HEALTH SPECIALIST WORKING IN COUNTY

Dr. Dixie B. Tucker, Government Sanitation Expert, to Lecture on Disease Prevention.

TO ORGANIZE THE WOMEN

Clubs Will Be Formed to Combat Social Disease—Malone Directs Campaign in District.

Dr. Dixie B. Tucker, employed by the government and given to the A. & M. college at Stillwater as a sanitary specialist, is in Tulsa this week and will put in the entire six days returning and stimulating interest in her work.

Doctor Tucker teaches children as well as adults where diseases originate and the simple methods of preventing them. She begins by advising all on the care of the teeth, neglect of which has been shown to cause many bodily ills. Her main activity is in the rural districts, reaching the remotest corners through the cooperation of county demonstration officials and school employes.

When interviewed this morning by a World reporter Doctor Tucker said that she had formed a league of women in many of the towns of Oklahoma and that they carried forward her instructions after she departs. This is under the supervision of Surgeon General Blue and has to do with the work pertaining to social diseases.

As an instance of the response met with, Doctor Tucker said that in a county containing 23 schools where she recently worked, she succeeded in causing 21 of them to take up the sanitary progressiveness advocated by her while there. Because of women having more time for such things, and because of a mother's interest she found that where women were on the school board her cause was more readily accepted.

In order to prevent another epidemic of "flu," lectures are given repeatedly on the ills derived from sneezing, coughing and spitting.

J. S. Malone, county farm demonstration agent, has mapped out the following program for Doctor Tucker this week where her lectures will be delivered: Monday afternoon, Sand Springs; Tuesday, Red Fork and Alsuma; Wednesday, Mingo and Collinsville; Thursday, Jenks, Liberty (district No. 24), and Glenpool; Friday, Bethel, Union and Malkey, a country colored school.

The women of Sapulpa have persuaded Doctor Tucker to come to them next Saturday.

A.E.F. BOXING AND MAT FINALS START AT PARIS

PARIS, April 7.—The finals in the boxing and wrestling championship of the American expeditionary force will begin tonight at the Cirque de Paris, the area where important boxing bouts have been staged in recent years. More than one hundred boxers and wrestlers are entered for the finals. They are the winners of the company, battalion, regimental, divisional and corps matches conducted during the winter throughout the American expeditionary force.

The boxers will fight two-minute rounds with ten rounds as the maximum.

The bouts tonight will be confined to the boxers in the bantamweight and heavyweight classes. Mike O'Dowd, the middleweight champ, will appear in the middleweight and lightweight classes.

TULSA COURTS EARNED $33,587.37 DURING MARCH

A total of $33,587.37 was collected in fees and court costs in district, superior and county courts during the month of March, according to data compiled by Hal Turner, cashier for the courts.

The receipts for the district court during the past month were $30,445.32, for the superior court $1,[illegible]37, for the superior court $1,249.52, [illegible]243.52, for county court $1,889.88. In the receipts of the latter court fees from marriage licenses and supporting affidavits, $383.75 were included.

Y. Workers Located.

By The Associated Press.

ARCHANGEL, April 7.—M. V. Arnold, of London, Ohio, and E. R. Ryall, of Bloomfield, N. Y., Y. M. C. A. workers, who have been missing for several days, and three American soldiers captured by the bolsheviki in the Onega (Zerki) sector are being taken to Moscow, according to information received in Archangel today from Obozerskaya. They are apparently being well treated.

EVERYONE SHOULD DRINK HOT WATER IN THE MORNING

Wash away all the stomach, liver, and bowel poisons before breakfast.

To feel your best day in and day out, to feel clean inside, no sour bile to coat your tongue and sicken your breath or dull your head; no constipation, bilious attacks, sick headache, colds, rheumatism or gassy acid stomach, you must bathe on the inside like you bathe outside. This is vastly more important, because the skin pores do not absorb impurities into the blood, while the bowel pores do, says a well-known physician.

