LILY SYRUP.

An unparralled remedy for Diseases of the Lungs, Consumption, Coughs, Influenza, Colds, Asthma, Spitting of Blood, Hooping Cough, &c. &.

TO THE PUBLIC.

In presenting to the public a new remedy for diseases of the lungs, it may be proper to say that, judging from the many certificates and recommendations of other specifics contained in the newspapers of the day no new remedy was called for or expected. But of the popular remedies, had any exactly to meet the ills of mortality, or any one of the many pretending to possess all those virtues were universally, or but after a fair trial, the public feel could believe that it is having power, and rationally hope for a speedy recovery of health, this humble attempt to arrest the progress of Pulmonary Consumption would not have appeared.

But that the victims of this destroyer are daily increasing, needs no proof and the large scales of the Druggists show that the remedies of the day have been fairly tried, and failed in their object, that object was the restoration to health of persons suffering from diseases of the lungs. While one remedy dries up a cough that should be properly aided to throw off the vissid phlegm collect upon the lungs and threat the harbinger of disease, another, by a bad solution of an excoriant, is in fact enabled to dispossess the present tenant, but leaves a worse one to occupy the shattered premises; and by it, the work of death is the sooner accomplished.

The LILY SYRUP is now believed to be the best remedy for lung complaints, that has ever appeared. To cure Pulmonary Consumption after the disease has done its last work, or become seated upon the vital function, and *tubercles* are formed and broken, and atmospheric air is admitted into the broken parts, is not among the precessions of the times and one poorer no-more than to the contrary, notwithstanding.

The medicine has restored many who were supposed to be beyond cure, by men standing high in the medical profession; but the restoration to health improved that great and good man may be mistaken, the stage or progress of the disease. Hence, let no person despair of relief, until he has made a fair trial of the Lily Syrup.

This medicine operates by promoting a free and [illegible] which the [illegible] the medicine.

The proprietors propose to refer to the following persons who have used the Lily Syrup, and who will be happy to give information of its superior healing powers, to any who may be desirous of it.

HEADACHE.

A CERTAIN CURE FOR SICK HEADACHE, which has been used in families, every member of which has had sick headache from infancy, is a constitutional family complaint, and has cured effectually in every instance we know, amounting to many hundreds. It is not unpleasant to the taste, and does not prevent the daily avocations of one using it; it must be persevered in, and the cure is gradual, but certain and permanent. Instances are constantly multiplying where the distressing complaint is completely relieved and cured, although of years standing by the use of Dr. Spohn's celebrated remedy. One dose of powders is sufficient to relieve, having some of the most astonishing effects.

Has a report of the medicine, that the proprietor has given directions for their agents to refund the price to any one who is not pleased with, and even cured by it. He hopes also that this may secure its great benefits to the distressed sufferers who are labouring under Headache. E. SPOHN, M. D., inventor and Proprietor.

NOTICE.—☞ Medicine is best known by the cures it performs. ☞ I. I. Newton's Panacea or Purifier of the Blood. The unparalleled and still increasing reputation which this medicine has acquired throughout the New England States, and the many cures it has performed, and the great demand made for it by the advice of physicians well acquainted with its preparation, has induced the proprietor to extend its circulation to almost every town in the eastern States, and the principal towns in the United States. This Panacea is warranted purely vegetable, and is recommended by many other medicine ever offered to the afflicted as the safest, surest and most certain remedy for all diseases, as experience proves that it has within the last fourteen months done and cured more than any other medicine ever offered to the public. Its cures are so numerous and so well known, that it would be useless to attempt to give them in a newspaper notice, or by anything but the testimony of the cured. MOFFATT'S VEGETABLE LIFE MEDICINES.—These medicines are indebted for their name to their manifest and sensible action in purifying the springs and channels of life, and enlivening them with renewed tone and vigor. To many hundred certificates which have been made public, and in almost every species of disease to which the human frame is liable, the happy cures of MOFFATT'S LIFE PILLS AND VEGETABLE BITTERS have been greatly and publicly acknowledged by the persons benefitted, and who were previously unacquainted with the beneficially physical powers which their compounds and medicines which their compounds early act.

THE LIFE MEDICINES recommend themselves in diseases of every form and description. Their first operation is to free from the coats of the stomach and bowels, the various impurities and crudities constantly settling around them; and to remove the hardened feces, which collect in the convolutions of the smallest intestines. Other medicines only partially clean either, and have such collected mass to remain to produce habitual costiveness, with all its train of evils, or sudden diarrhea, with its imminent danger. This fact is well known to all regular anatomists, who examine the human bowels at recess; and hence the prejudice of those who had imposed men against regular medicines—or medicines prepared and heralded to the public by quacks and persons.

The second effect of the Life Medicines is to cleanse the kidneys and the liver, and by this means, the liver and the lungs, the head balance of which entirely depends upon the regularity of the urinary organs. The blood, which passes to receive from the agency of the liver and the lungs before it passes into the heart, being thus purified by them, and not merely by food coming from a clean stomach, expands freely through the veins, renews every part of the system, and triumphantly mounts the banner of health in the blooming cheek.

Moffat's Vegetable Life Medicines have been thoroughly tested, and proved to be a sovereign remedy for Dyspepsia, Flatulency, Palpitation of the Heart, Loss of Appetite, Heartburn and Headache, Bowle cases, Blotches, Anxiety, Lassitude and Melancholy, Costiveness, Diarrhea, Cholera, Fevers of all kinds, Rheumatism, Gout, Dropsies of all kinds, Gravel, Worms, Asthma and Consumption, Scurvy, Ulcers, Inveterate Sores, Scorbutic Eruptions and Bad Complexions, Erysipelas, Scarlatina, Salt Rheum, Erysipelas, Common Colds and Influenza, and various other complaints which afflict the human frame. In Fever and Ague, particularly, the Life Medicines have been most eminently successful; so much so that in the Fever and Ague districts, Physicians almost universally prescribe them.

All that Mr. Moffat requires of his patients is to be particular in taking the Life Medicines strictly according to the directions. It is not a newspaper notice, or by anything but the humble efficacy any other favor, that he hopes to gain credit. He is solely the results of a long trial.

NATURE'S GRAND RESTORATIVE. The Native Vegetable Medicine simply medicinally for the following complaints, viz: Dyspepsia, or Indigestion, Liver of Lazer, Diseases of the, Dropsy, Asthma, Costiveness, Worms and loss of Appetite, and by cleansing the stomach and bowels, cures pains in the side, stomach and breast, colds and coughs of long standing, Hoarseness, shortness of breath, Nervous complaints, etc. which are frequently the cause of disease. For Fever and Ague, it is a most valuable preventative as well as a sovereign remedy. Its virtues equals any thing heretofore known in removing the Yellow Fever, which little have been known to cure this affliction before, after having failed every exertion of the medical faculty. Its powerful influence in removing obstructions, is unequalled, and as a family medicine, it is invaluable, but it may be a business to the author to describe its virtues, it is highly recommended by many scientific gentlemen, and a large number of ladies, who have proved the efficacy of the Medicine by personal experience that it fully answers the purpose.
