Wilmington Journal.

WILMINGTON, N. C.:

FRIDAY, MARCH 21, 1873.

STATE NEWS.

The Baptist Fair at Raleigh has proved very successful.

Among the graduates of the Maryland College of Pharmacy, Tuesday, was John R. Marshall, of this State.

Two oxen from Catawba county were on exhibition at Raleigh on Wednesday—one weighed 2,100, and the other 2,000 pounds.

The little daughter of Mr. Valentine Buffaloe, of Northampton, was burnt to death, on Thursday last, by its clothing taking fire.

Mr. Tilman Price, of Davie county, was knocked overboard into the Pasquotank river by a spar on the 18th February, and was drowned.

The new Board of Directors for the Lunatic Asylum refused to admit the reporter of the Raleigh Sentinel to their meeting. Something wrong.

Mr. Columbus Perry married Miss Catherine Beaman in Raleigh on Thursday. The bride was 19 and the groom 20. The Mayor performed the ceremony.

There are about eight thousand volumes in the State Library, exclusive of the Law Library in the Supreme Court room. Many of these volumes are very old and valuable.

There are sixteen Tobacco Factories in Surry county, eleven of them in or in the village of Mount Airy. And although no cotton is raised in the county, there are three Cotton Factories and a fourth nearly completed. We gather these facts from the Winston Sentinel.

The Rocky Mount Mail says that the farmers of Edgecombe and Nash are more backward in their preparations than they were ever known to be. Bad weather and want of farm hands are the causes assigned. Few of the farmers have hands enough to carry on their crops.

On Wednesday the extensive steam saw mill, spoke and handle factory of Messrs. Huey, Hicks & Co., at Raleigh, on the Raleigh and Gaston Railroad, was entirely consumed by fire. The property was estimated at about $20,000, with but little insurance. This will throw a great many operatives out of employment, and will prove a great loss to the whole community.

A correspondent in Tarboro' inquires, say the Newbern Times, by mail, that one Sallie Lawrence, who died near Tarboro', in Edgecombe county, committed suicide recently by taking two ounces of laudanum and carbonic acid combined. Grief for the loss of her father and sister, who both died recently is supposed to have been the cause of the deed. Before committing the rash act the unfortunate young lady made a will leaving her property to a young brother.

There are at present in the hands of the merchants of Raleigh, says the Raleigh *News*, awaiting shipment, some 3,000 bales of cotton. The receipts in that city since the first of September last have been some 12,000 bales, against 12,000 for the twelve months prior to that time, which evidences the fact that the receipts for the fiscal year, ending the first of September next, will be doubled over the preceding year. We are pleased to know that the general business of the city is increasing in the same proportion.

Last week Wm. M. Smith, who lost his right arm at Seven Pines, and was one of the first to volunteer in the Twenty-second North Carolina regiment (Pettigrew's brigade) arrived in Lexington, having walked all the way from Guilford county, N. C., for the purpose of seeing the graves of Lee and Jackson before he died. Having accomplished his purpose, he is now on his way back on foot. He was given "the freedom" of the town, and was kindly treated by all the town.

A STRANGE STORY.

How a Dead Man's Brain was Transferred to a Quick Subject.

A correspondent of the New York *World*, writing from Paris, gives the following strange and hardly credible account of the recent transfusion of a dead man's brain into a living subject. The facts are reported by the *World* correspondent as recorded in the Gazette Hebdomadaire, taken from *Virchow's Archives*, a medical journal published at Berlin:

