Science is possible in oil-well drilling—

H. B. Goodrich's articles, alternate weeks, are a guide to better and cheaper wells in the future.

ONE of the recognized best among production engineers is at work at a big task in the columns of National Petroleum News.

He is tabulating the facts gained from years of practical experience to establish a science of well-drilling. Written for the well-driller as well as the large operator, the summary below shows how thoroughly the articles already printed attack the subject.

Unnecessary Wells are Drilled. In Oklahoma half a million unnecessary dollars have been spent in two square miles. Spacing of wells in all fields is an important protective measure.

Water—An Advantage and a Menace. In the Cushing field a valuable water supply was ruined by allowing fresh water in shallow depths to mix with salty water of deeper strata during drilling.

Disregard of underground water shortens life of field. Besides aiding to locate accumulation of oil and gas, underground water often forms a seal to hold the oil and prevent its rapid escape.

Value of Undeveloped Oil Lands is best determined by showing history of monthly production as a curve showing decline through a period of years. By projecting it into the future the average life of wells or property can be estimated. Estimates based on volume of oil in ground per acre are inaccurate and misleading.

Premium on Haste often leads to greater loss to the operation later on; for example, if proper shut-offs have not been made. On the selection of careful drillers depends the future of each well. The driller either makes or mars it before it comes to life.

Strainers in Oklahoma Wells Will Save Much Oil and Money. Running sands are found in the hard rock fields too. Strainers cut down cleaning out operations after shooting wells in hard rock country.

Deeper Oil Deposits reached by improved drilling. Overconfidence in flush production results in careless extravagant waste.

Mud fluid is best preventative for shutting water from leaking.

YOU can turn these articles into dividends. Don't miss any more installments. Send your year's subscription—$5.00 for 52 issues—to our Tulsa office, 402 Cosden Bldg.

NATIONAL PETROLEUM NEWS

$5a year

In the Oil Fields

CONTINUED FROM PRECEDING PAGE

farm in the southeast quarter of 10-14-11. They hit a small showing of water at about 1,852 feet Sunday afternoon and went into a hard shell at 1889 and at 1891 feet a soft sand was found and the well started spraying above the derrick. The five inch casing is being set and the well will be drilled deeper probably today. It is about a mile from oil production, but a good gas well was drilled on the other end of the lease a few months ago.

Mid-Continent Committee Hears Reports

The different matters connected with the filing of individual and corporation income tax returns which have been before the Mid-continent oil & gas association for discussion since the first of the last month, were reported yesterday afternoon by J. F. Darby, vice president of the association, to be before the various committees for further action. The filing time for individuals has not been extended any further than the 15th of May.

"At a meeting of the executive committee of the Mid-continent Oil & Gas association on April 8, several committees were appointed in consideration of various phases of the income and excess profits tax," said Mr. Darby.

"The executive committee met again on Monday afternoon, April 14, at which time the committees reported on the matter of depletion, depreciation, estimate amount of oil underground, general valuation and interpretation of the law with reference to test wells making new discoveries. These reports were referred to committees for further action with reference to formulating a statement after comparison with the rules and regulations of the treasury department and the treasury manual.

"For a week past there has been an exchange of telegrams with the treasury department with a view to securing for taxpayers extension of time for filing of their tax reports. Yesterday afternoon Judge S. W. Hayes of Oklahoma City and Congressman Howard called upon Commissioner Roper. It is reported by them that the time for filing return of corporations has been extended to June 15.

"Individuals wishing extension of time should file their names with the Mid-continent Oil & Gas association as this association now has to prepare a list of members to be sent to the treasury department for whom it is assured extension will be granted.

"The association has decided to do its utmost for its members with reference to federal tax matters and to that end have secured the services of both Judge John J. Shea and Harry H. Smith, tax attorney. Judge Shea was yesterday appointed chairman of a committee with full authority to act. It is proposed to issue a mid-continent manual for the guidance of the taxpayers."

Dunigan Boys Back

Jack Dunigan, of the First Army 26th Engineers, is back in Tulsa again, after an absence of eighteen months on the battle front in Europe. With him is his brother Richard, of the same regiment and company. His second brother "Dick" of the 15th Engineers is still in service although he is expected home about the 15th of next month.

The Dunigan brothers are among the best known and loved of the boys who went over to fight when the war first began and everyone will be glad to welcome them back to the old place. Before they enlisted, Jack and Richard did considerable drilling and leasing and "Dick" was interested entirely in the oil leasing end of the game.

