OKLA. PRODUCING LESS THAN 300,000

For the first time in many months the actual production of oil in Oklahoma is less than 300,000 barrels and this in spite of the fact that the Prairie is still enormously running to per cent of the 600,000 wells with which it is connected. Indications though the time were about here to be doing all the oil again and advance the price.

The Cushing field in its entirety is producing between 120,000 and 125,000 barrels per day and this is steadily declining, with not nearly that amount being shot this week.

The fields in the state outside of Healdton and Cushing are probably making about 115,000 barrels of oil per day, but this figure could probably be augmented a little were all the oil run, as many wells are shut down on top of the sand.

The Healdton field is somewhat of a problem, with estimates in some cases ranging as high as 70,000 barrels, but the figure of 50,000 barrels will easily cover the total production.

These figures give a total of 285,000 barrels being produced each day in Oklahoma, and with Kansas added on, will only bring the total to a little over 300,000 barrels. The loss in Mid-Continent field has produced in many months.

Kansas is actually producing about 25,000 barrels a day, although it is likely that this Kansas production will be increased to 40,000 in a few weeks as some of the wells in Augusta and El Dorado can be drilled in shortly, as nearly every company up there with production is building tankage.

However, it is believed that the increased production in Kansas will hardly more than offset the decline in Oklahoma. Taking these figures as a whole, it is hard to see how the present unnatural conditions can last very long, and, in fact, it is already apparent to the observing man that the end has about been reached.

OFFERED $400 A BARREL.

RINGLING, Okla., Sept. 8.—The rumor recently circulated among oil regions of the middle-west that Healdton crude has gone begging at $250 a barrel is discredited by A. R. McLennan, secretary of the Thirty-One oil company, one of the heaviest producers of the northwest end of the Healdton field.

"Not a week has passed in three months," says McLennan, "that independent operators of this field have had had an opportunity to sell, and the price offered has never gone under $400 a barrel. That was offered this week. We could have closed a trade today on that basis. It is foolish to believe that Healdton crude has been sold to $250 a barrel when the big buying companies can't get what they want for $400. One of the biggest independent operators of the field just had a standing offer for three months at $400 a barrel and to sell at that price would net him over $2,000,000."

AT BRISTOW.

Longfellow and others are rigged up and waiting on water to run out in the southeast of the southwest of 8-17-8.

Anderson and others have a rig up for their test in the northeast of the southeast of the southwest of 22-17-8.

The test of Joe Abraham in the southeast of the northeast of the southeast of 8-17-9 is shut down at 1,720 feet with a caving hole in a sand found at 1,690 which had a showing of oil and water.

WEST OF OKMULGEE.

The Wolverine Oil company test in the southeast of the northeast of the southeast of 22-18-10 is drilling for 650 feet.

The Carter Oil company test in the southeast corner of 22-18-10 is drilling at 210 feet.

The Carter Oil company is drilling at 600 feet in its test in the southwest corner of 24-18-10.

The Carter Oil company and Downing test in the northeast corner of 26-12 is has casing on the ground and a rig up.

AT PUMPKIN CENTER.

The Cosar Oil & Gas Co. No. 6 on the N. Cosar farm in 7-18-14 is dry and abandoned.

The Quaker Oil & Gas Co. No. 5 on the E. M. Weaver farm in 18-18-11 is dry and abandoned.

The Sinclair Oil & Gas Co. No. 1 on the C. Tahlequa farm in 9-18-11 is good for 10 barrels.

IN THE OSAGE.

The Manhattan Oil company No. 11 on lot 284 in 21-24-11 is making 4,000,000 feet of gas.

The Prairie Oil & Gas Co. No. 22 on lot 246 in 30-22-11 is making 180 barrels.

The Total Oil company and others No. 12-D in 8-23-8 is making 20 barrels.

AT COMMANCHE.

The National Oil & Development company test in the northeast corner of 26-2 south-7 west got a dose of water at 2,685 feet and is being abandoned.

The Pittsburgh Oil & Gas Co. has a machine in for a test in the northwest of the northeast of 30-2 south-8 west.

IS ONE OF LEADERS IN NEW OFFENSIVE

GEN. BRYAN T. MAHON, Commanding the British.

IN ARKANSAS.

FORT SMITH, Ark., Sept. 8.—The Clear Creek Oil & Gas Co. No. 10 gasser on the Mill's farm in 20-9-30, Crawford county, a half mile from Kibler, which had been burning since Saturday afternoon when it was struck by lightning, was put out with steam yesterday.

