Cosden Advances Wages.

The wages of the employes in several departments of the big refinery of Cosden and company have been raised to take effect August 1. This will even up the advance to the men affected with the advance made some time ago to other departments, and is all done to meet the high cost of living.

It is all done voluntarily on the part of the management, who are willing to meet the men and give them all a square deal, at better than halfway. This in spite of the fact that refined products are down, and the cost of material is high and going higher every day.

For instance, the price of tank cars is bound to advance shortly and all manufacturers are sending out notice to that effect, with the notation that the price of steel will soon be up and that labor costs are higher than ever.

In the meantime, there is a disposition on the part of the state government at Oklahoma City to hamper Oklahoma refineries by stringent inspection laws, and the only reason that it will not affect Cosden and company is because his firm has never done any business in the state, so far as marketing refined stuff is concerned.

Marland Publishes New Paper.

The oil editor has just received a copy of the Marland News, published at Ponca City, by the Marland interests and gives some good news on the operations of the Marland concerns and is very interesting reading.

Gives Credit to The Tulsa World.

There seems to be a disposition among the independent marketers who are buying crude at Burkburnett and the new northwest extension, to give The World credit for having insisted on prices being maintained in spite of the fact that some of the operators down there are actually offering to give their oil away to get it moved, to make room for more oil.

So far as the oil editor of this paper is concerned, this sort of commendation doesn't go, as it looks in the first place as though some one is throwing bricks, or is indulging in the old time oil field pastime of "kidding on the square."

The marketers at Burkburnett and Wichita Falls might as well lay off, and not be giving credit to The Tulsa World or anybody else in Tulsa for having maintained prices, but had better get together and form a mutual admiration society, because they have it coming to themselves if anybody ever did.

All these marketers are well known here and every one of them is entitled to unlimited praise for having kept going clean and not having the odium of cutting the prices hung on the independent marketer.

The disposition and the desire to do the square thing that has been exhibited by them all, is worthy of all praise and right now is a good time to get together and let the wide world know that if any price-cutting is going on it is not the man who is supplying refiners in the mid-continent field with crude oil.

There is no better marketer than Edward Cosden, or any of the rest of them, who hails from Tulsa, and the oil produced at Burkburnett can count on one thing, and that is, that now is the time to shut their wells in, if these people cannot take care of their oil, and the pipe lines will not do so.

It might be a good thing to run a few tanks of oil for some of the boys and make room for more oil, just to show them that they are acting like wild men in drilling in their wells when there is no chance to run the oil. The northwest extension came in with a rush and mighty few were wise enough to anticipate any such state of affairs as is now apparent.

This same thing happened in the Glenn pool days, and there are many stories that could be told of the time when lease bosses pulled the plugs of tanks at night and let the oil run down the hill and afterwards sold it at a mighty low price to a new pipe line that had just been built into the field from Texas.

The whole thing at Burkburnett will soon be but a memory and the sorest thing about the entire situation is that it will not last long, and will soon be defined, and a thing of the past, unless there is oil found across the river in Oklahoma, which now seems possible.

At Blackwell

The Southwestern oil company No. 2 Porter in the northwest of northeast of 17-28-1 got sand 1,890 feet to 2,025 feet and well is good for 200 barrels.

Will Burkburnett Extend Across the River?

From the reported sale of a five acre tract of land by R. L. Owen in section 6 in 19w to C. F. Barnard for $1,000 an area with a thirty day drilling contract attached, it would seem to indicate that the Burkburnett average prices have crossed the Red River and give a number of new locations and rigs are going to near Beach, and now the question arises will Burkburnett extend across the river and, if so, will it be through or will and give Oklahoma another of those goodies, Reds?

The Hendrick Construction company has timbers on the ground for a rig in the river in the northeast of 34-4s-14w.

The Martin Jones oil company No. 1 Lamore in the northeast of northeast of 13-4s-12w has rig on the ground.

The Oklahoma Chief oil company No. 1 Crane has made a location in the southeast of 25-4s-14w for a test.

Is the Red River the Boundary Line?

Now comes the report from Texas that Governor Hobby has instructed the attorney general of the state of Texas to file suit to determine whether the Red river is the boundary line between Oklahoma and Texas. Texas claims Oklahoma was selling the riverbed sands which she claims rightfully belong to Texas.

It is now up to Oklahoma to establish her right to the Red river and means thousands of dollars to Oklahoma, and Oklahoma will fight to the limit to retain that which is rightfully hers.

Osages Receive Oil Bonus.

Each Osage Indian will receive a bonus of $720 during the coming week, a total of more than $1,500,000 being distributed. The payment comes from oil and gas royalties and represents some of the big bonus money which the oil men paid at the last Osage sale.

Three payments to the Indians have been made during 1919, amounting to $1,000 per capita and the $720 payment will make the total per capita to over $2,500 since January 1.

The money is derived from the sale of the oil and gas leases which the department puts on sale, when they think the oil men will come across with a big bonus and royalty. The Osages own very little of the surface rights and with the extension of the lease, will mean a big loss to the surface holders who own over 700,000 acres of land in fee.

Carter Drills Some Deep Dry Ones.

The Carter Oil company in its lost in the northeast of northwest of 22-27-3, Rouff farm, has been drilled to the total depth of 4,435 feet and is a failure and has been abandoned. This is one of the deepest dry holes in the state of Oklahoma, and gives this district one of the best tests ever drilled.

The Carter Oil company No. 1 Busser, in the center of southeast of southwest of southwest of 19-27-3, is dry and abandoned at 4,285 feet.

The Carter Oil company No. 1 Booten in the southwest of northwest of southwest of 14-27-3, is dry and abandoned at 3,210 feet.

