Wanted a Petroleum Club in St. Louis

There are so many oil men making St. Louis headquarters nowadays that a demand for a petroleum club is becoming strong and very insistent and inasmuch as the Missouri Athletic club has plenty of room it could easily be arranged and a corner or a dining room set aside or a small room in the big club could be used for all men exclusively.

St. Louis has some of the most distinguished oil men in the entire country as the following will show: There is with the Roxana Von der Lancht, president; Lydon, secretary and treasurer; Woodruff, sales manager; Selbolt, traffic manager, and with the well known individual oil producers P. D. C. Hall, E. A. Steinsinger, Walter Fritch, Jack Vardin and P. B. Smith, not to mention such well known marketers as L. A. Ryan, who is a brother to the famous Ben Ryan, whom everybody knew.

There is Greener and Lissig, who were the first to install filling stations in the United States, and among the supply stores that have headquarters here is the Continental and Jarecki companies, the management of which are known wherever oil is produced. The former is managed by W. K. Hughes and A. A. Moody, who is the manager for the Jarecki concern. Both are known nationally and have a world of friends among the oil men.

Tank cars are manufactured in St. Louis, the American Car & Fdy. Co., being managed by C. B. Collins, and the Standard Car Co., of which Messrs Woodsmith and Stringer are the moving spirit. St. Louis is the home of the "Lubrite" Refining Co., of which W. W. Strickler is secretary and the controlling interest is owned in Tulsa.

But perhaps the best known man in the entire list of oil men, E. E. Schock is in St. Louis most of the time, and his son, J. O. Shock makes this his permanent headquarters. Their membership alone would draw mightily and there would be many from Tulsa who would take out non-resident membership. It is really surprising that so few of them are acquainted and are thus missing a great deal of mighty good companship that should not be overlooked. They are all in the oil game and nothing draws men together like being in the same business.

And while this letter is being written many well known oil men of Tulsa are having a hard time getting accommodations. J. H. Gilliland, who is on his way to Toledo and New York, is registered at the Missouri Athletic club and many more are out looking for accommodations at the leading hotels with small chance for success.

At Oilton

Special to The World.

OILTON, Feb. 29.—What is promising to be the best oil field yet opened up in the Oilton field is being developed east of this city and extends from 35-19-7 to 21-19-8. Geologists report that this promises to be the real oil pool of Creek county and aside from this report, the wells that have already been drilled in show that the report is true, as verified by the showing of oil. The oil is found in the Bartlesville sand. The territory includes 25-35-36 in 19-7 and 20-21-28-29-30-31-32 in 19-8. The Prairie Oil & Gas Co's. well in 21-19-8, known as the Rocky Canon well, is four feet in the Bartlesville sand and has a good showing of oil as shown by the log.

W. S. McCray drilled a well in 31-19-7 on what is known as the Sandy Byrd lease which showed the start of the Bartlesville. This is a small well, good for perhaps 25 barrels. His No. 2 on the same lease, just a half mile north, was a 75-barrel well. The Brooks Store well, same section, was a Bartlesville sand well, and east along the north line of 36-19-7 the Sapulpa Petroleum company, the Lawrence Oil & Gas Co., and the Eastern Oil company have drilled in all some eight wells, all of which are in the Bartlesville sand and get better as they go east.

The Wolverine Oil company drilled a well in the northwest quarter of the northeast quarter of 30-19-7 and found a gas well in the Bartlesville, good for about 4,000,000 feet of gas. Their No. 2 drilled in the southwest quarter of 30-19-7 was about 40 feet in the Bartlesville, but owing to water troubles the well could not be shot, but nevertheless is making about 25 barrels natural. This shows the connection between the wells in 25-19-7 and 30-19-7 and 36-19-7.

