Stocks Sluggish.

NEW YORK, Jan. 26.—Stocks were sluggish and uncertain of trend at the opening of today's session, but improved in part of today's current the railway list later.

All quarters credit the day's material gains were made of the issues recently under bear pressure. To these were added several war prices in the industrials and specialties which showed industrials with early dividend ex rumor associates.

The further collapse of international rates carried British, French, Italian and many foreign securities to discounts' consideration. Low records established last week. Share offerings of bills again emanating from London.

Prices were at maximum quotations in the last hour the only active period of the day, regardless of call money's rise from 7 per cent, the initial rate, to 10 per cent. Late in the main final quotations were near to these points under highest levels, as a consequence of profit-taking. Sales amounted to 1,175,000 shares.

Steels, motors and oils were the dominant features. Pool paper, textile, metal and utility issues helped to swell the movement, advances of 1 to 5 points, Cuban American Sugar incidentally gaining 10 points net.

Liberty bonds rallied slightly, international issues eased and most domestic rails and industrials were irregular. Total sales, par value, aggregated $11,750,000.

WM. G. JOHNSTON

Capable Assistant For Oil Executive

You could use to good advantage a young man of proven ability in oil business—

accustomed to responsibility—

buying and selling daily large quantities of oil—

a capable traffic man, who understands freight rates and is accustomed to handling large numbers of tank cars—

a man with years of valuable experience as secretary to men of large affairs, now holding an executive position with an oil company of good standing—

having stenographic experience, of course—

a man with these qualifications will make his own future with any company.

If interested write—

Box 265-A, % World

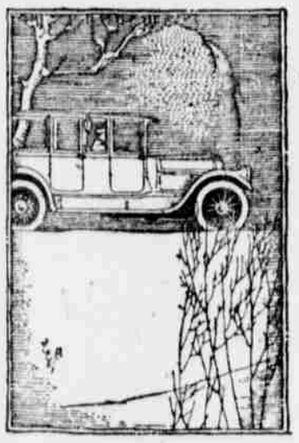
POWER MEANS SAFETY



The car that starts quickly, and accelerates faster than other cars, that meets the changes of the road without the delays of gear shifting, that steers at a light touch, that overtakes and passes other cars even on a steep hill on high, that is ready for every emergency, affords not merely greater service and satisfaction. It also affords greater safety.

The dual valve Pierce-Arrow offers greater safety—the safety of decisive action, not the safety of timid hesitation. It has power for ample speed, responsiveness that insures quick action.
