THE WANDERER'S SLAVES.—The Montgomery Daily Advertiser is informed that subpenas have been served upon several planters in Georgia, suspected of having purchased portions of the cargo of Africans lately introduced into that state, with a view to employ them as witnesses in the legal proceedings now pending in reference to that importation. The Advertiser, though formerly an advocate for the revival of the slave trade, has now changed its mind. It is convinced of its error; and it is now satisfied, "after mature and careful consideration," that the revival of the African slave trade, instead of being the salvation, would be the ruin of the South.

☞ The persistent effort of Dr. Powers to force the State (Temperance) Society to endorse his extreme views in regard to the best mode of carrying forward the Temperance Reform will have at least one good effect, to call the attention of the people, to the importance of vigorous action against this common foe of mankind.—*St. Albans Messenger.*

Which do you mean by "common foe," Dr. Powers, or the alcohol?—*Watchman.*

A COUNTER ATTACHMENT.—Mr. Davis of Mississippi, who is for taking Cuba by attachment, seems to forget that he lives in a very conspicuous glass house. If ever there was a community or State which assimilated to the character of "an absent, absconding or fraudulent debtor," it is the community and state of Mississippi. Its creditors have not only had to wait unreasonably for both principal and interest, but have been told that they may whistle for their pay to the end of time. If, therefore, the new theory of proceeding by attachment is to be adopted, England will have reason to make its very first application of this "sharp practice" to Mississippi herself, the home of its brilliant inventor.—*Journal.*

KANSAS.—Gov. Medary of Kansas has called upon the Federal Government for a military force to suppress disturbances in the Territory. We suppose the President is still anxious to keep Kansas out of the Union till she has 92,000 population—or until after another Presidential election.

A MAINE PORKER.—On the 20th of June last, Benjamin Nason, Esq., of South Berwick, Me., purchased a pig weighing at that time 270 lbs., and on the 20th ult., when the porker was slaughtered, it weighed 702 lbs., having gained 432 lbs. in six months, or 2 lbs. 6 oz. on an average per day. Beat this who can.

TORNADO.—A correspondent of the Traveller states that a destructive tornado passed over Haverhill, N. H., on the 31st ult., which demolished almost everything in its way, taking along with it houses and barns, chimneys and trees, from the sapling to the most sturdy oak. The gale lasted about one and a half hours. It was also severely felt at Benton, five miles distant. No particulars are given.

☞ Jerrold was seriously disappointed with a certain book written by one of his friends. This friend had heard that Jerrold had expressed his disappointment. Friend (to Jerrold)—"I hear you said —— was the worst book I ever wrote." Jerrold—"No I didn't. I said it was the worst book anybody ever wrote.

☞ Miss Nancy says a man is good for nothing until he is married, and according to her experience, he ain't worth but a dreadful little when he is.

☞ The correspondent of the Philadelphia North American says:—

"Although no direct intelligence has yet been received from Madrid of the effect produced there by the President's Message, still enough is known in diplomatic circles, of the previous disposition, to justify the belief that Mr. Preston's reception must be attended with some hesitation, and if formally permitted, that no welcome will be given to him. Mr. Preston has been made aware of the embarrassment which must attend his presence under these circumstances, and has been informed through responsible sources that, if he is received, and should undertake to propose a negotiation for the purchase of Cuba, such an offer would probably be followed by a tender of his passports.

☞ The N. J. Republican paper proposes Wm. L. Dayton, of that State, who ran for Vice President on that ticket in 1856, as a candidate for President in 1860.

☞ Hon. Theo. Frelinghuysen, who ran for Vice President on the whig ticket in 1844 is spoken of as the successor of Hon. W. Wright, in the U. S. Senate, from New Jersey.

☞ The notorious Pete Dawson, of New York, has at last found his level. He has been sentenced for nine years and six months to the Sing Sing prison, for an assault with intent to kill. The democracy loses in Pete one of its sturdiest and most influential leaders.

☞ Francis Heck had lain in jail at Cincinnati three months, awaiting trial for passing a counterfeit bank note, and when he was arraigned the note was pronounced genuine. For this gross injustice at the hands of the state, he has no remedy.