The Texas company is drilling now at 2,000 feet just a half mile east of the Wolverine well in 29-19-7 and should this well come in good it will absolutely prove the connection with the old well 1½ miles east in 27-19-8. The extent of this field will be about four miles long and will mean hundreds of wells to be drilled in the immediate future, as there is perhaps now that many locations already made. Rigs and strings of tools are being hauled to this field daily, and it means a great deal to Oilton. If some of these wells come in big Oilton will be one of the principal oil cities in the state. The number of teams leaving this city daily now is a reminder of the time when Oilton was on the map as the best oil town in the state. This is the deep sand and is more productive heavier lived and will mean more in the long run than where found in the Layton and other shallow sands.

Mr. Allmire at oil made a location this week in the northwest, northwest of 25-19-7 and already the derrick is being erected and it is expected to have the tools on the ground and spud in some time next week. Many other locations are being made and from present indications the oil development in and around Oilton is yet in its infancy. More rig timbers are being unloaded here this early in the season than ever before; casing of all sizes is coming in and the prospect grows brighter every day for Oilton to become the real oil mecca of Creek county and the mid-continent field during the year of 1920.

Tank Car Abuse

George F. Brigham, president of the Commerce Petroleum company, in discussing the shortage of tank cars today, when business is here too brisk, says it is a question with many angles. Possibly the most annoying problem to handle is the one where many of the largest users of petroleum products, more particularly fuel oil burners, have insufficient storage for taking care of their purchases and promptly unloading tank cars. This is applicable to many of the largest industries in the country or different units of their plant. Where the fuel oil storage is wholly inadequate and privately owned tank cars are taking care of this storage at a cost of thousands if not millions of dollars annually. Prompt unloading is treated with utter indifference. How they can get away with this and avoid railroad demurrage is a question. Refineries and shippers insert the following invoices and contracts:

"Cars must not be diverted beyond original destination or held over 48 hours when set for unloading. A charge of $5 per car per day will be made for such delays."

To enforce it is a joke. Is it not about time for the tank car owners to take some collective action and put these flagrant misusers of tank cars in a card index for permanent file?

At Ardmore

ARDMORE, Okla., Feb. 28—Encouraging news is coming on production from different sections of the southern fields. The Neustadt well in the Hewitt field has drilled 50 feet into the pay, the drill is still in the sand and the well is making 50 barrels an hour or at the rate of 1,200 barrels a day.

The Coline well in 31-1s-2w near Poolville in Carter county, is also very encouraging. This well had a sand from 1,780 to 1,800 feet. The sand carried a high grade oil which shows it not to be connected with the Wild Cat Jim territory, three miles to the south. The production from the sand was estimated by one man who saw it to be from 10 to 15 barrels while another man made the estimate less than this. The fact that an oil sand was found makes the location look mighty good and this being the largest structure known to geology in the state there is a chance that this well will lead to the opening of the greatest oil pool in Oklahoma.

The Noble people, who are drilling near Oswalt, are said to have made a second location in 23-1s-1w or about six miles south of its drilling well, which is reported today as having an oil and gas showing and it is also stated that these same people will drill in 7-1s-1w.

At Henryetta.

The Atlantic Petroleum company has a rig up for their No. 1 in the southwest, southeast, southeast, 6-16-12.

Indiahoma Lyons are drilling at 1,650 feet in their No. 2 in the northeast, northwest northeast, 17-11-11.

Kingwood Oil company is drilling at 2,100 feet in their No. 3 in the southeast, southeast, 16-11-11.

Indiahoma Lyons found the sand from 2,116 to 2,190 in their No. 1 in the northeast, southwest of 23-11-11.

Iron Mountain Oil company is drilling at 1,900 feet in their No. 1 in the southeast, southwest, 21-11-12.

W. B. Pine has a rig up for their No. 1 feet in the northeast, northwest, 5-11-12.

Kingwood oil company is drilling at 2,750 feet in the northwest southwest, northeast, 4-11-12.

Kimberly O. & R. Co. is shut down at 2,100 feet. Found the sand from 1,980 to 2,040 feet, located in the center of the north line southwest, northwest, 5-11-12.

