GOOSE NECK HOES.—We remember distinctly when there was no such tool as a goose neck hoe used in the cultivation of cotton. But now they are used almost exclusively. The reason assigned is that there were so many rattlesnakes in Georgia that when they would bite the old fashioned hoe handle, while the cotton chopping was going on, that the poison would cause the handle to swell and burst the eye of the hoe. Hence the goose neck hoe has superseded the old brace hoe.

A SUGGESTION.

LONGTOWN NEWS.

LONGTOWN, S. C., March 6.—We had the pleasure of assembling a few days since at the home of Mr. and Mrs. Saml. McCormick, and there found in store for us a rare musical, well rendered by one of the champion guitarists, our friend Dr. David M. Province accompanied by his gifted sister Mrs. Lynch, also on the guitar. This instrument was always a favorite with us—and especially on that occasion—as it yielded to the wonderful touch of the performers. We will also state that Mrs. Lynch, in conclusion, gave us some music on the piano to which she did full justice. Our visit was, unfortunately, brief, and the hours seemed entirely too short, or rather shorter than common. To lovers of music it is certainly a treat to hear them.

We were sorry to learn of the illness of our friend Mr. E. H. Harrison at Ridgeway, but at this writing he is reported better.

Another Skull Broken With a Rock. On Friday morning two hands, Willie Davis and Julius Emanuel, got into a dispute about which side of the wagon they would load with manure. It seems that they had been hauling out manure at the oil mill and had gotten on a different side from where he had been, and a short quarrel ensued in which Emanuel said, "stay where you are and hush your mouth, or I will take this plank seat to you."

He went on with his shoveling and the other fellow (Davis) came up behind him without saying anything and threw a stone, about the size of a tea cup. The sharp point in the stone broke a hole in the skull about an inch in size. Davis ran at once and has not been seen since. Some of the hands say he had the rock in his pocket. The doctor commenced to dress the wound at the mill, but finding it of so serious a nature, had the negro taken to his house. It is regarded as very serious.

Davis has served a term in the penitentiary for stealing a watch and seems to have an unsavory reputation.

A CUTTING SCRAPE. Defendant's Statement. On Saturday night Mr. Wm. Hedgepath at Mr. R. J. Stuart, near Mr. Stuart's store, in this county. The difficulty, it seems, grew out of an enquiry by Hedgepath as to who had given his brother whiskey. Mr. Hedgepath says that his question seemed to enrage Mr. Stuart, and Mr. Stewart asked him if he thought that he had given him the whiskey, and if he wanted to get on him in his own store, that he told Stuart no. Stuart said, "Get out of my store," and he says he went out, and that Stuart ordered him to get away from the big road. He told Stuart he would not go until he could get his brother. Stuart advanced to the road and asked him if he wanted him to kill him, to which he replied, "If you kill me, you will have to do it in the big road, for I am not coming in your store again."

Stuart said, "Get away from here." He replied, "I will when my brother is able to go, and not before." Stuart said, "If you don't leave this road, I will kill you," and he said he would as soon die now as anytime. Stuart went to the house and got his gun and advanced saying, "do you want me to kill you?" and defendant snapped the gun, but the gun did not fire. Stuart cooked the gun again, and I ran up to him and caught the point of the barrels and raised them upward and cut him across the gun. Mrs. Stuart and two negroes were trying to hold the gun to prevent Stuart from shooting and the negroes finally wrenched the gun from my grasp, and as I was going toward my brother, Stuart got the gun and fired at me one time. The gun was loaded with No. 3 shot. Mr. Tennant, and I met Stuart's son who had been hunting and as it was a new gun Mr. Tennant examined it, and knowing how it was loaded is why I feared it.

The doctor went to see Mr. Stuart and says he left him doing pretty well and his wound is not necessarily fatal. Mr. Stuart was setting up on Monday. Mr. Hedgepath was bailed in the sum of \$500. The affair is regretted very much in the neighborhood.

Children Cry for Pitcher's Castoria.

Fairfield County Has the Soil—As Good as North Carolina or Virginia.

