Alexandria Gazette and Virginia Advertiser

LOCAL MATTERS.

The Weather Probabilities, April 7 1881.—For the Middle States, fair weather during the rest of Thursday, westerly winds, shifting to southwest and southeast, a slight rise in temperature, followed by lower barometer, threatening weather and rain or snow during Friday.

PRESBYTERY OF WASHINGTON.—The Presbytery of Washington, which commenced in Washington Tuesday night, continued its session yesterday, with Rev. Dr. Paxton as Moderator and Rev. C. M. Robinson Clerk.

Appropriations in aid of destitute churches in the District and Virginia were recommended to the Home Mission Board of New York. Rev. Drs. Sunderland and Weakoop, and Elders Quaif and Moore were chosen delegates to the general assembly, with Rev. Drs. Van Doren and Burkhart and Elders Coe and Frost as alternates. Hermon Church was selected as the next place of meeting.

The evening session of the Presbytery was enlivened by an interesting discussion on a resolution offered by Chief Justice Drake, of the Court of Claims, to expel Rev. C. B. Ramsdell from connection with the church. Mr. Ramsdell is the pastor of the church in which the Presbytery is being held. His offence is that he married a Catholic lady, the ceremony being performed by a Presbyterian minister in Chicago. Dr. Sunderland offered a substitute that the matter be left entirely with Mr. Ramsdell's own conscience. On these the debate proceeded, Revs. Kelly and Sunderland defending Mr. Ramsdell and advocating the passage of the substitute. Mr. Ramsdell being asked made a statement in his own defence. He said he admitted that his wife was a Catholic, and that she attended the Catholic Church and went to confession, though she frequently attended his church. A petition was read, signed by some members of the church, asking the Presbytery to remove him, giving as a reason that his marriage impoverished the church spiritually as well as financially. On the other hand it was stated that the church never was in better condition. Judge Drake contended that no Presbyterian had a moral right to marry with a Catholic. The matter finally went over until today when the Presbytery will vote on the question.

THE COLUMBIA STEAM FIRE COMPANY.—A regular monthly meeting of the Columbia Steam Fire Company was held last night, with H. McLean, president, in the chair, and John H. Snider secretary.

One active member was elected, and two applications for active membership were received and referred to the appropriate committee.

A communication from Chief Engineer John P. Dilover, of the Allentown, Pa., Fire Department, was received through Mr. Charles Lohr, and read, stating that several companies of the Allentown Fire Department proposed visiting Alexandria at an early day, and asking if it would be convenient for the Department here to receive them.

The communication was referred to a committee, consisting of Geo. N. Duffy, A. T. Ramsay, and Wm. H. Wood, with power to confer with similar committees from the other companies, and make all necessary arrangements for the reception of the visitors.

Thomas L. Webster, chairman of the executive committee, which has charge of the proposed new engine house for the company, reported progress, and stated that he hoped soon to see the company occupying a suitable and convenient house.

The meeting then adjourned.

DISAPPOINTED SPORTSMEN.—Two well known sportsmen went on a hunting trip across the Creek the other day and finding no game, they were returning home in disgust, when, on coming across the causeway of the bridge they espied what they supposed to be two fowl. Being willing sportsmen they told their dogs, and fired one, two, three and fired. As soon as the smoke cleared away they saw the game in the same place, and sorrowing they took their ramrods prepared to fire, and, to their joy, went out to get the game, when lo and behold! in their great haste, they found two wooden decoys. They now say they will never go duck shooting without carrying a pair of magnifying glasses.

THE GREAT FALLS MANUFACTURING COMPANY.—The annual meeting of the stockholders of the Great Falls Manufacturing Company was held to-day at the Mansion House. Nine thousand five hundred and ninety three shares were represented by holders of stocks and in man.

After the usual business, including reports of board of directors and treasurer, two propositions for the purchase of the company's property and rights, made by New York and London capitalists respectively, were submitted and referred to the board of directors for action.

The following directors were elected for the ensuing year: Henry S. Davis, John Trimble, Alex. B. Hunter, Mark C. Jones, O. D. Barron, Henry E. Davis, Chas. R. Abell.

INJURED BY THE EXPLOSION OF A COFFEE POT.—A novel accident, by which three men were quite badly injured occurred at Danville Tuesday last. A number of railroad men were seated around a stove, on which was a coffee pot, tightly closed, to prevent the escape of the fragrant flavor of the coffee within. While waiting for the coffee to boil, the young men indulged in pleasant conversation, and everything bid fair for a southern breakfast, when without a loud report the coffee pot burst, scattering boiling contents over the room, and badly scalding Mr. John Cresap, engineer and Mr. R. C. Crock, fireman, on the Virginia Midland Railway, both of this city, and a young man, a fireman on this road, living in one of the counties through which the road passes.