☞ A little daughter of Samuel Keith of New Canaan, Ct., five years of age, slipped into a deep well on the 22d inst.; where the water was from six to eight feet deep. She was not missed for about thirty minutes, when a cry of "mother" was heard by a woman living in the house, and upon going to the well, the little sufferer was discovered standing with her head about six or eight inches above the water. She was immediately rescued, but when taken out she fell to the ground from exhaustion.

☞ Commander Maury, in one of his lectures on the "Highways and Byways of the Ocean," states that animal matter, at the bottom of the deep sea, owing to the superincumbent pressure, the exclusion of light and heat, and the saline properties of the water, cannot decompose, but must remain precisely in the state in which it is deposited for ages and ages.

☞ The Milford Journal states that Chas. Spear of Bellingham started from Woonsocket for home on the 29th ult., in a state of intoxication, and the next morning he was found by the side of the road a corpse. His horse returned home in such a bruised and mangled condition that it was necessary to kill him.

☞ At the Volks-Garten in New York, on Sunday, fifty thousand glasses of lager beer were sold up to ten o'clock, P. M. No wonder they have three murders a week there.

☞ A California bear, which was kept at a hotel near Providence, escaped from confinement last Friday, climbed a tree and frightened a stage team. He then smashed a window of Mr. Littlefield's house and prepared to enter the room where there was a good looking young lady. Mr. Littlefield loaded his gun with slugs and shot the varmint.

FORTY-EIGHTHS' DAY.—The two hundred and thirty-eighth anniversary of the landing of the Pilgrims was celebrated at Plymouth and Boston, on Wednesday last, in an appropriate manner. At Plymouth Mr. Everett repeated his oration on Washington, and the Standish guards were out.—In Boston, the day was celebrated by the Massachusetts Historical Society. Hon. R. C. Winthrop delivered an address and sundry historical incidents were narrated by other gentlemen.

☞ The getters-up of the Mount Vernon festival in New York, in an advertisement of spreading rhetoric, invited every citizen to come, and give "a sun's mite towards maintaining inviolate the home and the tomb of the American who was *born childless* that the nation might call him father." The bull is good enough to become the text of one of Mr. Everett's Mount Vernon papers in the Ledger.

☞ Parson Brownlow of the Tennessee Whig tries to "make it easy" to his subscribers. He offers to take "East Tennessee bills worth twenty cents on a dollar, Shanghai chickens, hoop skirts, boot-jacks, broom corn, baby-jumpers, fishing tackles, patent medicines, sucking pigs, frozen cabbage, old clothes, Colt's revolvers, second-hand tooth-brushes, ginger cakes, parched corn, circus tickets, or any other article found in retail store." If they will not settle up on these accommodating terms, the person says he shall file his claims in the high chancery of heaven and let them settle with their God in the world to come.

LETTER WRITING.—It is generally supposed that the people of this country write more letters than those of any other country in the world, but it is not so. The Swiss write twice as many letters as we do, the English more than three times as many as we do, and the French and Dutch nearly as many. The mail statistics show that in the United States there are an average of 4 1-2 letters sent annually by every inhabitant, in Great Britian nearly 15, in France over 4, in Holland 4 1-2 in Switzerland 8 1-4, in Belgium 2 1-2, and in Spaine 2 1-4. Perhaps we have bragged more than the facts will justify about the superior intelligence of our people.

☞ A new tribe of negroes has been discovered in Australia, who if the account is to be believed, are entirely without hair. Their complete baldness gives them a strange, unearthly appearance, at which, it is said, the Balonne blacks were at first much terrified.

☞ It is stated that in New York at least 300 persons are annually picked up dead in the streets and rivers, who are unknown, and are never identified by their friends. In Boston there are not more than fifteen or twenty such cases in a year.

☞ Capt. Townsend, of the slaver Echo, has been sent from Boston to Key West, Florida, for trial, which he regards as equivalent to honorable acquittal. And so it is likely to prove.

☞ Baking beets makes them more tender, sweet and juicy than boiling; in Italy they are carried hot from the oven, and sold in the street, and are very delicious with butter, salt and pepper.

