Possibilities for a Pipe Line

There will be a pipe line from Burkburnett with an extension to other fields in Texas, according to some of the best posted operators in this field and it will be built to supply refiners in Tulsa and vicinity which at first thought seems a mighty good investment and a great thing for Tulsa.

If it is to be built, however, it would seem that this is the proper time to start same as many of the refiners who would otherwise be interested have started a line from the Ranger field to Fort Worth, and now there is a genuine effort being made to get better freight rates from Texas points to points in Oklahoma.

Secretary Adams, of the Tulsa Freight Traffic bureau, has insisted that the rate be lowered from 22 1-2 cents from Burkburnett and 25 1-2 cents from Ranger to 17 cents, and he is entitled to the credit for having insisted on a reduction that is worth talking about.

From another source, this time political, an effort is being made to bring about the same result, and for this E. D. Davis, of the firm of Davis & Younger, who operate here in parfnership with Bob Duniap, formerly state treasurer, is entitled to the credit.

He has enlisted the support of Congressman Scott Ferris and Congressman-elect Howard and is working with a local committee of Oklahoma City operators, including W. A. Ledbetter, Paul Pope and the refiners of that city.

There was a hearing at St. Louis yesterday which was attended by Traffic Manager Locke, of the Bigheart Refining company, and within a short time there should be some news as to what has been accomplished.

Mr. Locke, who is a thorough railroad man, represented Mr. Adams at the hearing. He knows every angle of the game from a refiners point of view and will doubtless give a good account of himself and will do everything possible to bring about better rates.

The Conduit Pipe Line company has a line from the Burkburnett pool which supplies the Constantin refinery, now in operation at Duval, a small town in Oklahoma, this side of the Texas line and can ship from that town to points in Oklahoma crude oil at a rate said to be 19 cents per 100 pounds. It was hoped at one time that this line would be extended here, but this has failed to materialize.

But all this is much too high to be of any benefit to the big refiners in this section of the country as a pipe line in operation should be able to handle this crude for 15 cents and make a lot of money. Tulsa depends more on her refineries than any other one factor that goes to make this town great, and something in the way of a pipe line that would be a benefit to our industry ought to be built at once. No "dog in the manger" policy should be tolerated. The line should be built to supply both Oklahoma City and Tulsa, which would not be going a roundabout way from Burkburnett here.

Opinion of an Expert

The opinion of J. Edgar Pew at the head of the Sun company operations in Texas should be of great benefit in sizing up the situation as regards the supply of crude, only that his best efforts to come to a conclusion have so far failed to materialize.

Speaking of Texas, he said when here the other day: "I am of the opinion that there will be not enough oil produced to affect the market because some of the wells are very disappointing, and among the larger wells that have been completed there are many that are going off rapidly."

"I think, however, that the man who claims to know just what is going to happen with all the great number of wells drilling and with the possibility of new pools and deeper sands is simply showing his ignorance," and Mr. Pew is doubtless correct.

Kansas News

The A-1 Oil company No. 17 Bush, in the southeast of the northwest of the southeast of 24-29-5, has the sand from 2,777 to 2,803 feet and is estimated at 350 barrels.

The Trapshooters Oil company No. 1 Ferrell, in 4-29-8, is drilling at 700 feet.

The Bankers Oil company No. 1 Davis, in the center of the east line of the northeast of the southeast of 4-26-4, is dry and abandoned at 2,488 feet.

The Empire No. 11 Shriver, in 3-26-4, has the sand from 2,413 to 2,430 feet and is dry and abandoned at 2,430 feet. No. 12 in the same section is rigging up.

The same company No. 1 Harshman, in the southeast quarter of 16-26-5, has the sand from 2,455 to 2,860 feet and is dry and abandoned at 2,869 feet.

The same company No. 28 Koogler, in 19-26-5, has the sand from 2,543 to 2,557 feet and is making 25 barrels natural.

The Leonard Petroleum company No. 1 Parks, in the northwest of the northeast of 32-26-6, has the sand from 2,680 to 2,720 feet and is estimated at 200 barrels.

The Central States Petroleum company No. 1 Logan, in 31-25-7, is a rig.

The Great Southern Oil company No. 8 Bryden, in 26-22-8, has the sand from 2,280 to 2,334 feet and is making 100 barrels.

The Midwest Petroleum company No. 1 Benson, in 23-24-8, is shut down at 2,500 feet.