BARNUM'S GREAT SHOW.—Mr. Charles F. Mills of the Educational Department of P. T. Barnum's and the London Shows, was here to-day, and made arrangements with both the public and private schools of the city to attend the circus which will be in Washington on the 18th and 19th inst. The children are to be admitted either to the morning or afternoon performances for 25 cents, and by an arrangement with the ferry company, round trip tickets will be issued to them for 10 cents. The large number of animals with this show makes it one of the most attractive ones ever visited.

POLICE ITEMS.—Mayor Smith presided at police headquarters this morning, and disposed of the following cases:

John Hoby, for being drunk on the streets, and assaulting Policeman James Smith, was fined $25.

James Long and Geo. Brown, both colored, for disorderly conduct, were fined $5 each.

Ed Payne, colored, charged with the larceny of a lot of tobacco from Mr. Jerry Crilly, was committed for further examination.

THE STEAM TUG TEMPLAR.—The new steam tug Templar, built at Wilmington, Del., for Capt. J. C. Graham, of this city, which arrived here yesterday evening, is a handsome boat. She was built after the most improved modern style, 75 feet long, 18 feet beam and 8 feet depth of hold, with a high pressure engine, 18 inches in diameter, to which is attached a high pressure steam condenser. She was inspected today by a large number of river men who pronounced her first class.

FIRE.—The alarm of fire about 7:30 o'clock this morning was caused by the burning of the roof of a blacksmith shop on Duke street, between Alfred and Patrick, occupied by a colored man named Oliver Norris. The fire department was promptly on the ground, but neither of the engines went into service, as the flames were extinguished by some residents of the neighborhood. The damage was very slight.

CONSERVATIVE READJUSTERS.—A meeting of the Conservative Readjuster Club was held last night.

The only business transacted was the adoption of a resolution declaring that only the executive committee was authorized to represent the club in matters pertaining to the approaching primary election, and that said committee alone was empowered to confer with the conservative committee on all matters relating to the said primary.

After the election of several new members, the meeting adjourned.

CALL ACCEPTED.—Rev. W. S. Penick, pastor of the Baptist Church in this city, has accepted the call, mentioned a few days ago, tendered him by the High Street Baptist Church of Baltimore, and has placed in the hands of the officers of his Church his resignation to take effect the 1st of May. Mr. Penick has labored here with great success for seven years, and during that time has made a host of warm friends, who will regret exceedingly to part with him.

CONVICTED OF ASSAULT AND BATTERY.—James F. Burnett, who was on trial in the Circuit Court yesterday for shooting Geo. Edwards, having been found guilty of assault and battery by the jury, was this morning sentenced by Judge French to two months in the city jail, and to pay a fine of $300, his imprisonment to continue till the said fine is paid.

THE EPISCOPAL CONVENTION.—The Protestant Episcopal Convention of Virginia, with which all the Episcopal Churches in this city are connected, will meet in Danville in May next. At a meeting of the Vestry of Grace Church, last night, Mr. James F. Muir, was elected a delegate, and Mr. Phil B. Payton, alternate to said convention.

LOCAL BREVITIES.

Col. Archer and Mr. Avery, of Washington, accompanied by two gentlemen from the North were here to-day on business relating to the establishment of an iron furnace and rolling mill in this city. They examined the lot on Union street, near J. P. Agnew & Co.'s bloomery, and said a better location for the proposed furnace and mill could not be secured.

Fish sold at Fishtown to-day as follows: Shad $38 per hundred, herring $19.75 per thousand.

Mr. Isaac Kleinberg was, last night, elected President of the German Co-operative Building Association, No. 2, and 3 vice Mr. Rebh. Turner, who will leave for Europe Saturday next, resigned.

The remains of Miss Mary D. Whiting, a niece of Col. R. H. Dulany, who died at the residence of her mother, in Baltimore, after a long illness, Tuesday last, passed through here this morning for Loudoun county, where they will be interred.

[FOR THE GAZETTE.

