Marland Into the Big Game

E. W. Marland is reported from New Orleans as being the center of attraction in financial circles in that city on account of his plan to build an immense refinery with the necessary pipe lines to the north Louisiana fields and perhaps to the Osage where he has vast holdings and to be planning to build and equip a large line of tank steamers and thus make his company as world-wide concern.

Mr. Marland's friends here are all for him and are confident that he can make good in any undertaking no matter how large. He is a born leader of men, has an organization that is without a superior anywhere and can tackle anything that comes along with every confidence of making it a success.

Louisiana to the Front

Elsewhere in this issue will be found a report from Louisiana that indicates that the field is spreading out toward the south and this will be good news to every one in Tulsa as whatever happens in Louisiana is a direct benefit to the oil men here.

Up to now there has been less flagrant hot air in circulation in regard to Louisiana than any other new field in the memory of man. Early in the game leases were extremely reasonable and of late there has not been the tendency to hold up oil men that was so evident in the early days in Texas.

This is because the oil scouts, many of whom are from Tulsa, know the relative value of wildcat acreage and have refused to be stampeded and have insisted upon fair prices all the way down the line. The man who has money to invest could not do better than drill wildcat wells along the bayous and streams to the south and east of Shreveport as many pools with sand at different depths are likely to be uncovered.

A trip through Louisiana at this time of the year is a most interesting one and while it is a big country, it can all be gone over in the course of a month or two and likely looking spots picked out. It has looked good to the writer south of Monroe, around the town of Columbia and news of a well down that way would be of the greatest interest at his desk. It has been a hobby with the writer ever since scouting the well in the park at Monroe that came in as a radium water well and was turned into a health resort about eight or nine years ago.

Big Well Fills With Water.

The Texas company No. 1 in the northeast corner of 28-48-2w, which came in more than a week ago as a 1,000-barrel producer, is now a hole full of water and is producing no oil, according to a late report. The well is 2,194 feet deep and had 40 feet of sand.

Invader to Increase Capital.

The Invader Oil & Refining Co. has just issued a call for a special meeting of its stockholders for January 12, 1920, at which meeting it is proposed to increase the authorized capital from $2,000,000 to $10,000,000.

During 1920, the Invader company proposes to increase its Burkburnett refinery from 1,500 to 2,000 barrels daily, to build a 5,000-barrel refinery at Fort Worth, and inaugurate a vigorous drilling campaign for the development of its thousands of acres of proven leases. The company also proposes to extensively purchase partially developed producing properties. One hundred new 8,000-gallon tank cars and 50 new 10,000-gallon tank cars, with steam coils have just been purchased.

Laying Pipe From New Gasser.

Special to The World.

PONCA CITY, Okla., Dec. 17.—It looks like the Kay County Gas company will be successful in saving the big gas well located on the Alberta Four-eyes lease, two miles south of this city, and the company has started laying pipe from the well to the main pipe line from that field to Ponca City. The connecting line will be a mile and a half long. It has been feared that the water pressure was too strong to save the gasser.

Starts Drilling.

PONCA CITY, Okla., Dec. 17.—The Twin States oil company has started drilling its test well at a point six miles east of Newkirk and 12 northeast of Ponca City. The intensely cold weather has prevented drilling in the immediate fields, all the water lines being frozen, but operations have started again.

The Pirtle-Pittman oil company is drilling at approximately 2,250 feet on the Ames lease near Newkirk, and it had been hoped this well would be completed by Christmas, but cold weather will delay the finish. The Brooks well, west of that town, is drilling at about 3,550 feet.

At Beggs.

Waite Phillips has about all the casing out of the hole in 22-14-11 and, in fact, only eight joints remain. It is this test that was referred to recently in this column as likely to open a new pool in the 2,700-foot sand as the well has been making considerable oil although the sand has just been touched.