☞ A discharged servant girl at Cincinnati carried off at one fell swoop, under her crinoline, a bag of buckwheat, a quantity of flour, a small can of milk, several pounds of sugar, a package of tea and a jug of molasses.

☞ On Christmas night, Jack Mills, a free colored man, and his wife, residing near Halifax, N. C., while indulging in strong drink, had a quarrel, after which the man lay down and went to sleep. His wife then took an ax and deliberately chopped his head off. The deed was witnessed by a boy, who gave the alarm, and the woman was arrested.

Willim H. Woods, of Nashua, N. H., recently discovered a hen's nest in a secluded place in his yard, containing *one hundred and seven* eggs. His biddies evidently meant to surprise him.

☞ A knowing dog in Lawrence, the other day, seized the handle of the town pump worked the handle up and down, but the water within being frozen Towser could not get a drop to drink. A gentleman who had observed his motions kindly presented a pailful of the liquid element for the assuaging of his thirst, whereat Towser wagged his tail joyfully and partook.

☞ A man named Ricker, who recently eloped with and married a fair damsel at Milford, Mass., where he passed by the name of Morrow, has been arrested for cattle-stealing at Rochester, N. H., where he also has a wife, to whom he will now have an opportunity of explaining his absence from home for the last six months.

The Caledonian for 1859.

On the first of January, 1859, THE CALEDONIAN will have accomplished one-half of its Twenty-second Year. It has been so long a weekly visitor at the family fireside, and has identified itself so thoroughly with the interests of the people of Vermont, that it has become a Household Word.

The financial troubles of the last twelve months have have not been without their embarrassing effects upon us, in common with the Press generally. As a newspaper with some cannot be called an actual necessity, (though we believe it is so considered by many,) but rather a luxury; when the question arose, "How shall we retrench?" we regret to say that with many it was done by stopping their State paper. But we are happy to say that every vacancy has been filled, and that we have added new recruits to our ranks, so that to-day we print more papers than ever before. Our intercourse has been slow but gradual. We notice this fact with feelings of gratitude, showing as it does, better than any words could tell us, that we have not mistaken the wants of this community. We accept it, too, as an encouragement to go forward in improvement and independence, and by increased industry and expenditure to retain all our old friends, and add to their ranks hosts of new ones.

It will be our aim to make THE CALEDONIAN a welcome visitor at every fireside. Its political position needs no new exposition. It early attached itself to the great Northern Party that advocates Free Labor instead of Slave Labor, and has felt a lively interest and satisfaction in seeing its swelling tide of power.

Able correspondents will increase the variety and elevate the character of the contents of our columns the coming year.

As it has been our aim the year past, so will it be in the year to come, to make a valuable *local* news paper—a paper that no one can afford to do without. As the beginning of the year is a favorable time to subscribe, we hope to welcome large additions to our list. We have to trust for its increase to a desire for its possession which its merits inspire, and the voluntary exertions of those kind friends who believe it worthy of patronage.

TERMS—$1.50 per year.

C. M. STONE & COMPANY,
PUBLISHERS,
St. Johnsbury, Vt.

To the Reading Public.

We will furnish the *Atlantic Monthly*—the great American Magazine—together with THE CALEDONIAN, for $3.50 a year. The third volume of the Atlantic commences with January, at which time the ever-witty "Autocrat of the Breakfast Table" will commence a new series of articles.—Mrs. H. B. Stowe has already commenced a story entitled "The Minister's Wooing," which is said to amply sustain the great reputation of this author. Now is the time to subscribe.

R. R. EDDY, ESQ., SOLICITOR OF PATENTS.—We have before spoken in commendation of Mr. Eddy, the importance of his business, and the eminent success that has attained his efforts, during a long and extensive practice; and we again desire at this time, to call the attention of inventors and others, to his well conducted agency for securing Patents. Probably there is no man who is more familiar with the inventive genius of the country, or who is more thoroughly acquainted with the innumerable patents granted,—their condition and value,—from the formation of our government to the present day. Mr. Eddy procures Patents also in foreign countries, and executes all documents necessary to secure the rights of inventors, who may rely upon him, as highly honorable, prompt, and entirely devoted to their interests. *He* is constantly employed on cases that have been rejected, and his success in securing patents after all others have failed, is well known; his drawings, specifications, and other writings are prepared in the most thorough and business like manner, and his charges for professional services will be found very moderate indeed. The advertisement in another column gives full particulars, and we recommend all who are in any way interested in patents and inventions, to give it a careful perusal.

