there has been, in many of the old wool growing States, a large falling off in the number of sheep raised and pounds of wool grown.—In 1840, New York had upward of 5,000,000 sheep, being more over a quarter of all in the United States. Vermont then had over 1,600,000. Now, New York has only 2,500,000, and Vermont only a fraction over 600,000! The causes which have led to this result are various, but it is foreign to speak of them. In many other States there has been a similar decrease or falling off.

For ten years, the increase of sheep throughout the Union has been only one and a half millions, while the population has increased four eighteen to twenty-four millions. The American population doubles in about twenty-five years, without the aid of foreign congestion; and it is, moreover, time that the annual increase of our population requires the fleece of 1,000,000 of sheep. Six pounds of wool to every man, woman, and child in the United States is the estimated average amount required yearly for their comfort and use. Consequently, they would consume 150,000,000 pounds. Of this amount we grow 32,500,000, or a trifle more two pounds for each individual. Now, we actually consume annually, three times the amount we grow, and the country is to buy of foreign nations 100,000,000 pounds. Of this, 25,000,000 is bought in the raw material, and the remainder in manufactured goods.

If it be a correct estimate, that the inhabitants of the northern and middle latitudes require, annually, the wool of two sheep to each individual, then it follows that in many of the wool growing countries of Europe we shall look in vain for exports, in consequence of the large gain of population on the part of their flocks.

France, with a population of 36,000,000, keeps only a fraction over 20,000,000 sheep. Australia, with a population of 30,000,000, has only 15,000,000 sheep. Great Britain and Ireland, with a population of 29,000,000, keeps only 40,000,000 sheep. The sheep of Russia number 55,000,000, while the population is 60,000,000. Spain does better; a population of 12,000,000 keeps 18,000,000 sheep. Prussia has 15,000,000 of inhabitants and 10,000,000. Turkey, with a population of 11,000,000, keeps 14,000,000 sheep; while Sweden and Denmark have less than 3,000,000, with a population of over 5,000,000. In short, in seventeen of the largest nations of Europe, the sheep number only 207,171,151, while the total of the population of those countries is over 265,000,000.

It appears clear that these nations can not export wool, for in many of them wool growing has reached its utmost limits, and yet do not raise enough for their own consumption! The Australian colonies, since 1843, have never exported less than 16,000,000 pounds annually, and often as high as 40,000,000. Since the discovery of the gold mines, however, which has caused great neglect of the flocks, England has suffered materially in her receipts of wool from that region. It appears that there is a deficiency of sheep and wool throughout nearly all the wool growing sections of the globe; and hence we infer that wool, especially good wool, will command a high price for a series of years to come.

Heavy drafts are being made upon the old stock of cloths in market, and when these are exhausted we may expect a permanent rise in the manufactured fabric.—Many of the countries that once exported fine wools, now export none. The South American States still export large amounts of wool, but it is of the coarser grades, and cannot enter into competition with wool grown in the United States.

From whatever point we view the subject we must utter it, as the strong conviction of our best judgment, that the inducements to grow more wool present stronger claims upon the attention and enterprise of the American farmer, than those of almost any and every other of the varied pursuits of agricultural wealth.

"But," says the reader, "to enable me to grow more wool, must not I purchase more sheep?" I reply, not necessarily.—You can grow much more upon the same number than you ever have, doubtless.—Every one knows that the same acre of tillage land may be made to produce from 30 to 50 per cent. more than its usual yield, by the aid of fertilizers. So may a flock of sheep be made to shear from 30 to 50 per cent. of wool by the aid of fertilizers, or in other words, by adapting their food to the make and growth of wool. One of the constituent parts of wool is albumen; hence those grains which contain the largest per cent. of albumen, make the most wool when fed to sheep. Wheat and rye contain largely of it; peas and beans have 29 per cent. of it; and oats 10 1-2 per ct.

It has been ascertained by actual experiment, that the following are the results of feeding different kinds of roots and grains for the production of wool:

1,000 lbs. of potatoes, raw, with salt, make 6 1-2 lbs. of wool. 1,000 lbs. of mangle wurtzel, raw, make 6 1-4 lbs. of wool; 1,000 lbs. wheat, 14 lbs.; oats, 10 lbs.; rye with salt, 13 lbs.; rye without salt, 12 1-2 lbs.; barley, 11 1-2 lbs.; peas, 14 1-4 lbs.; buckwheat, 10 lbs.

These results (and they are the same by different experiments) show that peas, wheat, and rye produce the greatest increase of wool, and give about twice the number of pounds of wool that roots do when in equal weight. Corn meal, oil cake, and such gross substances, are the proper food when fat mutton and tallow are the objects. But the flock-master whose main object is wool, must rely on good hay and water, and a daily moderate allowance of those grains, with some potatoes or carrots as green food, for the attainment of his objects, viz: the greatest amount of good wool, and that at the very low condition.—[Prairie Farmer.