It was at Leipzig that the experiment was performed. A soldier who had killed the colonel of his regiment in cool blood, and whom the severity of Prussian military discipline would have caused to die a hundred deaths, had it been possible, was deliberately handed over to the surgeons, by sentence of court-martial, and was confined in a strong room in the military hospital, entirely in the dark as to the fate which awaited him. He was kept there ready for an emergency, which did not fail to occur. A keeper of a beer cellar in Leipzig, a man resembling in many respects the condemned soldier, and who had been seized with acute inflammation of the heart, or rather of its investing membrane, was brought to the hospital to die of that uncanny, and promptly fatal, malady. No sooner had the anticipated death taken place than the dead alcoholic was placed on the table by the side of another operating table, on which was a decapitated man just out of the prison. The surgeons, with a celerity which proved long practice, removed the head of the soldier, and placed it upon the shoulders of the dead man, and the skin was so adjusted as to hide the scars of the cut. The operation was performed in the presence of a number of the medical men of Leipzig, who had been invited to witness the experiment, and who were kept in the dark as to the character of the subject. The head remained without any sign of life for some minutes, when it opened its eyes, and looking around it, recognized the place where it had been accustomed to spend its evenings. The eyes then closed, and the subject gave no further sign of life for some minutes, when it opened its eyes for the second time, and, on being addressed by its name, it seemed to recognize the voice of its friend, and to make a violent effort to speak. The attempt was, however, a failure, the man only being able to articulate a few inarticulate sounds, which, however, were recognized as those of the man whose brain had been transferred to the living body. The experiment was considered a complete success, and the man was treated as a guilty man, and was shot, the sentence being carried out in the presence of the medical men who had witnessed the transfusion of brains. The man himself was perfectly conscious of his position, and died quite calmly, acknowledging that he had received justice at the hands of his judges. The experiment was considered a most interesting one in the annals of surgery, and it was thought that the success of the experiment would be a great encouragement to surgeons in the case of accidents where a portion of the brain of a patient might be destroyed by the injury of a fall or a blow, and where the patient would be considered as good as dead. The man who had his brain taken out for the purpose of being transferred to the living subject was a man who had been a notorious character in Leipzig, and was known to the police as a dangerous character, and was considered a fit subject for the experiment on account of his crime being of a character which would have caused him to be condemned to the scaffold had he been in any other country than Germany. The man who had his brain taken out was a man who had been a notorious character in Leipzig, and was known to the police as a dangerous character, and was considered a fit subject for the experiment on account of his crime being of a character which would have caused him to be condemned to the scaffold had he been in any other country than Germany.

Hints for the Farmer.

First. A knowledge of what his land will produce, is necessary to the farmer that he may know what expense may be allowed in cultivation, etc. This he must learn by trying his land—he may think he knows by what others have done. This is well enough, if he is sure he can do as others do.

Second. A great many unsuccessful farmers get in the grass, and fail to keep up with their work, but you will hardly ever find one that has not an excuse. It was too wet or too dry, or the hands failed to work, or something prevented the work being done in the proper way and at the proper time; when the real cause was *bad management*. And the reason why they don't learn to manage better is, they don't attribute the results to their true cause. If they would say I failed, instead of the seasons, etc., they might learn to manage better.

Third. A farmer should know what his means will admit of his doing—how many hands, mules, etc., it will take to do the work he proposes to have done in a certain time. This perhaps requires the nicest of all calculations, and as man by nature wants to do more than he can do, it would be well for him to guard against laying off more work than he is able to do. The only rule that I can give that will be sure to guard him against this great error, is to calculate what he will do *this* year by what he did *last*.

Fourth. A great many good men, especially farmers, are careless or indolent. They are always cheerful and accommodating, and proposing to do a great deal next year, but wait until it is too late to begin. The way to avoid this, is to commence at once, and never stop. If you are waiting for to-morrow or next week, before you go to work, you may know you belong to this class of good fellows.

Fifth. The farmers who make more than they consume, generally know what their land will produce—what their means will admit of their doing—by of no more work then they can have done, and adopt a rule for cultivation that they are able to carry out. These things mark a man's success in business, the young man would do well to heed them.

Sixth. To know *how to do*, is indispensably necessary. This may be acquired by seeing others do, or reading of them. It is also necessary to know *what* one knows and what he can do. Let us consider, as we may each this. Did your business last year turn out what you expected it would. If not, acknowledge the fault as your, not knowing what to expect, etc. Did you carry out your plans? If not, more than likely the fault was with you, and you would generally do well to consider it. Did you do all the work you proposed? If you did not, acknowledge that it was your fault, not knowing what to expect of yourself, by such procedure you may learn yourself by the same rule that others know you by—which is: What you will do and know, by what you have done and known.—*Southern Cultivator.*

An Illinois Girl's Success as a Farmer From the Seminary to the Cornfield.

