CHANGES ANNOUNCED IN UNIVERSITY FACULTY

Five Teachers Have Resigned and Four Others Granted Leaves of Absence.

ONE ON SABBATICAL PLAN

Two of the New Instructors Already Named for the Coming School Year.

For a Year's Travel.

NORMAN, Okla., May 4.—Five members of the faculty of the university of Oklahoma have asked for leaves of absence for the next college year, effective July 1, 1919, and four other members have been granted leaves of absence for the next college year.

Those who have resigned are W. C. Hanson, professor of physics, who will enter the oil business; Dr. H. M. Hargrove, professor of anatomy, who will practice medicine at East Worth, Texas; John McClure, instructor in English; M. M. Heath, instructor in ancient languages, who will engage in business in New York City, and Marie Mauk, instructor in English.

Miss Mauk is now on leave of absence and engaged in newspaper work. McClure and Heath also are on leaves of absence.

Leaves of Absence.

John Aiton, professor of political science; J. B. Cable, assistant professor of economics; E. E. Dale, assistant professor of history, and S. M. Salvi, assistant professor of English, are the men who will be on leave of absence next year.

Aiton will spend his year in France studying international relations and politics. His leave will be under the sabbatical plan, which means leave after seven years of service on half pay.

New Faces on Staff.

Miss Avis Gilson, formerly director of home economics under the federal board for vocational education, has been appointed associate professor of domestic science, succeeding Mrs. Harriet Patrick Minton, who resigned recently.

John R. Taylor, now on the faculty of Vanderbilt university, has been appointed assistant professor of English in the university.

All of these faculty changes have been approved by the new board of regents of the university.

The board has adopted all rules and regulations of the state board of education relative to appointments and government of the university.

Lombard Union	58
Salvation Army	64
Total	5,838

AMERICANS OPPOSE GIVING AID TO GERMAN FINANCES

PARIS, May 4.—Authoritative disapproval of a plan that has been advanced for the rehabilitation of European financial conditions was expressed today by the financial members of the American delegation. It was made known definitely that the United States would not be a party to any joint action having for its purpose the restoration of German business.

It had been proposed by the British that a German bond issue of $5,000,000,000 be arranged with Great Britain, France, the United States and other allied and associated powers as guarantors. The American delegates took the position that such a plan would be not only impracticable but contrary to American precedent. It was explained that the British proposal included the apportionment of the issue among all the powers, including even the small newly created governments.

Germans Pay for Coffee.

RIO DE JANERIO, May 4.—Dr. Epitachio Pessoa, president-elect of Brazil and head of the Brazilian delegation at the peace conference has sent word here by cable that the conference has decided that Germany shall pay the cost of the coffee stocks confiscated at Hamburg and Antwerp at the beginning of the war, together with interest on the sum involved.

Owasso Boy Writes Best Essay on Poultry Raising in Tulsa Club Organization

The poultry industry of the country may be one unusually active and new members are being added to the club as well as new clubs being created in other districts with the coming season in view.

Miss Carrie C. Lavette, county home demonstration agent, meets with the branches at intervals and by lectures and illustrations teaches the young folks the fundamentals pertaining the production of poultry. Members of the clubs are given credit in school for the work done, their essays and examination papers passing through the hands of Miss Lavette to the agricultural college at Stillwater, where they are graded by professional experts. This work is equivalent to one study, and exempts the member from one school examination.

Miss Lavett states that the interested boys and girls get a practical knowledge of poultry raising. They are taught how to select the breed, which are the more popular of the three main classes and the respective economical usefulness of each. They are told to select healthy, vigorous stock, that there is no "best" breed, but the one best suited to the individual purpose ought to be chosen, that it is best to keep but one variety, and that the male bird at the head of the flock should be standard bred. Detailed information is sent them regularly relative to raising the young chicks after their hatch.

The following "composition" written by Frank Klabr, 11 year-old boy of Owasso, is what Miss Lavette considers one of the best that have come under her observation to be sent to Stillwater. Miss Lavette contends that many of her club members could teach a mature farmer a great deal.