Top Dressing of Grass Lands.

Thirty years ago the practice, now so prevalent in many sections, of renovating sward lands by top-dressing, was unknown. Even in the older agricultural sections, where the science and art of husbandry were somewhat advanced, lands that had become inert and unproductive, were supposed susceptible of radical and complete emancipation only by plowing and relaying. At present, however, the fact is far otherwise. Those who have sward lands which fail to produce good crops, endeavor their renovation and improvement by the adoption of agencies far more speedy, efficient and economical. There are many methods of top-dressing employed, and a very great variety of materials are made use of, some of which, by your permission, I will enumerate and describe.

The first which I shall notice, and which is also the most ancient, is the practice of spreading manure upon the surface, broadcast, in the spring, or fall. For this purpose, the solid excrement of cattle, sheep, horses, and swine, is used. It is merely spread, and permitted to remain exposed, and freely exposed to the deteriorating action of the atmosphere, till its powerful fertilizers are exhausted, and it becomes a perfectly dead and effete mass. That manure applied in this way, may, and does, to a certain extent, benefit and improve the soil, I by no means am disposed to deny; but that the practice is an economical one, is a proposition for which few judicious and thoughtful minds will probably contend. It is a practice that deserves to become obsolete, and, indeed, already has become so in every section where the true interests of husbandry have been investigated with candor, and the philosophical principles upon which the art is based are accurately comprehended and understood.

If a farmer has a piece of sward land which, from long cropping, or other political causes, has depreciated so far in the quantity and quality of its produce as not fully to remunerate him for the outlay involved in its cultivation, the best method of amelioration he can possibly adopt is the following:

In the Spring, as soon as the snow is off, haul on and spread from thirty to forty double horse loads of good manure; spread the same evenly over the surface, and then pass over it a "spik ed roller," an implement of great utility, which is constructed in the following way: A heavy cylinder, six feet long and two and a half in diameter—made of a single log, is armed with iron spikes, of bar iron, one inch square and eight inches in length, measuring from the surface of the cylinder. These spikes are inserted over the entire circumference of the roller, one foot apart each way, in the same manner as the teeth of a threshing machine, and so firmly as not to be displaced by any substance or obstacle in the soil with which they may fortuitously be brought into collision. The action of this implement, when properly constructed and operated, is to scarify and loosen the old sward, and in some measure to bury the dressing, and bring it in contact with the weakened and emaciated fibres of the grass roots, the range of which is generally very near to, or but little below the surface of the soil.—By passing it two or three times over the field, the sward will be torn up, and no small portion of the manure brought into contact with the rootlets, while the scarification and enlightenment of the soil will afford a free passage for the soluble portions of the application into its interstices, thus affording an immediate advantage to the crop, and one that will speedily make itself apparent in the increased greenness and luxuriance of the branches, be their character what it may.

As the spike-roller leaves the surface rough and uneven, it should always be followed by the common roller, which will press down the loosened sward and manure, and leave the surface smooth and even for the scythe. After this, gypsum or wood ashes should be applied; or, if the soil is of a silicious or vitrious texture, common clay, finely pulverized, may be sown or spread with advantage.

In some cases I have known grass land which had become almost completely bound out, renovated and restored to its original productiveness, by a top-dressing of clay. If the texture be sandy, with but little vegetative power, the application of this earth will always be beneficial. By filling the pores and interstices of the surface, and thereby arresting, in a certain degree, the economy of transpiration, in seasons of drought, its effects are similar to those produced by irrigation, and of course immediately and directly beneficial to the crop.—But in all cases where amelioration of grass lands is attempted by top-dressing, ashes, lime, and gypsum, nitre, or common salt—one or all should be associated with the vegetable substances applied. Their tendency into warm and sweeten the soil, and to prepare it for producing to the utmost extent of its constitutional and vegetative powers.—[Cor. Germantown Telegraph.

As STATE change has of late become scarce, many are proposing remedies, and among the latest of the propositions is one that gold half dollars shall be issued from the mint. Such half dollars would doubtless answer well, if mixed with such a quantity of silver as to give them a convenient size. But the easiest and simplest way of preserving silver is for Congress to allow a new issue of small coins, with such a mixture of alloy that their legal value as money, will always be so far above that of the metal or bullion, that they will never command a premium for exportation, and cannot be used in manufactures.—While the remedy so much wanted can be so easily obtained, we are surprised that the matter is not taken hold of immediately in Congress, and carried through.

KNOWLEDGE is not wisdom. A person may know much, and yet have no claim to be called wise. Wisdom is the practical application of knowledge.

IT may serve as a comfort to us in all our calamities and afflictions, that he that loses anything, and gets wisdom by it, is a gainer by the loss.

