Ambrotypes UNISON & FAY

WOULD respectfully announce to their friends and the public that they have entered into copartnership for the purpose of taking Ambrotype Likenesses in connection with Daguerreotyping. The Ambrotype is a new and essential style of picture taken on glass, and for delicacy of shade, tone and brilliancy are unequaled by any other style. To be appreciated they must be seen. Having obtained the Ambrotype process from one of the best practical operators in the United States, they flatter themselves that they can produce these pictures equal to any taken in this country.—They cost but a trifle more than a Daguerreotype, and are indestructible to the action of the atmosphere and cannot be injured by rubbing or washing. Call and examine specimens.

Instructions Given

In the Art of Ambrotyping and Daguerreotyping, on liberal terms.
