STOCKS GIVE MUCH ATTENTION TO LOAN

Preparations for Campaign and Impending Holiday Make Trading Listless on Gotham Exchange.

NEW YORK, April 17.—With a bonded impending and preparations for the Liberty loan campaign absorbing the attention of the banking community the hesitant tone of today's stock market was accepted as a matter of course.

Trading differed from that of recent sessions in that motors and oils reflected a lack of professional interest, although there were exceptions in the latter group, as indicated by the strength of Sinclair and Pierce.

Steels and affiliated industries, notably Harvester, Steel Founders and Colorado Fuel, were strong and shipping as a group led the entire market, although gains were indifferently maintained.

Food and chemical shares found renewed favor. United States food products (formerly distillers) advancing almost five points, with one to three point gains in Cotton oil, American and Beet sugars and Wilson company.

Leathers and secondary metal issues rose appreciably, but coppers were listless or inclined to heaviness, changes in rails were irregular and most nominal.

Liberty bonds eased, but other domestic issues stiffened, international also improving. Old United States 4s rose 1-4 per cent on sales; others unchanged.

In the Oil Fields

CONTINUED FROM PRECEDING PAGE

taxed to its fullest capacity with all kinds of business.

Have Detectives on the Job

The Chicago Tribune says that the Congress hotel people in Chicago are spending a pile of money and are employing a large force of detectives to discover is possible, who distributed the farce entitled, "Floating to Victory on a Sea of Oil," (Standard Oil), at the banquet in Chicago when M. L. Requa made his farewell address to the oil industry.

There has never been, at least in years, an anonymous effusion of this kind that cut so deeply, and caused so much worry, as did this one. It seems to be getting more serious as time goes on, and about every man in Chicago at all familiar with the situation, has appointed himself a Sherlock Holmes to try by deduction or otherwise, to find the author.

It was thought at the time to be a good joke but may turn out otherwise.

British Government Did Not Purchase Mexican Property

World's Washington Bureau,
Post Building.

WASHINGTON, April 18.—The department of state has given out the following:

"El Universal, at Mexico City, published on April 1st an article by Mr. H. A. Cunard Cummins, in charge of the British legation in that country, denying press reports of acquisition by the British government of controlling interests in the Aguila Oil company. This article quotes Mr. Cumins as follows:

"In view of the statements which have recently appeared in the press of this capital stating that the government of his Britannic majesty has obtained control of the 'Compania Mexican de Petroleo, El Aguila' I would be very grateful if you should be good enough to publish in a prominent part of your newspaper the fact that I have received official authorization from my government to state that the government of his Britannic majesty is not interested in any oil company which is operating or which may contemplate operating in this republic."

MARTIN

Best Well in a Year

The Childers Gasoline company have a well making 300 barrels straight up in 12-26-15, northeast of Nowata on the George Witt farm. It will be of interest to old-timers to know that this location was overlooked on account of its being off the main traveled road and is four miles straight east of the crossing of California on the road between Nowata and Delaware and is on the bank of the Verdigris river.

Late News from Texas

(BY PRENTISS MOORE.)
Special to The World.

DALLAS, Texas, April 17.—The stockholders of the Texas Pacific Coal & Oil Co., meeting at Thurber, Texas, today, voted to increase the capital stock from $5,000,000 to $6,000,000, and reelect all officers and directors. No action was taken on the proposition to reduce par value of shares.

Another Big One in the Osage

The Barnsdall Oil company No. 3 in the center of the west line of the northwest of 5-24-10 is estimated at 2,000 barrels in the Bartlesville sand. This well was brought in at 2,080 feet. No. 2 on the same lease is on top of the sand.

Price of Gasoline Reduced in Texas

(PRENTISS T. MOORE.)
Special to The World.

DALLAS, Texas, April 17.—The Gulf Oil Corporation today reduced the retail prices of gasoline in all Texas except five cities, two cents per gallon. Other companies followed suit. The reduction leaves gasoline selling retail at a flat price of 24 1-2 cents less two cents to dealers and plus one cent at differential points all over Texas. In Dallas, Waco, Houston and San Antonio the price was reduced to 24 1-2 cents several weeks ago.

