Crude Oil Products

Refiners report following prices:

68-68 Gasoline	21¼c
58-60 Gasoline	20c
63-72 Naptha	12c
Kerosene	10c
Gas Oil	1¾c
Fuel Oil	1¾c

In Arkansas

The following information has been received from Shreveport correspondent:

Arkansas is looming large on the horizon of mid-continent oil operators. Within the last year operations have spread from a few scattered wildcat tests of the wildest sort to a concerted effort to develop oil in commercial quantities and in recent months, encouraged by the development of the rich Homer, La., field, the southern portion of the state, embracing Lafayette, Union, Ouachita and Columbia counties, has become the scene of persistent effort in the face of many discouragements and great financial outlay. These efforts now appear to be on the verge of realization.

The first authentic showing of oil in commercial quantities was obtained by S. S. Hunter of Shreveport, in a well drilled near Stephens, Ouachita county, during the latter part of April at a depth of 2,103 feet. A few days later the Constantine Oil & Refining Co. of Tulsa, Okla., drilled into a gas sand in a well a short distance southeast of Eldorado at a depth of more than 2,000 feet. Faulty casing, however, allowed salt water to come in above the gas sand and the well is a total loss although it is showing much gas with a faint trace of oil.

Then came the Keen & Woolf strike near Bradley in Lafayette county, southwest of Eldorado with an unmistakable showing of commercial oil at 2,762 feet with the bit three feet in the oil sand.

If operators were inclined to remain skeptical after these developments, the recent sale of S. S. Hunter leases, consisting of 21,000 acres surrounding his well, to the Standard Oil company of Louisiana for a price said to be $2,000,000 should do much to remove it. All these wells, as in the case of the Straughn & Crawford operations in Ouachita county north of Camden, are surrounded for a distance of two and a half to four miles by leases held by the interests making the tests and very little, if any acreage is to be had at this time in small blocks within that distance of the wells.

The Hunter & Keen and Woolf wells are just now the center of interest. With the sale to the Standard a matter of record, the Hunter well will be completed by that company, arrangements being now under way to move a crew from one of its Louisiana operations to Stephens to set casing and complete the hole, which, it is anticipated will be done by the end of the first week of June.

Before finding the oil sand at 2,762 feet the drill went through 100 feet of hard shale and six feet of caprock directly overlying the oil sand. Eight-inch casing was set at 1,061 feet and the hole is open from this level to the bottom but is in excellent shape. The mud used in drilling was very heavy, yet a pronounced show of light oil, estimated to test 38 degrees Baume was forced through it to the top of the casing and covered the pit after the bit had been in the sand for only a short while. Keen & Woolf have a tract of 20,000 acres surrounding the well, which is only a few miles west of the Hunter well and the Hunter leases. W. H. "Bill" Rowe, the first of the Homer, La., oil millionaires, recently bought a third interest in the entire block. The outstanding feature of the entire operation is that the well has never been a "mystery well" as the case usually is with a wildcat operation and the exact depth and thickness of the caprock, the well "log" and similar details usually regarded as a sacred secret of wildcat operations are generally known.

Some additional information concerning Arkansas development at present is reported as follows:

The Congress Oil company well on the Foran lease in 8-19-15 in Union county, is drilling around 1,000 feet.

C. R. Mattox is building a rig in 30-17-15.

The Walker well which is being drilled by Congressman Walker from Alabama in 5-17-15, near the center of the section is down 2,000 feet and is reported to have a good showing of oil.

The Sloan Oil company is rebuilding a rig for their test northeast of Eldorado—the old rig having been blown down in a recent storm.

Advocates Train Shipments

The interstate commerce commission has submitted the following recommendations to the terminal committees of the oil industry:

"The efficiency of transportation may be substantially promoted by the consolidation, where practicable, of shipments into solid trains for particular destinations and distributing centers. This plan tends to avoid congestion in the classification yards and to minimize switching. To illustrate: Present petroleum shippers have been, through one of their organizations avoiding congestion at terminal points and minimizing switching by consolidating their shipments into solid trains. All cars in a particular train were hauled via one railroad to one destination on one day to other destinations via different roads on the second day, to other destinations via still another railroad on the third day, and so on.

