For the St. Johnsbury Caledonian.

Manures.--Their True and Comparative Value.

There is no profession which can be compared in importance with that of agriculture, for to it belongs the production of food for man and animals, on it depends the welfare and development of the whole human species, the riches of states and all commerce. There is no other profession in which the application of correct principles is productive of more beneficial effects, or is of greater and more decided influence. Hence it appears quite unaccountable, that we may vainly search for one leading principle in the writings of agriculturists. The methods employed in the cultivation of land are different in every state and county: and when we inquire the causes of their differences, we receive the answer, that they depend on circumstances. No answer could show ignorance more plainly, since no one has ever yet devoted himself to ascertain what these circumstances are. Thus also when we inquire in what manner manure acts, we are answered by most intelligent men, that its action is covered by the veil of Isis; and when we demand further what this means, we discover merely that the excrements of men and animals are supposed to contain an incomprehensible *something* which is the nutrition of plants, and increases their size. This opinion is embraced without even an attempt being made to discover the component parts of manure, or to become acquainted with its nature.

In addition to the general conditions, such as heat, light, moisture, and the component parts of the atmosphere, which are necessary for the growth of all plants, certain substances are found to exercise a peculiar influence on the development of particular families.

Their substances either are already contained in the soil, or are supplied to it in the form of the matters known under the general head of manure.

But what does the soil contain, and what are the components of the substance called manures. Until these points are satisfactorily determined, a rational system of agriculture cannot exist.

The *general* object of agriculture is to produce in the most advantageous manner certain qualities, or a maximum size, in certain parts or organs of particular plants. Now, this object can be attained only by the application of those substances which we know to be indispensable to the development of these parts or organs, or by supplying the conditions necessary to the production of the qualities desired.

The rules of a rational system of agriture should enable us, therefore, to give to each plant that which it requires for the attainment of the object in view.

The *special* object of agriculture is to obtain an abnormal development and production of certain parts of plants, or of certain vegetable matters, which are employed as food for man and animals, or for the purpose of industry.

The means employed for effecting these two purposes are very different. Thus the mode of culture, employed for the purpose of procuring fine pliable straw for Florentine hats, is the very opposite to that which must be adopted in order to procure a maximum of corn from the same plant. Peculiar methods must be used for the production of nitrogen in the seeds, others for giving strength and solidity to the straw, and others again must be followed when we wish to give such strength and solidity to the straw as will enable it to bear the weight of the ears, we must proceed in the culture of plants in precisely the same manner as we do in the fattening of animals. The production of fat may be artificially increased; we give food to animals and lessen the processes of respiration and perspiration by preventing motion. The conditions necessary to effect this purpose in birds are different from these in quadrupeds; and it is well known that charcoal powder produces such an excessive growth of the liver of a goose, as at length causes death of the animal. The increase or diminution of the vital activity of vegetables depend only on heat and solar light, which we have not at our disposal; all that we can do is to supply those substances which are adapted for assimulation by the power already presented in the organs of the plant. But what then are these substances? The answer to this very important question, together with something to be said upon soils, rotation of crops, manufactured manures, their impurities and tests for proving the same, will be made the subject of future communications in connection with a careful analysis of the solid and fluid excrements of animals, plaster, ashes, muck, guano, &c. LEISURE.

LIME.—We do not use lime as freely as we should in our gardens and fruit orchards, or, for that matter, on our fields either. It would not only enrich the land, and give us larger crops, but they would be of better quality, and not so affected by disease. This is the experience of all who have used it. If we could burn our own lime, so that it would not cost more than ten cents a bushel, we could well afford to use it freely, at the rate of 150 to 250 bushels per acre. Large dressings at once, are better than small quantities more frequently applied. We want enough to change the character of the soil, liberate its potash, decompose the organic matter, and destroy fungas.—*American Agriculturist.*

QUALITY OF WOOL INFLUENCED BY FEED.—Sheep prefer upland pasture, and a great variety. It has been proved that the pasture has a greater influence than climate on the fineness of the wool. Fat sheep yield heavier and coarser fleeces. The fine flocks of western Pennsylvania, when taken to the prairies of western Illinois, in the same latitude, will in a few years change their character. The quantity of fleece and the size of the sheep will increase, but the fineness of the wool will not be retained. Sweet or upland herbage is the best for fine wool.—*National Agriculturist.*

FARM PROVERBS.—1. Use dilligence, industry, integrity, and proper improvement of the time to make farming pay.

2. Choose a farm with a soil either naturally dry or drained, not too level nor yet steep, well fenced in proper sized fields, not too large.

3. Good, snug buildings, with dry, if not clean yards, and cellars especially barn, and stabling.

4. Economy in accumulating, saving, and properly using all manures and fertilizers possible, no matter how rich your land may be naturally.

