Destructive Fire.—On Sunday morning last, a few minutes before eight o'clock, the gallery of the congregational Meeting-house in Newbury village was discovered to be on fire. The alarm was immediately given, and the citizens and others hurried to the scene; but the flames had already progressed so far that it was found impossible to save the building, and after tearing off the blinds, and securing a part of the carpets, cushions, &c., the attention of all hands was directed to saving the adjoining buildings. The dwelling-house of Hon. Henry Keyes, situated some three or four rods south, was badly scorched and somewhat damaged. His furniture which was removed from the building was also injured. The vestry, situated on the north side of the church now reduced to ashes, was also considerably damaged.

The Meeting-house is supposed to have caught fire from the stove funnel where it passes near and in front of the gallery, as it was that part which was on fire when first discovered, and as the partition through which the funnel passes was built of brick.—*Aurora.*

Richmond, Va. Jan. 16.—Depot Destroyed. The depot of the Danville Railroad, in this city, was on Saturday night crushed in by the weight of snow on the roof, and is now a heap of ruins. Twenty-five cars, filled with freight, were also demolished. Loss about $100,000.

A Big Shower.—The Alexandria Gazette has been shown by a gentleman living near Fairfax C.H., a specimen of hail that fell at that place during the rain of Saturday last. It is very black, discoloring the snow, and a little larger than a grain of coarse powder. Cold will not kill the mysterious bug.

Ice Bridge at Niagara Falls.—The Niagara Falls Gazette of the present week says, that for several days, the communication between that village and the Canada shore by an ice bridge across the Ferry has been uninterrupted. The ice is probably from twelve to thirty inches thick, and perhaps more. The crossing is perfectly safe, and the view which can now be obtained of the cataract is unsurpassed. Such an opportunity as is now presented for obtaining a front view of the Falls, rarely occurs.

Previous to Saturday ice had formed up to Goat Island, and the bridge could be made from the Canada side. This is a rare occurrence of very rare occurrences. We are informed that such a thing has not happened for the last 20 or 25 years. The letter bridge has broken away, but that at the Ferry bids fair to remain a long time.—*Buffalo Courier.*

☞ *Ft. Central Bondholder's Meeting.*—We see by the *Boston Journal*, that meetings of the holders of the different classes of Vt. C. R. R. bonds, were held in Boston on the 17th inst., to consult in regard to the interests of their property. It ended in appointing committees, to devise what had best be done. At a meeting of 20 Mortgage Bondholders, it was stated by Mr. Black, one of a committee appointed at the morning held a few weeks since to guard and protect the interests and property of the corporation, and to institute suits at law for that purpose, if necessary, that they had obtained the "facts" and were ready to go to court as soon as the funds to pay the costs are provided. It was suggested that a meeting be called next week to obtain subscriptions for this purpose.—*Free Press.*

The Murderer Arrested.—We are informed that J. A. Hollister, the young man that murdered his brother in Ashe, on New Years day, was arrested by an officer from Camp Lee on Friday last, at the dwelling-house of W. Savigne in Derby. It appears that he came to Mr. Savigne's and changing his name, was at work for him, coming per week. Hollister was for a time last winter, a resident of this village.

The officers, we are informed, gave him but chance to receive a trial in this state or in Canada, choosing the latter, he was immediately carried to Sacketsville and dispatched for safe keeping.—*North Union.*

Great Snow Slide.—On Tuesday last, while A. H. Howe and Alfred E. Cyler, of Vernon, were hunting bears on "Goats's Mountain" in West Brattleboro, the snow, for a space of about ten rods in width, slipped and slid down the mount, carrying Mr. Tyler and the dog which was with him over a precipice thirty feet high. Mr. Tyler escaped almost miraculously, after being buried along thirty or forty rods, without any injury, but the dog has not since been heard from. It is supposed he was smothered in the snow.—*Phenix.*

New Haven, Jan. 17.—Indictment for Murder.—The Grand Jury this afternoon have indicted Samuel Sly, ex principal and Rufus Wakemaughe, proprietor and Plumbe to S. Hoyey, as accessories to the murder of Orange Maldeaux. They will come in on Alfred Stephens and Joseph Jackson were this evening discharged from prison. The prophecies seem like an infant on being told that she has found mamie. Miss Hepsey said, pointing to the pumpkinseed, "Father, little know'st thou how we are about to disturb quiet prison here."