POULTRY MANAGEMENT
By
Frank Klabr

The best way to begin in the poultry business is to start with a few good hens and not make large investments before you learn the business thoroughly. The fall of the year is about the best time to begin. Chickens are classified as egg breeds, general purpose breeds, meat breeds and fancy or ornamental breeds.

The egg breeds are Leghorns, Minorcas, Andalusian, and Spanish.

The meat breeds are Cochins, Brahmas and Langshan.

The general purpose breeds are Plymouth Rocks, Wyandottes, Orpington and Rhode Island Reds.

Ornamental breeds are Games, Bantams and Bantams.

In my opinion the best breed for the farm is the general purpose breed because they are fair layers, sitters, their meat is good, and they make good mothers.

The two systems of housing are the colony plan, consisting of many small houses for small flocks and obviate the need of fences. The other is continuous housing made for many chicks under one roof. The continuous way is best because it does not take as much extra labor and lumber. The chicks are most easily cared for in stormy weather.

The house should be located on a southern exposure, rather high and well drained with sandy soil. Yards should be used when the flock is small.

Little chicks should not be fed from 36 to 48 hours after hatching, because they have the yolk of the egg in their body and it furnishes the needed elements.

One good feed for the first time is a hard boiled egg mixed, shell and all, with three times its amount of stale bread crumbs.

After weaning, the chicks should have green feed, grit, milk, and plenty of water. A good feed is, ten parts corn meal, three parts wheat middlings, one part meat scraps. Mix and bake.

During the molting period the hens should be fed more nitrogen than ordinarily. A little linseed meal added does good. Just before laying the hens should be fed animal feed, green feed, corn, wheat, oats, and barley.

The mother hen should be kept in the coop when the chicks are small because if she gets out she will make them go too hard for their strength.

For best marketing purposes eggs should be clean, of the same color, and good shape. They should be sold to regular customers.

The coops should be cleaned often, the drippings, if left, will cause disease.

A fertile egg is spider-like inside, while an infertile egg is clear inside. Infertile eggs are produced when no male is kept.

Boys and girls should join and be active members of the club, because it is helping the government and is good, interesting work for them.

M. V. DIVISION OFFICES TO BE MOVED TO TULSA

Special to The World.

MUSKOGEE, May 4.—General offices of the Midland Valley railroad moved to Kansas City last July by the United States railroad administration and consolidated with the Kansas City Southern, are to be opened in Muskogee again. Eugene Mock, former Midland Valley official, has been appointed general freight and passenger agent with headquarters here. Percy Talbot, who has served the road here as division freight and passenger agent, will be transferred to Tulsa, retaining the same title.

Mr. Mock formerly was the general freight and passenger executive for the Midland Valley, but was drafted by the United States railroad administration nearly a year ago and assigned to the southwest traffic bureau.

GERMAN DELEGATES ASSERT THEY ARE TREATED COLDLY

PARIS, Friday, May 2.—In a German wireless dispatch picked up in Paris the first meeting of the German delegates with representatives of the allies is described at length, the attitude of the French officials is characterized as "cold but correct." The message declares that the French and British press treat the arrival of the Germans as a matter of minor importance and adds that according to the Dutch papers the American press had displayed a similar indifference.

June 1 is given as the probable date of the signing of the treaty.

Soldiers May Obtain Extra Rail Allowance

WASHINGTON, May 4.—Thousands of soldiers, sailors and marines discharged from service between November 11, 1918, when the armistice went into effect, and February 28, 1919, may file claims with the auditor of the war department for 1½ cents per mile for traveling expenses from the place of discharge to their homes. This was decided by Comptroller of the Treasury Warwick, considering a number of questions involving discharged soldiers' travel allowance.

Police Hold Young Girl.

Special to The World.

MUSKOGEE, May 4.—The police are detaining Gracie Frances, 17, daughter of a farmer living near Wapanucka, who came here yesterday and at once went to the federal jail to see W. H. Stoner, a prisoner, whom she said was her husband. Shortly after she arrived the police received a message from her father requesting that she be held.

Williams Home to Vote.

Special to The World.

MUSKOGEE, May 4.—United States Judge Robert L. Williams, former governor, went to Durant today and will remain until Tuesday to vote in the road bond election.

