Osage Lessees Complete Organization.

The Osage Oil & Gas Lessees complited the organization of their association yesterday and selected Frank M. Breen of the Winona Oil company as president, Burdette Blue of the Indian Territory Illuminating Oil company ag vice president, Harry H. Smith as secretary and James K. Crawford of the Oklahoma Producers & Refiners corporation as treasurer. The executive committee consists of the following:

Frank Phillips, Bartlesville; Burt Collins, Tulsa; Charles Owen, Caney, Kan.; William N. Davis, Bartlesville; Judge Diggs, Tulsa; H. A. Broomfield, Tulsa; H. B. Straight, Bartlesville; W. C. Franklin, Tulsa; E. W. Marland, Ponca City; T. J. Leahy, Pawhuska, and C. E. Crawley and Carl R. Dresser of Tulsa.

By-laws were also adopted from which the following extract describes the purpose of the association:

"The name of this organization shall be the Osage Oil & Gas Lessees association, and it shall have for its purpose the promotion and protection of the oil and gas industry of the Osage nation and to that end, the creation of a mutual understanding and harmonious co-operation between the department of the interior as the supervising governmental agency, the Osage tribe of Indians as the owners of the mineral rights and the oil and gas lessees as the operators."

A committee of one consisting of Judge J. J. Shea, was selected to look after the extension of the Osage mineral trust period and to select such assistants as he might need and he immediately made his selection by drafting Judge T. J. Leahy of Pawhuska, and Judge J. H. Brennan of Bartlesville.

The party will leave for Washington, D. C., in about a week and will begin lining up congressmen for the extension which ought to have but little opposition as the department is for it as well as the Osage Indians themselves. The latter are enjoying unequalled prosperity and their interests are being conserved as probably the interests of no other tribe in the country. The chief of the Osages and the present consul are unusually intelligent and we are doubtless reflecting the views of all full bloods and mixed bloods of the Osage nation.

So far as the oil men are concerned they cannot hope to develop the Osage fully between now and 1931 and if oil is what the country needs the quicker the matter is settled the better. The selection made at yesterday's meeting will doubtless meet with the hearty approval of all the Osage lessees as they represent the best possible brains for a mission of this kind. It would be a mighty good thing if the leases could be made to read "for as long as oil and gas is found in pay'g quantities."

Ought To Register Geologists.

All geologists who have worked in New Mexico should be registered by some competent oil association and made to report at frequent intervals from now on because the leaders among them have given it out cold that they are going to quit this business unless oil is found in New Mexico.

It might be that some of them would become so despondent as to "shuffle off this mortal coil" and they cannot be spared by any means as there is still work for the geologists. Wake up to the fact that oil is frequently found in the synclines or along the creeks of Oklahoma, Louisiana, Wyoming and Kentucky and that Texas is as good a field for the creekologists as for the geologists, as witness Burkburnett, for instance.

Not that New Mexico may not produce oil because there is always a chance and oil men in this neck of the woods have seen the unexpected happen many a time. Nearly all the big companies with headquarters in Tulsa are interested in New Mexico, but the Gypsy well on the Aston Checo tract is drilled into granite at a depth of 2,031 feet in the south half of the south half of the northwest of 30-11-9. The Carter Oil company also has a dry hole at 1,982 feet on school land in the southwest corner of 17-11n-19w.

Pipe Line Runs.

Mid Continent pipe line runs in October totaled 10,469,298 barrels, with a daily average of 337,719 barrels. This is a gain of 644,138 barrels in the total figure and 16,215 barrels in the daily average compared with the previous months. Shipments by these lines during the month amounted to 11,528,943 barrels with a daily average of 378,353 barrels, a gain of 532,216 barrels and 5,129 barrels, respectively, over the previous month's figures. Stocks on hand October 31, 1919, amounted to 52,014,094 barrels, compared with 52,273,276 barrels September 30, and 66,036,222 barrels August 31.

