ADVANCE WAS VERY UNEVEN

Market Retrieves Itself From Temporary Set-Back and Resumes Forward Movement.

RISE NOT COMPREHENSIVE

Event of Day Was Jump in Discount Rate of Imperial Bank of Germany.

(By Associated Press.)

NEW YORK, October 11.—The stock market once more retrieved itself from a temporary setback to-day and resumed the advance. The rise was not even and not entirely comprehensive. The greater part of the trading and the movement being congested in a few prominent stocks. The firmness in the remainder of the market was due largely to sympathy with the few strong stocks, but the hardness of the market was none the less clearly demonstrated. There were large buying and substantial advances in Union Pacific, Atchison and St. Paul. The Gould Southwesterns were inclined to hang back, apparently affected by yesterday's accident on the Missouri Pacific and owing to dissatisfaction with the earnings statement, contained in the yearly report of the Wabash. United States Steel preferred was subjected to early pressure and then rallied, but met sufficient offerings at yesterday's high price to stop its advance. New York Central's 2 1-2 point advance was of only moderate influence on other Eastern railroads. Reading was sold to realize, and Erie was hurt by consideration of its annual report, which was circulated during the session. Brooklyn's rise was attributed to good current earnings. The events of the day in the world's financial markets was the advance from 4 to 5 per cent. of the discount rate of the Imperial Bank of Germany, after having maintained the former rate since June, 1903. Foreign exchange hardened here in respone, and the continental exchanges moved against London, where discounts hardened and the price of gold was advanced. The action of the German Bank is not clearly understood, and lead to surmises that another Russian loan is being prepared for. Our stock market closed somewhat irregular and with best prices not fully maintained, in spite of a late bidding up of members of the Southern group. Bonds were firm; total sales, par value, $5,370,000. United States Old 4's advanced 1-8 per cent. on call. The total sales of stocks to-day amounted to 853,100 shares.

MONEY AND EXCHANGE.—CLOSE: Money on call, steady, 2@2 1-4 per cent; closing bid, 2; offered at 2 1-4. Time loans, firm; 60 days, 3 1-4@3 1-2 per cent; 90 days, 3 3-4@4; six months, 4.

Prime mercantile paper, 4 1-4@5 per cent. Sterling exchange, firmer, with actual business in bankers' bills, at $485.40@$485.45 for demand, and at $483.15@$483.20 for 60 day bills. Poster rates, $484@1-2 and $486 1-2. Commercial bills, $482 3-4@$482 7-8. Bar silver, 57 3-4. Mexican dollars, 45 3-4. Government bonds, firm. Railroad bonds, firm.

Wall Street Gossip.

(Special to The Times-Dispatch.)

NEW YORK, October 11.—At the opening, the stock market was plainly influenced by the government crop report and all the stocks directly affected by corn conditions advanced easily. There was no very large amount of commission house business, but traders for the most part were bullish.

Missouri Pacific was opened up with the rest of the list on the corn crop, but sold off almost immediately. It looks as if the bull movement, which is merely a combination of a few active street traders had not been aware of the recent reduction in the holdings of the Standard Oil and Gould interests.

Copper showed some early strength with a fair amount of buying more or less of a trade character. Traders thought there was some good long stock for sale on advances.

United States Steel preferred was strong, showing, in the opinion of some operators, a resumption of Keene manipulation, although there has been some very good buying in the past few days.

Dick Bros. & Co., were early buyers of Reading. They say in their letter to their customers that "its advance to the new high price is accompanied by persistent rumors that important readjustments are being made in the affairs of several anthracite coal properties."

A surprisingly large number of traders seem to have thought that enthusiasm over the government crop report would make good market to take profits on. The supply of stock of this character was quite noticeably large.

In the first hour the market did not advance with such confidence as had been expected, and was under pressure of stock, especially from the western houses. Attempts to rally by manipulating special stocks were unsuccessful. Traders were bidding for stocks in places, but did not like the selling.

There was some buying orders in the market which were variously described as "Standard Oil buying" and "Rockefeller support," according to the position of the trader reporting the purchases.

After midday the market showed a good deal of strength, although it was not broad enough to permit of the advance of more than two or three issues at a time.

Union Pacific and St. Paul were selected, and some of the other stocks followed, rather hesitating where any selling developed.

Harriman & Co. were given the principal buying orders in Union Pacific. The traders who took stock seemed anxious to make it sell as high as possible on their purchases. The buying did not look altogether convincing, although some orders seemed to have been sent round by London.

At the close individual advances were for the most part retained, and the tone was generally fairly good, although the net improvement on the day was not great. Gains were, in fact, confined to a very limited number of stocks.

BALTIMORE STOCK MARKET.

BALTIMORE, MD., Oct. 11.—Seaboard Air Line common, 15¾@16¼; do. preferred, 32@32½. Atlantic Coast Line common, 134@135.

COTTON MARKETS.

NEW YORK, Oct. 11.—The cotton market opened steady at a decline of 4@12 points, the loss being in response to easier Liverpool cables, excellent weather and the continued heavy movement to the ports. But there did not seem to be a great deal of cotton offering at the break, and following the call the market was slowly rallied by moderate bull support and covering. It was generally expected that the weekly Weather Bureau rport, issued by the New Orleans station, now that the bulletin from Washington has been discontinued for the season, would make a bearish showing, but in spite of this the continued talk of holding in the South and a fair inquiry for spot cotton in connection with the outspoken bullishness of the Southern market leader prevented free selling, and bid mid-day prices were net 6@7 points higher. At this level the weekly report was read and proved very favorable as to climatic conditions, although the statements as to the large proportion of the crop already picked was taken by the bulls as favoring the idea of a moderate production. The effect of the report was bearish, however, and after it was read prices gradually worked off to about the low point of the morning. They were rallied slightly just before the close, and the market was finally steady at a net loss of 2@5 points. Sales were reported of 250,000 bales, according to estimates. Trading was again largely professional, but it seems that wire houses with Southwestern connections were getting a little more business on the long side of the market, and the news from this source was very bullish. Port receipts for the day were very heavy, but exports, too, were large, and the total clearances so far for the season amount to 1,111,290 bales against 668,122 bales for the same period last year.

Receipts at the ports to-day were 84,836 bales against 99,236 last week and 63,687 last year. For the week 400,009 bales against 397,869 bales last week and 299,519 last year. To-day's receipts at New Orleans were 21,495 bales against 11,281 last year, and at Houston 27,751 bales against 21,000 last year.
