GENERAL NEWS OF INDUSTRIES

Coal Freight Agents Have Difficulty in Reaching an Amicable Agreement.

WILL CONFER AGAIN THIS WEEK

It Is Also Thought That at This Week's Meeting of the Sale Agents a Slightly Lowered Circular Will Be Adopted—Important Consolidation of Trolley Interests Just Negotiated at Chester—Other Interesting News and Gossip in Relation to Pennsylvania Industries.

According to the best reports at hand, last Thursday's meeting of the coal freight agents in New York was not as uninterruptedly harmonious as might have been expected. In fact, it was rather a stormy session, taking all things into account. The question of adjusting freight rates from mines to tide water points was not solved, although it was debated with a vengeance, and another meeting will be called this week in the hope of then reaching a more definite conclusion. As THE TRIBUNE has previously explained, there are at present two sets of rates in force, one being based on 40 per cent. of the selling price of coal at tide water; the other a fixed rate of $1.70 per ton to Perth Amboy and $1.75 to Jersey City. The 40 per cent basis is now used by all the roads excepting the Jersey Central and Delaware, Lackawanna and Western; but it has only recently been adopted by the Lehigh Valley, which formerly used the fixed rate. The change made by this company, together with its through rate agreement with the New York, New Haven and Hartford, has been largely instrumental in creating the present discord among the coal freight agents. The Lackawanna is reported as being especially bitter against the Lehigh Valley, though why it should single out this road is not clearly understood in the trade. The 40 per cent rate makes the profits of the carrying companies considerably smaller than they would be if the fixed rate of $1.70 and $1.75 per ton was received, and the loss increases as the price of coal decreases. There is little doubt that the anthracite coal sales agents at their meeting in New York this week will make the spring circular something lower than present prices, so that the average selling price of coal at tidewater will on the 40 per cent. basis also lessen the cost of transportation.

Coke production in the Connellsville region last week was two thousand tons greater than that of the previous week, but the output was not up to the standard. In the weekly shipments there was a decrease of 75 cars, showing that some of the product was stocked on the yards. The demand did not improve much during the week, as the operators anticipated.

A detailed report of the operation and output shows that 11,219 active and 9294 idle ovens with a total estimated production of 119,741 tons compared with the production of the previous week. This was an increase of 2,040 tons. In the active list of ovens there was a net gain of 194 ovens.

According to the Bulletin of the Iron and Steel association; at least one-fifth of the capital invested in the iron and steel industries of this country has been absolutely sunk since the election of Mr. Cleveland in November, 1892, and at least 100 iron and steel manufacturing establishments and iron ore mining properties have passed into the hands of receivers and assignees, or the sheriff within the same period.

The latest trolley consolidation is reported from Chester, where all the electric railway centering in that city are united in one company, the new system having a total mileage of nearly forty miles of railway. The new corporation will be known as the Chester Traction company, and it is understood that the Philadelphia Traction company is interested in the deal. Colonel Samuel A. Dyer, who has been the active spirit in the Union railway, will control the new concern. The line subscribed by the Chester Traction company are the Chester Street railway, which owns most of the original franchises in the city, the Union railway, which has a lease on the lines of the Chester Street railway, and controls lines to Upland, Eddystone and Marcus Hook; the Chester and Media Electric railway, which has a line from the city to Media, six miles, and valuable street franchises in Media borough, and the Chester, Darby and Philadelphia railway, which owns and operates a line from the city to Darby, distant nine miles, where it connects with the Darby extension of the Philadelphia Traction company's lines upon which the trolley is now being introduced. The new company will own the large central power house in Chester, which supplies the current for all the above lines, and will have offices at Market square. The capital stock is $500,000, and the incorporators are Samuel A. Dyer, William Wilson, Charles F. Wagner, jr., Eugene Harvey, George F. Potteiger.

MINOR INDUSTRIAL NOTES:

A rock weighing three tons rolled upon the Pennsylvania railroad near Pottsville recently, wrecking a passenger locomotive.

Contractor T. F. Kerns and Joseph Gorman, of Pottsville, have made a bid for the construction of a new railroad between Cumberland and Hagerstown, to cost $4,500,000.

Potters talk of colonizing, building a pottery to employ 1,500 men and a town near East Liverpool, O., on a bonded basis of $41,000,000, with Congressman Tom Johnson as backer.

President Roberts, of the Pennsylvania, has been elected to serve in that capacity fourteen consecutive times.

President Depew says that there are continued evidences of improvement in local railroad traffic.

A good deal of significance is attached to the increasing intimacy between the Rockefellers and the Vanderbilts.

So great is the Philadelphia and Reading coal output that it is having trouble at Pottsville in handling it.

General Manager Prevost, of the Pennsylvania railroad, has been making a tour of inspection over various branches.

The Reading company's collieries made but three days last week.

The box factory owned by John E. DuBois, at DuBois, which has been idle for four weeks, will resume to-day, giving employment to one hundred hands.

Bucklen's Arnica Salve.

It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale by Matthews Bros. **

FINANCIAL AND COMMERCIAL

Stocks and Bonds.

NEW YORK, March 24.—The amount of business transacted at the stock exchange to-day hardly warranted bringing the members down town. Only 57,873 shares changed hands during the two hours session. The easier condition of the foreign exchange and the fact that no gold went out contributed to the firmness of the market. It is fair to assume that these factors would have had more influence had it not been for the uncertainty regarding the fate of the seignorage bill. Distillers and Chicago gas were among the firmest on the list. The first rose to 28¾; Chicago Gas moved up a point to 64 on Chicago rumors that the quo warranto proceedings will be dismissed. Richmond Terminal sold up to 7, third assessment paid. The market closed firm at about the top of the day.

The following complete table showing the day's fluctuations in active stocks is supplied and revised daily by Lellar & Fuller, stock brokers, 121 Wyoming avenue:

Market steady; inferior to choice, $2.50a4.35; lambs, $3.25a4.50.

Why So Many Languages?

Before the simpler laws of astronomy were known the sun was supposed to be trundled out into the heavens every day, and the stars hung up in the firmament every night by the right hand of the Almighty. Before the laws of comets were known they were thought to be missiles hurled by an angry God at a wicked world. Before the real cause of lightning was known it was supposed to be the work of a good God in his wrath, or of evil spirits in their malice.

Before the laws of meteorology were known it was thought that rains were caused by the Almighty or his angels opening "the windows of heaven" to let down upon the earth "the waters that be above the firmament." Before the laws governing physical health were known diseases were supposed to result from the direct interposition of the Almighty or of Satan. Before the laws governing mental health were known insanity was generally thought to be diabolic possession.

So in this case, to account for the diversity of tongues, the direct intervention of the Divine will was brought in. As this diversity was felt to be an inconvenience, it was attributed to the will of a Divine being in anger. To explain this anger it was held that it must have been provoked by human sin.

Out of this conception explanatory myths and legends grew as thickly and naturally as elms along water courses; and of these the earliest form known to us is found in the Chaldean accounts. We see it first in the Chaldean legend of the Tower of Babel. —Andrew D. White, LL. D., in Popular Science.

A Quarter Century Test.
