Texas Railroad Commission's Final Order

Special to The World.

AUSTIN, Texas, July 18.—Texas railroad commission today issued its order in Burkburnett oil hearing. The order is that waste shall be stopped in the northwest extension in accordance with Texas law and that producers shall not allow oil to escape in that field.

But the important finding and order of the commission is that all production in the northwest extension of the field shall be prorated and that, in proportion to potential production, the well shall be allowed to produce only the amount of oil which can be conveyed from the field.

J. L. Mildred, deputy supervisor for the commission, is directed to post an apportionment sheet in his office showing the amount of oil which pipe lines may transport for each well in the field.

Mildred is directed to confer with committees of producers and pipe line companies to establish rules for making the apportionment fair and equal. The apportionment will be made weekly and copies of the apportionment sheet are to be furnished pipe line companies and producers.

The new order does not close down the field or stop drilling therein, but is intended merely to insure business in pipe line runs and tank car transportation of oil in porportion to the amount produced in the field. The order will be effective for 30 days from this date, unless otherwise ordered by the commission.

The apportionment referred to in the order is to be merely advisory but any dereliction of duty in carrying it out is to be reported to the commission.

Gilliland Not in It.

J. W. Gilliland, owner of the largest production in the Burkburnett field, has been quoted as being at Austin and as having urged that the northwest extension be shut down for 30 days.

This does Mr. Gilliland great injustice, as in the first place he is in Toledo, Ohio, visiting his associates in business, and has not taken any part whatever in the discussion at Austin before the Texas Railroad commission, relative to the shutdown which was asked for by some of the older operators at Wichita Falls and elsewhere.

The chances are, as time goes on and the whole thing has blown over, there will be others who will declare themselves as having been most against the plan of having the railroad commission or anyone else in authority assume jurisdiction over the drilling operations in the new extension, and perhaps they will not, like Mr. Gilliland, be able to show an absolute alibi, but will have to live it down like many here.

In Oklahoma, during the rush at Cushing, many oil men asked that the state intervene and shut off rapid drilling, but when it was all over the largest operators, having the most at stake, were glad that the state had not done as requested, and that the militia had not been called out to stop drilling, and for the following reasons:

The great boom at Cushing, when it ended, saw a wonderful expansion of the refining industry, and a broadening of the market for refined stuff, and for fuel oil and road oil, that was the direct result of a flood of cheap oil. Had the drilling been stopped, it would have meant low prices over a long period of years, when the moment the market responded quickly as production declined. This due to the great number of refineries who led the way in price making just as they are doing today.

Great Activity on the Noted Osage Hill

H. F. Wilcox wells Nos. 1, 3, and 3 are still holding up their joint daily production of approximately 1,250 barrels, all on the Banks farm in 30-15-11. No. 4, being located in the northwest corner of the southwest quarter of the northeast quarter, is drilling at 200 feet. No. 5 which is offsetting the Producers & Refiners Co. well No. 1 on the Tob Jefferson farm, and where the Wilcox sand was reached at 3,022 feet, Wilcox has set his 10-inch casing at 840 feet and is now drilling on this test at 850 feet. His No. 6, which is an offset to the Carter well, and located in the northwest corner of the northwest quarter of the northeast quarter, is drilling at 800 feet. His No. 7, which is offsetting the Atlantic Petroleum company well No. 2, and which location is the center of the north line of the northeast quarter of the northwest quarter, is now drilling at 800 feet. His No. 9 is a rig, located in the center of the west line of the southwest quarter of the northeast quarter. His No. 10, which is offsetting the Skelly well recently brought in showing an 800 barrel production in a 600 foot sand, is now rigging up. His No. 8 on the same farm is a rig, located in the center of the south line of the northeast quarter of the northwest quarter.

H. F. Wilcox has a rig up for his No. 1 test on the Georgia Brown farm, located in the southeast corner of the northwest quarter of the southwest quarter of section 19-25-11.

Export Oil Corporation Holds Meeting

The Export oil corporation held a meeting yesterday and a most enthusiastic affair it was, judging from all reports, and the chances are that the Export oil corporation will continue its great work as the outlet for mid-continent refined products on a larger and greater scale than ever.

It was announced at yesterday's meeting that the contract with Donald Slingluff had expired and was not renewed, but that a program has been mapped out that will be of the greatest interest to refiners through this section of the mid-continent field as soon as it is announced.

It is a great corporation and is deserving of the greatest praise for the great work it has done in supplying our allies with oil during the war, and more than that, has been a most consistent friend of the independent refiner in the mid-continent field.

James King Duffy, president; E. E. Schock, Captain Constantin and H. N. Cole were in attendance.

McCarthy to the Kay County Gas

Frank R. McCarthy, who was general superintendent for the Oklahoma Natural Gas company for the past 10 years, is now head of the Kay County Gas company's pipe line department.