Jack brings back with him a letter of appreciation from Colonel George L. Spalding, Chief Engineer of the First Army, which expresses the feeling of the officers toward the soldiers who fought so nobly in battle.

Jack is not commenting much upon his experiences but he declares that he and his brothers are one and all emphatically against the league of nations. He expects to take a short vacation to get used to the idea of a country at peace instead of at war.

Look Good for Tulsa Operators.

While much of the news from Texas is very discouraging, in not the least, it looks as though Tulsa operators are inside the money and are therefore as well fixed as any of them who are drilling close in at the four particular places where oil is being found in large quantities. It seems that outside of these points the news is not so good.

For instance, the results where the Carruth in the Duke pool is showing 200 barrels and is gradually increasing, while the Simmons well is in the same pool is reported making two barrels an hour. The same company's No. 2 Gray in Coleman county, where the oil is found at the comparatively shallow depth of 1,400 feet is showing for a better well than No. 1 and is rated as good for 75 or 100 barrels.

The Simms well on the Coudy where they offset the Carey well has been shut and is making seventy 100,000 feet of gas and bids fair to soon be making a lot of oil. It will be remembered that the Carey well was absolutely dry until shot and then came in for one of the biggest producers in the state.

At Burkburnett the Gilliland people are getting much better wells than were expected and the chances are they have made a good investment in buying the Marine Oil company's acreage adjoining Burkburnett on the west.

All in all, Tulsa people have no complaint to make, although Texas is doing out to its reputation as a great country but where equal people abound.

Governor Renfrow Here

Gov. W. C. Renfrow, one of the first governors Oklahoma ever had, was in town yesterday on his way from his home at Mangum to San Antonio, Texas. The governor is looking as though he were not only prosperous but as young as ever, and while acknowledging he is 74 years of age he is nevertheless as full of pep as ever.

Harry McCormick in Town

Harry McCormick of the Midland Petroleum company is in Tulsa and says that for a long time he has anticipated the present strength in the gasoline market and while his partners seem to speculate on the market at this time he has had the right dope and has therefore every reason to shake hands with himself.

To Be an "Oil Producer"

C. W. Hood, who has been for the past two years with the Kawfield oil company, has resigned his position with that organization with the intention of going into the oil business for himself. He has quite a lot of acreage, both in Oklahoma and Texas. Mrs. Hood is fast recovering from a successful operation she has had.

Rogers County.

The Cabin Valley Mining company No. 23 Ganiger in the west half of the northwest of 23-24-18 is making 5 barrels.

The C. S. Hummel and others No. 17 Bertie Douglas in the west half of the northeast of 12-24-16 is a dry hole.

The Phillips Oil company No. 23 Lee in the southwest of the southwest of 2-24-17 is making 2 barrels.

Cohn & Co. No. 2 Bailey in the southwest of the northeast of 28-24-12 is making 20 barrels.

White & Todd No. 4 Greer in the southeast of the northwest of 10-24-18 is making 3 barrels.

South of Beggs.

The New York Oil company and R. L. Robinson have made a location on the Tetlichell farm in the southwest corner of the northeast of 15-14-13.

The March Oil company has made a location in the southeast corner of the northwest of 36-14-11.

At Nowata.

The Prairie Oil & Gas Co. No. 11 Nancy Forks in the south half of the northwest of 36-25-16 is making 5 barrels.

The Christian County Oil & Gas Co. No. 5 Babb & Whitmore in the northeast of the southeast of the north half of the southeast of 33-26-17 is making 2 barrels.

At Yahola.

The Olsen Petroleum company No. 1 Grayson in the northwest of the southeast of 24-15-15 has the sand from 1,160 to 1,185 feet and is making 15 barrels.

The Otis and Anders No. 3 Grayson in the northeast of the southwest of 30-15-15 is drilling at 300 feet.

In the Osage.

Dressing-up for Easter

WITH spring in the air and Easter coming, with the windows full of new styles and fresh fabrics, most men feel the lure of new clothes—a desire to dress-up and start off fresh.

The big question is what to choose. That's where we come in—with a big selection; with live new styles; colorful patterns, something to fit every one of you in a

Hart Schaffner & Marx

suit or overcoat. They're all-wool; well tailored; guaranteed to satisfy.

Style Features for Easter

There are waist-seams in suits and overcoats; single and double breasted, slash, crescent and vertical pockets, new lapels, stitched and piped collars. Two and three button sacks in rich all-wool serges, oxfords, worsteds, cassimeres. All sizes.
