We have arranged the second story of our new store or storing such Goods as we have not room for below, and for whole sale, should the demand for such goods as we can furnish or procure enable us to wholesale them. We are very made and moderate in our expectations from the wholesale department, but think we can supply our customers satisfactorily, and shall be happy to show them our goods and tell them the prices, and we know we shall not sell the goods it we put them too high.

No harm to call and look; nothing like looking for your self too; can't do any thing till you try; there is a beginning to every thing. We can sell as much as the boy wanted when he went to the slave dealer and enquired the price of slaves, at whole sale and when the price was named said "I will take one at wholesale."

WATCHES.

IN this line, to which we are paying more particular attention than ever, we offer better bargains than we have ever been able to do before, and those who wish a good GOLD or SILVER WATCH are particularly requested to *call* and *examine* with the closest scrutiny, the watches of our Spring importation. There has been quite a rise on good movements abroad since our arrival, and we can sell lower than if they were now to be bought.

We would remind customers that we know personally the makers of most of the watches we sell, that we are striving to establish a reputation for selling GOOD Watches, that we are of the opinion that we *know* whether a watch is good or not, and that we consider that we can be relied upon for what we recommend to be good, yet others IN the line or OUT say what they may. We have watches of R. & G. Beesley's, Joseph Johnson, John Harrison and other Liverpool Makers, and G. H. Ives, London, and we have movements of all the most celebrated makers, which we can case to any pattern desired, and we further say that we will sell for cash down any description of watches of any maker, as cheap as any New York or Boston Dealer. Our customers are desired to remember that when they buy a watch in New York or Boston they go and pay the cash down, and we cannot afford to sell a good gold or silver watch and take *part* pay in an old watch or something else, and sell the same price. Pay us the cash down, and ALL cash, and no one shall sell lower than we. We have for cash Gold and Silver Watches at half our former prices almost. We do not like the looks of prices in advertisements or we would subjoin a list that would make some stare. We only would say to all who wish any Gold or Silver watches or other Goods, just give us a chance to sell to you, and you shall be satisfied with prices and goods, and permanently. BRINSMAID & BROTHERS,
Successors to
PANGBORN & BRINSMAID.

CLOCKS.

Do not forget to remember that we are opening the most beautiful Brass and Wood CLOCKS, striking and alarm, and we intend to sell them single or by the case for very little pay. Don't fear to look at them, they won't hurt you, if you don't buy them.—No charge for shewing them if you don't buy.

CALL FOR GOODS.

THE Low Prices for which Goods have been sold, has for a good reason, induced buyers to take freely their accustomed supply from the Cheap Cash Store, where the whole trade being for Cash, there is of course no extras charged for contingencies, ready money buyers are satisfied that cash buys goods cheaper to-day, than a promise of it can possibly do to-morrow. The place for testing the to-day principle may be ascertained by applying to the People's Agent.

THE PATENT LACE,
INVENTED BY
E. P. BANNING, M. D.
OF PITTSBURGH, PENNSYLVANIA.

WILL be kept constantly on hand by Dr. JOHN W. EMERY, of Essex, he having purchased of the original Patentee the *exclusive right to make and rend* the same, within and for the Counties of Chittenden, Franklin, Lamoille, and Grand Isle.

The PATENT LACE has now been before the public for a number of months,—hundreds have been applied in different parts of the country, and with a success never before equalled by any remedial agent. Numerous well authenticated Certificates of its beneficial influence in the removal of diseases of long standing, might be furnished from this immediate vicinity—in addition to the statement of cases and certificates of cures furnished by Dr. Banning and others. But this is not deemed necessary as at the present time, reference can be given to individuals wearing the *Lace*, in nearly every town in the County.

Physicians have long felt the necessity of a Supporter differently constructed and more perfect in its adaptation to the human form, than any that had been presented to the public. The invention of Banning's meet with their general approbation, as it is designed to relieve symptoms, and remedy a class of physical maladies which *cannot* be reached by medicines alone.

The descent or displacement of the viscera from relaxation of the *abdominal muscles*, or other causes, tends to alter and derange the function of every organ in the human system, and, in many cases, this deviation from the natural healthy position of parts, is the sole cause of *general debility*—in Males and Females, of *Dyspepsia*, Affections of the *Stomach* and *Liver*, *Palpitation* of the *Heart*, *Spinal Irritation*, *Hysteria*, *Hypocondria*, *Piles*, *Prolapsus Uteris*, *Suppression of Urine*, *the Bronchitis* of Public Speakers, and *incipient Consumption*—all of which will be much relieved, if not entirely removed, by the use of the *Patent Lace*, when their existence is caused by physical derangement and a mechanical displacement of parts, which can be readily ascertained by observing the *form* and *symptoms* of the person affected.

This instrument has been examined by Drs. Mott, Rogers, Francis and Griscomb of New York—the Faculty of Pittsburgh, Hartford and New Haven, and has obtained their favorable testimony.

Applications for this Lace may be made to the subscriber, at Essex, or Hagar & Arthur, Burlington. Patients at a distance will be visited at their residence, if required. JOHN W. EMERY.