Mysterious Accident. Edwin C. Jenny, of Stowe, a young man of twenty years of age, while engaged in feeding a threshing machine, had one hand caught in the machinery and his arm drawn in, and mangled in such a manner as to cause his death the next day.

More Bears Killed.---Green Mountain Boys Awake.

Four bears of good dimensions, were captured at Bristol, in this county, on the 12th and 13th inst. They had been previously seen, but had evaded pursuit until Saturday, when their tracks were discovered by James Bren W. F. Rachardson, Lyman O'Brien, and Rescorm O'Brien, who tracked them to their den west of the farm formerly owned by Riley Adams, in the south part of Bristol. It being ascertained that the bears were within, their den was stopped up as securely as possible, and long poles were thrust in. By this means they were able to discover the whereabouts.

They then commenced firing into the den. This mode of procedure soon produced growls and howlings. After firing several times, they cut a hook and reaching in soon fastened to a bear and drew him out. Night having arrived they were compelled to desist from further operations, and having secured the outlet of the den they returned to their homes. As soon as morning appeared they recommenced their search. They tied an iron hook to a long pole and reaching in found another bear, and soon brought him to day light. They still proceeded and soon pulled out another, still alive; who was soon dispatched. They made further examinations with their pole, but could not discover any more. Mr. James then undertook the task of examining the den in person and upon crawling in discovered the feet of a bear. They then fastened the hook to the feet and soon the last one was brought forth, much to the satisfaction of the hunters and the community.

These bears were exhibited in our streets on the 14th inst. Too much praise cannot be awarded these young men, who thus courageously hearded these monsters in their den.

It takes the boys of the Green Mountains to do these things up in a scientific manner. These young men have proved, that although they are not descendents of old "Putnam," they have his pluck and sagacity in ferreting out these inhabitants of our Mountains and putting a stop to their depredations.—*Mid. Reg.*

Tickets for passage on the Lake Shore Railroad, to the value of $4,500, were stolen recently from a car on the Vermont and Canada Railroad. The tickets were all numbered "10."

The Dauphin.—The Cleveland Herald announces the receipt of a private letter which says the old Indian woman, reported to be the mother of Rev. E. Williams, has, very lately, signed a written acknowledgement that Mr. Williams is only her adopted son. Besides this, a letter has been received from France,—from a perfectly responsible man, which letter is in the hands of a distinguished Divine—a friend of Mr. Williams—stating that the writer was present when the Dauphin was conveyed from the Prison to a barge on the river, to be taken away.

Slavery in Egypt has been abolished; not only the buying and selling of slaves is forbidden, but all those in possession of private individuals have been informed that they were free.

Washington County Agricultural Society.

The annual meeting of the Washington County Agricultural Society was holden at Montpelier, Jan. 8, 1856. The following officers were elected:

President.
GEO. W. BAILEY, Middlesex.

Vice Presidents.
FRANKLIN A. WRIGHT, Warren,
ABEL K. WARREN, Berlin.

Secretary.
J. M. RICHARDSON, Waitsfield

Assistant Secretary.
A. D. ARMS, E. Montpelier.

Treasurer.
J. T. THURSTON, Montpelier.

Executive Committee.
GEO. W. BAILEY,
J. M. RICHARDSON,
J. T. THURSTON.

Voted, That the Officers and Managers meet at the Court House on the second Tuesday in February at 10 o'clock, A. M., to offer premiums, appoint awarding committees, and transact other necessary business.