Prairie Pipe Line company's runs during October amounted to 4,340,000 barrels, a daily average of 140,000 barrels, while shipments totaled 4,960,000 barrels, a daily average of 160,000 barrels. The company has declared the regular quarterly dividend of $3, payable January 31 to stock of record December 31.

Prairie Oil & Gas Co. has declared the regular quarterly dividend of $3 and an extra dividend of $7, payable January 31 to stock of record December 31. This compares with 3 per cent regular and 5 per cent extra paid in October. Total payment out of 1919 earnings total 28 per cent.

Anglo-American Oil company, limited has declared an interim dividend of 3 shillings per share, payable January 15 to holders of coupon No. 18. This dividend is payable out of 1919 earnings and will be free of British income tax. Payment will be made in the United States by the Guaranty Trust company at the exchange rate of $3.73 1-3 per pound sterling, which will be equivalent to 56 cents a share, compared with the previous dividend of 69 cents a share.—Pforzheimer's Weekly.

Barnsdall Oil Company Operations.

The Barnsdall Oil company is drilling at 1,340 feet in its No. 1 in the northeast of 31-32-11 in Chautauqua county, Kan.

The Barnsdall company is also quite active in the Osage.

It has a location for No. 1 in the northwest of 34-28-9. It has just completed a 100-barrel well in the No. 1 in the northeast of 28-24-10. It will abandon its No. 1 in the southeast of 32-25-10 which is dry at a total depth of 2,112 feet 12 feet in the Mississippi lime. It is drilling its No. 13 in the northwest of 20-29-9. No. 1 in the southeast of 12-26-10-E, a rig waiting on tools. The company has a rig standing and tools on the ground for its No. 1 in the northwest of 26-26-10. It is drilling at 850 feet in its No. 1 in the southwest of 15-26-9. The company is shut down for water in its No. 1 in the northwest of 29-29-5 at 1,975 feet. No. 1 in the southwest of 19-25-10 is a rig. No. 1 in the northwest of 35-25-11 is drilling at 350 feet. The concern has a rig up for No. 6 in the northwest of 36-25-11. No. 1 in the northwest of 17-25-12 is drilling at 1,625 feet. No. 1 in the northeast of 1-24-10 is drilling at 2,350 feet. The company has a rig up for its No. 2 in the northwest of 4-24-10. The concern is spudding for its No. 17 in the northwest of 3-24-10. It has material on the ground for No. 19 in the northwest of the same section. It has a bad hole at 119 feet in the No. 4 in the northeast of the same section. Its No. 5 in the northeast of the same section is drilling at 210 feet. The concern has material on location of its No. 2 in the southeast of 23-24-10. It is rigged up and waiting on contractor in its No. 7 in the southwest of 20-24-10. The company is drilling at 1,200 feet in its No. 2 in the northeast of 3-24-11. It has material on location for its No. 3 in the northeast of the same section. It is making a location for its No. 1 in the northeast of 19-24-11. The company has a rig waiting on tools in its No. 2 in the northwest of 17-22-10. It has a location for its No. 1 in the northeast of 19-24-11. The concern is building a rig for its No. 10 in the southwest of 24-23-11. It is making a location for its No. 13 in the northwest of 8-23-12. The company is shut down at 2,286 feet for 5 3-16-inch casing in its No. 2 in the northwest of 10-21-9. It is building a rig for No. 3 in the northwest of 10-21-9. No. 1 in the northeast of 10-21-9 is drilling at 630 feet. The company is building a rig for its No. 1 in the southwest of 10-21-9.

In Washington county the Barnsdall Oil company is rigging up for its No. 6 in the southeast of 15-21-13. It is moving in a machine on the location for its No. 35 in the northeast of 34-26-13. The concern's No. 14 in the northeast of 4-25-13 is drilling at 250 feet.

Muskogee.