5. A good and tolerably fast team; better than large.

6. Your farming implements well made, of good material, and not too heavy.

7. Have work done in season.

8. Always sow good, clean seeds.

9. Do not harvest before your crop is fit to harvest.

10. Do not keep more live stock on your farm than you can keep well.

11. House all things as much as possible—animals, utensils, and crops.

12. Sell when you get a fair price, and do not store for rats and speculators.

RAISING COLTS. — Never expect to have a good horse if you cram your colt: it cannot be done. The old adage in Vermont, "A ragged colt makes the best horse," means everything. Your colt, then, should run with its dam until it has reached that condition of the stomach which will enable it to digest solid food. Then take your colt and let it have abundance of free cold air to begin with, and in addition to that, avoid the feeding of grain until it is three years old, as you would avoid feeding brandy and water to your children when they are little. It is astonishing how many nice colts are ruined by the excessive use of stimulating grain food in their infancy, so to speak. Let your colt mature slowly, its bone grow properly, its digestive functions be properly organized, its flesh in the proper condition—never fat. Horse fat is the poorest fat in the world. Keep it upon the best hay in winter, and good, sweet pasture in the summer, and you will make the best possible horse of that colt.—*Dr. Loring.*

A MEDICAL OPINION.—An unfortunate man, who had never drank water enough to warrant disease, was reduced to such a state of dropsy that a consultation of physicians was held upon his case. They agreed that tapping was necessary, and the poor patient was invited to submit to the operation, which he seemed inclined to do in spite of the entreaties of his son, a boy of seven years old.

"O father, father! do not let them tap you," said the young hopeful: "do any thing, but do not let them tap you!"

"Why my dear, it will do me good, and I shall live long in health to make you happy."

"No, father, no: you will not. There never was any thing tapped in our house that lasted longer than a week!"

While the republicans of Boston lost the mayor, they won the better horse in majorities of both branches of the city government.

GENTS' FURNISHING GOODS,

In great variety at

CORSER'S ST. JOHNSBURY.

OF THE

1st National Bank of St. Johnsbury, Vt.

The fourth annual meeting of the stockholders of the First National Bank of St. Johnsbury, Vt., will be held at their Banking Rooms, on TUESDAY, JAN. 14, 1868, at 1 o'clock P. M., for the election of Directors for the ensuing year. GEO. MAY, Cashier.

St. Johnsbury, Vt., Dec. 6, 1867. 8t-9

CONCORD.

The resident and non-resident proprietors of Concord, in the county of Essex, are hereby notified that the taxes assessed by said town for the years A. D. 1863 and 1864, remain wholly or in part unpaid on the following described lands in said town to-wit:

One acre of land and the buildings thereon, lately occupied by R. T. Fletcher, and now owned by C. F. Gregory.

Also, about 2 1-2 acres of land with the buildings thereon standing, now owned by Lyman H. Adams and assessed to said Adams for the year 1864.

And so much of said land will be sold at public auction at the dwelling house of the subscriber in said Concord, on SATURDAY, DEC. 28, 1867, at 10 o'clock, A. M., as shall be requisite to discharge said taxes with costs, unless previously paid.

R. N. ISHAM, First Cons.

Dated at Concord, Dec. 11, 1867. 8t-87*

Dissolution.—We the undersigned have this day dissolved the partnership existing between us by mutual consent. All debts due us will be settled by R. Bugbee at his office. RALPH BUGBEE.

L. F. BUGBEE.

Lower Waterford, Dec. 4, 1867. *8t-87

525 MILES

—OF THE—

Union Pacific Railroad,

RUNNING WEST FROM OMAHA

ACROSS THE CONTINENT,

ARE NOW COMPLETED.

This brings the line to the eastern base of the Rocky Mountains, and it is expected that the track will be laid thirty miles further, to Evans Pass, the highest point on the road, by January. The maximum grade from the foot of the mountains to the summit is but eighty feet to the mile, while that of many eastern roads is over one hundred. Work in the rocky cuttings on the western slope will continue through the winter, and there is now no reason to doubt that the entire grand line to the Pacific will be open for business in 1870.

The means provided for the construction of this Great National Work are ample. The United States grant its Six Per Cent. Bonds at the rate of from $16,000 to $48,000 per mile, for which it takes a *second lien* as security and receives payment to a large if not to the full extent of its claim in services. These bonds are issued as each twenty-mile section is finished, and after it has been examined by United States Commissioners and pronounced to be in all respects a first class road, thoroughly supplied with depots, repair shops, stations, and all the necessary rolling stock and other equipments.

The United States also make a donation of 12,800 acres of land to the mile, which will be a source of large revenue to the Company. Much of this land in the Platte Valley is among the most fertile in the world, and other large portions are covered with heavy pine forests and abound in coal of the best quality.