A. Willard Hall's Exposure of Prof. Tyndall.

The gentleman in another State, as reported in the Gazette last night, who writes to a friend in this city, expressing to so kindly a manner his astonishment at my favorable opinion of Mr. Hall's book, is, I suppose, entirely misinformed about "the tube at Stansbury's." The history of that tube is this. After I published Hall's exposure of Tyndall, an admirer of Tyndall in this city got Mr. Stansbury to make a tube for him that he might verify Tyndall's experiment. Meeting Mr. Stansbury by accident he informed me that he had made such a tube. I told him I was glad to hear it, and would like to see and test it myself. He invited me to do so. This I did the next day. Others, admirers of Tyndall, came after I left, and tested the tube every way, trying to prove that the candle was extinguished by the pulse of *sound* conveyed to reach the tube, as Tyndall alleges, and not by the puff of air. But all in vain.

The disappointed admirers of Tyndall then told Mr. Stansbury that his tube was not like Tyndall's. Upon this Mr. S. wrote me asking me to tell him how to make the tube exactly like Tyndall's. In reply I sent him Tyndall's lectures on Sound with the place marked where Tyndall gives the experiment with a drawing of his tube. Mr. Stansbury then made a tube exactly like Tyndall's in every dimension given. This I tested as the former one with like result. If you put no smoke in the tube, and clap the books together as Tyndall directs, you can feel with your hand or check the puff of air from the tube. If you put the smoke of brown paper just inside the little end of the tube, the smoke rushes out the instant the books are clapped. So likewise when the whole tube is filled with smoke. And if you put the smoke in at the big end of the tube, as Tyndall did, and clap often enough to drive the smoke the fifteen feet of the tube's length it will then begin to rush out and continue to do so every time the books are clapped.

Now Tyndall says it is a pulse of sound and not a puff of air that passes through the tube and extinguishes the candle. "On clapping the books together, *no trace of this smoke is ejected from the other end. The pulse has passed through both smoke and air without carrying either of them* along with it." *Lectures on Sound, page* 12.

How, now, I ask, can that gentleman say, as he is quoted, "It (the tube) *does all* Tyndall says, no doubt," when it does nothing Tyndall says, but as I maintain holds him up to derision for drawing and publishing in an elaborate scientific work, an utterly untrue and absurd conclusion which any school boy can refute in two minutes.

The gentleman also commends the article of "A Layman" as "a very sensible and well tempered reply." Reply to what? To Hall's charge that Tyndall blundered ridiculously in the experiment? He said not a word as to whether the tube confirms or refutes Hall's charge. He only indulges in sarcasm at the idea that a dealer in stoves should be pitted against the world famed scientist in matters of difficult and delicate experiment. Well, nobody proposes this. But a maker of stoves can make an honest tin tube, and I think it likely that Tyndall got just some such man to make his. And then surely it is not a very difficult and delicate experiment to set a candle at one end of a tube and clap together two books at the other end and see whether the smoke and air come out or not.

My opinion is that "A Layman" is some one, perhaps a lawyer, who likes sometimes to try to make "the worse appear the better reason," and he was simply practising this a little for his amusement in this matter. But surely his article had not a shred of an argument for any one who wished simply to know the truth as to what the experiment with the tin-tube does teach.

As others may wish to try the experiment for themselves I will just add that the tube is fifteen feet long, three inches in diameter, but tapered at one end like a funnel, to five eighths of an inch.

WM DINWIDDIE.

COMMERCIAL.

ALEXANDRIA MARKET, April 7, 1881.—The market to day is strong and Flour is in fair request. The receipts of Wheat have somewhat increased and 1,420 bushels sold at 117, 118 and 120 for Fultz, 122 and 123 for mixed and 125 for fair Lancaster, no fancy being offered. PROFESSIONAL CARDS.

A CARD—It should be generally known that persons so unfortunate as to lose one or more of their teeth need not wait weeks and months for artificial substitutes and endure inconvenience, disagreeable changes in voice, facial expression, &c., but may have artificial teeth made before and inserted immediately after extraction of their natural teeth. By this mode a better adaptation, a more pleasant expression and a nearer approach toward preserving the natural harmony of the features are secured, and very much of the pain and difficulty experienced in learning to use teeth are also avoided. I have practiced this mode successfully for seven years, and having introduced it here, would be glad to refer any one interested to patients who know of it from experience. In treating the natural teeth my object is to preserve every one that time, patience and modern methods of treatment can save. The use of arsenic in destroying exposed nerves is condemned by the more enlightened of the dental profession on account of its turning teeth dark, inducing abscess and finally the loss of the teeth. The nerve pulp, which is the source of life to the teeth, should always be treated, when exposed, with a view to its restoration to health. I use no *cheap* alloys for filling; my fees are much less than are usually charged for the same class of work. Gold filling from $1 00 up; other work at proportionately low rates.