KIWANIS ANNIVERSARY MEETING MONDAY NOON

The first anniversary of the Kiwanis club will be held in the Hotel Tulsa at 12:15 o'clock Monday afternoon when the directors for last year including John B. Woodward, R. W. Grant, H. W. Miller, and R. M. Moody of the officers and N. G. Henthorne, M. Q. Queensbury, L. L. Doyle, A. M. Atkinson, E. P. Harwell and J. F. Blair former directors will be present and preside at the head table.

Law to Communize Hungarian Women Beaten Due to Quarrel in Family of Cabinet Member

BUDAPEST, May 5.—It was due to a family quarrel that Hungary escaped having its women "communized" after the fashion in the Russian "republic" of Saratoff, rather than to the abhorrence of Bela Kun to the scheme as the latter stated.

The law to communize women was actually framed and in the prince's hands ready for publication when Herr Weltner, one of the cabinet of bright young men who are now ruling the fate of the former kingdom, went home for supper. During the meal he told his wife and his mother-in-law in glowing terms about the projected reforms.

"What are you doing for women?" they asked.

Weltner then explained that in future women would be free too; that they would be permitted to choose their own husbands and discard them if they liked by the simple process of paying a few cents for a legal paper declaring their "unfitness" for married life. Further conversation developed the fact that the new law also gave husbands the same right; that children might be turned over to the care of the state so that both husband and wife would get rid of the duties and responsibilities of rearing the offspring.

"Do you mean to tell me that you can get rid of me from one day to another and marry the next day if you like?" demanded young Mrs. Weltner.

Then the storm broke. Both wife and mother-in-law began to scream and a frenzied scene ensued, the upshot of which was that the women demanded that Weltner should get the law stopped or they would leave him at once and would mobilize all the wives, mothers and mother-in-laws of all the nations to do the same.

THE MAKING OF A FAMOUS MEDICINE

How Lydia E. Pinkham's Vegetable Compound Is Prepared For Woman's Use.

A visit to the laboratory where this successful remedy is made impresses even the casual looker-on with the reliability, accuracy, skill and cleanliness which attends the making of this great medicine for woman's ills.

Over 350,000 pounds of various herbs are used anually and all have to be gathered at the season of the year when their natural juices and medicinal substances are at their best.

The most successful solvents are used to extract the medicinal properties from these herbs.

Every utensil and tank that comes in contact with the medicine is sterilized and as a final precaution in cleanliness the medicine is pasteurized and sealed in sterile bottles.

It is the wonderful combination of roots and herbs, together with the skill and care used in its preparation which has made this famous medicine so successful in the treatment of female ills.

The letters from women who have been restored to health by the use of Lydia E. Pinkham's Vegetable Compound which we are continually publishing attest to its virtue.

Coming Events Cast Their Shadows

Prepare Now to Withstand the Crisis.

Do not anticipate with a shuddering dread the beautiful event of childbirth. You can avoid disappointment during the period and start in the right way by preparing your system and nothing so well as a specific one direct to meet the case.

For just this purpose women all over the land, in every walk of life, have used for over half a century the time-honored and famous remedy, Mother's Friend. It is prepared to give the mother-to-be that direct help she needs. The muscles, nerves, tissues and cords are made and kept soft and elastic. Thus strain is avoided and as a result "nerve-racking" pains, bearing down and dragging are not experienced.

The skin, too, is put in a pliable condition and consequently there is no danger of unsightly stretch marks to mar the beauty of motherhood.

Write for our free illustrated confidential book, M, telling what to expect and how to care for the baby. Address Bradfield Regulator Company, Dept. M, Lamar Building, Atlanta, Georgia. For sale at all druggists, $1 per bottle.

Now, mothers, there is nothing to take the place of MOTHER'S FRIEND.

A Correction

Through an error it was announced in The Sunday Morning World that our formal opening would be held today (Monday). The painters and decorators not having finished their work, it will be impossible to hold our opening on this date. Watch the papers for announcement of opening date.

