Fuel Oil a Factor

Now that the coal strike is settled it will still be recognized that oil is the best fuel, is more economical, is cleaner and much easier to handle and further, that there is always a large supply in storage. Had the strike lasted a few days longer the big Sinclair refineries in Chicago would have simply skimmed the lighter products and would have furnished a great many public institutions with fuel.

There is an interesting situation in New York, where recently the powers that be had issued some very sensible regulations for the storage and use of fuel oil and now just as the great hotels, apartment houses and public utilities are installing oil burners the coal men have started a campaign against the use of fuel oil, claiming, among other things, that the soot from the burning petroleum is absolutely a detriment to buildings and things in general.

The facts are, there is no soot or smoke, as can be seen any day by looking at the building using fuel oil and only at frequent intervals is there any sign of smoke. This is when the dampers are being opened by the firemen in charge and the contrast between the smoke from the buildings using oil and coal is very great. The use of fuel oil should be set forth in all its efficiency, should be set forth in flaming advertisements by the refiners and marketers throughout the mid-continent field. It is here the marketer who, in nine cases out of 10 has blazed the way for a greater use of oil and deserves more credit than he will ever get.

Big Well at Beggs

The Gladys Belle Oil company and Barnsdall Oil company's test at the center of the south line of the northeast of the northwest of 7-14-12 got the top of the sand at 2,772 feet and at 15 feet in is making 700 barrels. This will start a lot of deep drilling as it extends the deep pay at least a half mile and makes all of the Gladys Belle holdings look good for wells at this depth.

The Ranger Gulf Oil company of which W. G. Skelly is president, has a 300-barrel well in the No. 1 R. A. Wilson farm in the northeast of the northwest of 31-15-11. The top of the sand was found at 2,533 feet and the total depth was 2,578 feet.

The same people drilling in the northwest of the northwest of the same section on the Ed Shrewsbury farm have a hole full of water in the No. 1 test at 2,600 feet, but will drill deeper. The same people have a 65-barrel well natural at 2,586 feet in the No. 2 Thompson farm in the southeast of 30-15-11. It will be shot with 40 quarts.

The Blackhawk Oil company No. 7 Adams in 2-14-11 is showing for 150 barrels, but will be squibbed again with 20 quarts before it can be brought up to the above estimate.

The Wilcox well in the center of the south line of the southeast of 26-16-11 has the top of the sand with a show of oil and gas, but is a fish-feet.

With the Oil Men

Word has been received in Tulsa of the loss by sudden death of two of the young children of C. H. Clark of Wichita Falls, Texas. No particulars of the tragedy were given. Mr. Clark is well known in oil circles here.

F. A. Gillespie, well known oil producer, is home from California and Kansas fear his mining operations in the southwest are progressing favorably. He thinks here is now assured that whatever he and associates will turn out a profitable investment.

W. N. Carter of the firm of Carter Brothers, is in the city and has just recovered from a severe case of the grippe. Carter Brothers & Mason have the right kind of good judgment that makes the automobile in this country as well as easily noticed by the fact that they have held onto their storage county of Osage June line for so many years.

Miles Arnett, well known in Tulsa, has left for Kansas City, to open an office for Prentice-Hall of New York. Before leaving Mr. Arnett succeeded in interesting a large number of local oil companies in the federal tax system, which has company is instituting throughout the country.

Stockholders of the Sequoyah Oil & Gas Co. are looking over the field here and figuring on making extensions of the company's holdings. They are H. K. Sherman, A. B. Russell and Reed of Butler, Pa.; J. W. Schnell of Los Angeles, and George H. Handlemann of Syracuse, N. Y. They expressed themselves as well pleased with Tulsa.

Raoul Corsa of the Cuba Lubricating Company, Havana, Cuba, is the guest of J. C. Miller, sales manager of the Oklahoma Producing & Refining corporation. Mr. Corsa's company handles the O. P. & R. refined products for the entire island of Cuba. The business with sugar mills and other plants has been growing so much so of late that the Cuba Lubricating company, according to Mr. Corsa, is building a large addition to its works. Muskogee lubricants, he says, are becoming increasingly popular in Cuba. This is his first visit to Tulsa and he is so favorably impressed with Tulsa that he places it second only to Havana.

John V. McMahon with the Sinclair Consolidated at Fort Worth, Arthur Kipps with the same people at Supercover, and several of the heads of departments were in conference yesterday with H. F. Sinclair at the company's offices here. Captain Archie Roosevelt, who is capably assuming a full fledged oil man, was in attendance and took a leading part.

