The Markets

Stocks Are Active.

NEW YORK, April 6.—Liberal offerings of call money at 5 per cent, the lowest initial and renewal rate in six weeks, furnished the chief incentive for today's fairly active and strong stock market.

There was cumulative evidence, also of a slight easing of time money, therefore bankers with local reserves seeking short term loans here at slight concessions from maximum quotations of the past fortnight.

Steels and railway equipments behaved large in the day's diversified dealings at extreme gains of 1 to 5 points, but motors and kindred specialties, as well as oils, metals and food shares, also contributed their share. Rails were more active than usual, but earlier in that division were limited at best. Sales amounted to 1,750,000 shares.

The strength of industrials, especially those comprising the equipment group, was accompanied by reports that details of a large "revolving fund" having government support, would soon be announced.

Rails and international issues held firm in the bond market, with irregularity in the Liberty group. Anglo-French 5s rose to 97, a new high for the movement. **Total** sales, par value, $12,500,000.