THE expectation of future happiness is the best relief of anxious thoughts, the sweet perfect cure of melancholy, the guide of life, and the comfort of death.

FALL AND WINTER CLOTHING.—To Merchants or Jobbers in Clothing and the public at large, we have received at the commencement of October the Fall Trade, consisting, in part of

*** Call and examine before purchasing elsewhere, as I am determined not to be undersold.

J. G. FOSTER.

Rutland, Sept. 18, 1852. 41—tf

In Probate.—John Waite's Estate.
STATE OF VERMONT, } BE it remembered that
District of Rutland, ss. } at a special session of the Probate Court for the said district of Rutland, held at Rutland in and for said district, on the 19th day of January, A. D. 1852; present Hon. Harvey Burton, Judge:

Whereas, a certain instrument in writing, dated the 4th day of October A.D. 1850, purporting to be the last will and testament of John Waite, late of Rutland, in said district, deceased, has been this day presented to the said Probate Court, by Geo. W. Chapin and Clark White, the executors therein named, to be proved and recorded as and for said will and testament;

Therefore, It is ordered by said court, that the parties and adversary of said instrument, as said law will and ordained, be, and the same are, hereby notified to the stated session of said court, to be held at the office of the Register of said Probate in Rutland, in said district, on the first Monday, being the 7th day of February, A. D. 1853, and that notice thereof be given by publishing a certified copy of this order three weeks successively previous thereto, in the Rutland County Herald, a newspaper printed at said Rutland, in said district, in order that all persons interested therein, may then and there appear before said court and object to the allowance of said instrument, and to said decree, if they see cause.

A true copy of record. HENRY HALL, Register.

M. Miller's Patent Sleigh.
FORT ANN, WASHINGTON CO., N. Y.

THE undersigned would respectfully inform the public that he has commenced manufacturing the style of Sleigh, as his shops in Fort Ann, Washington Co., N. Y. He flatters himself that any contemplating to purchase anything in this line, from a sporting Sleigh to a four horse Harouche, can be accommodated with style and price, that will render it an object for them to call and see before buying.

He has a few for sale at the Rutland Depot, where he will keep an assortment through the season of sleighing.

Notice has heretofore been given to the public, the Letters Patent have been granted to the subscriber for an improvement in the Patent Spring Seat—which is more extensively used than any other—and has taken the first premium at the N. Y. State Fair, for four successive years. The inventor has ground to avail himself of the benefit of this improvement, and would say that hereafter will have both be looked after and that those who have heretofore intruded upon them into market Sleighs manufactured by those who have not secured the right to build and that those who come, as well as send, are consignees, Messrs. Meacham, of Dresden; Whitney & Fob, and Mr. Weadon, of Pittsford,—are the only persons who have the right to build, in the united part of Rutland County. Those purchasing of the other mechanics, between Poultney and Middlebury will be liable to recover, in the Supreme Court of the United States, for a violation of the Patent Laws.

MOSES MILLER.

Rutland, Nov., 26, 1852 49-3m

Quickest, Cheapest, and Best Route.
12 hours saved, and unsurpassed for comfort.

MICHIGAN SOUTHERN R. R. LINE, carrying the great Western U. S. Mail between Buffalo and Chicago, Washington, Kenosha, Racine, Milwaukie, and Sheboygan, via Monroe, and Toledo. Through to Chicago in 41 hours, avoiding night travel by rail.

The traveling public are respectfully informed that the Michigan Southern Railroad Company have completed their road from Monroe to the city of Chicago, with a heavy rail, and have placed upon the Western Division, a new and elegant line of Cars, to run without any connecting Steamers. Excursion Mail, H. Van Allen, Commander, leaving Buffalo Mondays and Thursdays; Northern Indiana, E. Wagner, Commander, leaving Buffalo Tuesdays and Fridays; Southern Michigan, A. D. Fletcher, Commander, leaving Buffalo Wednesdays and Saturdays.

No expense has been spared in the construction and fitting up of the above Steamers. Their engines are of large power and low pressure, having been constructed expressly for these boats.

The boats will leave the M. S. R. R. Line Dock, directly opposite the Exchange, one hour after the arrival of the Evening Express Trains; as will also the mails to be changed, and baggage selected and taken to the boats, proceeding with no detention to Monroe, (240 miles in 11 hours,) where the Express Train will be in waiting to convey passengers directly into the city of Chicago, (60 miles in 2 hours.)

Passengers can have their baggage taken to the boats free by delivering their checks to the Baggage agent of the line, who will always be on the Trains. They can also have their baggage checked from Buffalo to Chicago.

While the mails are being changed, and baggage selected and taken to the boats, passengers will have plenty of time to go to Hotels and get supper.

The distance saved to this Line over any other route is between 30 and 70 miles.