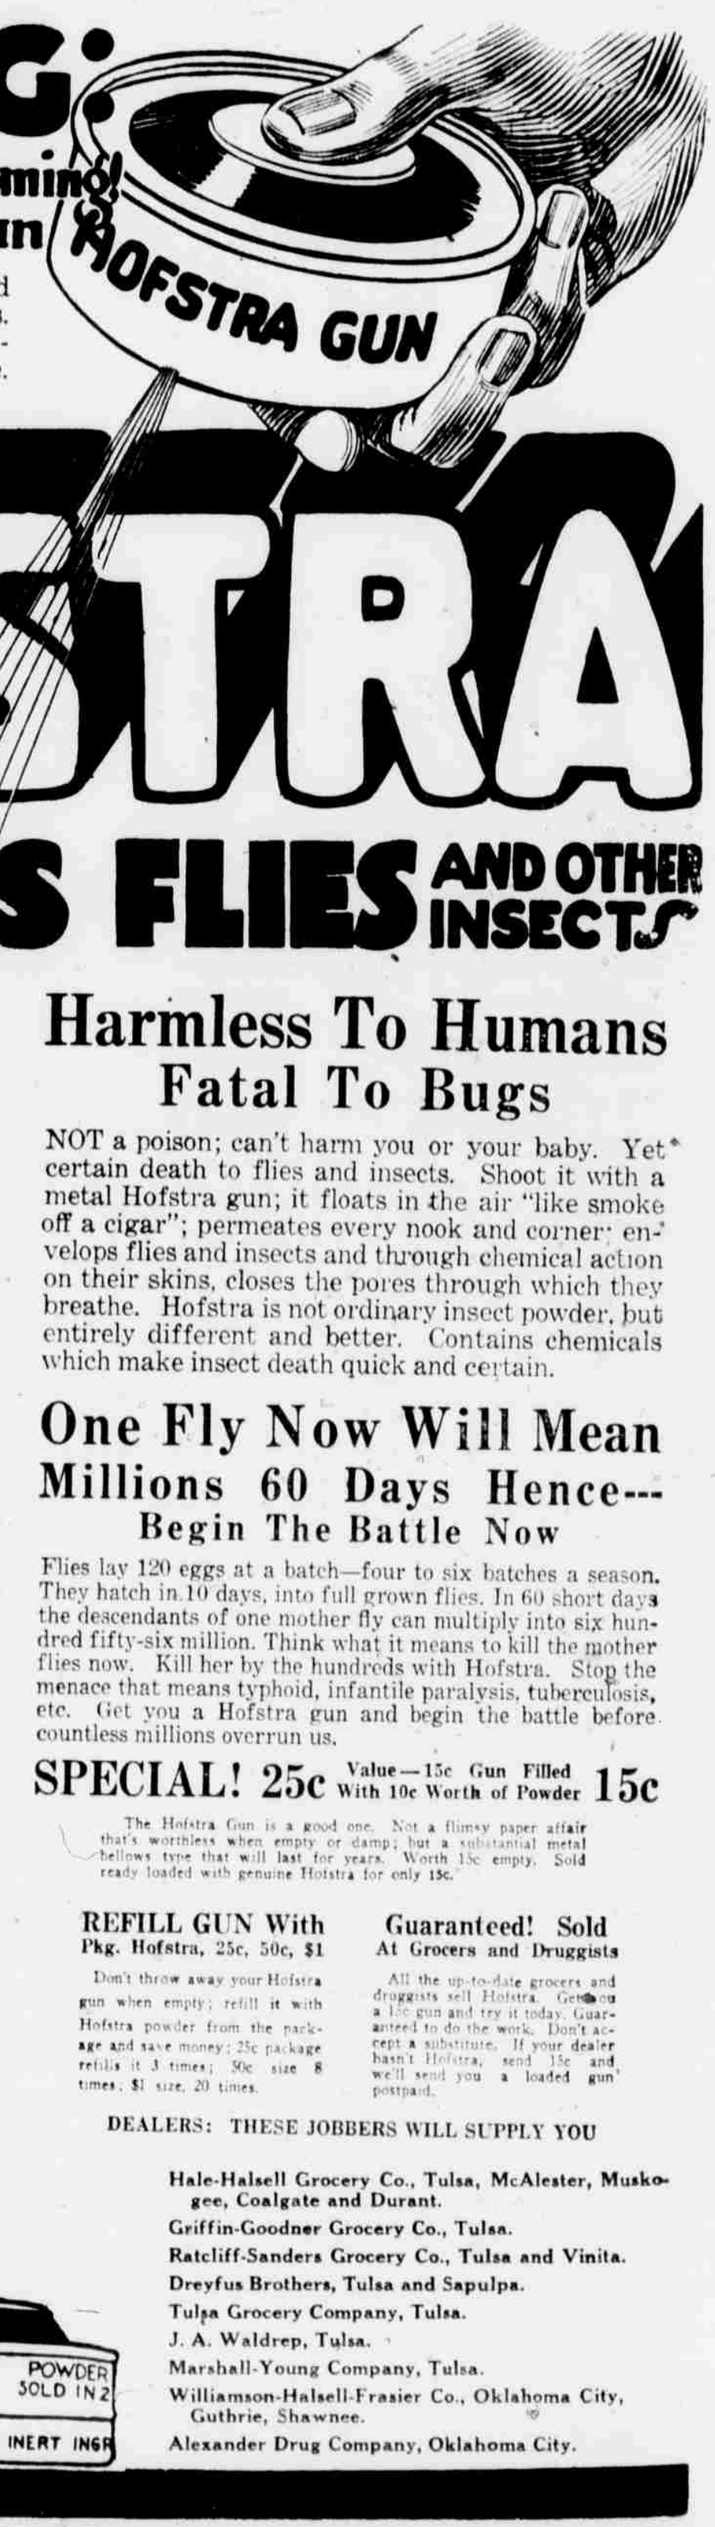
WARNING:

The Fly and Insect Hordes are Coming! Arm Yourself with a Hofstra Gun



Filthy flies, bugs, vermin—disease spreaders and food destroyers. They're breeding now by the billions. They'll get worse with hotter weather. Poisons are dangerous—sticky sheets are mussy—swatters are futile. You can kill them, hundreds at a single shot with—

"HOFSTRA"

KILLS FLIES AND OTHER INSECTS

CERTAIN DEATH TO

—Flies
—Ants
—Roaches
—Chicken Mites
—Fleas
—Mosquitoes
—Bed Bugs
—Lice
—Potato Bugs
—Green Bugs
—Water Bugs
—Cabbage Worms
—Tomato Bugs
—Black Fly
—Plant Lice
—Moths, Etc.

Harmless To Humans Fatal To Bugs

NOT a poison; can't harm you or your baby. Yet certain death to flies and insects. Shoot it with a metal Hofstra gun; it floats in the air "like smoke off a cigar"; permeates every nook and corner; envelops flies and insects and through chemical action on their skins, closes the pores through which they breathe. Hofstra is not ordinary insect powder, but entirely different and better. Contains chemicals which make insect death quick and certain.

One Fly Now Will Mean Millions 60 Days Hence--- Begin The Battle Now

Flies lay 120 eggs at a batch—four to six batches a season. They hatch in 10 days, into full grown flies. In 60 short days the descendants of one mother fly can multiply into six hundred fifty-six million. Think what it means to kill the mother flies now. Kill her by the hundreds with Hofstra. Stop the menace that means typhoid, infantile paralysis, tuberculosis, etc. Get you a Hofstra gun and begin the battle before countless millions overrun us.

SPECIAL! 25c Value—15c Gun Filled With 10c Worth of Powder **15c**

The Hofstra Gun is a good one. Not a flimsy paper affair that's worthless when empty or damp; but a substantial metal bellows type that will last for years. Worth 15c empty. Sold ready loaded with genuine Hofstra for only 15c.

REFILL GUN With
Pkg. Hofstra, 25c, 50c, $1

Don't throw away your Hofstra gun when empty; refill it with Hofstra powder from the package and save money; 25c package refills it 3 times; 50c size 8 times; $1 size, 20 times.

Guaranteed! Sold
At Grocers and Druggists

All the up-to-date grocers and druggists sell Hofstra. Get you a 15c gun and try it today. Guaranteed to do the work. Don't accept a substitute. If your dealer hasn't Hofstra, send 15c and we'll send you a loaded gun postpaid.