The Depositors Oil company No. 18 Tannehill, in 33-23-16, has the sand from 1,413 to 1,417 feet with a small show of oil.

The same company No. 1 Morrison, in the same section, is drilling at 600 feet.

Wilcox Declares Dividends

Probably the largest dividends that has been declared in the mid-continent up to this time was announced yesterday by the Wilcox Oil corporation, which declared a 5 per cent cash dividend and a 10 per cent stock dividend and in lieu of the latter Mr. Wilcox has offered to take the stock, paying cash therefore at par.

The stock has been sold of late at something like five for one in private deals, and it is not listed on the curb or in any stock exchange.

You Bet Your Life, Georgia, We'll Say It's Foyil

We'll say the ladies are right, right or wrong, always. We're for them. And particularly when they write and insist upon their rights. Why not? They generally are, at that.

Which, being a story in itself, is not, however, what this story is all about. It is about the Claremore well, or as it now appears according to the latest news from that place, the Foyil well. Perhaps the following letter will better explain itself. The oil desk received the letter following the publishing of a wire from Claremore describing the bringing in of the test well of the Mid-West Gulf Oil company in the center of 6-22-17 "some seven miles northeast of Claremore." The well is producing 60 barrels of oil at five feet in the shallow sand found at 823 feet, according to the Claremore wire received and published in The World.

Foyil, Okla., April 23, 1919.

Oil Editor, Tulsa World.

Dear Sir:

We notice by this morning's World that you speak of an oil well seven miles northeast of Claremore. By all rights and purposes, you should give the credit where it is due as this well you speak of is on Mr. Tennyson's farm, three-quarters of a mile from Foyil, and all land leased for oil is leased from farmers who claim Foyil as their residence. The well is nine and one-fourth miles from Claremore and only nine miles from Chelsea. We would like to see the mistake made good and credit given to Foyil for our well as we certainly take pride in it.

Haiman & Dawdy, merchants.
Rhoda Carruthers (at depot).
Foyil Harware company.
Carrie E. Steele, postmistress.
Georgia Andrews.

Anyway, to The World, its a Foyil well from now on.

Late Kansas Notes

The little pool in Marion county, north of the Elbing pool in Butler county, opened up about three months ago by a couple of good completions, brought in two more good wells yesterday. The E. E. Johnson and others' well on the G. W. Parker farm in 4-23-4e is good for 350 barrels of oil at three feet in the sand topped at 2,481.

South of the Johnson well the Elmhurst No. 2 Burton, offsetting the No. 1 Gillette in 10-22-4e is on top of the sand and the hole is full of oil. It looks like it would be as good a well as the Gillette well, which is estimated at 650 barrels per day.

The Carter Johnson in 24-22-4 Skaer and others in 35-22-4 and Steinhaer and others in 8-22-4 have all come in dry in this same vicinity.

Constantine has some promising acreage in immediate vicinity of the Johnson well to the north which is looking better than ever now. Part of this acreage is in Marion county and the rest in Butler. There is a total of 840 acres in all.

Marland Refining Going Good

The Marland Refining company is lucky in its drilling operations and will doubtless be able to produce as much oil as any of them in the Osage when it once gets started. Their lease in the northeast of 16-21-10, which was only approved a few days ago, has now one good well making 100 barrels in the Bartlesville sand found at 1,940 feet and this is accounted for by the fact that they own the gas rights on this acreage.

The chances are that Mr. Marland, who is enlarging his capital stock, will have not the slightest difficulty and will then be as well fixed financially as any but the very largest pipe lines. He is an oil producer right and has his own pipe lines and refineries.

Speaking of the stock sale, one of his secretaries stated that the $15,000,000 additional stock to be issued is not to be sold until needed, which is, of course, a conservative proposition and only enough to insure the success of the issue will be disposed of at present. It should go rapidly.

Prominent Financiers Here

H. F. Wilcox is entertaining two of the most prominent financiers from Philipsburg, Pa., both of whom are interested with him in the field and they have been looking over the situation with evident satisfaction.

D. Ross Wynn, who is president of the Moshannon National bank, and J. Edward Horne of the same city, were the guests mentioned and Mr. Wynn states that he puts Tulsa in the same class with New York and San Francisco as being the three most energetic towns in the United States.

Northern Oklahoma.

The Junction Oil & Gas company No. 7 Shurtz in the southeast of the northwest of 21-29-1 is shut down at 345 feet.

Blackwell Oil & Gas co No. 5 Harwell in the northwest of 6-28-1 is drilling at 2,900 feet.

