Making History

These are the days that history is being made and as long as oil is found in any country, today's events will be discussed wherever oil men congregate. That the crisis is here and that the result of yesterday's conference at Austin and today's meeting at Kansas City is of vast importance, is scarcely realized in Tulsa, but nevertheless both are epoch-making events.

If the Austin conference winds up harmoniously and oil men in Texas can agree on a program for the conservation of oil, it will beat all records, and if the refiners in Kansas City today can work out a program looking to a better price for refined products, it will be great news and well worth recording in the annals of the oil game.

But there must be no discrimination in Texas as against the independent refiners and marketers, and there must be concerted action at Kansas City looking to the welfare of the industry as a whole, and to the good of not the refiner alone, but to the oil producer, the marketer, which includes the jobber, and to the ultimate consumer as well.

Here's hoping that everything works out to the best interests of all, and why should we worry, as the worst seldom happens.

Skelly Getting a Good Well

W. G. Skelly is getting a good well southeast of the original Wilcox well in 30-15-11, and this in face of the fact that it looked for a while as though he were going to get a dry hole. The casing was set at 2,550 and nothing was found until about 2,575, when the well began flowing, and although it is impossible to estimate it at this writing, it is a good well and demonstrates that Mr. Skelly is right there when it comes to playing the oil game.

It also demonstrated pretty conclusively that the trend will go toward the northwest and is likely to connect up, eventually, with the stuff in sections 2, 11 and 10-15-10, and if so, will open up a mighty pretty trend in the direction usually taken by all the pools in Oklahoma.

Sa mLongfellow in Luck

Sam Longfellow, drilling as the Penn-Osage Oil company and Longfellow, has a well in the southeast corner of the northeast of 10-21-9 which is spraying oil and looks as thought it ought to make a good producer. The gas sand was found at 2,280 feet and there was more than 5,000,000 feet of gas at that depth and at 22 feet in the well began spraying oil and is shut in waiting for tankage.

The same people report a 100-barrel well completed about a week ago in the southeast of 32-26-11.

Everybody here is strong for Mr. Longfellow, who belongs to the old-time Barnsdall organization and is an oil man right.

Pottawatomie County, Kansas.

Crawford and others No. 1 Boyle in the northwest of northwest of 4-10-12 is cementing off water at 2,700 feet.

Osborne County, Kansas.

Delhi Oil company No. 1 Dorman in the southwest of southwest of 20-10-11w has rig up.

OIL AND GAS

Leases, Supplies, Production, Etc.

For lease for oil and gas by owner. The W ½ of NW 1-4 of section 2 and E ½ of NE 1-4 of section 3, T. 13 N., R. 8 E., Busie Polokee allotment. This property is directly south of production in section 27, T. 14 N., R. 8 E. Call 8180 or 6950 or address box 1290.

I have an 80-acre lease joining producing property at Billings. Three pay sands already discovered. Must turn this quick, so will make a red-hot price to some one who will drill it. Write W. E. Hackett, Covington, Okla., Rt. 1.—Advt.

Wanted—To buy or rent at once, string of Standard tools. Write, phone or wire East Extension Ranger Oil & Gas Co., 410 Phoenix building, Muskogee, Okla.—Advt.

Want contractor with heavy string of tools to drill well in Texas field. Will give inducements if ready to start at once. J. H. Russell, 307 Cosden building, Tulsa. Phone 7428.—Advt.

Wanted—To make connection with oil company as chief engineer or general troubleman. Twenty-five years' engineering experience. Seven years with two of the largest gasoline companies in the field. Address E-44, care World.—Advt.

R. H. Martin, casinghead gas testing, absorption compression methods. Phone 6287.—Advt.

See me for oil lease in Hughes and Seminole counties, three wells drilling near Yeager, one at Wewoka, more locations. W. J. Ryan, Holdenville, Okla.—Adv.

RANCH FOR SALE—8,000 acres deeded land, 3,000 acres leased land, 500 acres deeded land in cultivation, 150 acres meadow, balance rough, rocky grazing land. This is a bargain for cash or part cash and time. No trade accepted. Write or come at once. Ivey Johnson, Ardmore, Okla.—Adv.

WANTED—25 to 600 barrels production, also drilling proposition. Bezys district. Southern Development Co. Phone 1226, 525 Robinson building.