Managers for 1856.—Barre, A. Bradford; Berlin, O. C. Home; Calais, L. Robinson; Cabot, Frank Coburn; Duxbury, G. Huntley; E. Montpelier, W. Cutler; Fayston, John S. Campbell; Marshfield, H. Hollister; Middlesex, W. Z. Warren; Montpelier, Benj. Town; Moretown, H. Doyle; Northfield, H. Jones 2d; Plainfield, John Mellen; Roxbury, O. Richardson; Waitsfield, N. G. Joyslin; Warren, D. Upham; Waterbury, G. C. Arms; Woodbury, E. Heath; Worcester, A. Richardson.

No premiums were awarded on Field Crops or Orchardings, as the rules of the Society had not been complied with in some cases, and in others the applicants were not members of the Society and never had been.

It appeared from the Report of the Treasurer, that the financial affairs of the Society were never in so fine a condition as at present,—having funds sufficient for paying all outstanding orders against the Society, and all the premiums, leaving a small balance of ready cash on hand.

A Resolution was introduced by a gentleman from the eastern part of the county, the fate of which I cannot tell as I had to leave about that time. It was nearly as follows:

Resolved, That we, as members of the Washington County Agricultural Society, will not in any way patronize any publisher of a newspaper in this county who does not hereafter manifest more interest in the affairs of the Society.

J. M. RICHARDSON, *Secretary.*

[Another threat at the printers. We answer for one of them, that we last year "manifested our interest in the Society" to the tune of about twenty dollars out of pocket, by more printing than we pay interest; that we have always published all that the Society or its Secretary has sent for publication, sometimes doing the duty of the Secretary himself; and that we are ready to do so still. Now we suggest that the Society had better be thankful for small favors, instead of dealing in threats; and that the Secretary ought to manifest at least sufficient "interest in the affairs of the Society" to attend to his official duties. This "leaving" the officers in such awful suspense, not knowing whether their treasurer is off or not, is by no means pleasant; and "leaving" editors to get out his notices—as we and the rest did, at the request of the President, having no years fees for the purpose—is not agreeable, when the only reward from said Society is the above sneering.—*Editor of the Watchman.*]

The distinguishing Genius of the age.—Nature, men and times, brings forth such pioneers as Newton, Shakespeare, Talleyrand, Mozart, Napoleon, Washington, Franklin, Jefferson, Luther, Cromwell and others. These persons manifest a compass the world to admire and a

The genius of the present age is Discovery. In the progress of arts and sciences, this age is immeasurably superior to any former one. The power of steam stands pre-eminent for its wonderful discoveries in the sciences and arts. Among these, the noble science of medicine has made great progress. PROFESSOR HOLLOWAY has discovered and prepared a remedy for the diseases of men in which the ultimate destiny may have given him both. We have in a former article, introduced to our readers this distinguished physician, whose reputation is already engraved on the world's history. As a physician, he has copied Nature, and among physicians he stands the acknowledged Emperor. Both in the sale of his medicines, and in the number of patients that have taken them, he is unrivalled. Professor Holloway has labored to supply the human family with a permanent remedy for their diseases, to which the afflicted may have recourse with a moral certainty that they will be cured. There is no disease to which they will not afford relief. His Pills and Ointment, prepared from an extensive range of the vegetable kingdom with great care, will drive disease out of the system. Thousands of the most intelligent minds of all nations, men distinguished in every sphere of life—the statesman, philanthropist, conqueror, and those whose highest aim is to do good to their fellow men, unite in their praise of the remedies discovered by Professor Holloway for the removal of disease.

In uniting in this general recommendation of the remarkable virtues of Holloway's remedies we only perform a Christian duty, which the press should never neglect. Those who are eminent for the good they do in the world, have a just claim upon the press for aid in extending the good to the extent of their power. Therefore, we have determined to express our opinion that HOLLOWAY'S PILLS AND OINTMENT are adapted to the removal of disease, and have restored millions of the sick to health.—*New York Mess.*

THE FIRST ALARM.

