TRADE LISTLESS ON STOCK BOARD

Reactionary Trend Sets In on Practically All Favorites.

NEW YORK, May 19.—Business on the stock exchange today was listless, with a reactionary trend. Even the calls which figured prominently in the moderate improvement of the previous session, were dull and in some instances were actually lower.

Oils were the most conspicuous losers. Further short selling was encouraged by cables from London reporting unusual weakness in the British group. Rails, equipments, motors, sugars and utilities contributed the bulk of other offerings, gross recessions of 1 to 3 points. Scattered short covering in the copper, silk, tobacco and international issues showed a measure of resistance to the final pressure. Total sales amounted to 450,000 shares.

Although inquiry for money was relatively light because of daily loss of stocks, call loans held firm at 7 per cent rates for time accommodations also ruling at recent rates.

International complications reflected the more hopeful feeling of the sterling situation. Demand sterling rose a fraction over $4 and all the principal continental exchanges strengthened, notably Paris and Antwerp bills.

Liberty bonds were fractionally lower and fractions also eased, but rails and industrials were mixed. Mexicans again reacted sharply with irregular advances and declines among the various European issues. Total sales, par value, $9,250,000.

Standard Oil Stocks.

WHEAT ADVANCES DOPE IS SPILLED

Decline Scarcely Begun Before Trend Upward Envelopes Market

CHICAGO, May 19.—Wheat advanced sharply today, upsetting predictions that the market would indulge in a big break. The market closed strong, 1¾ to 4¾ cents net higher, with May 1.52 to 1.53 and July 1.18¾ to 1.20. Corn followed the wheat lead, rallying from early lows and ending 1¾@2¼ cents net higher, with May 60¾ to 60¾ and July 63¾ to 63¾ cents.

The extreme decline was 2¾ and with scarcely any selling pressure in the market it began to rebound with a rush. Although word of cancellations reached at the time to a fair extent during the market closed at almost the top figures of the day.

Favorable weather and news that corn planting showed rapid progress kept prices for corn and oats trending downward the greater part of the session. Provisions were firm, in line with hogs.

Chicago Livestock.

CHICAGO, May 19.—Cattle—Receipts, 4,000; steers active, steady to 25c higher; others slow, steady; butcher cattle and calves steady; feeders steady; stockers and feeders weak; fat cows and heifers 10@25c higher; bulls and calves vial 25@50c higher. FOR ITCHING TORTURE

Use Antiseptic Liquid Zemo

There is one remedy that seldom fails to stop itching torture and relieve skin irritation and that makes the skin soft, clear and healthy.

Any druggist can supply you with Zemo, which generally overcomes skin diseases. Eczema, itch, pimples, rashes, blackheads, in most cases give way to Zemo. Frequently, minor blemishes disappear overnight. Itching usually stops instantly. Zemo is a safe, antiseptic liquid, clean, easy to use and dependable. It costs only 35c; an extra large bottle, $1.00. It will not stain, is not greasy or sticky and is positively safe for tender, sensitive skins.

BILL TO PERMIT FARMERS' BANKS

Provisions of Nebraska Idea Are Pronounced Practicable

LINCOLN, Neb., May —The Nebraska legislature has passed a bill intended to permit farmers, and others, to organize cooperative banks in the state.

As originally introduced in the lower house, the measure had the support of many farm organizations in the state. This support, however, waned by the time the bill came up in the house for final action. It had been shorn of what were believed its desirable features. The bill passed the house and was unanimously endorsed by the senate. The senate took care more be-sent in the bill by making corrective measures of benefit to the new cooperative banking law.

Since the bill has become a law farm leaders are viewing it with renewed interest and believe that many of its features will be practical.

The cooperative bank law defines what may be termed "cooperative banks" providing that such institutions shall be organized under the general cooperative corporate laws of Nebraska. No person, under the law, either directly or indirectly, is permitted to own more than four per cent of the capital stock. The payment of dividends or interest on capital stock shall not be more than ten per cent thereof per annum. The distribution of patronage dividends of the net earnings above the ten per cent dividend limit on stock alone is permitted to stock holder borrowers or depositors, under the law.

In electing directors of a co-operative bank, stockholders are permitted to choose anyone among their number. The law clearly determines that directors of co-operative banks need not own at least four per cent of the capital stock as do such officials of other banking institutions.

WAS A "BEAR CAT"

"My wife was never an angel, but after five years of liver and stomach trouble she became a 'bear cat.' No doctor or medicine helped her and we thought there was no help for her. Our grocer told me of Mayr's Wonderful Remedy, which had helped him for same trouble, so I brought home a bottle but she promptly threw it out. I got it back and after a week coaxed her into taking it. She is now enjoying the best of health and disposition." It is a simple, harmless preparation that removes the catarrhal mucus from the intestinal tract and allays the inflamation which causes practically all stomach, liver and intestinal ailments, including appendicitis. One dose will convince or money refunded. Quaker Drug Co., and druggists everywhere.—Advt.

HOT STORAGE EFFECTIVE

Many Damaging Insects Unable to Survive New Method.

MORGANTOWN, W. Va., May —"Hot" storage as opposed to "cold" storage for many things affected by insects, but not by heat, may be realized soon if the experiments of Professor L. M. Peairs, of the department of entomology of the university of West Virginia, prove entirely satisfactory. Professor Peairs has met with a great degree of success in showing the practicability of hot storage for such articles as carpets, clothing, particularly woolens and furs, as well as cereals, dried fruit products and other materials unaffected by dry heat.

Professor Peairs has used grain and carpet beetles and other insects of a similar nature in demonstrating that they do not develop at a constant temperature of 100 degrees Fahrenheit, and in some cases of 95 degrees. Even such forms of insect life as could endure higher temperatures could not survive a constant temperature of from 95 to 100 degrees he said. Thus, he has concluded that hot storage with uniform and constant temperature of 100 degrees would prove more effective than cold storage in many cases.