Sapulpa Refining Co. Getting Well West of Beggs

The Sapulpa Refining company yesterday drilled the No. 1 well on the Lucinda Marshall farm in the northeast corner of the southeast of the southeast of 35-15-11 to the top of the sand at 2,250 feet, and the well is flowing 150 barrels. The well is located about a half mile southeast of the Gevirman 1,000-barrel well, and a quarter of a mile northeast of the Livingston well No. 1. The Prairie is drilling just west of the Sapulpa Refining company's lease.

Came Back to His Kiddies

W. V. Thraves, who has been operating lately in Kentucky, is back in Tulsa and brings a thrilling story to tell. He said yesterday:

"We had with us my brother-in-law's children while he went to war and the result was that we had a wonderful time with them.

"During the influenza epidemic my brother-in-law was given up as dead by the doctor, and was one of 35 one night that had the numbers placed on their arms for the identification by the undertaker. But the latter discovered the next morning when he came in that the body was still warm. He called a nurse, who brought him back to life, and thus he returned to his kiddies."

News from Beggs Unique

The news from around Beggs is certainly unique in that there is a big well drilled in 7-14-12 and another in 7-15-12. The former is owned by K. A. Roth and associates and the latter by Houston and others of Bixby.

Seven, Come Eleven

That range 11 is a humdinger goes without saying when there are so many wells that are coming in between the range lines. It is reported that the Sapulpa Refining company has a good well in 35-15-11 and that the Wilcox well in 25 is showing. If this proves to be the case there is going to be no end to the drilling around Beggs.

Only a short time ago it was range seven that was in the limelight.

In the Osage.

The J. E. McKinney No. 2 in the northwest of the southwest of 14-29-9 is a rig.

The Osage Natural Gas company No. 1 in the southwest of the northeast of 28-28-11 has the sand from 1,795 to 1,818 feet and is making 1,000,000 feet of gas.

The Progressive Oil company No. 1 in the northwest of the northeast quarter of 32-27-8 is drilling at 1,135 feet. There was water and a showing of gas at 734 feet.

The Dallas-Osage No. 59 in the northeast corner of 25-27-10 has the sand from 1,859 to 1,893 feet and is making 14 barrels.

The Carter Oil company No. 2 in the southeast of the northwest quarter of 9-25-11 has a fishing job at 756 feet.

The D. R. Travis No. 2 in the southeast of the northeast of 14-24-9 has the sand from 1,338 to 1,357 feet and is pumping 48 barrels a day.

The Atlantic Oil & Producing Co. No. 1 in the southeast of the northeast of 10-22-10 has the sand from 1,495 to 1,528 feet and is making 12 barrels after an 80-quart shot.

Comanche County.

The Keys No. 2 Gross in the northwest corner of 26-1s-10w is making 8,000,000 feet of gas. The sand was found from 2,165 to 2,173 feet.

The Oklahoma Producing & Refining-Pennok Oil company No. 3 Zipsie in the center of the east line of the southwest of the southeast of 29-1s-10w is making 100 barrels.

The Prairie Oil & Gas Co. No. 2 Adams in the southwest of the southeast of 10-1s10w is making 18 barrels. The sand was found from 2,172 to 2,174 feet.

The Tuscana II company No. 1 Lowe in the northeast of the northeast of 35-1s-9w is dry and abandoned at 2,430 feet. The sand was found from 2,257 to 2,259 feet.

South of Beggs.

The Benmo Oil company well in the southwest corner of the south half of the southeast quarter of 11-14-11 is making about 75 barrels.

The Halimo Oil company well on the Joe Blunt farm in 11-14-11 has the sand from 1,572 to 1,602 feet, and is flowing natural into the tank. No estimate is given as to the production, but it is making a lot of gas. A location has been made one location north and also a location in the northwest corner of the southeast quarter of the southeast quarter of the section, offsetting the big well on the Martha Burney farm.

At Blackwell.

The National Union Oil company No. 13 Long in the center of the north line of the northwest quarter is making 5,000,000 feet of gas at 1,962 feet and will drill deeper.

The Equitable Oil company has a rig up for No. 1 Patterson in the northeast quarter of 20-27-1w.

Cotton County.

The Riverdale Oil company No. 2 Wright in the northeast corner of 32-4s-13w is abandoned at 1,970 and are skidding the rig 300 feet south for a new hole. They had a small showing from 626 to 630 feet.

The Carter Oil company No. 1 Gebhart in the northwest of the southeast of 35-2s-14w is drilling at 2,762 feet.