FOR SALE — Nine 55,000 bbl tanks. Address N. Lyon, Postoffice Box 128, Tulsa, Okla.—Advt.

FOR SALE—80-acre lease Chisesa field; producing offsets on two sides, from 200-foot sand; straight sale only. Address E-53, care World.—Advt.

Marland Gets 2,000-Barrel Well at Ponca City

Special to The World.

PONCA CITY, Okla., July 16.—A 2,000-barrel well was completed by Marland Refining company, in the south Ponca field Wednesday when the G. H. Dyett No. 6 in the southeast of 8-26-2 began flowing at the rate of 100 barrels an hour.

The G. H. Dyett touched the sand June 29 and began flowing at the rate of 200 barrels daily. It was drilled 10 feet into the sand July 1 and production jumped to 800 barrels daily. Casing had been set only 3,600 feet down leaving 300 feet of open hole to the top of the sand. A 300-foot liner was put in this week and when the hole was cleaned out Wednesday it was began flowing continuously.

The well is the biggest producer ever completed west of the Osage in Oklahoma. Daily gauge reports of the well since June 29 are as follows, expressed in barrels: 124, 319, 345, 289, 284, 352, 232, 497, 470, 407, 436, 414, 851, 866, 852, 893, 790, 767, 799, 779, 744, 856, 782, 805 and 753.

The well filled a 250-barrel tank in two hours Wednesday and drillers had to pinch it in because of lack of tanks. The Dyett is the second well down to the deep marked sand by the Marland Refining company.

As to the Osage

Ponca City, Okla., July 15, 1919.

"W. H. Peck, Oil Editor, Tulsa World.

"I have been reading some of your stories regarding the extension of the trust period in the Osage, and I want to congratulate you on the attitude you have taken. You are always to be found on the right side of the argument in which the independent producer is interested, and this is a time when the boys need you to put in your best licks for them.

"I cannot conceive of any one in the oil business who would be against the renewal of the trust period in the Osage. Nearly all of us have bought leases over there that will expire by limitation before we have developed our leases, unless that trust period is extended.

"For once, we are in accord with the wishes of the interior department. They too are in favor of an extension of the trust period. In the past few years, the Oklahoma delegation in congress has been opposed to such an extension, but with the oil men favoring it, and the interior department favoring it, I think we should be able to prevail upon the Oklahoma delegation to see the matter as we do.

"One thing though I think that we should insist upon and require of the department some understanding in regard to, is that should the trust period be extended, the department would continue to lease the Osage lands. Without such an understanding with the department, I fear that if the trust period were extended, the Indian department would tighten up and withhold Osage lands from lease for many years.

"The Osage Indians want their land developed now; the producer wants the opportunity to develop it; and the independent refiners of Oklahoma need the oil, so I think we should all work together and try to help the interior department get an extension of the trust period, but upon the condition that they will lease the unleased portion of the Osage as rapidly as possible upon terms which will permit the independent producer to develop the oil leases of our Oklahoma refineries.

"Again thanking you for the interest you have taken in this matter, and hoping you will continue to plead the cause of the Oklahoma producer, I am, with best regards,

"Yours truly,
E. W. MARLAND."

Mr. Marland has the right idea, and the only question is, can the secretary of the interior, Franklin K. Lane, be depended upon? California operators had the same confidence in his fidelity to independent interests that operators in Oklahoma have now, and when it came to a show down on account of his political aspirations, the honorable secretary turned them all down and the history of the Honolulu Oil company seems to apply to the Osage right now. That the secretary is anxious to get back into the good graces of independent oil operators is evident, but now is the time to show whether he will stick or not, and whether he will play fair with independent operators, or will he throw his influence altogether with the monopoly, and this is exactly what the oil men want to know.

There have been but one or two dark pages in the history of the Osage up to the present time, one is that Theodore Barnsdall was robbed of his vast acreage, and the only oil writer in the entire bunch who had the nerve to fight for the old man was the oil editor of this paper.

Another equally dark page was the contract made by the Texas company at the time the Central Petroleum company was organized, and, looking back, it would seem that Providence has kindly provided that not a soul connected in any way with this deal had ever profited thereby. It is the good man that wins out in the oil business.

The Osage must be leased as quickly as possible and in as large blocks as possible for the good of the country, and for the good of the man of small means who is seeking a start, and can only purchase acreage when sales are held often and in large and numerous tracts. Mr. Marland is building up a vast industry at Ponca City and is entitled to every possible opportunity.