The Company is also authorized to issue its own First Mortgage Bonds to an amount equal to the issue of the Government and no more. Hon. E. D. Morgan and Hon. Oakes Ames are Trustees for the Bondholders, and deliver the bonds to the Company only as the work progresses, so that they always represent an actual and productive value.

The authorized capital of the Company is One Hundred Million Dollars, of which over five millions have been paid in upon the work already done.

EARNINGS OF THE COMPANY.

At present, the profits of the Company are derived only from its local traffic, but this is already much more than sufficient to pay the interest on all the bonds the Company can issue, if not another mile were built. It is no doubt on that ground that when the road is completed the through traffic of the only line connecting the Atlantic and Pacific states will be large beyond precedent, and as this will be no competition, it can always be done at paying rates.

It will be noticed that the Union Pacific Railroad is, in fact, a Government Work built under the supervision of Government officers, and to a large extent with Government money, and that its bonds are issued under Government direction. It is believed that no similar security is so carefully guarded, and certainly no other is based upon a large or more valuable property. As the Company's

FIRST MORTGAGE BONDS

are offered for the present at 90 CENTS ON THE DOLLAR, they are the cheapest security in the market, being more than 15 per cent. lower than U. S. Stocks. They pay

SIX PER CENT. IN GOLD,

or over NINE PER CENT. upon the investment. Subscriptions will be received by the

First National Bank of St. Johnsbury,

and in New York at the Company's office, No. 20 Nassau street, and by

CONTINENTAL NATIONAL BANK, No. 7 Nassau St.
CLARK, DODGE & CO., Bankers, No. 51 Wall st.
JOHN S. CISCO & SON, Bankers, No. 3 Wall st.

and by the Company's advertised Agents throughout the United States. Remittances should be made in drafts or other funds payable in New York, and the bonds will be sent free of charge by return express.

A NEW PAMPHLET AND MAP, showing the progress of the work, resources for construction and value of lands may be obtained at the Company's offices or of the advertised agents, or will be sent free on application.

JOHN J. CISCO, Treasurer, New York.

November 20, 1867. 4t-1

BINGHAM'S DRUG STORE.

WOOD AND HAY FOR SALE.

The subscriber has for sale and will furnish to order dry and green wood—four feet, and 16 inch. Also, hay in any quantities at the lowest market price. Apply to HORACE I. WOODS, Paddock Village.

THE VERMONT RAW BONE

SUPERPHOSPHATE of LIME

Is made of raw bones, with the other necessary constituents of the best quality, and with no other adulteration whatever at the works of the Company, at St. Johnsbury, under the direction of HORACE PADDOCK, ESQ., well known as an agriculturist, and also by his position—long held—as an officer of the Caledonia County Agricultural Society. Its preparation is conducted with skill and fidelity and it is the determination of the Company to fully maintain its high standard of excellence. Testimonials from many of our best farmers show it to be the cheapest and best fertilizer ever offered in our market:

"The Vt. Raw Bone Superphosphate is the best every way." JONA. LAWRENCE, Sec. of Caledonia Co. Wool Growers Ass'n.

"The most satisfactory of any I have used." HON. EZRA A. PARKS, Pres't of Caledonia Co. Agricultural Society.

"Has proved all that can be desired." S. S. GOULD, West Concord, Vt.

"Contains the most Bone Phosphate of any I have tried." J. P. FOSTER, Passumpsic, Vt.

"Is altogether the best in market, it hastens maturity so much secure from frost much earlier than otherwise." HON. BARON MOULTON, St. Johnsbury, Vt.

"Has a marked and beneficial effect on ruta bagas and potatoes." I. W. SANBORN, ESQ., Sec. of Caledonia Co. Agricultural Society.

"It stands at the head of every thing of the kind we have tried." J. A. L. R. VARNUM, Peacham.

"There was two bushels where it was put, to one where it was not used. Tried side by side with "Coe's Improved Superphosphate of Lime," (manufactured by W. L. Bradley of Boston) in crops under similar conditions of soil and treatment, there was a marked difference in favor of the Vt. Superphosphate." L. C. MATHEWS, ESQ., Lyndon, Vt.

"I had a better yield and earlier crops than neighbors who used yard manure or other brands of superphosphate. Tried on a piece of my oats, they ripened two weeks before the rest of the field." CAPT. H. PERKINS, Cabot, Vt.

"I got one fourth more bushels when I used the Vermont superphosphate alone than where I used alike amount of "Coe's Superphosphate" and 2 cords of well rotted manure to the acre—the crop and treatment the same." HIRAM HILL, Prop'r of St. Johnsbury House.

"It is cheap, concentrated and efficient, it greatly increases the yield and matures the crop two or three weeks earlier than yard manure. It was entirely devoid of the disagreeable stench put in by other manufacturers and I can speak of the opinion, it is the best we get." GEO. GALBRAITH, Barnet, Vt.

