Moran	2.28	Plymouth	4.51

Committee to Control

At the meeting of the Osage lessees yesterday afternoon at the headquarters of the Mid-Continent Oil and Gas association it was decided to form a permanent association and the following committee of 21 was appointed to formulate the plan of organization, suggest officers and outline the work of the association:

Ergonfield, Barnsdall oil company; H. V. Foster, Indian Territory Illuminating Oil company; R. H. Straight, Empire companies; Charles Owen, Owen-Osage Oil and Gas Co.; F. M. Breene, Wilcox oil company; Dana H. Kelsey, Prairie Oil and Gas Co.; D. F. Connolly, Wolverine oil company; Frank Hoskell, Total oil company; E. N. Gillespie, Guffey and Gillespie; J. A. Veasey, Carter oil company; James H. Deggs, Gypsy Oil company; H. E. Crawford, Sinclair Oil and Refining Co.; R. C. Sharp, Oklahoma Natural gas company; A. E. Aarenson, Mid Co. Petroleum company; Ralph Campbell, Coston and Co.; Frank Phillips, Phillips Petroleum company; E. W. Marland, Marland Refining company; Bert H. Collins, Echo Oil company; John J. Shea, Shea and Shea; James Crawford, Oklahoma P. & R. Co.; William N. Davis, Foster & Davis, Inc.

This committee will hold its first meeting Monday, December 22, at the offices of the Mid-Continent Oil and Gas association at 2 p. m.

The members expressed the hope that their permanent association would be organized and working soon after the first of the year.

Has No Jurisdiction.

When C. J. Wrightsman's committee on pipe profiteering wired the federal trades commission in Washington inquiring that it had discovered the guilty parties and request ing a government intervention, it caused for a while as though some of the boys who have been selling pipe were up against it. But now comes the reply from the federal trades commission saying there is nothing doing; that the duties of the federal trades commission is to prevent conspiracy to regulate prices between competing concerns and that the pipe people and the oil producers are not competitors. It is a most remarkable and clear statement coming from the said commission. We certainly have had a plenty of government regulation.

There will be no profiteering in pipe about the time the Texas operators begin unloading the vast stores of secondhand pipe. In fact pipe manufacturers might as well figure there will be nothing doing in the mid-continent beginning about the first of the year. There is said to be more than 2,500,000 feet of new pipe on hand in the Texas fields that will never be used there.

Will the Burkburnett Field Extend Into Oklahoma?

Now comes the report that the Hendrick Mapping company test in the northeast corner of the southwest of 14-4S-14W, which is in Oklahoma and across the river from Burkburnett, is showing oil. The depth is not given nor the amount of oil uncovered, but if anyone is clever enough to find oil where it has been so much sought after it would be the Hendrick family. They are in the free-for-all class as wise operators. The well is said to be a mystery although the owners admit that they are on top the sand. In this connection is herewith given the late completions at Burkburnett.

The Waggoner pool completions follows:

Moody Petroleum No. 1 Taylor, 500 barrels.

M. & P. Burk Extension No. 1 Evans, 500 barrels.

Mid-Co Petroleum No. 2 Taylor block 98, swabbing and flowing 1,500 barrels.

Mississippi Burk No. 1 Taylor, 600 barrels.

C. F. Noble No. 1 Brannon, block 89, 40 barrels.

Mo-Tex No. 2 W. F. George 400 barrels; No. 3 W. F. George, 225 barrels.

Ranger Burkburnett, No. 3 Waggoner, 750 barrels; No. 4 Waggoner, 500 barrels; No. 5 Waggoner, 400 barrels.

Middle States No. 1 Taylor, block 96, 600 barrels; No. 1 Taylor, block 98, 600 barrels; No. 2 Taylor, block 98, 750 barrels; No. 6 Taylor, block 98, 750 barrels; No. 3 Taylor, block 96, 500 barrels; No. 4 Taylor, block 96, 350 barrels.

John O'Neal No. 2 Taylor, block 98, 950 barrels.

Sinclair Consolidated No. 1 Brannon, 50 barrels.