Atlantic Petroleum Has Good Well

The Atlantic Petroleum company No. 5 Washard in 12-27-4, Garber field, is a well making 500 barrels and the top of the sand was found at 1,522 feet, and it is now 20 feet in. The well offsetting this on the south started at 2,200 barrels and got the top at 1,547 and the chances are that the Atlantic well will be drilled deeper and greatly increase its production.

Number 6 due north of No. 5 is drilling at 1,350 feet and ought to be in by Monday.

Ponca City Men in Texas.

EASTLAND, July 16.—Intense development of the Eastland district is contemplated by the Duquesne oil corporation, a Louisiana Delaware corporation, which has obtained a permit to do business in Texas and established headquarters in Eastland.

Ten drilling contracts have been let by the Shates Oil corporation to the Duquesne. These contracts cover drilling operations on the Nivens tract and other leases north of Eastland.

The company has also purchased a site in Eastland for an office building and supply depot.

The organizers of the Duquesne are J. M. Weaver, J. G. McCaskey and L. H. Wonk, Fort Worth, Texas.

An Important Test in Louisiana

P. J. White and J. Bruce Hughes are starting a test in 34-19-10, south of Dubach, Louisiana. This is on the north side of Dorbon bayou, which looks like a winner from the start. It is between the Homer field and the big gas in the Monroe field and is likely to open up something worth while.

Texas Operations.

The Oklahoma Producing & Refining Co. and Pete Oil company No. 4 Swenson in Eastland county is setting the 8 5-8 at 3,300 feet. No. 6 is drilling at 3,250 feet. No. 9 is drilling at 950 feet, and No. 13 is setting the 13 3-8 inch at 790 feet. The Ingram No. 1 is drilling at 3,437 feet. The Barton No. 4 is drilling at 3,277 feet, with a showing of oil and gas.

In the Yale-Quay District.

The Roxana Petroleum company has rigged up to drill No. 1 Haymond in 12-19-5, to the deep sand. A rig is building for No. 7 on the same lease for a deep sand well.

Carter company is rigged up to drill No. 4 Crow to the deep sand in the same section.

Sinclair No. 11 Crockett, offsetting the New England Oil company No. 7 Haymond, which is still making 200 barrels daily, is spudding.

Sinclair No. 3 Munnick in the northeast of 24-19-5 has a rig on the ground and will go to the 3,500-foot sand.

C. B. Shaffer No. 4 Laughlin, in 2-18-5, has been deepened from 2,540 to 2,590 feet, getting the top of the sand at 2,569 feet and is good for from 250 to 400 barrels natural.

The Middle States No. 1 Bushee, offsetting the above well to the west, got the sand at 2,560 feet and drilled to 2,577 feet. This well is making between 200 and 250 barrels daily.

Marion County, Kansas.

Salt City Oil company No. 1 Gutsch in the northeast of northwest of 17-18-5 is fishing at 2,448 feet.

The Spencer Oil company No. 1 Vogel in the northwest of southeast of southeast of 25-19-3 is drilling at 1,140 feet.

The Sinclair Oil & Gas Co. No. 1 Ford in the southwest of southeast of 15-20-4e has rig up.

The Marion County Oil company No. 1 Williams in the southeast of southeast of 18-20-4 is spudding.

Franklin Oil & Gas Co. No. 2 Manheim in the southwest of southwest of 11-20-5 has rig up.

The Argus Oil company No. 1 Kosloski in center of northwest of southwest of 5-21-4 got sand 2,260 to 2,290 feet and well made 5,000,000 feet of gas when it first came in, but is now making water.

Galbreath and others No. 1 Potts in the northwest of southeast of southwest of 27-21-4 is shut down at 510 feet.

Cosden and Markham No. 1 Sellers in the southeast of southeast of 28-21-4 is drilling at 1,850 feet.

The Ohio Cities and Gypsy No. 1 Davis in the northeast of southwest of 34-21-5 is shut down at 1,200 feet.

Rosenthall and others No. 1 Sicrest in the northwest of northeast of southwest of 17-22-2 is drilling at 1,700 feet.

Lee and others No. 1 Chilson in center of west line of northwest of southeast of 4-22-4 is dry and abandoned at 2,560 feet.

