THE MISCELLANEOUS CONVENTION.

"We have neither time nor room for anything but a remark; there are now two distinct organizations on substantially the same platform—and two candidates for Gov. of identically the same views, for the support of men who essentially agree in principle. To attain the great purpose of concentrating the power of the state in defence of freedom, there must still be yielding somewhere. This is unavoidable.—We regret this. A step in advance however, (?) has been taken, and that is so far favorable. How the difficulty is to be solved is now matter for consideration by all concerned. Let it be calmly considered.—*Montpelier Watchman.*

"We see nothing in the conduct of the Convention or in its result, to alter the opinion which we have heretofore plainly intimated, as to the necessity or expediency of its being held, and as to its power to give any additional force to the growing sentiment in the Free States against slavery extension.—*Burlington Daily Free Press.*

THE CHOLERA. It would be useless to attempt to conceal the fact this much dreaded epodemic prevails to a limited extent in Boston We are no alarmists, but the evidences of the fact are already too publicly known—and we doubt the propriety of the course pursued by certain parties, in endeavoring to palliate or misrepresent the true state of the case. When such a disease is really in our midst, we feel it to be our duty—not to sound the alarm—for there need be no fear—but to give timely warning to our citizens, that they may exercise the necessary precaution to prevent its spread.

The homely yet forcible adage, that "an ounce of prevention is better than a pound of cure," can be as properly put into practice now, with the prospect of good results, as at any time man's memory runneth not to the contrary. And at a time like this, where one half the truth is suppressed, and people are permitted to guess the rest, suspicion is excited and unnecessary alarm is the result.

One thing we wish to impress vividly upon the mass of our citizens. It is to avoid fear of the disease. Fear of the cholera has as much to do with the spreading of the disease as filth, if not more, and therefore the matter should be treated calmly, openly and aboveboard.

Our citizens need not in truth feel alarmed, but they should take all the necessary precautions to ward off the disease—be regular in their habits and diet—avoid all sudden changes in diet or dress, and above all avoid intemperance in eating or drinking. To this latter cause and a superabundance of filth, can be traced, we understand, the cause of every case of cholera that has occurred among us thus far. It has not entered the cleanly portion of the city, and we believe not a single case has occured, except among uncleanly or intemperate persons. This fact alone is a fruit ful subject for comment, but we refrain at present as the authorities are, "taking time by the forelock," and taking steps not only to remove the cause of the disease, but to provide for the proper treatment of such cases as may occur among the poor and destitute.—*Boston Mail.*

—OLD BULLION AND JOHN PETIT.—John Petit, having in a speech stated that Mr. Benton was the first man to break the Missouri Compromise, by annexing the *Platte* country county to the State of Missouri, Benton has written a letter to Mr. John Howe of Indiana, in which he says: "Sir, your Senator is a *great liar and a dirty dog*, falsifying public history for a criminal purpose." And what is more he goes on and proves what he says.

—RIVER AND HARBOR BILL.—Among the items in this bill for making appropriations for the "repair, preservation, and completion of certain public works heretofore commenced under authority of Law," is one of $18,000 for Burlington harbor, Lake Champlain. The total amount of appropriations put down in the bill is $2,127,800.—The bill has passed the House and it is supposed will pass the Senate.

—THE SCHUYLER FAMILY. The Syracuse Chronicle gives the following in relation to his family:

"One of his children married an Episcopal clergyman about three years ago, and did not know at the time of her marriage that she was the daughter of Robert Schuyler. His children were mostly educated at White Plains, where they went under the name of Spicer, and were looked after by their mother. They were let into the secret by their mother last fall, and the eldest son, a young man of education, talents, and moral worth was married soon after to a young lady in Brooklyn, under the present name of his father; but Mr. Schuyler was not present at the wedding.