When the direful fire-bell shakes the air,
And upward shoots the lurid glare,
We do not wait the *second call*—
Swift through the streets the engines roll,
And water, the fierce foe to tame,
Is poured in volumes on the flame,
And so when *Cough, Catarrh or Cold,*
Or Pleura, Lungs, or Throat takes hold,
The all-important thing to do
Is *Inflammation to subdue!*
For this the grand specifics are
Syrup of LIVERWORT and TAR,
Combined with CANCHALAGUA.
If health renewed—*not death*—you choose,
This famous combination use.
Since *Dr. Rogers*—with whose name
Is linked this great specific's fame—
Proclaimed its virtues far and wide,
Thousands the remedy have tried,
To which this name they freely give,
CONSUMPTION'S SURE PREVENTATIVE!

Holloway's Ointment and Pills the best Remedies for the Cure of female Complaints.—The extraordinary effect these Pills have upon all complaints peculiarly incidental to females, would appear incredible to the original of the Dauphin, if it were not confirmed daily by the wonderful cures they effect in the various States. It is an unquestionable fact, that there is not any remedy to equal them for exterminating suffering from the softer sex, particularly for young girls entering into womanhood, therefore all are requested to give them a trial, which will insure their recommendation.

A Virginia postmaster has been enquiring of the Department the meaning of the little "pictures stuck on the letters;" and another official in Iowa, desired the Department to sustain him in a decision he had recently made against a "feller" who insisted that "them pictures of Washington on the letters *paid the postage.*"

Price of Ducks.—A gentleman was asked "What is the price of Ducks?" when he confessed that he could not tell. He had been out that very day with his wife and she had purchased no fewer than three ducks. Firstly, there was "a duck" of a dress; secondly, "a duck of a parasol; and thirdly, a "duck" of a bonnet. The united cost of these precious ducks, was $35, so that each duck stood him in no less than $12 and a few shillings a piece. He supposed there were ducks to be had in the market cheaper, but for himself, whenever he heard his wife mention the word "duck," he always trembled from head to foot.

Frozen Flesh.—Mr. A. Brosson, of Mendville, Pa., says, from 15 years experience, he finds that Indian meal poultice, covered with young hyson tea, softened with hot water, and laid over burns or frozen flesh as hot as can be borne, will relieve the pain in five minutes. If blisters have not arisen before, they will not after it is put on, and one poultice is generally sufficient to effect a cure.

The *Star of Vermont* has changed its title to *Northfield Star.* It has again changed hands, and is now published by Safford and Robinson, and edited by C. H. Safford. The Star will continue to advocate the principles of the R. N. party with some important modifications. The new editor says that however necessary the precaution of secrecy was in the first organization of the Order, it is no longer so now, and believes "the only condition necessary to membership should be simply the requirement of signing the constitution."

Markets.

Boston Market---Jan. 25.

ASHES.—The market continues very quiet for Pots and Pearls, and the stock is so small prices are for the time part nominal. Sales of Pots at 7¼ @ 7½ c, and pearls at 8c per lb. cash.

CORN EXCHANGE.—The Flour market the past week has continued quite as inactive as previously noticed. The demand from the trade has been quite moderate, but prices of good sound Flour continue to be maintained, and the market at the close is quite firm with more enquiry. The sales have been at $8.25 a 8.50 for common brands Western; $8.50 a 9 for ordinary and good fancy brands, and $8.75 a 11 per bbl for poor and superior extra including St. Louis and Genesee. Canada extras have been selling in small lots at $9.75 a 10.50; and family at $9 a $9.25 per bbl. Buckwheat has been in moderate demand at $2.50 a 2.75 per 100 lb. The arrivals of Corn have been fair, but prices have ruled very little alike our last. The sales have been about 30,000 bushels new Southern yellow at 75c a 81 per bu, the market closing at 77c, and white at 79 a 80c per bu. Oats have been in very fair demand. The sales have ranged from 50 a 52c per bu for Northern and Canada. Rye is scarce, and the sales have been small at $1.20 a 1.25 per bu. White Beans are dull and prices tend downward. The sales have ranged from $1.50 a 2.75 per bu, as to quality.—Canada Peas are dull and have been sold at $1 a 1.03 per bu.

