SCHOOL BONDS TO BE TALKED TODAY

THE LUNCHEON TODAY IS IN THE HANDS OF THE SCHOOL MEN.

EVERYONE SHOULD ATTEND

It is the Most Important subject to Tulsa's Welfare at This Time

[illegible]

The proposed bond issue will be the subject discussed today at the luncheon which is to be held in the Y. M. C. A. parlors, after which a committee will go from the city school superintendent, J. H. Starr will also make a few brief remarks.

Superintendent Cunningham, who is in charge of the program for the day, has, and yesterday that every man present at the luncheon would be given an opportunity to express his views on the school bond issue.

"We want to know just how the people feel about the matter," said Mr. Cunningham, "and I do not believe the people today will do an illogical one."

There are now a few of the reasons Tulsa needs a new high school building and why we need the bonds. It is necessary that the bond issue be approved.

There are now more than 1,600 students in the high school, and eighty grades of the city schools, which means that within three years there will be about 2,000 students in the high school. It is estimated by the new high school building committee that each school student requires a floor space of 12 feet, and that the present building was not intended to accommodate more than 1,000 students. The school rooms now contain more than 1,600 students, and there are 225 expected in the high school. Yesterday the high school enrollment totaled 175, at least a hundred more than can be comfortably housed in the present building.

The new building now has 300 students, which is impossible to enlarge the manual training, domestic science and other special rooms sufficiently to accommodate the increased attendance of students. The school committee, of which Mr. Starr is chairman, believes that at least [illegible] should be added to the high school building, and that the bond issue should be for $[illegible].

Speaking over telephone, which is an unusual occurrence, as usually he is too busy to talk, Superintendent Starr said: "I am very much in favor of the proposed bond issue. I believe it will be for the good of the city. I will also make a few brief remarks."

MOTHER SEEKS ARREST OF SONS MURDERER

NEARLY 70 YEARS OLD, MRS. HENNESSY MAKES PITIFUL APPEAL TO OFFICERS

Tottering under the weight of nearly 70 years, Mrs. [illegible] Hennessy, mother of A. C. Hennessy, who was killed several weeks ago at Tecumseh, Okla., appeared at the police station last night to seek the counsel of Harry F. Singe, Bertillon expert, in regard to the best method to pursue to bring about the capture of the Winter brothers, the slayers of her son.

Tears flowed down her furrowed cheeks as she related between sobs that shook her aged frame, the details of her son's murder. Although always in good health and energetic prior to the fate of her son, Mrs. Hennessy appeared last night feeble and sickly wearing a black dress and an old fashioned black cap covered with a thin veil of the same color. The aged lady presented a pitiful sight.

She conferred with detective Singe for almost two hours.

NEW TYPE OF RIVER CRAFT.

Low Rakish Packets Replace Prototypes of Lee Line Boats on Ohio.

Wheeling Register.

With the composition of the government dams on the Ohio river, all of the present day river packets, which bear some of look to other days of the Robert E. Lee, Natchez and other famous lush model liners of the ante bellum times, will be replaced by fast, speedy craft driven by crude oil engines.

Already this boats are being built in the east and their influence is being felt. The new type of load has proved to be the most pronounced improvement, it is said, on river craft since the war. While teh fashion has been longer in coming along all other lines of improvement in river craft has been in view. Now, however, it is said that the craze up road has come to stay.

Of course, some of the old river men whose memories are associated with the jackets with their texas cabins and lush smoke funnels, will hate to see the change, for something has to give way before progress.

The new craft, it is said, has many advantages over the present passenger and freight packets. With the crude oil engine, all of the space taken up by the boilers on the packets can be utilized for freight. The engines will develop 200 horse power and 12 miles to the hour, loaded. The draft of the boats will be greatly reduced, and the texas cabins and smokestacks will be no more.

The boats will be low and rakish, built for comfort and speed. Instead of one wheel in the rear there will be two, both independent of each other, which will make the boat very easy to handle. Practically all smoke will be done away with. It is estimated that twenty-five tons of freight can be carried a mile at a cost of but one cent, figuring on the present crude and lubricating oils.

COTTON

Prices Fluctuated Irregularly.

NEW YORK, Jan. 26.—Cotton was quiet today and prices fluctuated irregularly within a range of 8 to 15 points, closing barely steady, net unchanged to 2 points higher. Buying orders at the opening were probably attracted by Saturday's rally and reports of an active southern spot demand at the week's low prices. Prices were steady at a partial advance of 5 points and active months sold $ to 8 points net higher right after the call, to about 17 to 20 points above Saturday morning's low level. Buying was encouraged by the steady showing of Liverpool and Indian spot news, while the favorable view of general trade conditions was followed by some comment by reports of increasing activity in the steel trade. There was comparatively nothing on the advance, however, while buying proved far from aggressive, and prices soon eased off under scattered selling which appeared to come largely from local sources.

New York Futures.

GRAIN

Underselling the United States.

CHICAGO, Jan. 26.—Evidence that Australia and Russia were underselling the United States had a bearish influence here on the price of wheat. Largely in consequence the market, although steady at the close, sank half to half ⅞ cents lower compared with Saturday night. Each of the other principal staples, too, showed a net decline. Corn ⅛ to ⅛@⅜ cents; oats ⅛@¼ and provisions 5 to 22½.