S. W. S. No. 1 Waggoner, block 86, 450 barrels.

W. G. Skelly No. 1 Elsen, block 88, 500 barrels; No. 2 Elsa, block 88, 450 barrels; No. 6 Waggoner, block 87, 750 barrels; No. 7 Waggoner, block 87, 1,000 barrels; No. 9 Waggoner, block 87, 500 barrels; No. 11 Waggoner, block 87, 600 barrels.

Townsend No. 3 Renner, block 75, 200 barrels.

Texas Blue Bonnet No. 1 Elsea, block 88, 400 barrels.

Hardly Able No. 2 Taylor, 750 barrels.

Harrison-Dale No. 4 Taylor, 1,000 barrels.

Ferris & Seay No. 2 Waggoner, 500 barrels; No. 3 Waggoner, 525 barrels.

American Refining No. 6 Waggoner, block 86, 1,000 barrels.

Imperial Petroleum No. 3 Taylor, 1,000 barrels; No. 4 Taylor, 1,000 barrels.

Mary Elizabeth No. 1 Elsea, block 88, 250 barrels.

Carranza to Blame.

Whenever a lawsuit is started involving the right to property in Oklahoma it is bound to act as a hoodoo and very shortly dry holes and kindred troubles intervene to put an end to the litigation. Right now it apepars that Mexico is in the same predicament on account of the intervention no doubt of the Carranza government, which has stopped the drilling of wells on many American oil properties claiming that all royalties must be paid to the statet in order to build schools. The monster well of the Huasteca Petroleum company, known as the Juan Casiano No. 7, which has produced more than 30,000,000 barrels of oil, is a striking example. It is now making water only.

The Texas company has lost two wells by water. The Mexican Gulf Oil company's No. 3 on lot 8 Tepetate district that has been making 5,000 barrels is a dead one now.

Reports from Washington have it that the Mexican government has shut down drilling operations for such well known properties as the Southern Oil & Transport Co., Tulsa-Texas Petroleum company, the Texas company, Chiconcillo Petroleum company, Island Oil & Transportation corporation, Cia Transcontinental de Petroleo, the National Oil Company of New Jersey, English Oil company, Tamesi and Cacomichi companies, represented by Swacker & Co., of New York, Aguila is operating. Mascotte is Anderson Prewitt Petroleum company, Panuco Fuel oil company, Federal Oil corporation, Tampico Fuel oil company, Dolores Mexican Petroleum company, Mexican Petroleum company, Mexican Petroleum company and the Mexican Gulf company.

All the above have joined in a letter to congress protesting that the rights and property of Americans are being violated. It is a troublesome situation and the party in power will not easily be absolving itself from invite all Americans to move out of Mexico. It has happened before.

Haring in Washington

The meeting in Washington which was on yesterday with reference to the prosecution of refiners who have been accused of profiteering in gas and in oil, assuming distress, and will probably be repeated by wire before you read about it in print. The fact is, I feel it was the competition that took the juice of profit out of things. Everyone having gas oil, that would go for the field making it on cars and shipped it there. Oil that was under contract to refineries made the long trip in the refinery cars bought to said refinery dirtier and all this caused a big stump and a lot of losses which will have to be paid by some one. Gas oil came from Kentucky, Louisiana, Texas, Oklahoma, Kansas, from Wyoming and of course some from the nearby fields in Illinois, Indiana and Ohio. It was a big movement but it broke the market and the "profiteers" in most instances are counting their profits on the red side.

It is all right, perfectly all right for brokers in Chicago to sell Mexican crude at fabulous prices and the distinguished senator from Kansas will applaud rather than raise his hand to prevent it. The oil producers and refiners of Kansas ought to have some fun with their distinguished representative in the upper house if he ever returns home. His name is Capper. He has the honor of filing a complaint charging profiteering.

Hull Bayou Extended.

SHREVEPORT, La., Dec. 15.—Proven territory in the Hull Bayou field was extended a half mile north and a half mile east in the recent completion by R. O. Roy for the Continental Oil and Petroleum Co. of its Robinson No. 1 in the southwest corner of the southwest quarter of 32-12-10. The well came in from around 2,776 feet and is flowing as an estimated rate of 500 barrels per day, making it one of the large wells of the district.