A large iron hood was put over the mouth of the well and a bank of mud was thrown up around the hood and all openings were plugged with the same material to shut out the air. A string of 10-inch casing, 160 feet long was attached to the hood to carry off the gas. A big swedge nipple was placed on the casing at the well carried the gas into an elbow and thence into the casing. At the point where the greatest amount of gas escaped around the casing a second string of casing was placed to carry off the gas.

When the hood was well banked with mud three two-inch lines of steam from two boilers and a stream of water under extra high pressure from a donkey engine were turned onto the hood. At the same time six men hailed water from ten barrels on the hood. Within 20 minutes the fire was snuffed out.

No effort will be made to remove the hood and permit the gas to resume its natural course of flow until the rig and derrick are rebuilt. The derrick was destroyed by the fire six minutes after the lightning ignited the gas last Saturday. When the derrick is rebuilt the work of drilling in the well will be resumed. The well was brought in a week ago Thursday with a capacity of 17,000,000 feet and at the time it was struck by lightning it lacked but six joints of tubing to be shut in.

There are 2,250 feet of tubing in the well, the section farthest down hanging 145 feet from the bottom of the hole. As "elevator" that held the casing at the mouth of the well withstood the terrific heat of the fire. Had the "elevator" which is made of iron, burned in two, and the casing dropped the damage would have been far more severe.

The company began moving in timbers late yesterday for the new derrick which will require about two days to build. It is expected to have the well shut in by the first of next week.

AT VERA.

The Kansas Natural Gas company test in the northeast corner of the Jesse Chandler farm in 17-23-14 got the sand at 1,260 feet and five feet in is showing for 25 barrels.

AT SPARKS.

The Baltimore Oil & Gas Co. has made a location for a test in 23-13-3 east.

The Oklahoma Star Oil company is building a rig for a test in 1-12-4 east.

AT EUREKA, KAN.

Tom Bell and others have made a location for a test in the southwest of the northwest of 15-27-11.

AT CASTLE.

The Cosden Oil & Gas Co. test in the southwest corner of the southeast of 20-12-9 is drilling at 650 feet.

The Prairie Oil & Gas Co. is drilling at 2,460 feet in its test in 24-12-9 after getting a water sand from 2,309 to 2,340 feet.

AROUND HEALDTON.

The Magnolia Petroleum company test on the Emmitt Chase farm in 21-3-3 is drilling at 2,300 feet in a bad hole.

The Producers Oil company test in 21-4-3 is drilling in a water sand at 1,815 feet.

Robert Watchorn's test in the northeast corner of 7-4 south-2 west is drilling at 1,280 feet after getting a dry sand from 1,235 to 1,265 feet.

The Ridenour-Baker company is drilling at 250 feet in its test in the northwest of the southeast of 13-4-3.

AT BROKEN ARROW.

Arduzzone and Braden test in 22-13-15 is 11 feet in the sand and showing for a good well, with 900 feet of oil in the hole.

The Edgar Oil company test in 32-18-13 in the northeast of the northwest is on top of the sand.

Webster and others have made a location for a test in the southeast of the northeast of 22-18-15.

The Laurel Oil & Gas Co. is rigging up for its No. 4 in 29-18-15 and No. 3 has been shut in as a gas well with which to develop the lease.

AT BOYNTON.

Bial and others No. 5 in 21-14-14 is showing for a ten-barrel well in the 1,100-foot sand.

Niles and Winemiller No. 8 on the Solomon farm in 21-14-16 got the sand at 1,549 and four feet in filled up 500 feet with oil.

The Navajo Petroleum company test in 18-14-16 is showing for a very small well after a shot.

AT BROKEN ARROW.

The Edgar Oil company is spudding in for a test in the southeast of the southwest of 1-18-14, offsetting the nice well of W. P. Tomson.

The Carter Oil company has made a location in 12-18-14 offsetting Tomson on the south.

AT NOWATA.

Beasley and others No. 4 on the Overfelt farm in 23-29-15 is making 75 barrels and No. 5 is good for 60 barrels.

Schartzer brothers No. 6 on the A. A. Flint farm in 23-29-17 is dry and abandoned.

AT BARTLESVILLE.

The Prairie Oil & Gas Co. No. 3 on the Mary Harrell farm in 24-26-12 is good for 40 barrels.

Crawford and Miller No. 7 on the J. R. Hamilton farm in 32-27-13 is dry and abandoned.

AT STONE BLUFF.