Mr. Wilcox is on top of the sand with his No. 4 Winey Stake farm in 12-14-11 and is drilling in at the present writing. He is rigging up for No. 6 on the same farm.

Tom Wood, E. L. Robinson and others are building a rig for the test in the south half of the northwest of 21-15-12, northeast of Beggs. It is near the big well recently brought in in section 16.

The E. B. Black test in 16-14-11 that came in for a 7,000,000 gas well is adding greatly to the looks of things in these days of fuel scarcities.

Kansas Completions and First Reports.

Ward & Wilhoit have spudded in and shut down in their No. 1 Covert in the southeast corner of the northeast of the northwest of 28-21-4, Marion county.

Springer and others are drilling at 500 feet with a Standard rig in their No. 1 Harpp in the southeast corner of the southwest of 18-21-5e, Marion county.

Shyrock and others have a rig up for their No. 3 Paris in the center of the north half of the southeast of the northwest of 20-23-4, Butler county. The same people's No. 10 Paris is a rig on ground in the northeast corner of the southeast of the northeast of the southwest of 20-23-4e, Butler county.

The Trans-Continental Oil company is spudding for its No. 3 Kehr in the northeast of the southwest of the northeast of 20-23-4e, Butler county.

The Gypsy Oil company is building a rig for its No. 4 Kehr in the northwest corner of the southeast of the northeast of 20-23-4.

Harron and others are building a rig for their No. 1 Vantyle in the northwest corner of the northeast of the northwest of 32-23-4e, Butler county.

The Mountain & Gulf Oil Co. is pumping 75 barrels daily from its No. 1 Rodner in the southwest corner of the northwest of 14-22-4e, Marion county. Sand was found between 2,546-47.

Iaggert and others are pumping 75 barrels from their No. 1 Hughes in the northwest corner of the northeast of 9-26-8e, Butler county. Sand was found between 2,439 and 2,506.

The Cattlemen's Oil company is pumping 100 barrels from its No. 3 Blankenship in the southwest corner of the southeast of the northeast of 9-26-8e, Butler county. Sand was found between 2,439-69.

Yeager and others have abandoned their No. 1 Rutherford in the northeast of the southeast of the northwest of 24-27-4e, Butler county, as a dry hole at 2,780 feet.

The Carter Oil company has a failure at 3,036 feet in its No. 1 C. W. Williams in the southwest corner of 30-27-4e, Butler county.

Smith and Hill have abandoned their rig and location in the northeast corner of the southeast of the northeast of 2-27-5e, Butler county.

F. A. Wahan and others are pumping 35 barrels after a shot of 120 quarts in their No. 1 Wallace in the southeast corner of 11-29-5e, Butler county. Sand was found between 2,677-2,824.

The National Oil company has an oil and gas well in its No. 2 Haver in the northwest corner of 30-29-6e, Butler county. The well is pumping 60 barrels of oil and making 100,000 feet of gas. The oil sand was found between 2,729-41 and the gas sand found between 2,710-28.

At Garber.

The Atlantic Petroleum company has completed No. 10 Charles Wishart farm, 12-22-4w, and has 150-barrel well at 2,209 feet. No. 11 and 12 are rigging up.

Asks to Drill Close.

Special to The World.

FORT WORTH, Texas, Dec. 17.—The Prairie Oil & Gas Co. has made application to drill within 65 feet of the Royal Duke Oil company's lease in the Pleasant Grove district of the Barger-Eastland field, in a hearing before George C. Butte, chief supervisor of the oil and gas department of the state railroad commission of Texas, at Fort Worth.

This is the first case of the kind to come up for discussion and settlement since rule 37 took effect November 26, which holds that "no well shall be commenced nearer than 300 feet to any other drilling or producing well nor nearer than 150 feet to any property line." The case is of unusual importance to both the Royal Duke and the Prairie. The ruling was made necessary because of injury operators were suffering on account of wells being drilled too close to each other.