We lately had the pleasure of "interviewing" a Miss A., of Illinois, who, for some years past, has been engaged in carrying on a farm of one hundred and twenty acres.

Her father died, leaving a widow, and, we believe, two daughters, and a boy, of whom Miss A. was the oldest, and the boy, a lad of ten or a dozen years old. She found the health of her mother, who was endeavoring to manage the farm with hired help, failing, and concluding that she would rather keep her mother than get an education, she left the seminary in 1863 and commenced farming. The farm at that time consisted of eighty acres of the home farm, about half of which was in cultivation; and at a little distance were forty acres more, all in cultivation. The home farm had a pretty good house, but the barn had recently been burned, and the fences were not good. Twelve acres had been planted in apples of good varieties. She had one horse, and got the loan of another from a friend, who also aids and is aided in turn by lending implements, &c. She has now a good team of her own raising, besides a horse that does duty in the market wagon.

So she went to work with the aid of her little brother, and, to some extent, of her mother and sister, who took charge of the housekeeping. She learned to do nearly all kinds of work. She does not plow much, but she can do it. She took out fifty to one hundred stumps of trees one year, with spade and ax, and, at the same time, assisting her brother, who was drilling wheat. She bound and shocked wheat, and can drive a team well. She can use an ax pretty well; formerly she could chop better than her brother, but now he chops as well as she can herself, and she does less of it. She wears a gymnastic suit when at home and at work, a broad-brimmed hat, and boots made to order. She wishes to look as well as other girls, and thus protects herself from the exposure resulting from out-door labor. She likes the open-air life and out-door work, and is healthy and strong.

Most of the home farm is cultivated in corn, though she has eight acres in grass and twelve in orchard. She raised twenty-three acres of winter wheat in 1872. It was a fine crop, but she lost from three to five acres from the failure of the man she had engaged to cut in time. Even then, with scarce and inefficient labor, by that noble class of men that are always willing to take advantage of those who cannot do so for themselves, she got her 880 to harvest through the wheat. Yet she got five hundred bushels of wheat, weighing 62 pounds to the bushel. The young orchard bore a good deal of fruit in 1872, and she sold 100 barrels of summer apples, and has 150 bushels of apples now in the cellar. She took most of her apples to market herself, selling some of them as low as 75 cents per barrel, and some as high as $3.

Prairie Farmer.

Well Said.

One of the most striking allusions to Credit Mobilier matters we have yet seen is the following, from the pen of Gen. Greenwood. It is decidedly graphic:

"The unsatisfactory nature of these explanations, the failure of our great expectations, the precarious condition in which honorable gentlemen are left, after all their frantic efforts to "set" themselves right before the country, reminds me of the mournful foundering of a Mississippi steamboat, as described by an eye-witness:

"She took a snort out, and she and hove,
And high her rudder flung
And every time she hove and not
A cross-beam she sprung."

Colfax & Co. will please notice, and copy poem into their note books.

The "little ax" historically connected with exemplary veracity is not to be confounded with Colf-ax.

The lady to whom Rochefort was married just before she received the last sacrament of the church, and was supposed to be dying, has quite recovered.

The Montgomery (Ala.) Advertiser is losing confidence in men and things. It offers a desperate wager that "Oakes Ames, if nominated by a Radical convention, would obtain more votes for President than any other man in the United States. He could beat Hartranft or Simon Cameron in Pennsylvania, or Pomeroy in Kansas."

A joint resolution has been introduced in the Tennessee Legislature to appoint a committee to investigate the report that corrupt means were used to prevent the passage of certain measures before the last Legislature. We would suggest to the Poland Committee that they make an effort to secure the contract for supplying that committee with whitewash.

The New Senator from Massachusetts.

Secretary Boutwell, the Senator from Massachusetts, will not hand in his resignation until he is officially notified of his election. As the Cabinet meets to-day, he will probably present it at that time. He will, however, remain in the department for several days to come, in order to close up his business. There are a number of matters now pending before the department which he has investigated, and with which he is thoroughly conversant, and it is his intention to settle them, or at least get them in shape for proper adjustment before he leaves. He will take his seat in the Senate, however, before the adjournment of the present extra session, unless that body should adjourn before Saturday, which is not probable. Everybody at the Treasury is confident that Judge Richardson is the "coming man," so far as Mr. Boutwell's successor is concerned. It is worthy of note that Mr. Boutwell was appointed Secretary of the Treasury just four years ago, the day of his election to the Senate.