Watchorn and others No. 1 Jolliffes in center of south line of southwest of 4-22-4 got sand 2,484 to 2,490 feet and well pumped 575 barrels first eight hours. No. 2 in southwest of southeast of southwest rig up. No. 3 center of north line of southwest of southwest is rig up.

The American Canadian Oil company No. 1 Chilson in the southwest of southeast of 4-22-4 is drilling at 1,260 feet.

Steinhour and others No. 1 Windsor in the northeast of southeast of 34-22-4 is dry and abandoned at 3,000 feet.

Watchorn and others No. 3 Jolliffes in the center of north line of northwest of 9-22-4 is rigging up.

Bimbusi Investment company No. 2 Buford in the northwest of northeast of southeast of 10-22-4 has timbers on the ground.

Same company No. 1 Sinex in southwest of 10-22-4 got sand 1,845 to 1,855, total depth 2,545 feet and have a crooked hole. No. 2 in southwest of northwest of southwest is spudding.

Derby and others No. 1 Larson in the southwest of northwest of 11-22-4 got sand 2,430 feet and is swabbing 300 barrels daily.

Gaskill and others No. 1 Jewell in the northwest of southeast of northwest of 11-22-4 is a rig.

Kinney Refining company No. 1 Endner in the northwest of southwest of northwest of 14-22-4 is spudding.

The Mountain & Fuel Oil & Refining Co. No. 1 Clark in the northwest of southwest of 14-22-4 is drilling at 1,456 feet.

The Elmhurst Investment company No. 1 Burton in southwest of northwest of northeast of 15-22-4 got sand 2,224 feet and well pumped 1,000 barrels in 24 hours. No. 3 in the northwest of southwest of northwest of northeast is drilling at 300 feet. No. 4 in southeast of northwest is spudding. No. 5 in the southeast of northeast of northwest has rig up. No. 6 in southwest of northeast is rig up.

Ward and others No. 1 Burton in the northwest of southeast of northeast of 15-22-4 has rig up.

The Carter Oil company No. 1 Lewis in the northeast of southwest of 15-22-4 got sand 2,567 to 2,569 and well swabbed 200 barrels. No. 2 is rigging up.

Pierce and Pierce No. 1 Clark in the northwest of southeast of 15-22-4 is drilling at 500 feet.

Buffalo Producing company No. 1 Jolliffe in the northeast of northeast of 16-22-4 is drilling at 1,000 feet.

Same company No. 2 Clark in center of west line of northeast of southeast of 15-22-4 is spudding.

Watchorn and others No. 2 Jolliffe in the northeast of southwest of northwest of 16-22-4 has rig up.

West and others No. 1 Jolliffe in the northeast of northwest of 16-22-4 has rig up.

Derby and others No. 1 Jolliffe in northeast of southeast of southeast of 16-22-4 has timbers on the ground.

Pierce and Pierce No. 1 Jones in center of east line of northeast of northeast of 17-22-4 has rig up.

Mullahan and others No. 1 Hall in southeast of southwest of 32-22-4 has rig up.

National Refining company No. 1 Evans in the southeast of southeast of 33-22-4 got sand at 1,850 feet, showing 20 barrels. 2,110 to 2,124 and showed 35 barrels. Total depth 2,630 with a hole full of water, but have plugged back to 2,150 feet.

Barr and others No. 1 Nelson in southeast of northeast of northeast of 33-22-4 is drilling at 1,100 feet.

The National Refining company No. 2 Evans in center of east line of southeast of southeast of 33-22-4 got sand 2,116 to 2,122 and well is good for 50 barrels after a shot. No. 3 in the southwest of southeast is drilling at 1,400 feet.

Same company No. 1 Hansen in the southwest of southeast of 34-22-4 is spudding.

Kanotex Refining company No. 1 Jolliffe in 6-22-5 is shut down at 2,490 feet.

Osage County, Kansas.

Hodgson Oil corporation No. 1 Craig in the southwest of northeast of southwest of southwest of 9-16-13w is rig up.

Mail Oil Development company No. 1 Nail in northeast of 8-17-17 has rig up.

Black Hawk Oil company No. 1 Van Buskirk, in the southwest of southeast of 10-18-16 is shut down at 2,700 feet.

At Foyil.

The Mid West & Gulf Co. has another good well in the shallow sand southwest of Foyil. No. 13 on the Tennison farm in 8-22-17. The well is flowing 100 barrels natural from sand found at about 650 feet.