No settlement has been made of the matter Saturday, according to T. A. Hilburn, president of the Royal Duke, although it was hoped an agreement would be reached within a few days.

The Prairie owns the lease on 88 acres of the Hanks tract; the Royal Duke 8.6 acres, the latter company's tract being in the shape of an "L" running on the north and the west of the Prairie lease. The case in question concerns drilling an offset well to Hanks No. 1 of the Royal Duke that is producing about 1,800 barrels daily and which was brought in five weeks ago. The rule in question provides that the commission may allow drilling at nearer distances provided no injury shall be done to leases on adjoining tracts.

Prairie to Build to Hewitt

Special to The World.

ARDMORE, Dec. 17.—Wirt Franklin, a member of the local oil fraternity, received a wire today from W. S. Fitzpatrick of Wichita, Kan., president of the Prairie Oil & Gas Co., stating that the Prairie Pipe Line company would extend a line to Hewitt and build gathering lines and would place the Hewitt field on a basis with mid-continent oil, which will mean that Hewitt crude will go to $2.50 a barrel, the present prices.

It is expected that this work will be completed by the middle of January. Hewitt crude opened at $1.50 and was afterward raised by the Texas company to $1.75, but it looks now that the credit will go to the Prairie company of putting the oil on the price basis of the mid-continent field.

Altus Activities.

Special to The World.

ALTUS, Okla., Dec. 17.—There is intense oil activity east of Jackson as well as throughout this county, across the line in Tillman county. The Fred Till well is counted a producer. The wildcats south of the river are making good showings. Leases have advanced in Jackson county from $1 per acre to as high as $12.50. Lessees are very active and prices jumping daily.

Geologists report a well defined structure extending from the gas field of Amarillo through the Texas panhandle, southwest Oklahoma on to the Louisiana oil fields.

The Laberanca Oil & Gas Co. has two tests going down in Jackson county.

Jarbeau and associates are putting down a test south of Olustee on Boggy creek.

The following companies have scouts in Jackson county and each has secured considerable acreage: Panhandle Oil & Refining Co., Sinclair Consolidated, Empire Gas & Fuel Co., Carter Oil company, Atlantic Oil Producing company, Texas company, Gypsy oil company, and the Magnolia Petroleum company. The Elmcourt Investment company has taken over the Looney well and is rebuilding the rig, now shut down at 800 feet.

Oklahoma Wildcats.

Kingston Home Oil company No. 1 Thomas in the northeast corner of northwest of 26-7s-5e is shut down at 800 feet.

Fred Pak test on the Wilson farm in northwest corner of southwest of 15-8s-26e is shut down at same depth.

Wilkinson and associates No. 1 Smith in the northwest corner of southeast of 33-2-13e is drilling at 1,250 feet.

Mawano Oil company remains shut down for an under-reamer at 2,600 feet in its test on the Scott farm in center of 12-3-7e.

Ole Oil & Gas Co. No. 1 Hines in the northwest of 35-4-1e is shut down at 2,160 feet for a string of 6 5-8-inch casing.

J. D. Abbott and associates No. 1 Ford in the northwest of 24-4-6e is cleaning out at 2,160 feet.

Rosedale Oil & Gas Co. No. 1 Thompson in the center of 26-5-1e is shut down at 1,045 feet.

Texas company has rigged up and shut down for boiler in No. 1 Hicks in 6-5-9e.

Maud Oil & Gas Co. No. 1 Davis in the northeast of 18-7-5 is a fishing job at 2,000 feet.

Macklinburg & Duncan No. 1 Macklinburg in the northwest of 22-8-1e is shut down at 1,800 feet.

R. D. Wallace is drilling at 1,875 feet in the test on the Diets farm in the northwest corner of southeast of 22-8-2e.

Cleveland County Development company No. 1 Braman in the southeast corner of 31-9-1e is shut down at 2,502 feet.

Magnolia Petroleum company No. 1 Cowan in the northwest of 15-1-2w is drilling at 1,112 feet.

