Business and the Strike Menace

There is a disposition on the part of well-informed oil men, to welcome a genuine clash between the workers in the steel mills and the various steel corporations, and the consensus of opinion is that when it comes it will all wind up with a lower scale of wages for some of the highest priced laborers in the world, instead of an advance.

And for this reason the strike situation appears more of a joke than a menace. At all the summer resorts in the east patronized by oil men, both oil producers and men who work in the fields, there has been during the hot months a delegation from the steel mills at Youngstown and Pittsburgh, of steel workers who came in even better motor cars than were owned by the oil producers themselves, and there was no mistaking any one of them on account of the prodigality with which he spent his money, and the easy manner in which he declared that he was making his little $25 a day any day he worked.

And these same people are not bosses only in the sense that they are at the head of the class when it comes to making good wages, and have the gift of running steel deftly.

They know the art of making pipe, and anyone who has visited the great steel mills up the river from Pittsburgh and have seen them all in action, are fully aware of the fact that their labor is less arduous than the ordinary roustabout on a lease, or the tool-dresser on a drilling well. It is, however, much better paid and rarely a man has graduated from the steel mills into other lines of business, and has done it with capital which he has acquired by a year or two of ordinary frugality.

These men are not the ones who are looking for trouble, and have not voted, according to the best reports obtainable, for a strike to take place on the 22nd of the present month, but are simply outvoted by a lot of foreigners who are saving up their wages for a peaceful old age in their home country. They are mostly Lithonians, Rumanians and Slavs, and the appearance of these men is enough to make a free-born American mighty thankful he was born and raised in the United States. They live in a condition of filth and over-crowding, to which they have been accustomed all their lives, and if they must put an end to the great prosperity we are now enjoying, by going on a strike, the quicker the better, as the sooner it is over with, the sooner will we know just how strong American institutions and traditions are in the hearts of the people of this country.

This fall will see in Oklahoma and the southwest the largest trade ever experienced in any country. It is a problem to take care of the oil and the great crops of the southwest, and if the predictions of one of the engineers of one of the large steel companies, doing business up the river from Pittsburgh is correct it is high time that we round it out and supplant this foreign labor with American labor who would jump at a chance to take these jobs at the wages they are paying.

This engineer was one of the hosts on the steamboat ride up to the National Tube works at McKeesport at the time of the gas men's meeting at Pittsburgh several years ago, and pointing to some buildings that had been burned in a recent strike, he said: "I want to tell you that if there is ever a general labor strike in these steel mills, there will be hell to pay."

An Important Acquisition

The Swensondale Oil company, which has just established operating headquarters in the Fort Worth National Bank building, is a most important acquisition to the business interests of Fort Worth and the fact that the company selected Fort Worth for its headquarters established beyond peradventure the fact that the Tarrant county metropolis is the oil center of the state.

The Swensondale company is operating in Stephens county, where it has large acreage leased. This concern owns Peter Swenson No. 1 and Peter Swenson No. 2, producing wells, Nos. 3 and 4 are drilling, these are up for five more holes and 12 rigs are under course of construction.

The Swensondale company also has 20 carloads of timber en route, 30 carloads of casing and two carloads of drilling material on the way. This company drills its own wells and is building a town at Swensondale, Stephens county. It has a railroad siding on the M. K. & T. at Albany.

The Swensondale Oil company now ranks sixteenth in the list of oil producing companies of Texas. It paid taxes on an output of $328,506 for the second period of the year. Peter Swenson No. 1, the first well drilled by this company, produced 146,[illegible]92 barrels of oil between May 26 and June 30, 1919. Peter Swenson No. 1 was started February 22 and finished May 15. It came in for a flush production of 3,000 barrels. Peter Swenson No. 2 was drilled in 43 days, a record for Stephens county wells.

Many of the officers of the Swensondale Oil company have leased homes, moved to Fort Worth and established homes here. J. S. Pool, vice president, was in the lumber business at Valley Mills, Bosque county, for 27 years before he came to Fort Worth. He and his family are now located at 1319 El Paso street. Mr. Pool helped organize the Swensondale company.

"Our company was organized last December," said Mr. Pool. "We started out with a capitalization of $300,000 and 1,095 acres of land, which Peter Swenson and his son, Selmar T. Swenson, put in the company. In April we increased our capital stock to $1,400,000 and increased our acreage to 1,597. Shares in the company have changed hands lately at $3,000, which indicates our growth. The Pierce Oil corporation and Gulf Pipe Line company are running our oil and the Prairie pipe line will shortly hook up with our tanks."

Selmar T. Swenson, president of the company, is a son of Peter Swenson.

R. B. Robertson, attorney, is a former assistant attorney general of Texas. He has moved his family to Fort Worth and leased a home at 1225 Washington street.

