SHARP REACTIONS IN STOCK MARKET

Liquidation on Street Which Looks Like Closing Out Loans.

GENERAL LIST IS WEAK

Securities Hit Toboggan, and New Low Records Are Made.

BY BROADAN WALL.

New York, November 10.—Liquidation that looked like the closing out of loans brought sharp reactions in to-day's stock market. Pronounced weakness in the general list developed with noticeable pressure in stocks of the better grade. St. Paul dropped from 85¼ to 83¾, the lowest price since the panic of 1907. Northwestern, Delaware and Hudson, Illinois Central, all recorded losses of from 1@1½ points. Southern Pacific made a new low record when it touched 93, and New Haven sold at 127½.

The so-called "Reid stocks" were under particular pressure. Lehigh Valley fell over 4 points with unusually heavy transactions for this investment issue. The earnings of the company are highly satisfactory, and there is apparently not the remotest danger of any decrease in the dividend rate.

American Can fell 3 points, and Rock Island preferred sold at 38¾, on rumors from abroad of a further drop in the price of copper metal. Amalgamated declined to 67¾. The minor copper shares weakened fractionally.

United States Steel was a pillar of strength in a weak market that bordered on demoralization. The stock opened at 54¾, sold at 53¾, and recovered to the opening price.

Publication of the tonnage statements showed orders on hand October 31 of 4,509,908 tons, a decrease of 499,000 tons from September 1. These figures were about as expected, and a rally followed their publication.

United States Rubber issues fell sharply, the common to 51 and the preferred to 94½. It seems hardly probable that the public will subscribe to the new preferred shares at par with the old stock selling at a discount. Losses of from 1 to 4 points in the inactive issues were numerous, and although there was a rally in the late trading, when traders began to cover their shorts, the tone of the market was distinctly feverish.

Rumors that the trainmen would receive an award of a 10 per cent increase furnished additional helpful news.

Taxes have gone up by leaps and bounds, capital is practically unattainable, and the established product, transportation, is still sold on the old terms.

News in Mexican situation was as confusing as ever. Foreign markets were quiet, and displayed little inclination to trade in our securities.

Estimates of the corn yield, furnished by the government, raised the estimate 99,000,000 bushels over the figures of a month ago.

Foreign exchange was weak, prices ruling at 4875 for sight drafts on London. With call money 4 per cent higher there is no inducement for bankers to put in applications for the yellow metal.

Investment stocks are in many cases selling at bargain prices. A continuation of liquidation will furnish further opportunities to the discriminating investor. Steel common, selling at 53, carries a quarterly dividend of 1¾ per cent, which comes off December 1. This stock is considered an attractive speculation by some of the oldest commission houses on the Street.

New York, November 10.—Quotations were scaled down all through the stock market to-day. It was the severest setback of some time, with losses among representative stocks—Reading 4 points at the lowest of the day. The amount of business was small in proportion to the extent of the movement, and the general absence of bear support was disquieting to holders. Even more significant was the evidence of genuine liquidation, which was written all through the record of the day. Conservative investment stocks, like Delaware and Hudson, Consolidated Gas, Louisville and Nashville and American Telephone were sold at concessions. In many cases prices reached the lowest points since the slump of last June, and in a number of stocks, including Atchison, St. Paul, New Haven, American Telephone and Rubber, low marks for the year were set.

Belief that a crisis is approaching in the Mexican situation was the foremost factor in influencing the market. United States Steel's monthly statement of unfilled tonnage was considerably poorer than had been expected. For the first time in nearly two years unfilled tonnage fell below the 5,000,000 mark, the decrease amounting to more than 499,000 tons during the twelve months. From the copper trade came similarly discouraging news.

Bonds were weak, with severe declines in some issues. Total sales, par value, $1,560,000. United States bonds were unchanged on call.

New York, November 10.—Money on call easier at 3@4; ruling, 3½; closing, 3@3½. Time loans, easy; sixty and ninety days, 5; six months, 5@5½. Prime mercantile paper, 5@5½. Sterling exchange steady; sixty days, $4.86½; ninety days, $4.85½; Commercial bills, $4.84½. Bar silver, 67½. Mexican dollars, 48. Government bonds steady; railroad bonds weak.

COTTON MARKETS.

New York, November 10.—After breaking into new low ground for the movement the cotton market to-day rallied on covering and trade buying, with the close firm at a net advance of 6 points on November and of 2@4 points on later deliveries. There was a renewal of Saturday's selling movement early, but offerings were well absorbed below 13c. for the spring months, and while trading became less active the market ruled very steady later in the day. Liverpool seemed to take a less bearish view of Saturday's ginning figures than had been reflected in the market here at the end of last week, and the local opening was steady at an advance of 2@9 points in sympathy with steady calls. There was considerable covering as well as some fresh buying, and active months sold 8@10 points net higher right after the call, but offerings were heavy on this bulge, and the market soon weakened.

There was Southern selling as well as a renewal of liquidation, under which prices rapidly eased off until active months were about 2@7 points net lower. January contracts broke to 12.86, or practically 1c. under the recent high record, but around this figure and 12.96 for March, there was a good demand, much of which appeared to come from trade sources.

As the market rallied recent sellers began to cover, and active months sold 21@24 points net higher during the late trading. The bulk of selling was supposed to be in the way of liquidation, while trade interests and shorts were considered the best buyers.

Private cables from Liverpool said the market there had been steadied by increased demand from English and Continental spinners, and local spot people said that domestic spinners had been calling considerable cotton on the decline.

The weather South was somewhat unsettled over Sunday, but not enough so to create any fresh sentiment regarding the probable movement of the crop.

Cotton futures closed firm.

New Orleans, November 10.—The cotton market had a very steady tone to-day, although the ring was quiet and trading was not heavy. The bear element early was aggressive, and prices responded to pressure from that source. Later, on small crop talk from prominent traders the market steadied and the decline was replaced by an advance. The opening was steady at a rise of 6@8 points. Cables were higher than due. First prices were the highest in the early trading, as bears were inclined to sell on the favorable weather map, no rain being reported in the cotton region over Sunday. There was also much large crop talk in the early trading, which had its effect on sentiment. Soon after the call prices were 7@8 points under Saturday's close. Telegrams from the interior saying the crop was gathered in many sections stimulated fresh buying, and the market rose. In the afternoon most decided statements from large traders to the effect that this crop would not turn out over 14,500,000 bales followed. At the highest the most active months were 14@16 points over last week's closing level. The close was steady at a net gain of 12@15 points. Spot cotton, quiet at ⅛c. off; middling, 13.5-16c. Sales, on the spot, 425 bales and none to arrive. Cotton futures closed: November, 13.22; December, 13.30; January, 13.32; March, 13.49; May, 13.46; July, 13.48.
