In the Oil Fields

CONTINUED FROM PRECEDING PAGE

Wrestling News from Tennessee

The Tuxbury Oil and Refining corporation of New York, with field office at Dickson, struck a big gas flow in its well No. 2, on the Stark farm, near Cumberland Furnace, Dickson county, last Monday. The pressure was so great that it brought the 8-inch tools out of the hole without the assistance of the engine, and for some time thereafter spouted out rocks as big as hen eggs.

Local people went out in many autos and the excitement was intense. Those working on the well got out the crew hastily and got out of the way, while the natives around about gave the well a wide berth. The gas was struck at 285 feet and began to increase in volume until the first stream was run, when it came out hog-wild and caused a hasty desertion of the rig and nearby territory of everyone present.

The 295-foot depth had just penetrated the top of the Mississippian shale, of which there is supposed to be from 100 to 200 feet, after which there is supposed to be about 75 to 100 feet of the Devonian black shale, and then, under that, the oil. Officials of the company are letting the well blow off so they can drill down in the oil.

State Geologist Nelson is coming down to the well with gas tubes to take samples as to quality, etc.

The well was drilled down on the side of a fine structure, and is the second one on the structure that has been located by Geologist E. O. Rhodes of Lexington, Ky., who worked down in this field for some months for the Tuxbury people.

The first well, on the apex of the structure, got the first oil sand at 725 feet, the second oil sand at 796 feet and then got 26 feet of good Clinton Rock sand, richly saturated with oil, at 1,116-1,142 feet. This well is capped and will be shot later.

Peake et al got a small pumper at 1,169 on Jones creek, east of Lancaster, and are drilling No. 2 to the west.

Humphreys Oil and Gas company is on top of the shale and making some gas at 483, seven southwest of Waverly, Humphreys county.

Tuxbury corporation, at Southside, Montgomery county, drilling at 270 feet, and had some oil at 68, with much gas at 136 feet.

Morrison et al, near Cross Plains, Robertson county, drilling at 270 feet and had some oil at 68, with much gas at 136.

Hon. Ike B. Stevens, secretary of state, headed a syndicate that this week took over 50,000 acres leases in western Cheatham and western Robertson counties. They announce two wells at once for Cheatham, and one north of Adams, for Robertson county.

Wheelcroft et al, resumed drilling at 700 feet near Cooperstown, southwest corner of Robertson county.

Anderson et al, shipping in drilling outfit for test near Hurricane Mills, Humphreys county.

Haverstick-Salyard et al, of Independence, Mo., due at Dickson August 20 to start three tests in Hickman county.

Drake et al, closed for four tests near Hamble, to go 1,500 to 2,500 feet, northwest corner of Dickson county.

Pennokla Oil and Gas company contracting for test near Cedar Hill, Robertson county.

Kansas News.

Members American Cotton & Grain Exchange

Orders solicited for the purchase and sale of cotton for future delivery.

The following is for the information of the public who desire to trade with us:

Trading Rules

All orders given us for the purchase or sale of contracts for the future delivery of cotton must be in compliance with United States Cotton Futures Act, United States Warehouse Act and subject to the By-Laws and Rules of American Cotton & Grain Exchange, Inc.

All contracts entered into by us as brokers for our customers for the purchase or sale of cotton for future delivery shall be, unless otherwise expressly stipulated at the time of giving us the order, held as complying with Section 5, Paragraph 5 of United States Cotton Futures Act and United States Warehouse Act, to be delivered and accepted at the Port of New York or other points that may be designated with corresponding differences in freight in compliance with the rules and regulations of American Cotton & Grain Exchange, Inc.

On the floor of American Cotton & Grain Exchange, Inc., there are Trading Posts and a ring, at which transactions for the future and spot delivery of cotton are made.

These Posts are designated as follows:

Good Ordinary, Strict Good Ordinary, Low Middling, Strict Low Middling, Strict Middling, Good Middling, Strict Good Middling, Middling Fair.

One post is designated "Staples," at which transactions in cotton of a longer staple than the Government Standard seven-eighths inch shall take place.

The ring is designated "middling."

Unless otherwise instructed by customers in their order, it is understood that such order is for "Middling seven-eighths of an inch Government Standard," and the order will be executed with such understanding.