The location is the farthest well northeast in the field and carried production a half mile farther toward the old Red river field made famous three or four years ago by the big Gusher Bend producers. It is about a mile north of the Rich Nelson leases of the Texhoma Oil company.

E. B. George a Hero.

E. B. George, who is drilling for gas to keep the home fires burning, brought in a 15,000,000 gas well yesterday located at the center of the southeast of the northeast of 20-14-12. The well is now supplying gas for the people of Tulsa as the gas company was on the job before the well was even finished. Mr. George says, "I am drilling four more wells and one of them is bound to be good for gas. It takes money these days of high priced labor but the people must have gas."

Late News From Shreveport.

SHREVEPORT, La., Dec. 14.—Three of the four big leases of the Claiborne field were each credited with a completion Sunday the total new production of which is 16,250 barrels, an odd detail of completions is that neither 30, which has almost become a synonym for the Homer district, nor the Show lease can stack up another well on its record; 29-21-7 gets the blue ribbon with a 15,000-barrel well on the Gas Oakes lease. Standard Oil company at around 2,930 feet in the southwest corner of southwest quarter of 29-21-7 is in the southeast corner of proven territory.

Cleland and Foster completed Jackson 1 in the center of 24-21-8 for 100 barrels at about 1,150 and the Arkansas Natural Gas company completed the trio with Langston 191-0 near the center of same section, yielding 850 barrels at 1,100 feet.

Important Well Near Bristow

The Harmer Oil company, Seth Fox and associates drilling at the south center of the east half of the northeast of 5-18-8 have a well that has filled up 2,500 feet with oil. The total depth is 2,874 and the well is just on top of the sand. So far the oil is heavy and of a very dark color.

Is Stealing From Corporation a Venial Sin.

Last week in Eastland county, Texas, the first tried of 17 indicted men was convicted of having stolen oil well equipment from many of the large corporation drilling in the Texas fields. The defense seemed to rest the case wholly upon a contention that it is right to steal from big corporations.

This may be a tenet of bolshevism or it may not be but at any rate if the men who steal oil well casing and equipment had lain awake as many nights as the oil men planning to accumulate what fortunes they have, then they would have spent their time to better advantage than lying awake nights planning to steal the result of other men's labors.

With the Oil Men

F. L. Sawyer, one of the old-time oil men and formerly of the firm of Litchfield & Sawyer, is in Tulsa on business.

Howard Gray, prominent insurance man of Joplin, who is interested in a well now drilling southeast of Henryetta, has been visiting his old friend, B. L. Love, here.

Grant C. Stebbins is at Dubach, La., superintending the completion of a well which is showing gas and located on one of Mr. Stebbins' large blocks of acreage over east of Homer. The well, which is now fishing on top of the sand, is located in 22-20-2. It is a likely looking country and the best bet for something new in Louisiana.

Judge Leahy of Pawhuska was in the city yesterday attending the conference of the Mid-Continent Oil & Gas association on the Osage matter and had with him Chief Brown of the Osages and Secretary of the Council Tinker. It goes without saying that the chief and the Osage [illegible] the lease contract on the reservation which expires in 1921.

W. N. Davis, prominent oil producer of Bartlesville, who is one of the best and most influential members of the board of directors of the Mid-Continent Oil and Gas association was in the city yesterday attending the conference.

Franklin K. Lane, jr., son of the secretary of the interior, has been placed in Shreveport, La., in charge of the Doheny interests, pending the return of J. C. Anderson, general manager, who recently accompanied the Doheny party on a tour of inspecting over their Louisiana holdings. It is understood that fully $2,000,000 will be spent in this territory by the Doheny interests, and plans have been made to establish offices in Shreveport and start active drilling operations at once.

OIL AND GAS

Leases, Supplies, Production, Etc.

I own scattered leases in Okfuskee, Seminole and Hughes counties. For information write P. O. Box 264, Okemah, Okla.—Advt.

Want 100 barrels settled production. Also Beggs and Osage drilling contracts. Arthur Fuller, Mayo Bldg., Tulsa, Okla.—Advt.

We are in the market for close in leases, drilling propositions and production in Oklahoma oil fields. Ladd and Hannon, Wheat Bldg., Fort Worth, Texas.—Advt.