The Carter Oil company drilled the above wells on a big block of acreage and on what looked like a very good structure, but from the depths of the wells above, it would seem that a thorough test had been made of the acreage and represents a big pile of money, but the Carter people believe in going after the deep stuff and will gamble to the limit.

Tremendous Market for Fuel Oil Is Built Up.

NEW YORK, July 21.—A tremendous market for fuel is being built up throughout the country, according to the statement of a prominent oil producer yesterday.

It is asserted that at the present price for fuel oil which can be delivered to Atlantic ports for 75 cents a barrel, there is a saving over coal fuel, which has induced many important manufacturing companies to transform their boilers to use oil burners. The cost of this is said to be negligible, while the saving applies not only to the difference between the cost of coal and oil but also to labor.—Buffalo Inquirer.

Texas News.

The West Virginia Coal & Oil Co. No. 1 R. E. Cotton in Eastland county is producing 1,000 barrels from sand at 3,429 feet.

F. A. Young reports that he is drilling the six-inch at 2,407 feet in Jim Hamilton county well and expects to run in within 10 days. This good showing of the Rishmo well means this well look very promising.

F. A. Young's No. 1 Crockett in Hood county is drilling at 388 feet.

F. A. Young's No. 1 Cunningham in Bosque county is drilling at 500 feet.

Tillman County.

The Summers oil company No. 1 Kary in the southwest of 25-1s-15w is a dry.

The J. P. Ryan No. 1 Poe in the southeast corner of the southeast of the southeast of 11-2s-15w is shut down at 1,512.

The West Texas Development company No. 1 Indian land in the southeast corner of the northwest of the southwest of 10-2s-15w is shut down at 1,600 feet.

The Buck Extension Oil company No. 1 Hill in the northeast corner of the northeast of the southwest of 3-2s-15w is shut down at 1,800 feet.

The Pool Hill oil company No. 1 Brogan in the southwest corner of the southwest of the northeast of 7-2s-15w is a gasser.

A. J. Rodgers and others No. 1 in the southeast corner of the southeast of the northeast of 6-4-13w is a gas machine cleaning up.

The Otter Creek oil company No. 1 in the center of the west line of the northwest of 15-1s-18w is shutting the rig to the south.

The Overland Petroleum company No. 1 Todd in the northwest corner of the northwest of the northwest of 22-1s-14w is shut down for cleaning.

The Sterling Petroleum company No. 1 in the center of the north line of the southeast of 23-1s-19w is a gusher.

Jackson County.

The Eldorado oil company No. 1 Reece in the northwest corner of the southwest of the southwest of 2-2s-23w is shut down at 600 feet.

The Navajo Oil company No. 1 Hickman in the southwest corner of the southwest of the southwest of 28-2s-24w is shut down at 835 feet.

The La Sonora Oil company No. 1 Jackson in the northwest of the southwest of 16-2s-20w is shut down at 2,074 feet.

Greer County.

Frank Turner and others No. 1 Murray in the northeast corner of the northeast of the northeast of 12-4s-22w is spudding.

The Bissell Petroleum company No. 1 Landford in the southwest corner of the southwest of the southwest of 25-4s-24w is shut down at 815 feet.

The Wanda Oil Gas & Fuel Co. No. 1 Jordan in the northeast corner of the northeast of the southwest of 12-2s-21w is drilling at 605 feet.

New Ones Going in at Beggs.

The Pantanna oil & Gas Co. No. 1 Greaves in center of northwest of southeast of 1-14-11 has rig on the ground.

The Carter oil company No. 2 Bentbrad in center of west line of southwest of southeast of 19-15-11 has rig up.

Gleeman and others No. 1 Linnen in center of southeast of southwest of southeast of 36-15-11 got sand 2,255 feet to 2,291 feet and well is good for 20 barrels.

The Sapulpa Refining company No. 2 Marshall in the northwest of southeast of southeast of 35-15-11 is drilling at 290 feet.

The Cosmos oil company No. 1 L. Harlo in the southeast of northwest of northeast of 6-14-12 has rig on the ground. No. 2 rig on the ground.

C. B. Shaffer No. 3 Tiger in center of west line of southwest of southeast of 6-14-12 is spudding. No. 4 rig up. No. 5 rig up. No. 6 rig up.

F. W. Biggs and others No. 1 Kelly in the northeast of southeast of northwest of 7-14-12, has rig on the ground.

Alexander and others have just completed a couple of nice wells on their property in sections 6 and 7-14-12 and makes it look like one of the best pieces in that district. No. 1 in the southeast of northeast of southwest of 6-14-12 got sand 2,312 to 2,354 feet and came in for 850 barrels. No. 2 in the southeast of northwest of 7-14-12 got sand 2,231 to 2,265 and came in good for 700 barrels. They have two other wells on this property making 250 barrels.

F. E. Young No. 1 Hall in 31-14-11 is expected to drill in this week.

F. A. Young No. 5 S. S. Fink in 32-14-11 will drill in this week.

At Garber

The Carter Oil company No. 19 Toney, in the northeast of southeast of northwest of 24-22-4w got sand 1,910 to 1,955 feet and well is good for 150 barrels.

Hessey and others No. 1 Cramer in the southwest of northwest of 22-22-3w is dry and abandoned at 1,515 feet.

McNight No. 1 Seamon in the northeast of 29-22-3w is dry and abandoned at 2,025 feet.

Chautauqua County, Kansas.

The Sterling Oil & Gas Co. No. 7 Whartenbury and Montgomery in the southeast of 7-35-16 is good for 10 barrels. No. 8 is making 20 barrels, also.