"Each terminal committee should begin at once a study of this problem with the object of working out practicable plans by which shipments may be consolidated into train lots by different railroads to different destinations on different days, and to impress upon all shippers and carriers the importance at this time of bending every effort to bring about this desired result and thereby substantially to improve transportation conditions. This should be done in co-operation with the car service commission's committees in the respective terminals."

New Company Headed by Experienced Oil Men

June 1 is the first official day in the career of the newly organized Hill Oil & Refining Co., a concern whose offices are located in Tulsa, and whose officers are men of wide reputation and experience in the mid-continent field.

Filling the office of president is J. R. Hill, who needs no new introduction to the industry, as he has been vice president and general manager of the General Refining company since 1917. T. J. Sharp, secretary of the General Refining company, is vice president, and J. C. Kemp is secretary and treasurer. Offices will be on the third floor, Kennedy building, in suite 315-16-17.

This enterprise does not mean that Mr. Hill will relinquish his connection with the General Refining company, but he will continue in his present capacity of vice president and general manager. The new company starts with experienced oil men at the helm, and its prospects for success, backed as it is with unlimited capital, seem assured.

All branches of the petroleum industry will be followed by the company. Already for or five wells are drilling, and the company holds extensive acreage in many sections and many leases. Mr. Hill leaves Tulsa in a few days for a month's vacation in California, after which he will return to his interests here.

Stockholders Meeting

The annual stockholders' meeting of the Oklahoma-Texas Producing & Refining Co. was in session in the Hotel Tulsa yesterday. Among the out-of-town visitors attending the meeting were the folowing: C. E. Morris of Boston, Mass.; L. H. Corbitt of Bridgeport, Conn.; A. T. Rhodes and B. E. Larned of Worcester, Mass., who are all associated with the financial house of C. E. Morris & Co., with offices in Boston, Worcester, Bridgeport and New York; J. F. Taylor of J. F. Taylor & Co., New York, who are underwriters of the above company; C. O. Krause of Scranton, Pa.; George P. Meyers of Tucson, Ariz.; A. H. Lee Wooster, Ohio, and J. A. Loomis from Muskogee, who was formerly president of the company. The new members of the board of directors are as follows: Dr. C. L. Robertson, A. F. Vogies, E. T. Bowen, L. G. Wilson, who are all residents of Tulsa; L. H. Corbitt of Bridgeport, C. O. Krause of Scranton and George P. Meyers of Tucson, Ariz.

The Texas-Oklahoma company has extensive holdings, comprising at least 50,000 acres in Oklahoma, Kansas and Texas, which includes a number of producing properties. The stockholders who were in attendance at the meeting all seemed extremely well pleased with the future outlook for their company.

Wilcox Well Flowing

H. F. Wilcox is just completing what will surely be a splendid producer judging from the present indications of the well in the northwest corner of the Willis Stephey farm in 24-15-10, which is located one-quarter of a mile east of the Miesner and Steele well which was brought in recently. This well is producing from the Bartcher sand which was encountered at a depth of 2,578 feet with a showing of gas after drilling to 2,587 feet the well started flowing over the derrick and is reported to be making ten-minute flows every 15 minutes. This producer is a mile and a quarter distant from the nearest Dutcher sand well in this area.

Marland's Luck Continues

In addition to the big Osage well reported for the Marland Refining company and associates in yesterday's edition, the Marland people are having continued good luck as is demonstrated by the bringing in of its No. 15 Minkashe in 13-22-8, which is making 30 barrels an hour at a depth of 2,800 feet at the second break in the lime. This, with the other big gushers which have been completed in the Osage county recently is confirmation of the general belief of the oil men as to the Osage field being the best in the line of the producing areas of Oklahoma.

At Bristow

The Savoy Oil company No. 1 on the Smith farm in the northeast northeast of 25-15-10 is making 85 barrels from the Wilcox sand at a depth of 3,100 feet.

The Iron Mountain Oil company & P. W. Neely has a well that is showing for 100 barrels at only three feet in the sand. It is located in the northeast corner of the northwest quarter of 28-16-10.