HAY.—Eastern has been arriving more freely, but the market is firm at $23 per ton, most of which sales to a fair extent have been made.

HOPS.—The market continues very dull for Hops, and we have only to notice small sales at 8c per lb. cash.

PROVISIONS.—There has been a fair demand for Pork the past week, and the market is firm at improved prices. The sales have been at $14 a 14.50 for mess and $10.50 a 11 for prime, as to size. Lard, the market closing in the higher figures. In Beef there is no change but the arrival is more imported lots. Sales at 5 a 6.00 this Western mess and extra mess, at $14 a 16; and eastern ranges from $12 a 13.50 per bbl, cash and 4 mos. Hogs have been arriving quite freely of late, and we have sold from 5½ a 6c per lb. for sumpsum and clrs. Beef is held pretty firm, but the demand continues moderate. Good and choice quality is selling from 24 a 26c, and ordinary to fair quality at from 18 a 22c. Cheese is selling at 6 a 10c per lb. as to quality.

POTATOES.—The demand has been fair for the arrivals, and prices are steady and firm. Sales of common white at 30 a 35c; Peach Blows at 40 a 45c; Chenangos at 45 a 50; and Carmens at 70 a 80c per bu.

TALLOW.—We notice sales of 1,000 lb rendered, at 12½@ per lb. cash. Rough is in fair demand at 3 a 3½ c.

WOOL.—Fleece and pulled wool continue to meet with a good demand, and prices are quite firm. The sales have been upwards of 200,000 lb at general rates. The stock in the market is quite small.

Saxony Fleece,	45 a 46
American full blood,	43 a 47
" 3-4 blood,	38 a 42
Com. 1-2 blood,	33 a 35
Pulled extra,	42 a 47
" superfine	38 a 42
" No. 1,	34 a 37
" No. 2,	29 a 30

Cambridge Market, Jan. 23.

At Market 600 cattle 600 sheep, 42 cows, one stall fed Western ox, 1 Michigan ox, Western Vermont and Texas Year-lings.

Prices—Extra ox $7, including $2.25 a 2.75 for hide and tallow; a 7.00; thick fatters 6.00; ordinary 5.00.

Working Cattle—Sales—

Extra one pair $[illegible]
Two Year Olds—$[illegible] a 40.
Three Year Olds—$27 a 29.

Sheep and Lambs—Sales in market. Prices—Extra one selected $7, 10 a 12. By lot—$3.00, 4.00, 5.00, 6.00 a 7.00.

Remarks.—The market was well attended to-day by buyers. The supply was sufficient for the demand, and prices ran a little lower, the sales at the close being dull.

Dr. Hayden's Pills.

We, Slade, the Agent for Dr. Wm. S. Hayden's Improved Vegetable Purging Pills, in Washington Co., N. H., assure us that within the six weeks past he has sold three dozen boxes of Dr. Hayden's Pills, mostly to males. Many of them to men, have been sent for the best medicine, one as a relative, while the most positive opinions, not in one but a which has come to his knowledge, have they failed to effect an immediate cure. 69.6m

☞ All the specials on the post and present are only to point directly higher attainments and improvements in the future. The past year of its introduction has proved its merits in the previous. Thus it will, Sears's Classic Compounds, and Hoarhound Elixir combine the wonderful virtues of new and scientific research. Very extensive sales are represented, for entertainment. 68.4m

"Hey ring lock,
Hang on key upon like a golden fleece."
Shakspeare.