F. P. Whitfield, who represents the General Refining company as sales manager in Chicago, is in Tulsa and has made a great record selling some of the largest manufacturing concerns fuel oil during the last month. It is related that some of the people with the reputation for having a very profitable monopoly have been buying fuel oil on long time contracts.

Second Well South of Osage Junction.

The Globe Oil company drilling on the Carter Brothers and Mason lease in the southeast of 21-21-9 met with a gusher warning yesterday when they ran indicator fuel of sand at 400 feet which is the total depth. The sand is showing for 250 barrels in this zone which is likely the Prentice sand which has not been heard much of lately. The No. 1 on this farm got the sand at 2,172 feet and is pumping 150 barrels at about a month old. It adds greatly to the books of the lease, even there because there are still the varying sands that are found below and the chances are that deeper drilling of this well should show tremendous production, something like the old Sinclair stuff a couple of miles north.

The New Pool East of Beggs.

The new pool east of Beggs seems to be attracting as much attention as any of the new pools discovered down that way and from all accounts there is a tremendous rush to get rigs in and wells started and it all means that there will be much added wealth to the community.

From Okmulgee comes the report that offers for acreage near the well in 15-16-12 have climbed tremendously in the last 24 hours and it looks as though somebody might be arrested for profiteering. But without joking these new pools help immensely and everybody now is wondering why they did not get in on a good thing while the getting was good.

At Ringling.

The Blackhawk Oil company is drilling at 2,002 feet in its No. 1 McMinstry in 1-6s-5w. They expect to get the Hewitt sand at 2,150 feet.

Drilling Job.

H. P. Wilcox is moving in for a test in the northeast corner of the northwest of 3-15-12 and will bore for the deep pay found in section 16 that has started so much excitement down that way.

OIL AND GAS

Leases, Supplies, Production, Etc.

Will buy or drill close-in leases. Also want production. Arthur Fuller, Mayo Bldg., Tulsa, Okla.—Advt.

I own scattered leases in Okfuskee, Seminole and Hughes counties. For information write P. O. Box 264, Okemah, Okla.—Advt.

For sale one unit compression gasoline plant in operation; price right for immediate sale. Address Box 303-A, World.—Advt.

Want 100 barrels settled production. Also Beggs and Osage drilling contracts. Arthur Fuller, Mayo Bldg., Tulsa, Okla.—Advt.

We are in the market for close in leases, drilling propositions and production in Oklahoma oil fields. Ladd and Hannon, Wheat Bldg., Fort Worth, Texas.—Advt.

For sale by owner, 1,800 feet 24 pound 8¾-inch, and 700 feet 32 pound 10-inch casing in Beggs district; immediate delivery on ground. Phone Cedar 929.—Advt.

Louisiana Acreage.

Scout just returned. Thousands of acres at rare bargains. Write immediately for choice locations. Dixie Land & Leasing Co., P. O. Box 1234, Ranger, Texas.—Advt.

For information about the new shallow sand oil fields in western Tennessee, and for acreage, 100 rentals in territory geologically approved, write Tennobla Oil Co., Dickson, Tenn.—Advt.

Producing oil company have 200 acres in 25-15-11, nine and half west of Beggs. Any part open for drilling proposition on percentage basis. Apply John W. Steiner, Box 532, Beggs, Okla.—Advt.

Pipe and Casing for Sale.

Ten miles 2-inch line pipe, 5,000 feet 2-inch tubing and rods, 5,000 feet 3-inch line pipe, 5,000 feet 4-inch line pipe, 1,000 feet 8 1-4-inch 24 pound casing, 2,700 feet 10-inch 32 pound casing, two 20-horsepower gas engines, one 15-horsepower gas engine, two standard rigs. All the above material is used but in good condition. For immediate delivery. Oklahoma Salvage Supply, Okmulgee.—Advt.

NOTICE

The Forrester Welding Company is now operating under a new management, using the same name and at the same location. Your business appreciated.

Raynster

Reg. U. S. Pat. Off.

Look for this Label in your Raynster

Depend Upon It!

This weatherproof coat is made for good service—*hard service.* For general, all-round, outdoor use there is nothing to compare with the "Ranchkote".

A most practical garment for oilmen, ranchmen, farmers, and truckmen. A protection against rain and storm,—a hardy, durable double textured coat.

The "Ranchkote" belongs to the well known Raynster line, made by the United States Rubber Company. The Raynster Label is in every garment,—the label of *quality.*

The strong double texture of khaki, brown or drab jean is reinforced by an interlining of the best rubber. A further protection is a double over jacket at the front, back and shoulders.

The full corduroy collar, two outside pockets, storm fly front, sleeve straps and buckle fasteners, are special features. Wear the "Ranchkote",—and be sure of *the very best value.*

United States Rubber Company