Broadgate Oil company No. 1 Abram in the southwest corner of southwest of 23-1-3w is shut down at 2,700 feet for fuel.

Coline Oil company No. 1 Fahrem in 31-18-2w is running 10-inch casing at 1,140 feet.

Burns and associates No. 3 Willis in the southeast of 26-1s-5w is drilling at 210 feet.

Ranger-Gulf Oil company No. 1 Foster in the southeast of 36-1s-5w is rigging up with a Star machine.

Pen-Kel-Wat Oil & Gas Co. No. 1 Horton in northeast of 17-5s-7w is shut down for 5 3-16-inch casing at 3,030 feet.

Noble and associates No. 1 Alexander in the northwest corner of northwest of 32-8s-1w.

Ryan City Oil company No. 1 Banett in the southwest corner of southwest of 2-8s-1w is a rotary rig.

Empire Gas & Fuel Co. No. 1 Seay in the southwest of southwest of 3-7-5-5w is a rig.

W. J. Scott test on the Price farm in the northeast of 24-1s-2e is shut down at 1,232 feet.

Nash and associates No. 1 Roberts in the northeast corner of southeast of 32-2s-3e is a rig.

Wagner an others test on the Johnson farm in southwest corner of southwest of 7-4s-13e remains shut down at 400 feet.

Baxter and associates No. 1 Summers in the southwest corner of 18-6s-7e is shut down at 475 feet.

With the Oil Men

J. J. Schock, who has the very important position of general manager at the Indiahoma Refining company at Okmulgee, is a genuine American and has shown his quality by not only carrying out his own little girl when the Schock residence was burned the other night but also rescued one of the servants and his fear is referred to in the Okmulgee Democrat as being the most sensational incident of the fire. His father, P. E. Schock and E. Constantin are on the way home from France, being due in Tulsa Tuesday. It will be a most unwelcome surprise to the father and mother when they arrive to find their home in ruins as the house was filled with everything that goes to make a home pleasant.

Captain R. A. Beard, who has served three years in the United States army, beginning with the Mexican border trouble and winding up in France, is here from Toledo as the guest of Joe Kirkbride and will likely make Tulsa headquarters as he is getting into the oil game and will find much to his liking. The captain was in the 37th division.

M. J. Neely, vice president of the National Exploration company of New York, and J. W. B. Crawford, secretary of the above company, have been looking over the city for the past few days. It is Mr. Crawford's first visit.

J. C. Tarter, formerly with the Pearce Oil corporation here, is now in charge of the office of the general refining company of Tulsa in Cleveland, Ohio. It looks like a mighty fertile field for new business.

James King Duffy, of the Phoenix Refining company, arrived in Tulsa yesterday on one of his periodic visits.

20,000 acres wildcat leases scattered throughout every parish in North Louisiana. Title work complete and ready for delivery.

For sale, in Beggs district, for immediate delivery, 1,627 feet of 8 1-4, 24 pound; 700 feet of 10-inch, 35 pound and 912 feet of 6 5-8, 20 pound casing, price right, for quick action call Cedar 920.—Advt.

Amarillo Acreage for Sale.

Since the ones No. 4, north of Amarillo, Texas came in with a gas flow of 107,000,000 feet daily at 1,005 feet by actual test, acreage in this territory is selling at fabulous prices.

We are drilling and going to 3,000 feet east of this location, on the same structure and pronounced by four geologists to be a superior formation. We have a big block of acreage around this well, a little of which we will sell for $25 per acre in small tracts. You can put in $50 and may win $200,000 as is being done at Burkburnett. If you want better than gambling chance to acquire property which may mean a fortune in a few weeks, let us show you our maps and data on this proposition. There are kings in the deck but unless you sit in the game they won't do you any good. Oklahoma State Development association, basement Cosden Bldg., Tulsa, Okla.—Advt.