Marland Building City for Employes

PONCA CITY, Okla., July 18.—Ponca City is to have a model city in the nature of an addition to the present city limits.

The project is a $1,000,000 building program announced by President E. W. Marland of the Marland Refining company and Kay county Gas company in connection with the Marland refinery here.

The model city is to be a unique departure in industrial development. On three quarter sections of land adjoining the south Ponca oil field will be the 3,000-barrel refinery of the Marland Refining company, the casinghead plant, tank farm, cracking and lubricating plants, office buildings, and a parking system and residential section, all within sight of the derricks on the oil field.

The grouping of all interest of the two companies is a part of a program for caring for the living problems of employes.

The three quarter sections to be occupied are on a line running north and south, the south quarter adjoining Ponca City on the southwest. This quarter will be the residential section. On the south quarter are located the refinery, casinghead plant and tank farm. On the middle quarter will be built a five-story office building, a garage 70x140 feet, and a warehouse 150x150 feet. Along the Santa Fe tracks adjoining the middle quarter on the east will be the two companies' pipe line yards, half a mile long.

The unique feature of the project, and the one that makes the plan of particular interest, is that which provides for the employes of the two companies. All the artistry of the landscape architect is to be employed in making this model residential city a beauty spot. The residential section itself will be one huge park, which will be traversed by streets running on easy curves to break the usual monotony of straight streets found in most cities. The minimum cost of houses built in this section will be $3,000, which will be paid back to the companies by employes buying them on easy payment terms. Every employe who lives in the section will own his own home. Streets will all be paved and all wiring will be underground. The companies will provide a large garage for employe owned cars.

West of the office buildings in the middle quarter section, and just across the road south from the residential section will be a large area devoted to amusement and welfare features. A large lake back of the refinery is to be extended north on the west to build a pavilion for amusement and educational features. There will be a string of tennis courts, a baseball park and two club houses, one for men and one for women. The club houses will be in the nature of dormitories for unmarried employes but the houses will be open for the general use of all employes.

All vacant ground not used for residences, amusement places and buildings will be converted into parks. The large part of the residential section will be dotted with small parks. No straight lines will be employed in building this section. The park will have the general appearance of the boulevard sections of larger cities with the streets crossing at irregular angles.

Layton & Smith, Oklahoma City architects, have been working on the plans for these improvements since the first of the year. They have almost completed their work and material has already been ordered for starting construction work. Several months will be required to convert part of the land to proper condition, and more time will be required to laying out parks, grading, building streets etc. It is as though someone had chosen a barren spot on a prairie and begun to build on it a city modern in every respect.

Present plans contemplate accommodations for 1,000 people immediately, with room to enlarge to accommodate 6,000 people if needed. All expense, except that which will be repaid by employes for the homes they buy, will be paid by the Marland companies. The amusement features and parking systems will be built at no expense to the employes.

In a large park west of the office building there will be a sun dial in the form of the statue of an Indian maiden, symbolic of the Indian country of which Ponca City is a center. This park will face on the main road between the main office building on the south and residential section on the north.

Thus will be grouped, over the short distance of a mile and a half, all the interests of two companies. Employes will live, work and play in this big civic center independent of attractions from the outside. All units of a big corporation will live as one big family, on common ground.

It is planned to provide special school buildings for the addition so that children of employes will not be compelled to go a great distance to school.

A Two-Million Acre Lease

The Emerald Oil company, recently organized, has just closed a deal for the leasing and part ownership in fee of a tremendous acreage of oil and gas land in Colombia, South America. The deal was consummated by Alfred J. Diescher, president of the Emerald company, who recently resigned as head of the oil and gas interests of the Empire companies. The Emerald company will have offices in Kansas City. It now has operating offices in Winfield, Kan.

The tract in Colombia includes 2,000,000 acres. The deal was closed in Utah, where Mr. Diescher dealt with the American-Colombian company, owners of thetract, which is considered one of the best in Colombia.

Mr. Diescher will send in a party of geologists as soon as the rainy season is over, who will make a thorough geological study before the beginning of actual drilling. It is expected that a drilling campaign will commence next winter, when the climate conditions will permit.

The immense tract of prospective oil and gas land is unique in that it easily is reached by water. River steamers ply on the two main river highways of Colombia. The construction of pipe lines is contemplated when production justifies.

The tract is in one piece extending from the Magdalena and Cauca rivers up to the mountains. Aside from it being prospective in oil and gas riches, it has over 7,000,000,000 feet of lumber upon it. The altitude ranges from 300 to 3,000 feet. The ownership has passed down through one family almost continuously since its grant by the king of Spain in 1637. Under the laws of Colombia, the oil and gas rights under privately owned land belongs to the individual owners and it is not anticipated that there will be any such trouble as has arisen in Mexico where the government claims to own the oil and gas on privately owned lands which were leased by the oil and gas operators.