C. G. Dansby, treasurer, is the former cashier of the First National bank at Valley Mills. He has brought his family to Fort Worth and leased a home on Seminary hill.

Discussing the organization of the company, Mr. Pool said: "O. E. Schow, general manager, arranged the deal with Peter Swenson originally. Mr. Schow at that time was a resident of Bosque county and interested a number of his friends in the company. Mr. Schow and myself arranged for the organization of the Swensondale company after a conference with Peter Swenson in August, 1918.

"Peter Swenson suggested that it be called the Swensondale Oil company. He also urged the selection of his son as president. All the big oil producing companies of the north Texas fields were bidding for the Swenson acreage at that time. Peter Swenson made up his mind to drill his own property. That is how the Swensondale Oil company was organized.

"We have not perfected all our plans yet. The company expects to build a refinery to handle its output and we have other plans in view for the expansion of our business. The directors of the company will hold a meeting at the Fort Worth headquarters in October to outline our policy and perfect plans for the additional improvement of our business."

In the Osage

The Duffield & Howard No. 14 in the southwest of 3-26-12 is dry and abandoned at 1,440 feet.

The Kewanee Oil company No. 2 in the southwest of 18-21-12 is good for 15 barrels at 1,420 feet.

The Atlantic No. 3 in the southwest of 1-22-9 is dry and abandoned at 2,525 feet.

The Fidelity No. 1 in the northeast of 1-22-9 is dry and abandoned at 2,320 feet.

The Gillespie No. 5 in the southwest of 22-27-10 is dry and abandoned at 2,320 feet.

The Gillespie No. 5 in the southwest of 22-27-10 is dry and abandoned at 2,470 feet.

The Sinclair No. 15 in the southeast of 32-22-10 is good for 5 barrels at 1,970 feet.

The Alexander No. 15 in the northeast of 32-27-10 is good for 150 barrels at a depth of 1,221 feet.

The Olsen Petroleum company No. 1 in the northwest of 26-22-11 is dry and abandoned at 1,240 feet.

The Clover No. 2 in the southwest of 31-22-12 is good for 75 barrels at a depth of 1,225 feet.

The Kewanee Oil company No. 5 in the northeast of 12-23-10 is good for 20 barrels at a depth of 1,138 feet.

The Texas company No. 6 in the southeast of 36-23-10 is dry and abandoned at 1,915 feet.

The Carter Oil company No. 2 in the southeast of 8-23-11 is good for 125 barrels at 1,770 feet.

The Ashland No. 1 in the southwest of 14-23-11 is good for 140 barrels at a depth of 1,850 feet.

The Foster & Norwood No. 21 in the southeast of 23-24-9 is good for 800 barrels at a depth of 2,685 feet.

The Phillips Petroleum No. 18 in the northeast of 1-24-10 is good for 5 barrels at a depth of 2,005 feet.

The Burkett No. 2 in the southwest of 7-24-10 is dry and abandoned at 2,620 feet.

At Henrietta

The J. C. Baugh No. 1 in the northeast of the northeast of 14-9-13 is shut down at 1,480 feet.

The same company No. 1 in the northwest of the southeast of 36-9-13 is a rig.

The Kimbley and others No. 1 in the southwest of the southeast of 7-9-13 is a rig.

The Kingwood Oil company No. 1 in the northeast of the southeast of the northwest of 1-10-11 is shut down on top of the sand at 2,640 feet.

The Stone & Finney No. 1 in the southwest of the southeast of 19-10-12 is drilling at 1,790 feet.

The Artesian Oil company No. 1 in the center of the south line of the southwest of the southeast of 1-11-11 is a rig.

The Indiahoma & Lyons well in the northeast of the northwest of the northeast of 6-11-11 is shut down at 200 feet.

The Dessner & Jamison well in the northeast of the northwest of 22-11-11 is shut down at 2,220 feet.

The Indiahoma & Jamison well in the northwest of the southwest of 28-11-11 is a rig.

The J. G. Lyons and others well in the northwest of the northwest of 26-11-11 is a rig.

The Iron Mountain Oil company No. 1 in the southeast of the northwest of 31-11-11 is a rig.

The Kingwood Oil company No. 1 in the northwest of the northwest of 5-11-12 is a rig.

The Kimbley Refining company well in the southeast of the northeast of the northeast of 4-11-12 is shut down at 300 feet.

The Georgia Petroleum company well in the northwest of the southwest of 5-11-12 is shut down at 1,660 feet.

The Kimbley Oil & Refining Co. well in the northwest of the northwest of 5-11-12 is shut down at 1,700 feet.

The Black and others are rigging up for a well in the northeast of the southeast of the southwest of 16-12-11.