The Helmo Oil company and Jack Darnell have a 200-barrel producer in the northeast of the southeast of the northwest of 16-15-10 at a depth of 2,656 feet—the well was drilled 55 feet in the sand.

In the Beggs Field.

The Ohiokla and the Savoy Oil companies are drilling at 2,000 feet in the northeast of 2-15-12 where they have encountered 5,000,000 gas, with the well spraying oil. They are drilling deeper.

The Barbara Oil company has a good producer in the northeast corner of the northwest of 18-15-11. The well is making 460 barrels from the Dutcher sand.

The Henry and Chicago Oil companies No. 5 on the Dave Marcey in the southeast corner of the southwest of 1-14-11 is on top of the sand at around 2,800 feet and is possibly drilling in at this time—a later report will be given.

In Texas.

In the Breckenridge district Templeman Oil corporation and Humble are spudding No. 2 Guffee, an offset a lot of oil and is now making 150 barrels oil natural and 2,000,00 feet of gas. This well is one mile from the Gulf's Stocker No. 2, which produced 100,000 barrels the first eight days after reaching the sand, two weeks ago.

Templeman Oil corporation has a rig up and ready to move tools in to No. 1 which has already produced east corner of the southwest quarter of the northwest quarter of section 8, one-half mile west of the town of Breckenridge.

In the Osage.

The Phillips Petroleum company well in the northeast corner of the southwest of 17-29-8 is making 30 barrels in sand from 2,658 to 2,668.

O. R. Howard, Duffeld and Berlin have just completed a well at a total depth of 1,282 feet which is making 30 barrels. It is located in 13-21-12.

In Louisiana.

The Wilder well which is being drilled by local people at Homer, La., in 18-23-5 Claiborne Parish, has had a good showing of oil at 1,800 feet. The general report concerning this well is that the indications are favorable for a good producer.

Tulsa County.

The Harvey Crude Oil company No. 3 on the Tate Brady lease in the southwest southwest southwest of 24-20n-13e reached the top of the sand at 1,240 feet and at five feet in is making 15 barrels.

West of Mounds.

The Savoy Oil company Smock No. 5 in the northwest of 15-16-11 got the Red Fork sand at 1,710 feet and is making 15 barrels after a shot.

At Paden.

The Gypsy and Savoy Oil companies are drilling at 825 feet in the northeast of 35-12-6.

With the Oil Men

"Bill" Allen, representing the Borden company of Warren, Ohio, selling the Beaver line, is in the city on one of his periodical trips and is receiving a warm welcome from his many friends in Tulsa. Mr. Allen will be in this vicinity for the next few weeks later going to Texas and from there to Colorado and Wyoming during the hot season, returning to California for next winter.

Edward Cowhey of the Tulsa Oil Products company is back from Cleveland, Ohio, and reports that fuel oil consumers are still willing to contract at good prices for a period of time. Mr. Cowhey is of the opinion that refiners will do well to accept contracts of this nature at this time and he is doubtless correct.

Colonel Pat Hurley, vice president of the Gilliland Oil company has returned from a business trip to Toledo and Cleveland, Ohio. He was delayed on his return trip and much to the regret of his many friends here was unable to deliver the memorial speech for which he was booked on Decoration day.

Arch Grider has been entertaining his mother from Milwaukee for the past two or three weeks. She is leaving tomorrow night for El Paso, Texas and says that she is well pleased to find her son doing so nicely here in Tulsa.

J. R. Hill, president of the Hill Oil & Refining Co., is leaving Tulsa after a vacation of about 30 days duration in California.

Recount in Kansas City

KANSAS CITY, June 1. — The board of election commissioners today ordered the recount of votes cast here in the April municipal election, to begin June 7. The ballots are being recounted upon petition of Mathew A. Foster, republican candidate for mayor, who is contesting the election of Mayor James Cowgill, democrat.

OIL AND GAS

Leases, Supplies, Production, Etc.

Block lease 1,500 acres, shallow field; one No. 17 Lydecker drilling machine; good equipment. Address Box 413, Claremore, Okla.—Advt.