The Grub Stake Oil company No. 1 Coogan in the northeast of the northwest of 26-2s-9w is drilling at 2,218 feet.

Stephens County.

Personal Mention.

A. B. Lawrence of F. H. Smithers & Co., of New York City, was in Tulsa yesterday on business.

Personals

"Bill" Hoffman is in the city and is as full of kittenish buoyancy as ever.

Charlie Brant, most noted wildcatter of them all, is in the city.

R. M. Morrison, with the Winona Oil company, is in the city and says that Frank Breene is putting in most of his time on the farm at Ramona.

R. E. Adams is back from Newkirk and says that the Johnson well, four miles north and a little east of the Elbing pool, has 2,000 feet of oil of 34 gravity in the hole, which was drilled to a total depth of 2,453 feet. The Elbing oil is about 40 gravity, says Mr. Adams.

Superintendent McMahon of the Sinclair refinery at Vinita, one of the best refiners in the state, is in Tulsa for a short business trip.

Messrs. Bellrose, Seifert and Jones of the Bell Rose Oil company are in the city. They are interested particularly in production at Terrell.

Lieutenant Toneray, recently of the aerial service, has accepted a position at the Cosden refinery, where he will go to work within a few weeks. He expects to spend a short vacation with his mother in Texas before he settles down in Tulsa.

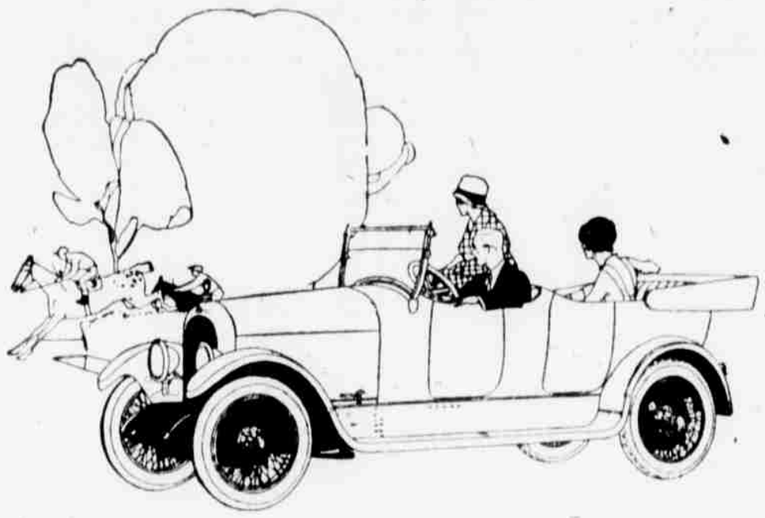
G. W. Tipton and George Faulenshee of Taft, Cal., are back from a two days' trip to the Covington and Garber fields. Mr. Tipton, who represents the Oklahoma Tool & Supply Co., says that he has found that the Texas people have bought an enormous amount of tools from his concern and are still placing orders for the future. It is becoming more and more apparent that Tulsa's larger concerns are benefited by these drillings in Texas.

Germans Want Indemnity.

PARIS, April 17.—(Peace) Germany intends to claim an indemnity from the allies, according to the Frankfort Gazette. It says the German negotiators at Versailles will ask payment for damages sustained from aerial attacks, from the occupation of German territory by the allied troops and for the delay in concluding peace, causing a prolongation of the bolsheviki and Spartacan trouble.

Mrs. Murdock Dies.

CHICAGO, April 17.—Mrs. W. A. Murdock, founder and president ever since its organization, 32 years ago, of the ladies auxiliary of the Grand International Brotherhood of Locomotive Engineers, died at her home here today after a brief illness.



Unique Marmon Features

LIGHT weight attained by the elimination of hundreds of parts and the extensive use of aluminum; automatic lubrication and oilless bearings, abolishing 41 lubrication points; deep pressed steel frame; low center of gravity with little weight below the springs; all load centralized between the two axles, and great economy in upkeep and operation.

The Marmon embodies not some, but all of these vital features, and *has* for four years. And in the meanwhile Marmon owners have had the advantages that other car builders aim to give their patrons in the next redesigning period.

If you want tomorrow's engineering, and want it now, you can get it today in the Marmon 34. Come and let us demonstrate the unique Marmon features for you.