To keep these poisons and toxins well flushed from the stomach, liver, kidneys and bowels, drink before breakfast each day a glass of hot water with a teaspoonful of limestone phosphate in it. This will cleanse, purify and freshen the entire alimentary tract, before putting more food into the stomach.

Get a quarter pound of limestone phosphate from your pharmacist. It is inexpensive and almost tasteless. Drink phosphated hot water every morning to rid your system of these vile poisons and toxins, also to prevent their formation.

As soap and hot water act on the skin, cleansing, sweetening and purifying, so limestone phosphate and hot water, before breakfast, act on the stomach, liver, kidneys and bowels.

MINORS TO FORCE ISSUE SAYS PELICAN PRESIDENT

NEW ORLEANS, April 7.—"My case is not injured in the least. It simply means that the minor leagues intend to force the issue."

This was the statement issued today by A. J. Heinemann, president of the New Orleans club of the Southern association, when notified that the national board of arbitration had supported John D. Martin, president of the association, in his enforcement of the seven-player limit rule and other legislation opposed by Heinemann.

"I expected such action," said Heinemann. "From the way Secretary Farrell, of the board of arbitration, has acted towards my communications, I could rightfully expect nothing else. That is the reason I carried my complaint to the national commission when it did not appear an answer would be forthcoming from the board of arbitration.

"The seven-player rule adopted at the spring meeting of the Southern association restricts the number of class A men in any club to seven."

IDA SHANNON SOUGHT BY HOMELESS CHILDREN

Asking the police department to notify one Ida Shannon, formerly of Neosho, Mo., that her husband, John Shannon, is dead and that their three children are now homeless, a letter was received Monday in this city addressed to the chief of police from J. Grimsley, R. F. D. No. 1, Neosho, Mo., asking that the mother be sought in this city.

From information contained in the letter, Mrs. Shannon was in Tulsa on March 21. She is described as a woman about 40 years of age, dark hair, light complexion, weight about 140 pounds.

WOUNDED MAN CHARGED WITH MOUNDS BURGLARY

Jake Christian, charged with burglarizing a building northeast of Mounds Sunday night, is held in the county jail awaiting arraignment before Justice S. C. Maxey in whose court an information was filed Monday.

From an account given by L. M. Davis, the complaintant, Christian was apprehended in the act of burglarizing a building. Christian was captured after Davis had inflicted a number of flesh wounds on the alleged burglar with a load of bird shot.

DENNY UNDER $5,000 BOND FOR ASSAULT

Driver of Car That Injured Five People to Be Tried Under Unique Charge.

Charged with assault with intent to do bodily harm, as the result of an automobile collision in which four persons were seriously injured last Saturday night west of this city, Albert Denny, driver of one of the cars, pleaded not guilty at his arraignment before Justice H. J. Gray Monday afternoon. Denny was released under bond of $5,000 for his preliminary hearing April 15.

Upon recommendation of Thomas Munroe, county attorney, the bond was placed at an unusual figure, both the county attorney and the justice believing that the auto wreck was due to criminal negligence of the defendant in driving a car at a high rate of speed on a public highway.

Denny, driving a car in which F. M. Kirwin, 65 years old, was riding, collided with a car driven by B. M. Megginson, 1114 North Denver avenue. Megginson had as his passengers his wife and Mr. and Mrs. Joe Ryan of Jenks. The party of four were returning from Jenks to this city when Denny drove his car into the vehicle occupied by Megginson and his party.

Kirwin was in a critical condition after being taken to the hospital but his recovery is now considered probable.

The information, signed by Mrs. Megginson, states "that the defendant, Albert Denny, did wrongfully, feloniously and without excuse commit assault upon the person of one Stella Megginson, by driving an automobile at a high and reckless rate of speed over a public highway, evincing a depraved and reckless regard for human life."

By bringing this charge the county attorney's office will seek to place the reckless driving of automobiles on public highways in the class with persons who employ deadly weapons with wanton disregard for human life. Under the laws of Oklahoma a person who discharges firearms in a reckless manner is liable to the consequences of his acts, although at the time of the act he may not be able to foresee the results.