Henry Oil company is drilling at 1,980 feet in their No. 1 in the southeast, northeast, southeast, 21-11-12.

Kingwood is drilling in their No. 1 in the center of the southwest, southwest, 27-11-12.

John D. Revold is rigging up for his No. 1 in the southwest, northwest, southeast of 24-12-10.

Texas company is drilling at 3,400 feet in their No. 1 in the southwest, southeast, southwest of 7-12-11.

Young and others are spudding in and shut down in their No. 1 in the southwest, northeast of 17-12-11.

Purchased Ardhoma Oil Company.

Special to The World.

Ivey Johnson and Dr. Charles S. Lynch, local oil producers, have purchased the Ardhoma Oil company which was organized in the early days of Healdton by local people. The property owned consists of 40 acres with 17 wells and a daily production of 150 barrels. The price was a little more than $250,000. The new owners will take charge of the property Monday morning.

Bristow District.

Atlantic Petroleum corporation is building a rig and moving in tools for a well in the northeast corner of the northeast quarter of 31-15-10.

At Welcetka.

The Atlantic Petroleum company's No. 1 in 11-16-11 is drilling at 220 feet. No. 1 in 6-16-12 is drilling at 220 feet.

At Edmond.

The Nagles test in 17-14n-3w is dry at 931 feet.

At Brownville.

Rebold's test in 19-9-8 is running the 12 1-2-inch casing at 485 feet.

Hannis Optical.

MEXICAN CONSUL BREAKS OUT ANEW

Ramon de Negri Says Americans Are Prejudiced

WASHINGTON, Feb. 28.—The attention of the state department has been called to another complaint from the mouth of Ramon P. de Negri, Mexican consul general in New York, to his foreign office which has been made public in the Mexico City press, in which the consul is quoted as charging that American officials here are prejudiced in their dealings with Mexican affairs, are prejudiced in that they have financial interests in Mexico.

A few months ago the same official was criticised for writing to a Mexican member that the policies of the United States fully appreciated the business of the New Mexican government that had been protested vehemently by the United States, Great Britain, Holland and France.

In the latest communication the consul is alleged to have attacked the staff committee of the senate and to have said that the committee had spent more than $2,000,000 and made little advance, that no good would come to the United States since all the committee could report was already known, and that it was well known that "Senator Fall and the other members knew mining and other interests in Mexico."

HOSPITAL AS A MEMORIAL

Mrs. Robert Bacon Endows 24 Beds in Neuilly Institution.

PARIS, Feb. 29.—Mrs. Robert Bacon, widow of the late Colonel Robert Bacon, at one time minister to France, and a former secretary of state, has placed in the hands of the trustees of the American hospital in Paris 4,846,000 francs with the request that it be devoted to endow 24 beds in five wards of the new American hospital, which is to be built at Neuilly. This endowment is given in memory of Colonel Bacon, who, as president of the American hospital, took great interest in its welfare.

You are invited to the Mutual Friends dance, West Tulsa, Tuesday, Thursday and Saturday nights.—Advt.

Committee Named to Frame New Oil Law for Louisiana

SHREVEPORT, La., Feb. 29.—Appointment of committees by the independent oil and gas producers association and by the state legislature to draft a new petroleum conservation law for Louisiana, to supersede an act passed in 1918 by the independent producers association, in behalf of a similar organization from the gas producers of the oil and gas fields, particularly in the Rodessa, La., field and the settlement of long standing differences between the independents representing the Louisiana gas and fuel company, recently in "settling" the "right" gas sands in Bossier Parish, La., were effected at the closing sessions of the oil and gas conference called by Governor Pleasant Friday.

Through Judge Fogg, the independent and Mr. Leake of Rodessa, Kan., the Standard Oil company, has indicated that while it will not interfere with the enactment of such a measure, it will control it to the limit in the courts.