—The Annual General Conference of the Congregational churches in the State of Maine met this year at Bangor, on Tuesday, June 27th. The Conference resolved, among other things, that as Christian Citizens they were called upon to resist the policy of the Nebraska bill, "as bringing into jeopardy the continuance of our Union, as making us the scorn of the other nations of the earth, as exposing us to the the just judgement of Almighty God, and finally as creating formidable obstructions to the progress of Christ's kingdom on earth; and re-affirmed most emphatically their confidence in the *Maine Liquor Law, that it's good and doing good!*

—MEMBERS OF THE N. Y. CITY GOVERNMENT IN BOSTON.—The N. Y. City Hall having been destroyed by fire last year, a splendid edifice is to be erected on the same site, at an estimated cost of $1,000,000, and a Committee of the City Government, on their way to Vermont for the purpose of examining a quarry of marble with the design of using it in the new structure, arrived in this city on Sunday morning, and took lodgings at the Revere House. The Committee consists of the following gentlemen, members of the board of Aldermen and the Common Council:—P. P. Voorhies, C. H. Tucker, D. P. Sammis, P. M. Schenck, I. M. Belden, Dr. E. H. Kemburk, T. Frye, C. Allen, J. N. Wells, W. H. Smith.—*Journal of Tues.*

THE AVENGER.—Some six or eight years since, while spending a few weeks in Washington, we observed a young man of large size and handsome figure and face, who had no apparent occupation, but spent his time lounging about the bar-room and sitting-room of the National Hotel. He was seldom visible during the day, but at night was always there,—generally more than half intoxicated, always moody, shunning conversation, and apparently anxious to escape both his own thoughts and the companionship of others. His appearance attracted our attention, and those of whom we enquired concerning him, told us that he belonged to one of the best families in Virginia,—that he was highly educated and of promising talent, that he had made a most excellent start in life, but that he had acted as one of Ritchie's seconds in the bloody and brutal affray which consigned poor Pleasants to the grave. From that time his course had been rapidly downward. He had become an outcast from society, mainly from his own inability to mingle with other men, had sought relief in dissipation, and had become the mere wreck which we then beheld. We have heard nothing of him since, but presume he died some years ago. And now the principal in that transaction, after longer and we doubt not still keener sufferings, has followed his victim and his accomplice to the repose of the grave. It is often a short sighted judgement which pronounces the victim of crime to be the most unfortunate of the party it involves.—*N. Y. Times.*

Foreign News.

ARRIVAL OF THE NIAGARA.

THREE DAYS LATER from EUROPE.

HALIFAX, July 12th.

The Royal Mail Steamship Niagara arrived here this afternoon.

Prince Gorsachkoff (not the General,) arrived at Vienna on the 4th of July, as the bearer of the Czar's official reply to Austria, the precise terms of which have not transpired, but the Prince was also the bearer of an autograph letter from Nicholas to the Emperor of Austria, the tenor of which is said to be that by evacuating Wallachia and leaving free the Danube, the Czar considers that he satisfies the reasonable demands of Austria.

Moldavia will not be evacuated, as the occupation of that principality is a necessary guarantee for conditions of a future treaty of peace.

Col. Meutteffel arrived at Berlin on the 6th with the Czar's reply to Prussia. The reply is in courteous terms, stating that the Czar will consent to resign his exclusive protection over the Greek Christians, if Turkey will accede to a joint protectorate of the five Powers. He will evacuate the Principalities when the other Powers evacuate Turkey, but he will retain a strong military position in Moldavia as provisional security.

The Czar also sent Col. Iaskoff to Dresden with a friendly autograph letter to the King of Saxony and other sovereigns who were represented in the Bamberg Conference. Meantime hostilities continue and fighting is reported from the Baltic, Black Sea, Danube and Asia.

The Austrians have entered Wallachia, and a French army is embarking in English ships at Cherbourg for Finland. At Wallachia, on the 2d, 17 steamers with Austrian troops were dropped down the Danube.

FROM THE BALTIC.

Sir C. Napier's fleet was laying in line of battle off Constadt, but up to June 29th, no attack had been made.

The English frigate Desperate fired a few shots, which the batteries returned.—Bomarsund was a second time bombarded on the 26th and 27th ult., and the fortifications were destroyed.

On the 24th ult., eight Russian steamers came out of Sebastopol, and attacked some ships of the Allied fleet, and afterwards regained shelter at the batteries. The affair seems to have been a running fight, and the Furious, one of the Allied fleet thus attacked, was considerably damaged.

