A GREAT WORK

Has been Practically Completed Meaning the W. & E. G.

NEW SUBURBAN ELECTRIC LINE.

CARS WILL PROBABLY BE RUNNING WITHIN TWO WEEKS. FIVE CARS TO BE PROVIDED, AND A FIFTEEN MINUTE SERVICE INAUGURATED BETWEEN THE CITY AND ELM GROVE. WHEELING'S ELECTRIC ROADS HAVE A BIG MILEAGE NOW.

Practically, the reconstruction of the Wheeling & Elm Grove railroad into an up-to-date electric line has been completed. The road is now completed with the exception of two or three minor things that cannot be completed until on the eve of the inauguration of the electric service, including the doubled guarded curve at Seibert's, the cutting in of the new and old tracks near Leatherwood, and some paving that remains to be done near Stackyard Hollow at the "Y."

It is now anticipated that the steam motors will be retired in about two weeks, immediately after which the road will be operated by electricity. Already there are two of the four Brill cars here, the "Hiawatha," which has been in service on the city division for several months, and the "Admiral Schley," which was received two days ago from the makers. Two other cars, similar to the two already received, are expected to be shipped in a few days. They are to be called the "Admiral Sampson" and the "Admiral Dewey. The fifth car will be one of the present coaches in use on the steam road, which will be equipped as an electric motor car.

With these five cars, it is proposed to maintain a fifteen minute service between the city and Elm Grove. Each car will be equipped with a 140 horse-power motor, giving power sufficient to haul two trailers when desirable.

The machinery is being put up at the power plant, in the East End, at a rapid rate. The steam fittings are so arranged that the power capacity of the plant can be increased in the event that the cheaper fare and more frequent service booms traffic on the road.

THE WHELLING LINE.

The extensive improvements on the lines of the Wheeling Railway Company are fast approaching completion. The state fair grounds branch is now being operated with one car, giving a twenty-four minute service, which will, of course, be largely increased when there are doings on the fair grounds. During state fair, all cars from Wheeling, Bridgeport and Martin's Ferry will make the trip around the state fair loop, in order to set down fair visitors from all places on the road right at the gates.

The crossings and switches at Ohio and Penn streets, Island, having been completed, the construction gang is now at work on Ohio street, between Penn and Huron, puting down the new ninety-pound rails and practically reconstructing that part of the road. As soon as this improvement is completed, the men will move on to Martin's Ferry, where there is considerable construction work to be done.

There has been some delay in putting in the new machinery equipment at the Forty-second street power house, but it is expected the new power equipment will be ready for use before the middle of the month.