The Arthur company is drilling at 1,200 feet at No. 11, C Thompson, corner south line northeast, southwest 6-14-18 and is due to hit sand now most any time. No. 10, which completed several weeks ago, found sand at 1,264 to 1,280 and 1,396 to 1,425 feet, the former Muskogee and the latter Timber Bridge pay, came in for 40 barrels and is making pretty close to that figure right now. The scene of this new lease is one of the oldest producing leases in the Muskogee field, but on which no new wells had been drilled in a number of years.

The Donald McMillan Oil company shot sand at 1,150 to 1,155 and 1,170 to 1,190 feet in No. 9 L. Leters, corner south line northeast southwest 1-14-17, Monday. Just what the well will make is problematical, but report's indicate that it will go up to around 25 barrels or more.

The North American Oil & Refining Co. is clearing out after a shot at No. 4 Cherry southwest of northwest of northwest 2-14-18, sand having been found at 1,204 to 1,214 feet. There was as much as a 10-barrel showing before the shot. This well is on a lease where three other holes had been drilled a number of years ago, one of which is reported being an oil well and the other two rated in the "showing" class. There are many that each leases in the Muskogee district which will stand redrilling now on a $2.75 market as against a 30 to 40-cent market and then sale for only about half the oil, when a majority of the tests older leases were drilled several years ago. If when the famous chicken farm lease was drilled a $2.75 market had prevailed every man connected with its ownership would have realized thousands where he got hundreds. Somewhere in the oil field there is another Chicken farm. At least that's the belief of old timers, and now that oil is up the old territory is showing activity again, with almost 100 per cent results.—Phoenix.

At Ardmore.

ARDMORE, Dec. 30.—The Hewitt field, which was discovered about the first of last June, 18 miles west of Ardmore, near the town of Wilson, has 23 drilling wells, 29 rigs up and three locations. The field has nine wells completed and a production now of about 3,000 barrels.

Here is a report of the production of some of the wells at Hewitt: Texas company No. 1 Denney in 27-4s-2w, 50 barrels; Texas company No. 1 Dillard in 27-4s-2w, 275 barrels, Texas company No. 1 Nolen in 25-4s-2w, 120 barrels, Franklin No. 1 Thompson in 21-4s-2w, 469 barrels; Carter Oil company No. 1 Noble in 27-4s-2w, 240 barrels; Carter Oil company No. 1 Hefner in 21-4s-2w, Westheimer & Daube, No. 1 Isabel in 22-4s-2w, 400 barrels; Westheimer & Daube No. 1 Dillard in 21-4s-2w, 310 barrels, Wolverine Oil company No. 1 Dillard, 300 barrels.

The Healdton field did not do quite so well during the month of December as it has been doing and the total production for Hewitt, Healdton, Fox and the 2-4 country for the month of December was 35,600 barrels.

Ashland Oil Co. Busy in Osage.

The Ashland Oil company is moving in tools on its No. 1 in the southwest of 15-23-11. It has a rig standing on its No. 2 in the southeast of the same section. The concern has material on the location for its No. 2 in the northwest of 20-23-11. It is building a rig for its No. 5 in the northwest of 21-23-11. The company has a rig up for its No. 1 in the northeast of 16-22-11. The company is shut down at 1,898 feet to run a liner in its No. 1 in the northeast of 17-22-11.

In the Osage.

The Tidal Oil company No. 9 in the southeast of 20-21-12 is a 30-barrel well after 100 quarts, in sand from 1,311 to 1,341 feet.

The Phillips Petroleum company reports a 50-barrel well in the northeast of 9-24-10.

In Stephens County, Texas.

The Mid-Kansas No. 1 Graham is said to be making 20,000,000 feet of gas at 2,275. The same company has a fine show of oil and gas at 3,270 feet in its No. 1 Milam, the top of the sand being found at 3,260 feet.