In Butler County, Kansas

The Empire Gas and Fuel company No. 29 M. A. Koogler in the south half of 17-26-5 is good for 55 barrels. No. 38-48 good for 50 barrels. No. 36 is good for 35 barrels. No. 41 is good for 100 barrels.

The same company No. 9 Richardson in the west half of northwest of 17-26-5 is good for 50 barrels.

The same company No. 12 Fee in the northeast of 17-26-5 is good for 50 barrels.

Dalles and others No. 2 J. W. Fox in the northeast of 13-29-5 is good for 65 barrels.

Warshall and Durham No. 1 Warner in the northeast of 26-29-5 is good for 15 barrels.

The Little Pirate Oil and Gas Company No. 1 Vaden in the southeast of 14-29-5 is dry.

The Al Oil and Gas company No. 3 J. W. Fox in the northeast of 13-29-5 is good for 75 barrels.

The same company No. 14 Hess in 18-26-5 is good for 45 barrels.

The Sperry Oil and Gas company No. 1-G Brooks, in the northwest of 13-28-5, is a dry hole.

The Empire Gas and Fuel company No. 31 D. Smith in the south half of northwest of 26-28-4 is good for 45 barrels.

In Roger Mills County.

The American Petroleum & Producing Co. is drilling a test in 14-12-25w, Roger Mills county, and is now shut down at 104 feet waiting on 26-inch casing. A. F. Lawrence is the contractor on this well.

OIL AND GAS

Leases, Supplies, Production, Etc.

For Sale or Lease—South east 1-4 of southwest 4-4 of sec. one (1) township two (2) Range seven (7) east in Creek county. Will sell fee or lease. One producing oil well on this land. See or write H. H. Gamoway, P. O. Box 1244, Drumwright, Okla.—Adv.

For lease for oil and gas by owner. The W ½ of NW 1-4 of section 2 and E ½ of NE 1-4 of section 3, T. 13 N., R. 8 E., Susie Polokee allotment. This property is directly south of production in section 27, T. 14 N., R. 8 E. Call 8180 or 8950 or address box 1290.

I have an 80-acre lease joining producing property at Billings. Three pay sands already discovered. Most turn this quick, so will make a red-hot price to some one who will drill it. Write W. E. Hackett, Covington, Okla., Rt. 1.—Advt.

Wanted—To buy or rent at once, string of Standard tools. Write, phone or wire East Extension Ranger Oil & Gas Co., 410 Phoenix building Muskogee, Okla.—Advt.

Have cash ready to buy fee land and oil royalties. Give full particulars, with age of wells, income from last year, price, etc. Address P. O. Box 88, Tulsa.—Advt.

RANCH FOR SALE—6,000 acres deeded land, 3,000 acres leased land, 500 acres deeded land in cultivation, 150 acres in meadow, balance rough, rocky grazing land. This is a bargain for cash or part cash and time. No trade accepted. Write or come at once. Ivey Johnson, Ardmore, Okla.—Advt.

WANTED—25 to 500 barrel production, also drilling proposition Beggs district. Southern Development Co., Phone 1326, 525 Robinson building.—Advt.

FOR SALE — Nine 55,000 bbl tanks. Address N. Lyon, Postoffice Box 129, Tulsa, Okla.—Advt.

WANTED—26 or 28 Star drilling machines. Sweeland & Hardman, Phone 722 or 1739.—Advt.

FOR SALE—Turabuckle standard rig located in section 29-21-12. Sweeland & Hardman. Phone 722 or 1739.—Advt.

OIL LEASES for sale. NW¼ of NW¼ 22-15-11 and NW¼ of NW¼ of 26-15-11; price reasonable; these leases are sure to double in price in near future; no one need answer unless ready to buy. Phone 7218.—Advt.

Okmulgee County Production

Special 200 barrels at 1,200 feet, 40 acres, with 40 acre offset. A. L. Hale, 6 Severs Bldg., or Parkinson Hotel.—Advt.

Buy Beckham county leases before Magnolia strikes oil. Elk City Oil Exchange, Elk City, Okla.—Advt.

Brand new string, very complete for deep work, $13,500, F. O. B. Tulsa; immediate delivery. Call Golden, 9114.—Advt.

Star No. 28 machine and tools complete; very good outfit; cheap within 30 miles of Tulsa. Parkersburg complete, fine string, show every piece, seven miles of Tulsa. Standard outfit, good boiler, engine and tools. Priced right. Twenty miles south. Phone Golden, 9144.—Advt.

Certified Accountant

Experienced in public auditing and oil work. Will be open for position about September 1. Prefers position of responsibility with good local concern.