The Sinclair Oil & Gas Co. No. 3 on the Reynolds farm in 31-17-13 is making 5,000,000 feet of gas on top of the sand, but will not be drilled in until some tankage is built. Number 2 is making a good 600 barrels.

AT HASKELL.

The test of Hazlett and Price in 31-15-16 got the sand at 574 feet and is showing for a nice gas well.

Chase, Irvan and others test in 7-15-16 is drilling at 1,107 feet.

AT DEPEW.

The Monitor Oil & Gas Co. test in the northeast of the southwest of 6-15-7 is shut down at 2,680 feet with a caving hole.

AT LAWTON.

Kinsley and Jones have a rig up for a test in the southeast of the northwest of 13-1 south-10 west.

AT ATLEE.

The Northfleet Oil company is drilling at 1,150 feet in its test in the southwest of the northeast of section 9-5 south-4 west.

AT MARIETTA.

The Alta Oil company test in 8-7 south-1 east is drilling at 1,500 feet with a rotary outfit.

AT LEBANON.

Coombs and Rudore are drilling at 1,500 feet in the northeast corner of of the southwest of 5-7 south-4 east.

AT FIRE.

The Oklahoma-Texas company test in 9-7 south-2 west is drilling in top of a sand at 1,950 feet with a showing of oil.

AT MINLOCK.

The Dundee Petroleum company and 1916 Oil company test in 9-6 south-6 east is drilling at 670 feet.

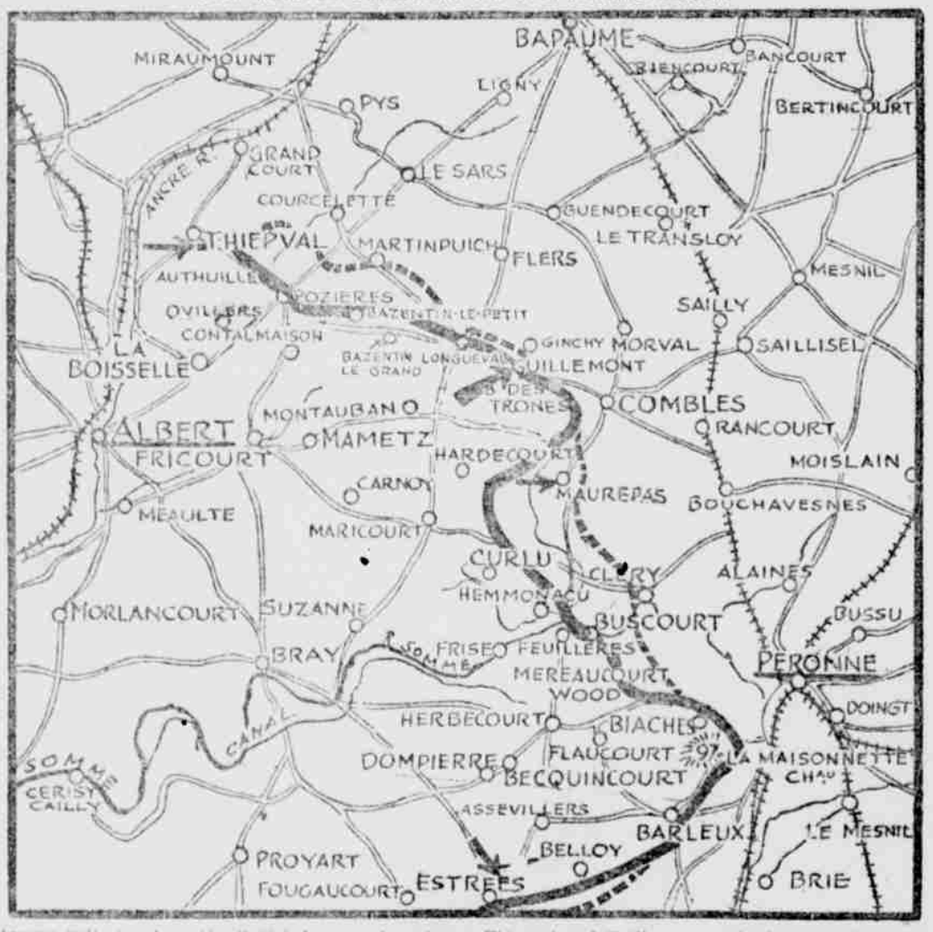
AT ORRIS.

The Interstate Petroleum company has made a location for a test in the southeast of 23-6 south-3 west.

AT LOCO.

The Lone Star Gas company test in 5-2 south-5 west is drilling at 1,859 feet in water sand found at 1,728 feet.