It is just what I look for in a cheaply such an article can be afforded. It is never placed superphosphate, nor yet of good quality, be deserved, for the grain sold as sold by the Company, be mixed with more or less of dry muck, or fine old compost and a good or all of the result, and it is cost of less than two dollars a hundred.

"Those who buy and use it will lose nothing. I let part of my field without any. The result was, VERY MUCH in favor of the Phosphate all through the season. A neighbor had one barrel of what I ordered, and called it better than "Coe's." LONSON L. RICE, Fairlee, Vt.

"Seven dollars worth brought me in an acre of extra good corn which I certainly should NOT have got without the Superphosphate, as it was a very large piece from poor land. Other brands of Phosphate had not done well with me and I had still less faith in applying it, but the cash was up, but I put it on the first acre and was astonished to see how quick and vigorously it took hold of the crop." W. D. GOULD, ESQ., Concord, Vt.

"I have taken some pains to observe the effects upon various crops of the super phosphate of Lime manufactured by Paddock, Dean & Co. They have been manufactured for a direct sale in my judgement is much better than those used in manufactures generally. If it is worth while to use fertilizers, I feel confident it would prove an important gain for farmers other than those who purchase it prepared ready for use or simply sold." I. N. CHADWICK, St. Johnsbury, July, 1867.

A genuine article of Superphosphate supplies those elements of growth which are most difficult to be obtained, and which only in scanty amount in the best farming soil manure.

It gives a quick, vigorous start to the young plant.

It prevents the appearance of growth throughout the season.

It greatly increases the product.

It matures the crop from two to three weeks earlier so as to secure it from frost.

In a dry season it protects the roots of corn, from insects and other enemies. It contains no burn yard guaranteed. It is perfected to the corn with ease, and applied with drilling tubes, and a home made manure must dry, be considered for the needs of agriculture, genuine Superphosphate is an invaluable auxiliary.

Guardian Notice.

STATE OF VERMONT, } In probate court held at the
Caledonia district, ss. } probate office in St. Johnsbury, within and for said district on the 18th day of Dec. A. D. 1867.

Daniel W. Hubbard, guardian of John F. Hubbard, minor and heir to the estate of Rufus M. Hubbard and Sarah N. Hubbard, both late of Wheelock, in said district, deceased, makes application to said court for license to sell the whole of the real estate of his said ward, representing that the sale thereof, for the purpose of putting the proceeds of such sale at interest or investing the same in stocks or real estate, would be beneficial to said ward:

Whereupon, it is ordered by said court, that said application be referred to a session thereof, to be held at the probate office, in said St. Johnsbury, on the 4th day of January, A. D. 1868, for hearing and decision thereon; and it is further ordered that all persons interested be notified hereof, by publication of notice of said application and order thereon, three weeks successively in the Caledonian, printed at St. Johnsbury, before said time of hearing, that they may appear at said time and place and, if they see cause, object thereto.

By the court—Attest

8-88 ASA L. FRENCH, Judge of Probate.

Josiah Gage's Estate.

STATE OF VERMONT, } At a Probate Court held at
Caledonia District, ss. } St. Johnsbury, in said district on the 16th day of December, A. D. 1867.

Barron Moulton, executor of the last will and testament of Josiah Gage, late of St. Johnsbury, in said district, deceased, presents his administration account for examination and allowance, and makes application for a decree of distribution and partition of the estate of said deceased.

Whereupon it is ordered by said court, that said account and said application be referred to a session of said court to be held at the probate office in St. Johnsbury, on the 4th day of January, 1868, for hearing and decision thereon. And it is further ordered, that notice be given to all persons interested, by publication of the same three weeks successively in the Caledonian, a newspaper published at St. Johnsbury previous to said time appointed for hearing, that they may appear at said time and place, and show cause, if any they have, why said account should not be allowed, and such decree made. By the Court—Attest.

8-88 ASA L. FRENCH, Judge of Probate.

George C. Peck's Estate.

STATE OF VERMONT, } In Probate Court, held at the
Caledonia District, ss. } Probate Office, in St Johnsbury, on the 4th day of December, A. D. 1867.

Amasa O. Harris, administrator of the estate, of George C. Peck, late of Lyndon, in said district, deceased, makes application to said court for license to sell the whole of the real estate of said deceased, representing that the said sale is necessary for the payment of the debts of said deceased.

Whereupon, it is ordered by said court, that said application be under consideration and be heard on the 4th day of January A. D. 1868, at the probate office, in said St. Johnsbury; and it is further ordered that all persons interested be notified hereof by publication of notice of said application and order thereon three weeks successively in the Caledonian, printed at St. Johnsbury, before said time of hearing, that they may appear at said time and place and if they see cause object thereto.

By the Court,—Attest,

8-88 ASA L. FRENCH, Judge of Probate.

Jean Nelson's Estate.
