Coleman's London Mustard.

THE attention of Dealers and Consumers is particularly called to the superior quality and low prices of the above Mustard, manufactured by Messrs J. & J. Coleman, London, now the most extensive Factors of Mustard in Great Britain.

Four different qualities are manufactured, which are packed in Kegs, Canisters, Tin Foil and Bottles, and each package is warranted full weight. Tins 4, 6, and 10 lb. Tin Canisters are especially adapted to the South, as they effectually exclude dampness and air, thus preserving the flavor in all its strength.

STAR AND ADAMANTINE

CANDLES.

THE undersigned continue the manufacture of their celebrated Candles, of the different sizes, four, five, six, and seven to the pound.

All Warranted Full Weight.

Consumers will find it greatly to their interest to use these Candles in preference to those that are sold by COUNT.

Many Candles that are really seven to the pound, are branded and sold as sixes, making a difference against the consumer of five pounds to the box. The variation usually made in the price is not proportional to this difference, as the following statement shows:

A Box of Sevens contains 247 Candles, and is sold for 35 pounds, which is the actual weight.

A Box of 14 oz., or "Short Weight Sixes," contains only 240 Candles, SAME SIZE AS SEVENS, and is sold for 40 pounds.

Supposing the price of the former to be 20 cents, and the latter 18 cents, there will be a difference of twenty cents in price and seven Candles in consumer's box, in favor of the full weight Candle to retailers and consumers; and this will be increased five cents per box for every cent advance in price.

These interested would do well to examine the subject for themselves. PROCTER & GAMBLE,

MALT WINE.

McKnight's Malt Wine.

HE subscriber offers for comparison with any brand of Malt Wine, his MALT WINE.

His confidence in the superiority of his superb extract of MALT and HOPS was arrived by the universal reputation it has already attained in the Eastern and Middle States.

Its production is the result of 30 years' practical experience combined with the facilities afforded by one of the largest breweries in the United States, containing all the latest improvements, adopted at a recent personal inspection of the British Breweries, with the express view of introducing a

STANDARD AMERICAN MALT LIQUOR.

Sick Babies Wanted

THE numerous deaths among young children, show that the powerful medicine usually prescribed for them, is not suited to their sickly condition. The best Pedestriage in the world for children from one day to five years old is the

Children's Panacea,

Prepared by the Grafenberg Company

The true worth of this extraordinary and valuable Medicine, can never be set forth in words, but it can be felt and appreciated by by mothers, whose children have been snatched from death by its use.

The celebrated Dr. Williams who has devoted a life to study, has analyzed this remedy, and says the Grafenberg Children's Panacea, is compounded with expect I refer one to the immature state of the nerves, blood vessels, glands and bones of the child's body. Should a mother neglect to procure herself with this invaluable remedy, she may chance to behold death claim her children and have no one to blame but herself. It is a certain cure for all diseases of childhood, and receives as it deserves universal appreciation. Dr. Martin, of South Carolina, says: "I think it best general medicine for infants and children." Dr. Watts, of New York, writes: "In all diseases caused by teething it is a certain remedy." Dr. Colson, of Illinois, says: "In cases of cholera it works with marked success, also in Measles, fever from teething, diarrhoea, pains in the stomach, bowels, &c. I should be guilty of great neglect did I not recommend it in the highest terms."

PHONOGRAPHY

AND

PENMANSHIP.

MR. DOLBEAR,

HAS now accomplished his object, in showing to the citizens of Nashville that Phonography is easily learned, even by small children. Many of his pupils are now able to follow a moderate speaker, and are rapidly increasing the speed of their writing. The difficulty in accomplishing this has been doubly increased by the designing and unscrupulous who have sought to bear upon pupils in the shape of misrepresentation, ridicule, &c., &c., in quarters from which better things were to be expected. [Tax payers and citizens who have children to educate we did do well to look into the what and the way of this chapter.] Never have a community been more grossly deceived in regard to the nature and leading features of Phonography. Citizens who have not the leisure to investigate the subject are not aware that they greatly lessen the labor, and save several years of time, in the education of every child, and that they awaken the intellectual faculties to an extent attained by no other means, and with delight to the pupil—that they have been examined, tested *practically* by hundreds of the most able school committees, teachers, superintendents and educationists in the country and in England, and reported to the highest terms of approval, while it has enabled them to see the astonishing effect of a mode which raises the minds of so many children, and fills them with learning. Such are the effects of this mode of teaching, in developing the minds of children, that they are often regarded as prodigies in intellect, whereas it is the result of teaching simple truth instead of absurdity.

Mr. D. has not been charged merely for the regular course of lessons in Phonography, making no charge for attending to the purely practice in reading and writing after the pupils with the art were learned. He will continue to receive pupils on the same terms till the 20th inst., after which the terms for the regular course of lessons will be the same as heretofore, but a monthly charge will be made for attending to practice of the pupils after the course is completed.

N. B.—All pupils who have not completed their course of lessons, are requested to do so without delay.