In the Danube, on the 21st and 22d, an important battle was fought. A despatch states that the Turks under Geroth Mussa Pacha, fell upon the Russian rear guard of 25,000 men, near Silestria, on the 21st, and the battle lasted during two days, the Russians losing 2,500 killed, but making good their retreat.

The plan of the campaign and the movements of the Allied army are kept profoundly secret. The cavalry are supposed to be advancing by land to the Balkan.

A telegraph is being built from Constantinople to Varna, Shumla, Widdin, Adrianople and Gallipoli.

Fifty thousand Anglo French troops are still at Varna, as are also Marshal St. Arnaud and Prince Napoleon.

On the 22d, the cannonade of the attack on the Russian rear guard was heard by the French, and Gen. Canrobert sent two squadrons of dragoon to reconnoitre.

Omar Pasha is prepared to establish his headquarters at Rutchuk.

General Baraguary D'Hilliers commands the division of the French army about to embark for the Baltic.

Warsaw is being doubly fortified.

Fourteen neutral merchant ships now in Riga petioned Napier to permit them to leave.

The harvest in Bulgaria is very rich.

FROM ASIA.

From Asia the news is bad. On the 9th of June, the Turks met with a severe check in attempting to storm two redoubts, between Ussurquet and Kurtaie. The Russians attacked them in flank during the assault and defeated them with 1500 killed. 13 cannon, 35 standards and the entire camp equipage were captured. An erroneous despatch was published reversing the fact, and stating that the Turks under Selim Pasha had defeated the Russians with the above loss, but reliable accounts show that the Turks were disastrously defeated.

GREECE.

From Greece it was announced that Hodgretras had been completely routed at Kaladaka in Thessaly. The rebellion is now considered ended. H. G. DUNHAM.

The harvest in Greece was everywhere abundant. Piracy is increasing. French troops continue to arrive.

Cholera is reported to prevail in the garrison at Constadt. Also some cases in the British fleet.

It is affirmed that the Duke Alexander is about to join the Russian army in Moldavia.

Cramp and Painkiller.

The world is astonished at the wonderful cures performed by the Cramp and Pain Killer, prepared by CURTIS & PERKINS. Its equal has never been known for removing pain in all cases; for the cure of spinal complaints, cramp in the limbs and stomach, rheumatism in all its forms, bilious obstructions and fever, bowel, sore throat, and gravel, it is good. (5) the best remedy in the world. Evidence of the most wonderful cures ever performed by any medicine are on circulars in the hands of agents. You may be positively sure of relief if you use it. Millions of bottles of this medicine have been sold in New England the past six or eight years.

For sale by the above named Agents.

Agents for the above Medicines, Ford & Morse Chas. Hurt & Son, James Porter, Rutland; Lincoln & Osgood, Center Rutland; J. L. Gilman, West Rutland; F. J. Sprague, Weybridge; H. A WONDERFUL DISCOVERY has recently been made by Dr. Curtis, of this city, in the treatment of Consumption, Asthma and all diseases of the lungs. We refer to "Dr. Curtis's Hygeian, or inhaling Hygeian Vapor and Cherry Syrup." With this new method Dr. C. has restored many afflicted ones to perfect health; as an evidence of which he has innumerable certificates. Speaking of the treatment, a physician remarks:—It is evident that inhaling—constantly breathing an agreeable, healing vapor, the medical properties must come indirect contact with the whole of the aerial cavity of the lungs, and thus reach the many and varied changes produced upon iron when introduced into the stomach, and subjected to the process of digestion.—The Hygeian is sale at all the druggists throughout the country.—Over the New York Dispensary of Jan. 14th.

See advertisement of Medicated Inhalation in another column of this paper.

Thirty Years' Experience of an Old Nurse

MRS. WINSLOW would call the attention of the ladies to her Soothing Syrup, for children teething. It will give immediate relief, reduce all inflammation, making the process of teething easy, and positively cure to cure the dysentery and diarrhea, in some quantities are sold all over New England.