NOTICE.

THE Caledonia County Young Mens' Temperance society will hold their annual meeting at Barnet, (Stevens Village) Wednesday, Jan. 12, 1859, to commence at 10 o'clock, A. M. Let there be a general rally of the friends of Temperance to this meeting.

Per order of Executive Committee.

DR. WISTAR'S BALSAM OF WILD CHERRY.

Boston Pictorial of 4th July says:—Realizing the due sense of responsibility attaching to the Editor of and Publisher of a widely circulated journal, we should deem it little less than a crime to recommend any medical compound the real virtue of which we could not conscientiously endorse. This balsamic compound has become a household idol, and all persons who suffer, and have in vain attempted to cope their Coughs, Colds, Bronchial or Pulmonary Complaints, make use of this unequaled remedy.

The following certificate from a distinguished gentleman is equally convincing:

From Rev. Henry Wood, formerly Editor of the Congregational Journal, Concord, N. H., more recently American Consul at Beirout, Syria, and now Chaplain in the Navy.

CONCORD, N. H., March 2.

HENRY SETH W. FOWLE & CO.—Gentlemen:—Two years ago a sudden and violent attack upon my lungs confined me to my bed for several weeks, and when I recovered, I was so much oppressed by difficulty in breathing that I was often unable to sleep or rest upon a bed by night. The symptoms were alarming, and I was in fact a victim of the remedy itself. I supposed the disease incurable. Being persuaded to try a bottle of Wistar's Balsam of Wild Cherry, without confidence in its efficacy, I found speedily and entirely removed before one bottle was used up. Sympathy with my fellow sufferers induces me to make this public statement, and recommend the article to others similarly afflicted.

With respect, yours truly,

HENRY WOOD.

None genuine unless signed I. BUTTS on the wrapper.

Prepared by SETH W. FOWLE & CO. Boston, and for sale by J. C. Bingham and Hoyt & Green St. Johnsbury; Eaton & Co. Lyndon; Parker, Austin & Marsh, Lyndon; Kittredge & Quimby & Co London Centre; W. C. McGaney London Corner; S. S. Gould West Concord and by nearly all dealers in medicine. 19-22

☞ It is folly to suffer from a protracted cough when relief may be so easily obtained. Wistar's Balsam of Wild Cherry is undoubtedly the most reliable of all preparations offered for the cure of throat and lung complaints 19-22

☞ 5000 AGENTS WANTED—To sell 4 new inventions. Agents have made over $22,000 on one—better than all other similar agencies. Send four stamps and get 84 pages particulars, gratis. EPH. BROWN, 19-2.* Lowell, Mass.

AMERICAN & FOREIGN PATENTS.

R. H. EDDY, Solicitor of PATENTS.

(Late Agent of the U. S. Patent Office, Washington, under the Act of 1836.)

76 State st., opposite Kilby st., Boston.

After an extensive practice of upwards of twenty years, continues to secure Patents in the United States, Great Britain, France, and other foreign countries. Caveats, Specifications, Assignments, and all Papers of Drawings for Patents executed on liberal terms, and with dispatch. Researches made into American or Foreign works, to determine the validity of Bills of Patents or Inventions, and legal opinions rendered in all matters relating thereto. Models of the claims of any Patent forwarded in resembling One Dollar. Assignments recorded at Washington.

This Agency is located near the heart of New England, but through it inventors have advantages for securing patents, more reliable in the probability of invention being patented, than if sent elsewhere, or through agents who may be offered them elsewhere. The testimonials below given prove that there is More Business done at the Patent Office than the authorized agent, and that the Sovereign is the very sponge of Assurance and Safety, he would add that he has no connection, or any interest, and can prove that he is not an officer of the Government, or employee of Personal service, can be obtained. The numerous practice of the sister, during twenty years past has enabled him to accumulate a vast number of specifications and official documents relative to Patents Value, Reissues, Extensions, Interferences, and decisions of cases, and full accounts of patents granted in the United States and Europe, render him able, perhaps in addition, to offer superior facilities for obtaining patents.

