IN THE OIL FIELDS

Office: 6241 W. H. PECK Residence 2442

OIL MARKET QUOTATIONS

Pennsylvania	$4.10	Homer	1.30
Pakwin	2.85	Lima	1.30
Corning	2.75	Karns & Olds	1.50
Cabell	2.55	Hendon	2.75
Somerset	2.75	Cornhan heavy	1.75
Ragland	1.75	Cornhan light	2.00
North Lima	2.15	Electra	2.10
South Lima	2.15	Haberetta	2.00
Indiana	2.65	Ringer	2.00
Plymouth	2.15	Moran	2.50
Trapshaw	2.15	Burkburnett	3.10
Ball Heavy	2.15	Powell	3.50

Crude Oil Products

Refiners report following prices:

66-68 Gasoline	27c
70-72 Gasoline	25c
56-62 Naphta	17c
Kerosene	17c
Gas oil	9½c
Fuel Oil	7½c

May Be Obliged to Shut Down

If the railroad strike should continue, there is much grief in store for the oil producers or many of them, who are running oil to refineries who are storing their refined products, but must have some of some quickly or they will be obliged to stop taking oil from the oil producers.

Another Big One South of Kellyville

Rawfield Oil company and Stinson & Matthews have a showing for a mighty good well in their No. 2 Sterling in the northeast corner of the west half of the northeast of 9-15-10. The well appeared better than No. 1 which is making 600 barrels. It is already in the sand 41 feet and has 26 feet more to go—the top of the sand was found at 2,598 feet.

Special Meeting Called

A special meeting of the stockholders of the Texhoma Oil company was called yesterday, but due to the absence of some of the local officials of the organization, the meeting was adjourned until this morning. The object of this meeting is to perfect plans for the future operation of the company. They have a large representation here from New York, Boston, Chicago, St. Louis, Detroit, Shreveport and Canada.

Another Big Well

Producers & Refiners corporation extended the field a little over a quarter of a mile in a southeasterly direction of its present production by drilling in its No. 1 well on the Gold lease. The well is in the southwest corner of the southwest quarter of 29-15-11c. This well was drilled in Tuesday afternoon and began flowing at the rate of 800 barrels, and was drilled four feet deeper on Wednesday afternoon and now flowing 1,200 barrels. This gives the Producers & Refiners about a dozen more proven locations. The well is flowing from the Dutcher sand at 2,510 feet, and it now looks like they will be drilling twin wells on this property as the Wilcox sand is producing on their lease adjoining on the west.

J. Alex Dingwall, jr.'s Operations.

Above company's well in southwest corner north half southwest 28-19-9 had a showing of oil in the Bartlesville sand, the top of which was found at 2,310 feet. The company is going deeper to the Dutcher sand, or if necessary, to the Wilcox sand. It is now drilling at 2,400 feet. Well in northwest corner west half northwest 10-12-12 is drilling at 2,740 feet. Well on the Bird creek allotment in the northwest corner west half northwest 7-16-12 is spudding. No. 1 on the Flora Jacobs allotment in the northwest corner west half southeast 6-15-10 is proving difficult to clean out owing to the loose sand and the thickness of the strata. The well is putting 75 barrels into the tanks during the cleaning out process. No. 2 on the same lease is fishing at 1,250 feet. No. 2 on the same lease has been delayed owing to the railroad stamp but is now completing the rigging up and will probably spud-in the end of the week. The well northwest corner south half northeast of 22-18-12 on the Anna Eliason allotment is selling 12½ inch casing at 825 feet. Well in northwest corner east half northeast 23-18-5 in the J. P. Eliason allotment is drilling at 510 feet. No. 2 on the Quinn allotment in the southeast corner northeast northeast of 27-19-10 is the center of the east line is tools moving in.

OIL AND GAS

Leases, Supplies, Production, Etc.

Jennings, southeast 18-2-7. $20,000. Osage 9114.—Advt.

WANTED—Contract for one or more wells, depth 1,800 to 2,500 feet, new string of tools, practical tools. Osage 959.

Wanted—Acreage at Beggs and Jennings. Will consider drilling proposition. Spangler & Waxler, 504 Kennedy Bldg.—Advt.

shut down. Too goodly number of leases will surprise many and some may not believe that there are so many. The writer could easily give the list, but to publish some of the locations as outside wells in Wildcats would be sure to make somebody excited.

That the number of wildcats will increase rapidly is a safe prediction, in view of the five year leases taken when the oil development started here expire in the next 18 to 24 months. To save the leases looking average there will be many tools drilled during the next few months.

The lack of the Mulinix-Simmons company, also with the help of their geological corps, recently showed a new field east of Inglewood with a 245 barrel and 400-barrel well in sections 29 and 20-24-14w. It is a great big encouragement to others who have believed that all the existing high gravity oil of this district has not been found.

Beggs District.

On his No. 25 on the Banks farm in 26-15-11, he is drilling at 1,565 feet. No. 29 is drilling at 2,385 feet. No. 27 is drilling by tools at 2,380 feet. No. 10 is drilling at 1,955 feet. No. 21 is a completed job. No. 32 is also a rig under construction. No. 8 on this farm after shooting the sand (price is drilling at about 400 feet in the third hole.

On his No. 1 on the Alex Baker in 24-15-10, the rig caught fire and burned down, also destroying part of the tools. The origin of the fire is unknown.

Frank Baker Has Big Well.

Frank Baker is getting a big well in the southwest corner of the northeast of the southeast of the northeast of 22-48-7W in the Hewett field. This in connection with a well showing for 150 barrels in the northeast corner of the southeast of 9-15-10, south of Kellyville, makes it appear that Mr. Baker has arrived and is due for another streak of his old-time phenomenal luck.

Had Water at 3,000 Feet.

The Prairie Oil & Gas Co.'s test in the southeast corner of 13-15-7 got salt water in the Bartlesville sand around 3,000 feet. The well will be drilled to the Wilcox sand, as the hole is in elegant shape, having 2,800 feet of heavy eight-inch in the hole and therefore a deep test can easily be accomplished. C. W. Campbell is entitled to the credit for the good well.

Roxana Expect Another Big One at Jennings.

Well No. 2, which is two locations east of well No. 1 brought in by the Roxana recently and now producing 100 barrels per hour, is expected in shortly. The location of this well is in the south half of the north half of 7-19-7 on the Johnson & Prentice farm, and the present depth is 2,697 feet.

H. F. Wilcox Operations.

H. F. Wilcox's No. 1 on the Smith farm in 34-16-10 is drilling at 958 feet. They had a very good showing of gas in this well at 880 feet.

With the Oil Men

Hon. W. R. Hudson, who is a big land owner and oil producer in Hempstead is a Tulsa visitor.

J. J. Shook of the Indianola Refining company is here for a few days looking after his oil interests in this vicinity.

George P. Bridges, president of the Commercial Petroleum company is temporarily in receipt of mail addressed to him from Shreveport, where interesting new wonderful concessions to invest in Texas oil stock. The mail was forwarded to us by Judge the late Roy George, a director and attorney of the Equitable Petroleum company, who for the past week or more has been in Texas and is leaving tonight for his home in Tulsa. We know Judge George will be glad to see his friends.

Mr. Morris of New York, representing the Continental company of the U. S. A. (Inc.) Ltd., 17 Battery Place, New York, is in Tulsa and is leaving tonight for Shawnee, Okla., where the company has an option on a large acreage.