The Simplex Oil company well in the southwest of the northeast of the southwest of 24-12-11 is drilling at 2,250 feet.

The Jugo Slav Oil company well in the center of the northeast of the southeast of 35-2-11 is drilling.

New Union Oil Company

An offering of Union oil company of California common stock has been made by Strandberg, McGreevy & Co. and H. P. Wright Investment company, according to a recent announcement.

The Union Oil company was incorporated under the laws of the state of Delaware, August 15, 1919, and has an authorized capitalization consisting of 5,000,000 shares of common stock without par value, of which it is the purpose presently to issue 3,000,000 shares. The company has no funded or floating debt and no preferred stock.

The Union Oil company of Delaware has been formed for the purpose of acquiring a large interest in the Union Oil company of California, the Columbia Oil Producing company of California and allied properties.

The company in addition to the stock interests above mentioned, will commence business with a cash capital of approximately $11,550,000.—Financial & Grain Reporter.

Burkburnett Shows Loss

North Texas oil fields have averages 241,00 barrels daily production for the past week. Ranger shows a gain of about 2,500 barrels and Burkburnett a loss of 3,000 barrels daily. The figures by fields follows:

	Barrels Daily
Ranger	82,800
Burkburnett	84,500
Electra	10,000
Stephens county	40,750
Desdemona	18,500

The following is a list of the principal producing companies:

	Barrels Daily
Texas company	22,000
Gulf Production	18,000
Magnolia Petroleum	14,500
Humble Oil	14,000
Texas Pacific Coal	12,500
Prairie Oil	8,250
Sun company	6,500
(Burland Oil	4,000
American Refining	3,500

According to late and authentic reports from Eastland the T. Y. Binder well of the Sales Oil corporation, a mile north and a little east of the Pleasant Grove church, has turned to salt water. The well is making between 2,500 and 3,000 barrels of water and is reported making practically no oil. The water is thought to be coming from the bottom of the hole, which adds to the difficulty of shutting it off. The well has been drilled to a depth of 3,495 feet and is said to have gone less than ten feet into the sand.

It is also reported that the Thorp well of the Sammons-Oil corporation in the Gunsight district, south part of Stephens county, has also turned to salt water. The Thorp has been showing for some salt water for several weeks, but late reports indicate that there is practically no oil coming from the well now. The well is in the shallow sand at around 1,800 feet.

Rush for Acreage at Hewitt

(By JOHN EASLEY.)

Special to The World.

ARDMORE, Sept. 13.—When the Anderson & Simpson well, at a depth of 1,998 feet, went into a salt water sand, the local oil fraternity was set to guessing. When the Texas company brought in the discovery well in the Hewitt field in the northwest corner of section 27-4s-2w, there was a rush for acreage east and south and the word went down the line from the knowing ones to the south by the best acreage. While this water sand does not condemn any territory yet it must be admitted that the acreage to the south does not look quite as good as it did before the sand was pierced up. The sand had a thickness of only six feet and because of the higher elevation of the Anderson & Simpson well the first sand is not due here before the 2,800 foot level is reached. The company is now shutting off the water and will resume drilling.

Hendrion Petroleum company and [illegible] in section 31-4s-2w, in the Graham district have completed the first well in that field at a total depth of 2,527 feet. The well had 52 feet of brown sand and the production is estimated to be good for 250 barrels. These people have a rig under construction for a second well.

George W. Chaffee near the southeast corner of the southwest quarter of section 31-2s-1w, about a mile south and a little west of the discovery well in the Graham district is drilling at a depth of [illegible] feet and this well will be sent on to the top of the Johnson sand, found there at 2,245 feet. This well had a prolific gas sand at a little below 1,[illegible] feet.

The Consumers Light & Power co. has connected its gas lines in Ardmore with the gas well in the northeast corner of sec. 34-2s-2w in the "Ice district," which is owned by the Humble Oil & Refining Co. and others. This well made something like 20,000,000 feet of gas from a sand found between 900 and 1,000 feet.

Empire Gas & Fuel Co. on the Wilhams farm in the northeast corner of the southwest quarter of the sec. 31-2s-2w is drilling at a depth of 1,[illegible] feet. Nine wells on the same farm have been producing since January, and some the past month, made an average daily production of [illegible] barrels.

The Texas company, which was drilled out of the three producing wells in the Hewitt field, has in other wells that are shallow, and producing and one that is fished for gas within a short time. These are No. 1 Feaster farm, sec. 6-3s-2w, which is at a depth of 1,[illegible] feet and No. 1 on the Harris Nelson farm, sec. 28-3s-2w, west of the discovery well, which is now at a depth of 1,[illegible] feet.