M. Littre's dictionary of the French language, which he has been engaged upon for thirty years, has just been completed and contains six thousand pages.

DR. J. MILES HUNTER & TEW.

Special Practice.

CANCERS, TUMORS, SCROFULA, CHRONIC ULCERS, AND ALL ANALAGOUS DISORDERS

Successfully Treated.

OFFICE AND INFIRMARY,
EAST CENTRE STREET,
GOLDSBORO, N. C.

Consultation FREE!

In consequence of increased practice, we have opened an Infirmary at Goldsboro, N. C., for the accommodation of patients requiring daily attention. The facts that we have cured a large number of patients in the best guarantee of our ability to do all we promise.

We invite attention to the cut illustrations below, which are selected out of a large number, circulars containing full particulars mailed upon application.

GOLDSBORO, N. C., December 11, 1872.

This is to certify that in December, 1871, I visited Messrs. J. M. Hunter & Tew for the purpose of being treated by them for a cancer on my nose. I had it in a horrible suffering with this affliction for a period of two years and it had grown to an enormous size. Some time before coming to Drs. Hunter & Tew, I had had it removed by surgical operation, but it began to reappear in about two weeks after the operation had been performed and growing rapidly at the time of placing myself under the treatment of Messrs. Hunter & Tew, it had grown to the size of a large walnut, and extended over the entire nose from the line of the upper lip to the eye, threatening to destroy my sight. After a faithful and persistent use of the remedies given me by Messrs. Hunter & Tew, and under their personal supervision, I am happy to state that I am now entirely free from any affliction, and that the cancer entirely cured.

(Signed) MARGARET E. DUDLEY,
aged 75 years, by her N. L. Hutton.

This is to certify that I was called upon by Messrs. J. Miles Hunter & Tew, to see Mrs. Margaret E. Dudley on December, 1871, soon after arrival in Goldsboro, and found her suffering with a large tumor, chiefly on the right side of the nose, the cancer had extended over the entire nose from the upper lip to the eye, threatening to destroy her sight. After a faithful and persistent use of the remedies given me by Messrs. Hunter & Tew, under their personal supervision, I am happy to state that I am now entirely free from any affliction, and that the cancer entirely cured.

(Signed) MARGARET E. DUDLEY,
aged 75 years, by her N. L. Hutton.

MARRIAGE GUIDE.

EVERY ONE HIS OWN DOCTOR—Being a popular exposition of the married persons, or those about to be married, with a full, plain, and practical treatise concerning the physiology and relation of our sexual system, and the production and prevention of offspring, including all the new discoveries never before given in the English language. By W. M. YOUNG, M. D. This is really a valuable and interesting work. It is written in plain language for the general reader, and is illustrated with numerous Engravings. All young married people, or those contemplating marriage, and having the least impediment to married life, should read this book. It contains secrets that every one should be acquainted with; still it is a book that must be locked up and not left lie about the house. It will be sent to any address on receipt of 50 cents. Address Dr. WM. YOUNG, No. 416 Spruce street, above Fourth, Philadelphia.

☞ AFFLICTED AND UNFORTUNATE.—No matter what may be your disease, before you place yourself under the care of any of the QUACKS—native or foreign—who advertise in this or any other paper, get a copy of Dr. Young's Book and read it carefully. It will be the means of saving you many a dollar, your health, and possibly your life. Dr. Young can be consulted on any of the diseases described in his publications by mail or at his office, No. 416 Spruce street, above Fourth, Philadelphia.

ETIWAN FERTILIZERS.

Three very Superior Articles are offered by the Sulphuric Acid and Super phosphate Company of Charleston, S. C., viz:

ETIWAN GUANO.