County Attorney Munroe declares that there is as much danger from reckless driving of automobiles as from the reckless use of deadly weapons and that the law will be invoked to its fullest extent in the prosecution of persons guilty of disregarding the life of others, whether that person is armed with a weapon or is recklessly driving an automobile.

HOBBY MEETS MEXICAN GOVERNORS AT LAREDO

LAREDO, Texas, April 7.—Removal of present stringent passport regulations and improvement of trade relations between the two countries were the principal subjects discussed at a conference here today between Gov. W. P. Hobby, of Texas, and the chief executives of three Mexican border states. The conference, which also was attended by a number of Mexican and American military officials, was declared as most cordial and the belief was expressed that it would promote mutual friendly relations between the two nations. The day was observed as a holiday in Laredo and Nuevo Laredo.

The first meeting of the four governors took place on the international bridge, while a Mexican military band on the southern side played the Star Spangled Banner. This was followed by the playing of the Mexican national hymn by an American military band on the Texas end of the bridge. After the exchange of greetings between Governor Hobby and Governors Ozuna of Tamaulipas, Nicifero Mireles of Nuevo Leon and Gustavo Espinosa Mireles of Coahuila, the party proceeded to the federal building in Laredo, where the conference was in session from 11 until 4 o'clock.

Can Enter Army.

WASHINGTON, April 7.—Officers with the rank of ensign of the line of the naval reserve force, whether on active or inactive duty, may be appointed for temporary service in the regular navy under orders published today by the navy department.

BOY SCOUTS TOOK A SIXTEEN-MILE HIKE

Left Tulsa Friday Afternoon and Returned Saturday Night; Camp Beyond Country Club.

One of the longest hikes taken by the local boy scouts was that of Friday and Saturday. The scouts left the headquarters at 5 o'clock Friday night and returned about 10 o'clock Saturday night, covering about 16 miles on the trip.

The first stop was made at Turkey creek, about 5 miles on the north side of the Country club, where the boys pitched tents for the night. Immediately after tents were pitched supper was cooked, followed by the new scout dance which was originated by Scout Executive John Lindly. The dance was taken with such enthusiasm that the boys did not get to their "bunks" until almost midnight.

Saturday morning tests were held in tracking, scout pace, signaling, firebuilding, cooking, nature study, use of knife and ax and map making. Following the early lunch the rest of the day was spent in scout games and a competitive track meet.

The boys broke camp at 4 o'clock and marched back to the scout headquarters, arriving about 10 o'clock, tired but happy. Over 70 scouts were taken on the trip, this being the largest number ever taken on an overnight hike.

The hike was in charge of Scout Executive Lindly, assisted by Scoutmaster Eckle and Assistant Scoutmasters Cunningham, Smith, Benner and LaForge.

FORMER NEGRO JUSTICE DEFENDS DAMAGE SUIT

Suit in which David Nelson, a negro, asks personal damages of $15,000 against M. J. Latham, former negro justice of the peace, and James Thomas, a constable under Latham, for alleged false imprisonment and assault, was heard by a jury in district court Monday, the jurymen retiring to the jury room at 5 o'clock Monday night with instructions to return a sealed verdict.

Nelson claims that he was assaulted and arrested by Thomas at Latham's orders and placed in the county jail last July, where he was detained for two days and three nights. He stated to the jury that he had been guilty of no offense and that the actions of the defendants were due to their personal animosity toward the plaintiff.

TWO MORE CHARGED WITH BREACH OF LABOR LAWS

Charges of violating the state labor laws were filed in county court Monday against the Fronhe-Gray construction company and E. M. Ketchum, the complainant, D. L. Easterly, state factory inspector, alleging the defendants have allowed men employed on public work to labor more than eight hours a day. These charges are in addition to 12 others of a similar nature filed last week against the Fronhe-Gray company and subcontractors working on county roads.