The Cabins of these boats, are reserved for passengers arriving on the Evening Express Train.

For berths or passage apply on board, or to S. M. Kinney, Agent, St. R. R. Dock, foot of Commercial Street, Buffalo.

Tickets on the above Line, can be obtained at the Office of the R. & S. R. R. Company 29-tf

COMMISSIONERS' NOTICE.—We, the subscribers, being appointed by the Hon. Probate Court for the district of Rutland, commissioners to receive, examine, and adjust all claims and demands of all persons against the estate of Norman E. Cottin, late of Fair Haven in said district, deceased, represented insolvent, and six months from the 20th day of November being allowed by said court for that purpose, we do therefore hereby give notice that we will attend to the business of our said appointment at the house of C. M. Willard, Esq. in Fair Haven, first and fifteenth days of February next, from 1 o'clock until 4 o'clock, P. M., on said days.

Dated at Fair Haven, December 20th, 1852.

CYRUS C. WHIPPLE, T. E. WAKEFIELD, } Commissioners.

In Probate.—Luther Buxton's Estate.
STATE OF VERMONT, } BE it remembered, that
District of Rutland, ss. } at a special session of the Probate Court of the said district of Rutland, held at Rutland in and for said district, on the 4th day of January, A. D. 1853,—present Hon. Harvey Burton, Judge:

Whereas, Jeremiah Buxton and Daniel Buxton administrators of the estate of Luther Buxton, late of Middletown, in said district, deceased intestate, and did then allow them one year to dispose of the estate and to pay the debts of said deceased. And said Jeremiah and Daniel have applied to said court for an extension of the time so allowed as aforesaid to the 12th day of January, A.D. 1854 therefore it is ordered by said probate court that the hearing and decision of said petition be, and the same are, hereby referred to a stated session of said court to be held at the office of the Register of said court in Rutland in said district, on the 1st Monday, being the 7th day of February, A. D. 1853, and that notice thereof be given by publishing a certified copy of the record of this order, three weeks successively previous thereto, in the Rutland County Herald, a newspaper printed at said Rutland, in order that all persons interested therein, being thereby duly notified thereof, may then and there appear before said court and object to the allowance of said extension if they see cause.

A true copy of record. HENRY HALL, Register.

In Probate.—Noah Vick's Estate.
STATE OF VERMONT, } BE it remembered, that
District of Rutland, ss. } at a special session of the Probate Court for the said district of Rutland, held at Rutland in and for said district, on the 20th day of December, A. D. 1852, present Hon. Harvey Burton, Judge:

Whereas Harris P. Otis, administrator of the estate of Daniel Fink, late of Danby, in said district, deceased intestate, has this day applied to the said probate court for an order of sale of real estate of said administrators of said estate. Therefore it is ordered by said court that the examination of said account for said allowance and any decree as to the assets in said administrators hands be, and the same are, hereby referred to a stated session of said court to be held at the office of the Register of said court in Rutland in said district on the 1st Monday, being the 7th day of February, A. D. 1853, and that notice thereof be given by publishing a certified copy of this order three weeks successively previous thereto, in the Rutland County Herald, a newspaper printed at said Rutland, in order that all persons interested therein, being thereby duly notified thereof, may then and there appear before said court and object to the allowance of said account and to said decree, if they see cause.

In Probate—Daniel Underwood's Estate
STATE OF VERMONT, } BE it remembered that
District of Rutland, ss. } at a special session of the Probate Court for the said district of Rutland, held at Rutland, in and for said District, on the 21st day of December, A. D., 1852,—Present, Hon. Harvey Burton, Judge:

Whereas, Gideon S. Tabor, Administrator of the estate of Daniel Underwood, late of Mount Tabor, in said district, deceased intestate, has this day presented to the said Probate Court, a petition in writing therein setting forth certain facts relative to the situation of said estate, whereby it appears that the personal estate of said deceased is not sufficient to pay the debts of the said deceased and the expenses of administration; and that it is necessary to sell a part of the real estate of said deceased, and therefore requesting said Court to grant him a license to sell a certain tract or parcel of real estate, of which the said deceased died seized, containing about 40 acres of land, with a small barn thereon situated, in said Mount Tabor.

Therefore, It is ordered by said Probate Court that the hearing and decision of said petition be, and the same are, hereby referred to a special session of said Court, to be held at the office of the Register of said Court, in Rutland, in said District, on the 21 Monday, being the 19th day of January, A. D., 1853, and that notice thereof be given by publishing a certified copy of the record of this order, three weeks successively previous thereto, in the Rutland County Herald, a newspaper published at said Rutland, in order that all persons interested therein, being thereby duly notified thereof, may then and there appear before said Court, and give bonds for the payment of said debts and expenses, or otherwise object to the granting of said license if they see cause.