A complete manure adapted to Cotton, Grain and Tobacco, being the well known article heretofore offered at the very high grade of 18 per cent. dissolved Bone Phosphate of Lime, with the addition, as heretofore, of Peruvian Guano, Ammonia and Potash. Price $52 per ton, if paid on or before the 1st of April next, and $60 per ton, payable 1st November, 1873, without interest.

ETIWAN CROP FOOD.

A new article of about the same high grade of Soluble Phosphate, compounded with the elements of Cotton Seed in such a manner as to ensure one of the best fertilizers for Cotton and Grain, at a lower price than the Etiwan Guano. Price $45 per ton, if paid on or before the 1st of April next; $45 per ton, payable 1st November, 1873, without interest.

ETIWAN DISSOLVED BONE.

Averaging from 23 to 24 *per cent.* of Dissolved Bone Phosphate, and thus enabling the planter, by composting to obtain two tons of half that grade of a saving of one-half *cost of freight.* Price $35 per ton, if paid on or before the 1st of April next; $40 per ton, payable 1st November, 1873, without interest.

TAKE NOTICE that all these fertilizers are of the *highest grade of Soluble Phosphate*, and must help for more than one year.

FERTILIZERS! FERTILIZERS!!

READ! READ! READ!!

GREAT DISCOVERY!

BRADLEY'S PATENT ENAMEL PAINT,

Made from Pure White Lead, Linseed Oil and Zinc,

And Always Ready for Use.

READ THE FOLLOWING TESTIMONIALS:

THE PLAINS, FAUQUIER CO., VA., February 6, 1873.

MR. C. P. KNIGHT—Sir—The Paint came safely to hand as ordered—two kegs, five gallons each, and three buckets, one gallon each. As practicably as I did the job myself. Two weeks, nearly, work, completed the house, two coats. Too fast read Teppichtick and it is now generally conceded that for "enamel" the house is the best job, and many of colors, there is not a handsomer job in the place. I saving every one ($5) dollar I was to pay for painting, which I am just now with "Southern People." It is fast becoming universally adopted in this State. Any country let me prove.

I have never published testimonials & as Testimonials, but I feel so fully the extra adaptability of your "Enamel Paint" to the wants of our people, its excellency of material, its beauty of colors, and in the fact of its being "Ready MIXED," that I give my name in full, if it is desirable to you to make what use you think proper of this letter.

Very respectfully and truly,
S. McGILL, M. D.

BALTIMORE, Dec. 19th, 1872.

MR. C. P. KNIGHT—Dear Sir: It affords me much pleasure to say to you that the Bradley Patent Enamel Paint far exceeds my expectation as a covering, both in beauty and durability. Many reasons I could give for this, but the fact of my Hotel Mansion being covered with the Bradley Patent Enamel Paint, and I was so well pleased with it I later decided to paint the outside of the Hotel, which I am happy to say, is in perfect satisfaction. In conclusion I will say, if this be worth, I will be my advantage to you use at liberty to use my name.

Yours, most respectfully,
W. H. ALLRESON,
Mansion House Hotel N. W. corner Fayette and Gay Streets, Baltimore.

C. P. KNIGHT—Dear Sir: I have had Bradley's Patent Enamel Paint, which I purchased of you, used inside and outside, both at my residence and at my Store, for two years. I go not great pleasure to be able to say that it comes fully up to your recommendations in all its qualities, covering, durability and beauty.

Yours, very truly,
THOMAS S. IRVING,
of Thos. Irving & Co., 131 West Balt. St.

BALTIMORE, Sept. 20, 1872.

TO THE PUBLIC—It affords me much pleasure to state that in July, 1871, Front Street Theatre was painted inside and out with Bradley's Patent Enamel Paint, for which C. P. Knight, No. 93 West Lombard street, is agent, and to testify to its superiority over any and all other paints for similar uses. In no private dwelling can paint be subjected to the very severe test it undergoes at this establishment, where, during our daily cleaning, soap and water are constantly applied to it, and yet it appears as sound and fresh as when first put on. Of the numerous advantages it possesses over other paints I will mention its being mixed and ready for use in quantities to suit purchasers, its quick drying properties, which saves much time in the execution of work where paint is needed, and its very perceptible toughness, which imparts beauty and durability to the objects on which it is used. As such I most earnestly recommend it to the merchants and trade even of our city, believing that I will give them greater satisfaction than they can possibly anticipate.