A charge of working a boy under the age of 14 years was also filed against Ketchum, the information stating that the defendant had allowed one Willie Kingsley to be employed in violation of the state law on this subject.

Colorado Storm Delays Train.

DENVER, April 7.—Trains from the north and east entering Denver are running from one to 10 hours behind schedule as a result of the wind, sleet and snowstorm that swept the western states Sunday. Three feet of snow is reported at Wiggins, Colo. In western Kansas and Nebraska westbound trains are experiencing difficulty because of the snow that has piled in the deep cuts.

Resinol

OVERCOMES SKIN TROUBLES

Although that unsightly skin eruption is conspicuous, it may be overcome with Resinol Ointment. Decide at once to give the healing medication of this ointment a chance to correct your trouble. Best and speedier results are obtained by the joint use of Resinol Soap and Resinol Ointment. This soap contains in a modified form the same soothing medication as is embodied in the ointment. The combined use of the ointment and soap seldom fails to relieve other annoying skin disorders on the body and limbs.

For a free trial of soap and ointment, write Resinol, Baltimore, Md.

All druggists sell the soap and ointment.

Science is possible in oil-well drilling—

H. B. Goodrich's articles, alternate weeks, are a guide to better and cheaper wells in the future.

ONE of the recognized best among production engineers is at work at a big task in the columns of National Petroleum News.

He is tabulating the facts gained from years of practical experience to establish a science of well-drilling. Written for the well-driller as well as the large operator, the summary below shows how thoroughly the articles already printed attack the subject.

Unnecessary Wells are Drilled. In Oklahoma half a million unnecessary dollars have been spent in two square miles. Spacing of wells in all fields is an important protective measure.

Water—An Advantage and a Menace. In the Cushing field a valuable water supply was ruined by allowing fresh water in shallow depths to mix with salty water of deeper strata during drilling.

Disregard of underground water shortens life of field. Besides aiding to locate accumulation of oil and gas, underground water often forms a seal to hold the oil and prevent its rapid escape.

Value of Undeveloped Oil Lands is best determined by showing history of monthly production as a curve showing decline through a period of years. By projecting it into the future the average life of wells or property can be estimated. Estimates based on volume of oil in ground per acre are inaccurate and misleading.

Premium on Haste often leads to greater loss to the operation later on; for example, if proper shut offs have not been made. On the selection of careful drillers depends the future of each well. The driller either makes or mars it before it comes to life.

Strainers in Oklahoma Wells Will Save Much Oil and Money. Running sands are found in the hard rock fields too. Strainers cut down cleaning out operations after shooting wells in hard rock country.

Deeper Oil Deposits reached by improved drilling. Overconfidence in flush production results in careless extravagant waste.

Mud fluid is best preventative for shutting water from leaking.

Easter Fashions In Suits

There is no doubt about it—Madame la Mode has one particularly definite idea that dominates the suit fashions this year and that is that the suit has as its basic lines, the loose fitting character of the box coated design.

With this basic idea to work upon, the designers have given free reign to their fancy and produced, and continue to produce, models of the cleverest and most interesting kind.

The collars are of Eton, the Tuexdo, and the shawl types, when the suits are not collarless, which a great many of them are.

The square line at the back is frequently broken by a narrow belt.

Braidings are to be seen with much frequency.

Sleeves are mostly full length and tight fitting, though there are many smart exceptions with sleeves wide at the cuffs.

All suits either have or lend themselves to the wearing of a waistcoat, and it is in the waistcoat that Madame la Mode has shown another striking style preference— and certainly the best informed will not neglect the waistcoat with the suit this season. The suits which will be here daily until Easter for your selection, will be the leaders of the lines of a great many of the recognized suit stylists of New York—so that from the viewpoint of variety and authenticity of style, EVERYTHING will be here.

In fact we will be carrying up to the middle of April, more suits probably than we have had in the fashion department for many seasons.

Today's arrivals bring the latest word in suit fashions out of New York.

Prices Range from $27.50 up to $135.00.

The Displays Will Be Augmented Daily By New Arrivals