Mid-Continent Tax Bureau. Carl L. Rice, C. P. A. Audits, Reports, Tax Problems, Systems. Phones Cedar 297 and Osage 6977. 517 Kennedy Bldg.—Advt.

One Parkersburg machine complete with guy wires and stakes, in A-1 condition; located five miles west of Haskell. Price $1,000. J. H. Rush, 412 East 14th, Osage 7277, or Beggs, Okla.—Advt.

For information about the new shallow sand oil fields in western Tennessee, and 50c acreage, 10c rentals in territory geologically approved, write Tennokla Oil Co., Dickson, Tenn.—Advt.

For sale, interest in 40-acre lease Bird Creek field, well now drilling will be drilled in about the 20th. One-eighth interest $1,200; one-sixteenth interest $600. If you want quick action on your money this is your chance. Phone Osage 1659 or call at office 330-332 Robinson Arcade, Tulsa, Okla.—Advt.

For sale, interest in 40-acre lease. Bird creek field, well now drilling will be drilled in about the 20th. One-eighth interest, $1,200, 1 1-8 interest $600. If you want quick action on your money this is your chance. Phone Osage 1659 or call at office 330-332 Robinson Arcade, Tulsa, Okla.—Advt.

For sale, 25 barrels settled production with 1,500 acres undeveloped acreage close to production. Several thousand feet line pipe, casing, rods and tubing. Two good National drilling machines complete. Truck and Ford cars. Everything in A-1 condition. Call at 807 Unity Bldg.—Advt.

Take a Chance—Drill a Well.

Down in 16-14 we have an 80-acres; oil north, south, east and west of this tract; oil well within one-half mile; gas well within one-fourth mile; nothing to condemn our lease. Stone Bluff pool just northeast, nine miles west of Haskell where big wells are common. Drill us a test well on this 80 and it is yours, or you put up the money and we will drill the well. We know the game. Every dollar of your money goes to develop your own lease. Oklahoma State Development association, basement Cosden Building, Tulsa, Okla.—Advt.

Gas Well Produces 100,000,000 Feet Daily.

Jones Bros. No. 2 well at Amarillo, Texas, is producing 100,000,000 feet of gas daily at a depth of 1,865 feet. Geologists claim that oil should be found before the drill reaches 3,500 feet.

We are drilling a well on this same big structure. Our location has been approved by four geologists as being one of the most perfect in Texas. We are selling a small amount of acreage around our well at $25 per acre. Fifty dollars buys a two-fifth interest in a 10-acre tract. At Burkburnett, Texas, acreage that formerly sold at $15 to high as $100.00 an acre. We high as $1,000.00 an acre. We have contracted to drill our well to 3,500 feet unless a paying well is found at less depth. Over 90 per cent of the structures in this same formation have proven good by the drill.

Where else can you invest $50 and get a legitimate chance to make $200,000? The acreage is assigned to you; you own it. You do not have to drill for five years; one dollar an acre yearly rental, or $2 each year keeps your lease good and we look after this for you. Mail checks to Oklahoma State Development association, basement Cosden Building, Tulsa, Okla.

Drill Oil Wells.

We have an 80-acre lease on which there is a practical certainty that there is production. We will contract for the drilling at the following attractive terms:

You place $2,500 in the bank and we will drill a well. If we get a paying oil well this money is ours, if dry we return your money. If the first well is a paying well you put up $2,500 more and we drill a second well. If this well is dry we pay, if good, you pay and put up a third $2,500 fund are we will drill the third well. If dry we pay and if good the money comes to us.

At the conclusion of this operation we will assign you a three-quarter interest in the lease and we retain the other quarter and pay one-fourth of all future drilling and operating expense. At any time any one of the three wells you are to drill come in dry we will assign to you your three-quarter interest. Shallow drilling, Bartlesville sand north and east of Tulsa, from 18 to 26 feet of sand. Everything in the hands of perfectly competent and experienced men.

If you want an interest in a real oil property here is your opportunity. See or write, Oklahoma State Development association, basement Cosden Building, Tulsa, Okla.—Advt.
