STOCKS TAKE SPURT BUT LATER DECLINE

Conflicting Labor Reports Are Responsible for Quick Change in Trade on Stock Exchange

NEW YORK, Sept. [illegible] moved to materially higher levels in the early period of today's trading dealings on reports that the [illegible] unions had reconsidered their [illegible] strike order, but part of the gain was lost later when these reports met with qualifying denials.

Another development [illegible] in a measure to check the advance was the further slump of exchange rates to France and Italy, both falling to lowest quotations ever recorded in this market with further bills.

Another event of interest and encouragement was the easing of the funds, these being supplied [illegible] per cent as against the long prevailing 6 and 6½, which increases were made to pay on the loans [illegible] collateral, call money also eased moderately.

Although trading showed many different features, including rails, interest greatly concentrated in steel equipments, motors, oils and tobaccos, and food shares, oils and tobaccos recording best gains toward the close, when the tendency elsewhere was towards moderate reactions. Sales amounted to 1,650,000 shares.

The bond market reflected further uncertain tendencies, chiefly due to heaviness, however, in the actively and strength of Liberty issues and the former tone of international issues. Sales, par value, aggregated $12,650,000.

Sore Throat? What Does Mere Man Know About It

Sore Throat No Joke to Jill, the Giraffe

Jill—One of a Herd.

Just think of a giraffe the next time you are afflicted with a bit of bronchial trouble and thank your lucky stars that you are not in his elongated class.

Of course a lengthy neck has its compensations, when eating ice cream as swallowing a cooling beverage, for instance. Needless to say, giraffes never indulge in such luxuries but they do eat such tidbits as sliced apples and carrots. And in juvenile giraffe circles, the last named delicacies are what sweet meats are to real youngsters.

The accompanying picture is of Jill—one of the herd of eight giraffes carried by the great Ringling Brothers and Barnum & Bailey Combined shows. John Patterson, who is head of all the animals in the mammoth super-menagerie is of the opinion that one of the higher air currents struck Jill when she was a bit overheated and so gave her a cold.

FLATTERING REPORTS ON CROP CONDITIONS

September First Shows 25 Per Cent Over the Average for Past Ten Year Period

HAY IS ESPECIALLY GOOD

Rains of August Came Too Late to Help Corn But All Forage Crops Were Boosted.

Special to The World.

OKLAHOMA CITY, Sept. 15.—The official crop report for Oklahoma, issued jointly today by the United States department of agriculture and the state board of agriculture, shows no particular deterioration in the growing condition of corn for the past month but the estimate is consistent with that of August 1 since, on account of drouth in the central, northern and eastern sections of the state, late corn and upland crops were fired in July and most of the damage done to corn was prior to August 1. The condition figure as determined from all sources of information is 71 per cent of normal as against 76 per cent last month, 95 per cent July 1, 23 per cent September 1, 1918, and about 46 per cent for a ten year average as of September 1. The condition figure of 71 per cent based on the estimated planted acreage this year 3,038,000, forecasts a crop of approximately 65,774,000 bushels. The rains the latter part of August, which were heaviest in the central and eastern parts of the state, amounting to almost a general rain, with the exception of the extreme northwest, southwest and northeast, came too late to make any material change in the growing condition of corn. The forecasts indicate that the state has a very substantial crop of corn this year even on a reduced acreage, since the condition at prospect at this time is fully one and one half times the ten year average on this date.

Generally speaking the hay crop in Oklahoma, both tame and prairie hay, is especially good this year in view of the fact that the acreage of tame hay harvested compared with last year is 112 per cent and the acreage of prairie hay is 102 per cent. The condition throughout the season has averaged 90 per cent or above and reflects the average yield per acre to be for tame hay two tons and prairie hay 1.1 tons. The yield per acre of tame hay is influenced materially by the yields of alfalfa, since alfalfa constitutes a very large proportion of the tame hay crop in this state. The first cutting of alfalfa hay was considerably damaged in quality by the excessive rains early in the season. The yield of the second cutting was considerably reduced on account of the ravages of the army worm, and, in many sections, practically amounted to nothing. Lack of rainfall interfered with the yields of the third cutting in the central and eastern sections but the rains the latter part of August will be of material benefit to alfalfa in most sections of the state. A heavy acreage of prairie hay was harvested in eastern sections and the yields generally averaged well.

The principal deterioration in the condition of grain sorghums which is reported this month at 80 per cent as against 85 per cent last month, and 89 per cent July 1 was due to the lack of rains in the central and northern sections of the state. The crop is holding remarkably well in all western sections. The crop is heading nicely and some of the earlier crops have been headed and cut for forage. Late kafirs will be materially benefited in all sections of the state by the excellent rains the latter part of August.

The rains during the latter part of August will be of special benefit to pastures, forage crops, and in those sections where rains were heaviest, farmers are now actively engaged in plowing, preparing ground for fall seeding of wheat. No progress of consequence was made in fall plowing during the month of August on account of the lack of rainfall in the central and northern sections.

Details for September crop report are as follows.

	Cond'n Sept. 1	Forecast
Corn	71	65,774,000
Oats	90	51,872,000
Barley	97	421,000
Potatoes	75	2,720,000
Sweet potatoes	75	1,477,000
Grain sorghums	80	28,705,000
Broom corn	83	33,428
Peanuts	77	616,000
Sorghum cane (for syrup)	77	631,000
Hay—tame	90 (1)	1,264,000
Hay—wild prairie	12 (1)	661,000

Condition at the time of harvest; (1) yield per acre; (2) preliminary estimate 1919. Production in bushels, except broom corn and hay in tons; sorghum cane for syrup in gallons.

The following table is a report of the growing condition of certain crops in Oklahoma on September 1, 1919, 1918 and 1917, basis 100 per cent representing the normal.

	1919	1918	1917
Apples	73	34	80
Grapes	81	33	83
Pears	82	39	69
Millet	86	49	85

"The World Aflame"

IS A MESSAGE TO YOU

BECAUSE it is a burning message of the Moment to Those Who Wish to Get More and to Live Better.

BECAUSE the theme is timely, up-to-the-minute, and deals with one of the most momentous questions of the day.

BECAUSE the drama will appeal to every class of motion picture theater patrons old and young, employer and employe.

BECAUSE the story is one of gripping, vital interest—not a propaganda picture in any shape or form, but a picture of the real life of the masses and the classes today.

BECAUSE it eloquently portrays the tongues of alien hatred spitting venom at the foundation stone of American liberty, striving to stir up Red Revolution for ulterior purposes.

BECAUSE it is an intense drama of the Social Upheaval which is now permeating the world and points a clear path to industrial peace and contentment and true co-operation.

BECAUSE there is nothing controversial in this big feature film play—not "Capital versus Labor," but "Capital co-operating with Labor" is its wonderful message.

BECAUSE this enthrallingly interesting and absorbing photodrama offers a workable solution to the old-age problem which has puzzled the world since B. C. 6000—not as Labor propaganda—not as Capitalistic sermonizing—but on a plain and simple plan of "getting together" in a commonsense manner.

BECAUSE it tells a story of real life, full of human heart interest. It describes in graphic picture and title that One Touch of Humanity which made the Whole World Kin—the Human Touch which reached into the Palaces of the Mighty and the Hovels of the Misled Poor—a Touch administered by a Wise Mayor who had studied Human Nature and knew when to apply reasonable and sensible force, and when to preach the gospel of reason and co-operaiton and profit-sharing. He broke the strike, but not the strikers—he deported the alien strike-makers and gave Labor a sample of true American leadership—and he pointed out the path of true happiness and contentment to Capital and Labor alike.