THE LINE OF FIGHTING ON THE SOMME FRONT



Arrows indicate where the British have made gains at Thiepval and Guillemont, and where the French have made gains at Thiepval and Guillemont, and where the French have cleared the Germans out of Maurepas and advanced their lines. The dotted line shows the new French front.

COTTON

New York Cotton.

NEW YORK, Sept. 8.—Unexpectedly heavy closing figures were followed by a further severe break in the cotton market during today's early trading. December contracts sold off to 13.96c, or 27 points under last night's closing figures and about 11 points under the high levels of last week, but liquidation then became less active and there were rallies in the late trading with December closing at 15.26c. The general list closed steady at a net loss of 3 to 8 points for the day.

Fairly large ginning returns were expected, but it seemed that no one was prepared for record-breaking figures and in some quarters the census report of 870,652 bales ginned to September 1 was considered out of line with recent small estimates of the crop. Liverpool cables were relatively firm and the market also opened steady.

Spinners were said to be fixing prices both here and in Liverpool and this was one of the factors on the advance of some 50 to 75 points from the low level of the morning. Some of the private wires received from the southwest said that the interior was beginning to withhold spot offerings at the decline and local bulls attributed the extraordinary heavy ginning figures to premature opening in some quarters, combined with a rush to pick in order to secure recently prevailing prices.

New Orleans Cotton Futures.

NEW ORLEANS, Sept. 8.—Cotton closed steady at a decline of 5 to 7 points.

	High	Low	Close
October	14.80	14.50	14.73

March	15.35	15.09	15.33
May	15.55	15.27	15.51

GRAIN

Chicago Grain.

CHICAGO, Sept. 8.—Lower cable quotations today tendered to weaken the wheat market here. The prospect of a bullish crop report from Washington this afternoon formed something of a handicap for the bears, but confidence in values was seriously disturbed by Liverpool reports of a strike of mill operatives and by assertions that British dealers were purchasing freely in Argentina rather than in the United States. Opening prices which ranged from ⅛c off to ¾c up with December at 1.52⅞@1.53, and May at 1.54⅞@1.55⅛c, were followed by slight gains and then a moderate setback all around.

Corn eased off with wheat. After opening lost lower to give advance, the market displayed a general inclination to sag. Liberal buying for a large export concern strengthened corn. Provisions gave way with hogs. Most of the transactions were in lard.

MAJESTIC.

"The Marriage of Molly-O," at the Majestic today, the new Triangle picture featuring Mae Marsh and Robert Harron, is said to be one of the truest pictures of Irish life yet shown upon the screen.

The settings in the little shamrock village were arranged by a technical staff that had to do very little rummaging into books of their extensive library, for most of the members had actually spent part of their lives on Irish soil. So there is loving care expressed in the fidelity to fact shown in the picture.

One of the most elaborate series of scenes is an Irish fair. A complete village was built on the studio grounds for the express purpose of taking these episodes, and there one may see the jaunting cars swinging through the place, pigs and cabbages—which is the crude way of saying bacon and greens—rattling Irish jigs and all the rest of the many things that go to make up life under such conditions.

Throughout all the little flashes of insolent gossoons ogling the colleens, a jaunting car and a hay wagon catching at the wheel hubs and the drivers getting down to fight it out, distributing prizes for the best pigs, and so on, there is emphasis on two points—Irish blarney and Irish love of a good scrap.

The result of this emphasis is the linking together of all these episodes into the spirit of the play. The story has romance, it has blarney and it has fight.

Indeed, "The Marriage of Molly-O" has something of the story of Cinderella. Cinderella lived in the ashes; Molly lives in dire poverty, with little to eat and wear. Cinderella found a prince for her husband; Molly found a knight—Sir Laurence O'Dea. The story of Cinderella is perennial; so is the story of "The Marriage of Molly-O."

Riots in Moscow.

BERLIN, Sept. 8.—Press dispatches from Stockholm to the Overseas News agency report that a revolt occurred recently at Moscow, resulting in the killing or wounding of many persons. According to this account wounded Russian soldiers in a hospital train were left without care. Soldiers refused to fire on the crowd, whereupon police were sent against the soldiers, a sanguinary encounter resulting.

Uses Cops' Gun on Self.

CHICAGO, Sept. 8. — Arthur E. Hansen of Omaha, Neb., seized a revolver from the pocket of a mounted policeman and shot himself to death at Randolph and Dearborn streets, one of Chicago's busiest corners.