W. E. FOX, Front St. Theatre,
Baltimore April 25, 1872.

Wilmington, N. C., March 14. w-m

WE CLERGYMEN WERE CURED

of Chronic and Acute Rheumatism, Neuralgia, Lumbago, Sciatica, Kidney, and Nervous Diseases after years of suffering, by taking Dr. Fitler's Vegetable Rheumatic Syrup—the scientific discovery of J. P. Fitler, M. D., a regular graduate physician, with whom we are personally acquainted, who has for 35 years treated these diseases exclusively with astonishing results. We believe it our christian duty, after deliberation, to conscientiously request sufferers to use it, especially persons in moderate circumstances who cannot afford to waste money and time on worthless mixtures. As clergymen we seriously feel the deep responsibility resting on us in publicly endorsing this medicine. But our knowledge and experience of its remarkable merit fully justifies our action. Rev. C. H. Ewing, Media, Pennsylvania, suffered sixteen years, became hopeless. Rev. Thos. Murphy, D. D., Frankford, Philadelphia. Rev. J. R. Davis, Hightown, New Jersey. Rev. J. S. Buchanan, Clarence, Iowa. Rev. G. G. Smith, Pittsburgh, New York. Rev. Jos. Boggs, Fair's Church, Philadelphia. Other testimonials from Senators, Governors, Judges, Congressmen, Physicians, &c., circulars free on application. Regulating three dollar size, nine dollars per doz. will be presented to any medicine for sample equal merit under the sun, or that can produce one-tenth as many living cures. Any person sending by letter description of affliction will receive a written legally signed guarantee, naming the number of bottles to cure, agreeing to refund money upon receipt of statement of its failure to cure. All are invited to write to Dr. Fitler, Philadelphia. His valuable advice costs nothing.

GREEN & FLANNER,

☞ The CHEAPEST and most EFFECTIVE Steel Plow in use.

☞ IT DOES THE WORK of TWO PLOWS WITH ONE MAN AND ONE HORSE.

It runs easier, is easily guided, and is light to the Horse.

It is made of Wrought Steel, and will outlast two ordinary Plows.

It sweeps Perfectly, and replaces the earth on the hill at the same time.

It can be used in any well prepared soil, and is equally good for cotton, corn and Potatoes.

All who have used it are pleased with it.

This is the most popular plowing among cotton planters now in use.—Col. G. W. Parsons.

It saves the labor of one horse and plow and four men.—Elmer G. W. Hyam.

Col. Jas. A. Hoy says—"Sojourner I have used it and like it very much."

Hon. R. Williams, Esq., says: "It saves the labor of one horse and hand."

☞ A. B. Farquhar, says—"I know of no Cultivator embracing so many good points, and so well adapted to working the plant in the several stages of its growth."

Price $10.

Liberal Discount to the Trade.

North Carolina,
ONSLOW COUNTY.

SUPERIOR COURT—FALL TERM, 1872.

Durant S. Rhodes in his own behalf, and in behalf of such other creditors of the late White D. Humphrey, dec'd, as may unite in and contribute to this action, Plaintiff,

Against

Nathan S. Humphrey, W. D. Humphrey, Mary S. Cox, wife of Cader G. Cox, and others, Defendants.

"CREDITOR'S BILL."

Ordered by the court, that publication be made for six successive weeks at the Court House door in Jacksonville, N. C., and at three other public places in the county of Onslow, and also in the Weekly edition of the WILMINGTON JOURNAL, notifying all creditors of the late White D. Humphrey, deceased, who may join in and contribute to the action of the filing of the bills, for the purpose for which it is filed, and seeking leave to appear at the office of the Clerk of the Superior Court of Onslow county on or before the 18th day of February, A. D., 1873, prepared to make a proper exhibit and proof of their claims against said Estate, and make themselves parties plaintiff to this proceeding if they shall elect to do so; and on their failure to do this, they will be debarred of all participation in the fund that may be derived pursuant to this proceeding.

Given under my hand and seal of office in Jacksonville, this 6th day of January, A. D., 1873.

A. C. HUGGINS, C. S. C.