All necessary fees for Washington, to procure a patent, and the usual great delay there, are here saved to inventors.

Testimonials.

"I regard Mr. Eddy as one of the most capable and successful practitioners with whom I have had official intercourse.

CHAS. MASON, Commissioner of Patents.

"I have no hesitation in assuring inventors that they cannot employ a person more competent and trustworthy to secure for them an early and favorable consideration at the Patent Office.

EDMUND BURKE, Late Commissioner of Patents.

Mr. R. H. Eddy has made for me THIRTEEN applications on all but ONE of which patents have been granted, and that one is now pending. Such unmistakable proof of great talent and ability I have rarely met with, and shall at all occasions be happy to bear testimony to the success of any of my fellow citizens who may employ him to procure their patents, as they may be sure of having the most faithful attention bestowed on the case, and at very reasonable rates.

JOHN TAIGART.

From Sept. 17th, 1852, to June 17th, 1855 the subscriber, in notice of his large practice, made no rejections to applications SOLICITED BY MR. EDDY, which was declined in his hands, by the Commissioner of Patents.

ACADEMY OF MUSIC.

THE St. Johnsbury Academy of Music is located in the pleasant Village of St. Johnsbury, Vt., having a special act of incorporation granted by the Legislature of Vermont, establishing the school upon a permanent basis. The design of this institution is to afford the most thorough musical education, at an expense very much less than has been usual where similar advantages could be enjoyed. Very many persons possessing the finest talents have been deterred from studying Music as a profession, on account of the enormous expense which has hitherto attended such a course of study.

The St. Johnsbury Academy of Music offers advantages and facilities of the highest order, at from one-fourth to one-third the expense attending such a course of study, if pursued at Boston or New York. For the benefit of Teachers and all others desirous of attaining superior excellence in the science of music, both as performers and theorists, a Collegiate and Normal course is pursued, embracing a period of four years. The first year is devoted to a thorough course of elementary study, using as text books, only the works of the most celebrated masters, which having been thoroughly tested, bear the stamp of superior excellence. Pupils devoting all their time to music usually practice the Piano, Organ,—or whatever instrument they may prefer,—from four to six hours per day; practice vocal studies one to two hours; devote one hour to the study of harmony. Each pupil is required to study the Piano sufficiently to accompany well. Pupils in thorough has are required to play church music as a daily exercise.

Instrumental music is taught exclusively by private lessons, two lessons per week being the usual allowance. The study of harmony and composition is taught in several classes, with daily recitations. Private lessons are given to advanced pupils in singing. Vocalizing is also taught in several classes with daily recitations.

The Male Principal having been connected with some of the best Bands and Orchestras in New York and Boston a considerable portion of the last twelve years, is prepared to teach all the various BAND and ORCHESTRA Instruments.

Besides the various lessons and class exercises to which pupils attend, a Public Rehearsal is given every Saturday afternoon by the pupils, who are all required to attend, and take some part in the exercises, their parents and a few friends only, being present. In addition, a Musical Soiree is given twice during each quarter, a large audience being present. The year is divided into four terms of eleven weeks each.

Pupils graduating with honor will be guaranteed good situations as Teachers. The following prizes will be distributed among those of the graduating classes at the annual commencement which will take place at the close of the fall term of each year, (pupils graduating must have completed the full course of study.)

ESTABLISHED expressly for the treatment of Consumption, Asthma, Bronchitis, Catarrh, and Diseases of the Air Passages and Chest, Rheumatism, Nervous Diseases of long standing, Female Weakness, etc. Dr. G. has made the above diseases a specialty during the most active years of his life, and has more new and important discoveries in their treatment, and more cures to attest his success than any other physician living. His remedies are destitute of all mineral, are pleasant to take, can do no harm, and have cured cases of long standing, after all else had failed. Can be taken at home, from all the medicines and advice in the evening, ready for the morning. Medicine for one month, with advice, $5. Medicine for one week, $2. Advice, $1. Dr. G. can address those who prefer, stating their several cases—enclosing two three cent stamps—when they will receive a letter of advice and Dr's new treatise on the above diseases, prepaid by m