WANTED—Three experienced salesmen who are accustomed to work on a real live proposition. Call at 537 Mayo buildin.—Advt.

New five-year commercial lease, northwest of southeast section 19, township 19 north, range 8 east, quarter-mile north of Wolverine gas well. Call Osage 3727.—Advt.

Wanted to buy two complete strings of tools, one 28 and one 26 or 27, Star machines; would also like good driller and tool dresser, who want interest. Address B. J. Arbon Phone Osage 9238. Box 1027 Tulsa.

Kansas Acreage.

800 acres located in south part Greenwood county; commercial leases 4 years to run. If interested write me for particulars. R. E. Lynch, box 902, Tulsa, Okla.—Advt.

Wanted, first-class driller of good habits, experienced shallow fields Oklahoma, for partnership drilling contracting business. Investment desirable, but not essential. Address 251-E, care of World.—Advt.

Tools For Sale.

Two strings standard tools with one turnbuckle rig, lots of good manila cordage and everything complete. List and location of tools upon application. Address S. R., 509 Phoenix Bldg., Muskogee, Okla.—Advt.

For sale, one or two complete string heavy drilling tools, 13"-inch bits down, in A-1 shape. Fishing tools, now drilling, sand and casing lines, camp equipment and Dodge truck. Goods now working and rig waiting. Bargain if taken at once. Address 722-C, care World.—Advt.

Livingston Getting Another Good Well.

The Livingston Oil & Gas Co. has 20,000,000 feet of gas in the top of the sand which is found at 1,294 feet in its No. 4 Atkins farm in 16-17-15. It has every indication of being the best well in the new pool south of Coweta.

WANTED—pumper who has had at least 10 years' experience in roustabouting and pumping and handling oil production. Nice three-room house and gas furnished. Cistern. One mile from town and good schools. Must thoroughly understand getting production. Give full particulars. Address Postoffice Box No. 88, Tulsa, Okla.—Advt.

DREADFUL RASH ON BABY'S HEAD
Itched and Burned. Scalp Sore and Red. Cuticura Heals
"My ten months old baby had a dreadful breaking out on his head. He would scratch spreading the eruption, and his scalp was sore and very red. The rash itched and burned painfully. He was terribly cross and fretful, and would lie awake nights and keep me awake. The eruption also stopped the growth of his hair.
"Then I sent for a free sample of Cuticura Soap and Ointment. I afterwards bought more, and I used one cake of Cuticura Soap and one box of Cuticura Ointment when he was healed." (Signed) Leslie Sanders, Knottsville, Ky., April 9, 1919.
Use Cuticura for all toilet purposes.
Sample Each Free by Mail. Address: "Cuticura Laboratories, Dept. S, Malden, Mass." Sold everywhere. Soap 25c. Ointment 25 and 50c. Talcum 25c. Cuticura Soap shaves without mug.

NOTICE TO CONTRACTORS.

(Fire Station Kendall)

Bids will be received at the office of the City Auditor, Tulsa, Oklahoma, until o'clock P. M., Thursday, June 14th, 1920, for all materials and construction for a Fire Station, located Lots 12, 20, 21 and 22, Block 16, College View Addition, and north 50 ft. of Lot 1, Highland Addition to City of Tulsa, in accordance with plans and specifications approved by the Board of Commissioners.

Bidders may state price in aggregate for furnishing all materials and doing the work for the completion of the building.

Bidders awarded the contract to furnish a SURETY BOND to the City of Tulsa within ten days after the award.

A certified check, payable to the City Auditor, in the sum of five (5) per cent of the amount of the bid will be required from each bidder.

Specifications and plans are on file at the office of the City Auditor, Tulsa, Okla. A deposit of $10.00 required for a set of plans and specifications.

The right to reject any and all bids is reserved to the Board of Commissioners of the City of Tulsa, Okla.

All bids will be opened and considered by the Board of Commissioners of said City at a meeting of said Board to be held in the City Hall in said City at o'clock A. M. on the 15th day of June 1920.

MRS. FRANK SEAMAN, City Auditor.