With the Oil Men

C. B. Coon, assistant to the president of the Gladys Belle Oil company, Grant C. Stebbins, is back from Springfield, Mo., where he spent Christmas with his people and while there had the unusual experience of seeing a large business block owned by himself and family, burned to the ground with but little insurance. It was certainly tough luck, as the loss amounts to nearly $100,000.

E. S. Line, with the Omaha Refining company, is in the city on business and says the new plant in East Omaha is ready for operation. He says that his concern has had a good year besides having a plant built by experts and that they expect to specialize in lubricating oil, which is much in demand in that neck of the woods.

Major C. B. Colby, just out of the gas and flare division of the service, is in Tulsa as the guest of R. A. Brumfield, general manager of the Barnsdall Oil company, and an old California friend of the major's. Major Colby would find a warm welcome in Tulsa should he decide to make this his future home.

Allen Whiteside of the Sinclair organization is back from Fort Smith, where he spent Christmas and says there is plenty of oil excitement in that neck of the woods with a slight showing of gas over northeast of Van Buren. He is not very optimistic, however, as to the outlook.

Jack Bates, the popular and very efficient production man of the Roxana Petroleum company, is in Texas on business.

OIL AND GAS

Leases, Supplies, Production, Etc.

Stanley Warfield accountant, auditor, tax returns, systemp, Osage 2666, Box 437.

For sale, 1,400 feet of 6 5-8 17 pound casing, almost new. Call Cedar 826.—Advt.

Pipe! Pipe! Pipe!

Several miles of good pipe and casing for sale. Phone Osage 1735 or Cedar 1358.—Advt.

For Sale—Commercial oil and gas leases in Rogers county, shallow sand. If you want leases or blocks of acreage address P. O. Box 268, Claremore, Okla.—Advt.

Wanted, small set of books to keep, by an expert thoroughly competent to prepare income tax returns. Phone Osage 5225 or 7444.—Advt.

For sale, 80-acre leases close to big production and drilling wells. Bull Bayou field, Louisiana. Call 531 Mayo Bldg., Tulsa. Phone Osage 2028-2846.—Advt.

For information about the new shallow sand oil fields in western Tennessee, and 50c acreage, 10c rentals in territory geologically approved, write Tennokla Oil Co., Dickson, Tenn.—Advt.

For sale or trade, Franklin five-passenger, good condition, run 16,000 miles, will sell cheap for cash, or will trade for city property. F. J. Bradford. Phone Osage 6748.—Advt.

Osage Leases for Sale.

Two attractive pieces of acreage. S. E. ¼ 20-25-7, $4,000; N. W. ¼ 21-24-12, $3,200. These properties are both close to production. Phone Cedar 1773.—Advt.

Will sell all or any part of royalty on northwest quarter of southwest quarter of section 16, township 15, range 12. It is near the Billingslea well at Beggs. A location has just been made offsetting the northeast corner of my land. Phone owner, Osage 9361.—Advt.

For sale by owner, oil and gas lease. Commercial good title to be written on 80 acres NE. ¼ of 11 and NE. ¼ of NE. ¼ of 10-14-11. Terms, $20,000 cash, bonus 1-8 or oil and gas; drilling 30 days from date of contract. Two months from now this lease will double in price. Will have no dealings with brokers. Phone Cedar 1505, Tulsa.—Advt.

This Is the Engine That Drives Hundreds of Oil Well Pumps

Before you buy any engine—ask these questions. "Who else uses them?" "How long have they been in service?" and "How are they performing?"

Fairbanks-Morse "Y" Oil Engines are used at hundreds of oil wells. During the past several years, they have built up and and are maintaining exceptional records for endurance and economical operation—with little attention and low upkeep cost.

Simple in construction—practically automatic in operation and regulation—no carburetors, valves, batteries, mixers, timers, igniters, magnetos, switches or spark plugs.

Special quick-starting device; air seal prevents oil from being blown out of bearings; positive lubrication; sensitive governor. No hot bulb—no water injection. Guaranteed by Fairbanks Morse Quality.