The lucky who derive these "money locks," we recommend the use of GLOVER'S VOLT COMPOUND KATHAIRON. It is a natural effect to curing, preserving and beautifying the hair, and removing it from dandruff and all other impurities, leaving it with a healthy growth, luxuriant and free from unfavorable effects of any, have at most in the choicest and most medicinal preparations for the hair ever made. 68.4m

PROFESSOR WOOD'S HAIR RESTORATIVE

IS, no doubt, the most wonderful discovery of this age of prodigies. The following is from a distinguished member of the medical profession:

St. Paul, January 1, 1855.

Prof. O. J. Wood—Dear Sir—Unsolicited, I send you my testimonials. After being nearly bald for a long time, and constantly at the back of a number of years, I was induced to try your Restorative. Now, I am almost myself in the middle of a better, and had no head entirely bald with a good old Scotch, on the Restorative then applied and well rubbed in, (little enough was all I gave—for I remember a very morning, and in three weeks the young hair appeared, and gain rapidly from August last up to the present time, and it now thick, black and strong—soft and pleasant to the touch—and I feel as well as I ever did, and I attribute this wonderful restoration to your Restorative alone. Your Restorative stands alone, unique among quacks. I will give your Restorative about twice a week, and shall soon have a good and perfect crop of hair. Now I can recommend it to every one who has not—but have never seen, however, any case in which one person's hair was really benefitted by any of the hair tonics, &c., of the day; and it really gives me pleasure to speak the truth to my experience. I have recommended your preparation to others, and it all to only has a large and general sale throughout the city. The people here see its effects, and have confidence in it. All who have used it have will convert with me in what I have said. The people, moreover, as the wonderful cures in the country, is already known, and daily inquiries are made for it. You deserve credit for your discovery. I for one return you thanks for the benefit it has done me. Go it regularly and persistently, long enough, at least effecting any such result. I congratulate you that your fortune, and a large one, is already made.

Yours truly,
J. W. BOND,
Firm of Bond & Kellogg, Druggists, St. Paul, M. T.

Prof. O. J. Wood—Dear Sir—My hair had been for several years becoming prematurely grey, accompanied by a harshness which rendered the constant applications of oil necessary to dressing it. When I commenced using your Hair Restorative what two months ago it was a dry and harsh mass, and having continued its use until within the last three weeks, it has retained its natural color and assumed a softness and inner gravity to be preferred to those produced by the application of oil. I have also used your preparation I have ever used. I consider it an indispensable article for every lady's toilet, which has to undergo a daily transformation by the simple process of dressing or brushing the hair. I have pleasure also in referring to my all in my profession as to the performing of this operation.

MRS. C. SYMONDS, 191 Third St.

Cincinnati, Ohio, Feb. 20th, 1854.

Galena, Ill., June 27th, 1853.

I have used Prof. O. J. Wood's Hair Restorative, and have received its wonderful effect. My hair was one dreadfully, and I thought, get it entirely gray, only the use of my "Restorative" in five months it has regained its original color, and I have no doubt, permanently so.

SIDNEY BREESE,
Ex-Senator United States.

Brookfield, Mass., January 19, 1855.

Prof. Wood.—Dear Sir—Having made use of your valuable Restorative, it gives me pleasure to say that it has fulfilled its promises in the case of my wife, Zeuliah, and restored her hair to its original color, and it has also arrested its further falling out which I have been troubled with from childhood, and has set it growing on my face, which is a thriving state, so to speak, at present. I have used no other article with anything like the pleasant and public.

Yours truly,
J. K. BRAGG,
Pastor of the Orthodox Church, Brookfield.

Ware, Feb. 1854.

Prof. O. J. Wood:—With confidence can I recommend your Hair Restorative as being the most efficacious article I ever saw. I have used the Washerton and many other preparations of the day, with no effect. Since using your Hair Restorative, my hair has entirely ceased to fall out, and instead of its being almost white, as it was before, it has regained its original color, and is now quite a dark brown. I shall continue to use it, and recommend it to all my friends.

E. P. BUTLER.

Sold by O. J. WOOD & CO., Proprietors, at their Wholesale Depot, 114 Broadway, New York.

Sold by all Druggists and Fancy Goods Dealers throughout New York and the United States.