On Thursday Mr. E. B. Ragsdale informed our reporter that there was a tobacco grower in town and his object was to interest some of our Fairfield farmers in tobacco raising. He had a letter of introduction from Mr. Thornwell McMaster, of Columbia, to Mr. G. H. McMaster, and Mr. Ragsdale had seen Mr. McMaster in Columbia before in reference to the matter of new enterprises, especially in farming, offered to procure a turnout and "we" offered to go along with the gentlemen, Mr. J. T. Pitts.

Mr. Pitts had heard that Mr. Wade Macfie had soil which was very suitable for tobacco culture and wanted to see it and see if he could interest Mr. Macfie and others. We reached Mr. Macfie's about the right time, as the hands were coming in from the field as we approached his place. THE NEWS AND HERALD man has a very fine ear for a dinner horn, natural, not cultivated. Mr. Pitts however seems to be the subject of a practical joke by some of the Columbia physicians, and is in the race against Dr. Tanner. He has been fasting for about seven weeks, has only eaten a piece of steak about 1 1/2 inches square, and then felt the evil effect.

After enjoying the midday meal, and enjoying equally as much the joke perpetrated on our North Carolina friend, we proceeded to search for the suitable place for the purpose. Mr. Pitts arrived at a field on Mr. Macfie's place which he pronounced as good as any in North Carolina, Virginia or Florence, S. C.

Mr. Macfie was uncertain at first as to whether he could undertake the matter this year, but in order not to lose any valuable time, he had Mr. Pitts lay off a space for the purpose of preparing it for a hot bed. Mr. Pitts measured off a hot bed large enough to grow plants for thirty acres of tobacco. Mr. Macfie will have the bed prepared at once, in the meanwhile Mr. Pitts has gone to Columbia to get the seed and to make arrangements to remain up here for two or three weeks. We went to see Mr. Thes. Andersen and Mr. S. W. Ruff and would have seen others but for lack of time. Mr. Pitts would like to get up two or three clubs in ten or twelve miles of each other so he could overlook them all and each club pay its proportion of his expense, etc.

He says that no man should experiment with less than six acres, for the tobacco from six acres will about fill a barn 18x20 and that it will be useless to build a barn for less than six acres. But he says three or four men can club together and build a barn, if they desire, and in that case three men planting two acres each could use the barn made for six acres. As to the expense of making the tobacco, he says it takes about \$8 for fertilizer, out an acre, or in round numbers about twenty dollars per acre to get the crop nearly ready for market, and that you can make shipment and draw enough money to finish the entire crop. So all the ready cash a man will need is about \$20 per acre, that is to put the crop near the finish. The lowest yield generally, he says, is 600 pounds per acre; it ranges from 600 to 1,200 and over. And the very lowest price is 5 cents per pound for scraps, but that the average is from 9 to 12 cents per pound for ordinary tobacco. The price always depending on the quality. Mr. Pitts says that most any land will grow tobacco in this county but that the finer the soil the better it is for the purpose; that they plant tobacco in North Carolina just like our farmers do the cotton, plant just such land as they have. He says that it is a crop that needs close attention and if a man plants it and don't give it close attention and expects to go to the field and reap a harvest that he will be very much mistaken, but that properly cared for it is the best money crop we can raise.

Mr. Pitts was a buyer for the American Tobacco Company and went to Florence, S. C., to buy, and there Mr. Albert Taylor, of Columbia, heard of him and procured his services. He worked the business for Mr. Taylor one year and the next year for Mr. Frank Hampton, and refers the gentlemen in this county to either of those above named.

Mr. J. D. Pitts, the tobacco grower, came up on Monday to prepare the hot bed at Mr. Wade Macfie's. We introduced him to several members of the Waterere Prize Club, and one of its members has agreed to prepare a hot bed. He will be in the Waterere section on Friday and will visit the Jackson Creek club on Saturday. Certainly we should do as well as others to do in this State.

Mr. Pitt says he will refer any one to Mr. Albert Taylor or Mr. Frank Hampton, of Columbia. He says Mr. Taylor cleared \$900 on fifteen acres. How does this compare with cotton? If you wish to correspond on the matter address THE NEWS AND HERALD.