PAUPER POETRY.—We have sold very large quantities of Mrs. Winslow's Soothing Syrup during the last six years, and over 20,000 bottles the last year. We believe it the best medicine in the world for children teething, or for the cure of Dysentery and Diarrhea in children, whether it arises from teething or by other cause. It gives universal satisfaction—ever heard a complaint from any one using it—never did a medicine so universally successful in relieving pain and effecting cures. In all cases where stood, taken in season, relief is immediate and sure.—PORTLAND CHRONICLE. CURTIS & PERKINS.

Druggists, No. 48 Cortlandt Street, New York. Sold by C. H. RING, corner of John street and roadway; BOYD & PAUL, No. 48 Cortlandt street New York; HENSHAW, EDMANDS & CO., Boston. Price 25 cents a bottle.

Also for sale as above, CURTIS & PERKINS' WILD CHERRY BITTERS for the cure of Bilious and Jaundice Complaints, and General Debility.—They quicken the blood, and give new life and energy to the whole system. Price only 25 cents a pin, bottle.

Myers' Extract of Rock Rose.

Every day furnishes additional proof of the efficacy of Myers' Extract of Rock Rose in the cure of Scrofula, Salt Rheum, and all impurities of the blood. Persons troubled with Scrofulous affections of any kind, should lose no time in trying it. Parents whose children are at all predisposed to Scrofula, should administer it freely. By attending to the advice, they will confer a blessing upon their off-spring, greater than anything they can bequeath to them, viz: a healthy constitution.

SALT RHEUM.

My daughter, Hannah, has been severely afflicted with an eruption ever since her childhood. It has been named Scrofula, Salt Rheum, &c. It was, I think, the Salt Rheum, which was of the very worst form. It destroyed her health, strength and appetite. She had used various remedies in vain. At last I obtained a bottle of Myers' Extract of Rock Rose. She took two bottles, and a marked change for the better was soon perceptible, and in four weeks she was able to attend school and resume her studies, which she had been obliged to relinquish in consequence of poor health. We hope and think the humor entirely healed. Her general health is greatly improved, and for many years she has not been as well as she is now. H. G. DUNHAM.

Mr. H. G. Dunham is Deacon of the Congregational Church of which I am the Pastor, and is extensively and favorably known throughout this State as a Colporteur, and the cure of his daughter by the Rock Rose, is a striking fact, which many have witnessed.

DIED.

In Wallingford, on the 13th inst., Mrs. LOIS M. REED, wife of Mr. Elliot Reed, aged 26 years.

Amiable and affectionate as a daughter, a devoted wife and mother, a true friend and a kind and obliging neighbor, her loss will be deeply felt in the circle in which she moved. The place of such an one is not easily supplied. But let her numerous friends be consoled in their bereavement, that she died in the exercise of a clear and unwavering faith in the Redeemer, and may they seek to follow in her steps, that they may hold the same complacent trust in a dying hour. If ugly as sin, your picture will be how and c!

Rare chance to start in Business.

IT is a well known fact that Bookstores are greatly needed in many of the thriving villages and large towns in New England which now have to rely upon the transient visits of Pedlars for all their reading.

A Bookstore can be started on a capital of from $200 to $300, keeping a very fair assortment, and replenishing as often as is necessary. Druggists would find it profitable to keep a stock of BOOKS in connection with their business, in villages where there are no Bookstores.

A rare chance for procuring a stock at unusually low prices is now offered. A Bookselling firm located in Hartford, Conn., intending to confine themselves to the publishing business, offer their entire retail stock of

Lightning Rods.

THE subscriber, Agent for a new and improved **Lightning Conductor,** would inform the inhabitants of Rutland and vicinity, that the article he is about to introduce to them is no humbug, but just what it pretends to be. It is perfectly insulated and continuous; and attached to the building by pillars of Glass instead of iron staples. I have no testiments to make, as the rod will recommend itself to the satisfaction of all. The price per rod is 20 cents per foot put up satisfactorily. Models, or certificates of recommendation will be left at the Office of this Paper, where all are requested to call and examine for themselves.

P. S. I am requested by the proprietor to say that if any one will produce as good a rod, on scientific principles, he will furnish their buildings

Free of Charge.

Any communications addressed to the subscriber at *North West Creek, N. Y.,* or to the Office of this Paper, will be **promptly attended to.**