The National Union Oil company No. 2 J. L. Peeton in the southwest of 31-28-1 has the sand from 738 to 740 feet and is making 1,000,000 feet of gas. The total depth is 1,170 feet, plugged back to 740 and shut in for a gusser.

The Marland No. 1 R. I. Cook in the northwest of the northeast of 20-28-3 is a location.

The Ranger Oil & Gas Co. No. 1 McCluskey in the northwest of 14-27-3 is spudding.

The Ramsey and others No. 1 Hawthorne in the northwest of 10-21-3, an abandoned old hole at 3,200 feet, is to be drilled deeper and is now starting to drill.

The Marland Refining company No. 10 C. S. Hill in the southeast of 8-22-2 has the sand from 1,855 to 1,860 feet and is making 175 barrels.

The Magnolia Petroleum company No. 1 Friend in the southeast of 2-22-4w made 2,000,000 feet of gas in the sand from 1,125 to 1,130 feet, was drilled to 2,380 feet and abandoned.

The Prairie Oil & Gas Co. No. 5 Wishard 660 feet north and 300 feet west lines of the southeast of 12-22-4w has the sand from 1,300 to 1,308 feet and is making 278 barrels. No. 6 Wishard is a rig.

The Exchange Oil company No. 1 Denker is rigging up to drill deeper. This well was completed last April as a Hutsen sand well. The sand was found from 1,444 to 1,454 feet and made 40 barrels.

The Roxana Petroleum company No. 4 Schroeder in the southeast of the northwest of the southwest of 18-22-4w, an old well drilled deeper, has the sand from 2,165-4e 2,179 feet and is showing for 40 barrels.

The Exchange Oil & Gas Co. No. 1 Cooper in the northwest of 21-22-3w is a rig.

The same company No. 3 Crews in the northwest of 30-22-3w is fishing at 735 feet.

The Watchorn and others No. 1 Jackson in the southeast of the northeast of 29-22-3 is shut down at 4,100 feet.

The Cosden 21 school land in the southeast of the northwest of the southwest of 36-20-5 is a rig. No. 22 is drilling at 1,000 feet, No. 23 is drilling at 1,210 feet, and No. 26 is spudding.

The Selby-Gypsy Oil company No. 9 Mullendore in 1-20-7 has the sand from 1,820 to 1,854 feet and is making 10 barrels.

The Cimmaron Pocket Oil company No. 1 Mitchell, located 200 feet north and east of the southwest corner of 27-20-9, is a rig.

The Shattuck Oil & Gas Co. No. 2 Shultz in the center of the southwest of the northwest of the northwest of 1-19-25w is shut down at 800 feet.

The Simmons Oil & Gas Co. No. 1 Gray in the southwest of the northeast of 12-19-8w is shut down at 1,085 feet.

The Roxana Petroleum company No. 2 Skeen in the northeast of the southeast of the southeast of 11-19-5 is a rig.

The Magnolia Petroleum company No. 4 J. S. Still in 12-19-5 is drilling at 500 feet.

The same company No. 2 Hollis in 19-18-6 is drilling at 100 feet.

The Gross and others No. 1 Harris in the southwest of the southeast of 27-19-7 is a rig.

The Sweeney & Mitchell No. 3 Berryhill in the northwest quarter of 21-19-11 is a rig.

The Creek County Gas company No. 1 Ellis in 2-18-5 has the sand from 2,936 to 2,942 feet and is estimated at 75 barrels.

The Prairie Oil & Gas Co. No. 1 unallotted land in 8-16-9 has the sand from 2,700 to 2,722 feet and is making 75 barrels natural.

The Bartlett and Buell No. 1 Lucas in the northwest of 31-15-9 is plugging at 3,738 feet. They had 4,000,000 feet of gas in the Layton sand, which was muddied off.

The H. F. Wilcox No. 1 Stepney, located 200 feet west and 1,520 feet south of the center of 24-17-10 is fishing at 2,230 feet.

The Sapulpa Refining company No. 1 Marshall in the southeast of 35-15-11 has the sand from 2,336 to 2,347 feet and is making 75 barrels.

The Prairie Oil & Gas Co. No. 2 Postoak in the northwest of 35-15-11 is making 20,000,000 feet of gas.

The Okmulgee Oil Field Operating company No. 2 Birney in 10-16-11 has the sand from 1,862 to 1,922 feet and is estimated at 75 barrels.

The Economy Oil company No. 5
