VICE THRIVES IN IGNORANCE

THRILLING EPISODES.

[illegible]

"I am impressed with the art of this picture, 'The Little Girl Next Door' as well as with its lesson. This moving picture is able where the stage has failed to give us the drama without brutality and the moral warning without dullness. There is no fire to the light-minded in this story. The thrill of the episodes has its instant antidote in the flashing back to the vice sessions of the vice commission, with the subjects of these sketches destitute of the rouge and gas refinement telling their stories without music and scenery, at dissipation and adventure.

"The play is virile, interesting and convincing. Its truth has not been made an excuse for vulgarity, nor is there any wallowing in indecency in the tenderloin glimpses that are required to make the point of the argument that ignorance is the real culture in which the bacillus of vice thrives."

"The Little Girl Next Door" will be shown at the Majestic theater, Wednesday, Thursday and Friday, October 4, 5 and 6.—Adv.

BIG OIL STRIKE MADE AT RINGLING

Town Goes Wild When Mc-Man Company Gets a Giant Producer.

Special to The World.

PERCOLA, Okla., Sept. 26.—Resembling the strike of a new ore lead in a mining country the southern Oklahoma oil region went wild over the oil well brought in twelve miles north of Ringling by the Mc-Man Oil company yesterday.

Scores of leases in the Healdton field were deserted by superintendents who hurried to the scene. Scouts for big companies from all over the state rushed it.

Townsite promoters, oil supply men and lease dealers by the hundreds hurried into the Fox territory. Acreage in fee went to $500 and leases were refused at $1,000 an acre.

The well was swabbed today, a tank was built and tomorrow the gas will be turned loose below the oil and a test made.

Speculation tonight places the production at 100 to 600 barrels. Ringling tonight is an oil Mecca for men from every other Oklahoma field. Hotels are over-crowded, lumber material, feed and provisions orders reached an early unprecedented stage
