CHANGES RAPID IN STOCK TRADE

Food Shares, Steels, Oil Under Pressure of Professionals

NEW YORK, June 4.—Following the characterized today's session of the stock market, leading to a decidedly widely divergent movements. Food shares and many prominently steels, oils and affiliated issues were under further professional pressure, but seasoned industrials and rails denoted substantial support.

Mobile and Nashville and Atlantic Coast Line showed net gains of 7 and 9 points respectively. Persistent weakness was shown by marine and shippings issues, sales amounting to 500,000 shares.

Sales of 2 1-2s made further appreciable recovery from their recent depression, rising to $8.38, or almost $1.00 from the low record of the day.

Liberties, as well as victory issues, however, and the general list that was irregularly lower in early sales, pared their losses.

Pressure foreign exchanges manifested again unsettled sterling demand, bills falling to $3.84 3-4, or more than 15 cents to the pound from the high quotation of a week ago. Weakness of the British exchange was attributed primarily to the strike of the cotton spinners.

Further decrease in actual loans and discounts was reported by clearing house banks, together with a substantial gain of cash, increasing the excess reserves to slightly over $[illegible].

Sheep—Receipts 4,000, practically all to packers direct, market compared with week ago, spring lambs averaging 1.50 higher, for grades 10@15c higher, fat sheep and yearlings steady to 25c higher.

ST. PAUL TO SAN ANTONIO

Highway Section Kansas City to Dallas Is Mapped Out.

OKMULGEE, June 4.—Work of laying out the Oklahoma division route of the Cotton Belt highway has been begun by following the organization of the Oklahoma Cotton Belt Highway association here today.

W. W. Jenkins, executive director of the Okmulgee Chamber of Commerce, was named as president of the association, and Charles E. French, of Okmulgee, was elected secretary and treasurer. Vice presidents were selected from various towns along the route of the new highway, which is being mapped from Kansas City to Dallas, and from which will eventually extend from St. Paul to San Antonio. The association will work with the Kansas association in defeating the road bill and in getting the rest of Missouri and nothing the new highway.

Spiritual Circle Is to Quit for the Summer

The midweek circle of the First Spiritual church will be discontinued for the summer months. For some time its meetings have been held at the home of Mr. and Mrs. E. L. Reed, 103 1-2 South Peoria, but holds at 109 1-2 South Peoria, but they are leaving for a tour of the northwest. After visiting in Missouri, Kansas and Iowa they will attend in company with J. L. Kelly in company with J. L. Kelly attend the Lily Dale camp. The circle will be resumed when they return in the fall.

An easily manipulated alloy of zinc and copper is claimed by its inventor to be stronger than [illegible] and less corrosive than copper.

GRAIN FUTURES MOVE DOWNWARD

Ordinary Breaks Fail to Halt Movement Down; Wheat Nets Loss

CHICAGO, June 4.—Grain futures were on the downward trend on the Chicago board of trade today. Ordinary brasses failed to halt the movement, especially in July wheat, which was so weak that it dragged all other grains with it. At the end of the session found all options at practically the low point of the day.

Wheat netted a loss of 1 3-8@2 cents, corn 1 to 1½c, and oats 1 to 1½c. Provisions resisted the movement and closed 7 to 30 points net higher.

Wheat prices were noticeably weak from the start. Excellent weather for filling wheat berries and fore cases of continued cool skies over the belt was the chief factor in the decline at the start.

Corn and oats were both affected by wheat prices and by crop reports which held out prospects of good crops in both these products. Sale of 400,000 bushels of corn for export failed to change the future market in the face of the wheat situation.

Higher hog prices, a decreased western run for the week and an optimistic trade report from a leading packing company operated to keep provisions firm. Trade, however, was very dull.

WHITES DODGE TROPICAL LABOR

Hawaiians Must Rely on Asiatics to Work on Ranches

HONOLULU, T. H., June 4.—After 20 years of vain endeavor to Americanize, or, at least, "Caucasianize" the plantation fields of Hawaii, the territorial mission now in Washington, seeking the consent of congress to the importation of Asiatic labor in limited numbers and under stipulated restrictions, has returned to the earlier declarations of former Gov. George R. Carter in his reports to the interior department in 1904 to 1907, that the white man will not work in tropical fields.

Official facts and figures are in possession of the commission to show that Americans, Portuguese, Spanish, Russians and Germans all have been tried and all have failed as steady sources of agricultural labor supply.

Today, succeeding to Gov. C. J. McCarthy, Albert Horner territorial sugar expert, and others in a position to know conditions, the territory is facing the gravest labor crisis in its history.

In 1920 the production of sugar for the territory was 289,544 tons, with 56,040 laborers to handle the crop. In 1920 the production was 556,871 tons and last December there were 35,548 laborers at work on the plantations. Sugar cane acreage has increased tremendously, labor has not kept pace and now, with the exception of a small flow from the Philippine islands, them selves in a like predicament, there is no source from which to draw for harvest hands for Hawaii's great pineapple and sugar plantations.

Jump the Job.

The labor exodus from the plantation goes in three directions, some return to their home lands, others pass on to the mainland and still others go into other lines of activity in the territory. The motive actuating them all is the same to get away from the hard labor of the fields as soon as possible.

Ten million dollars and more, according to official statistics, has been spent by the industries of Hawaii in importing labor during the past two decades and today these industries are under a heavier handicap of labor shortage than ever before in their history.

The Chinese exclusion act and the gentlemen's agreement with Japan have shut off both these countries, but despite this, frequent recommendations have been made that congress take into consideration Hawaii's peculiar isolated position and let down the bars.

Now a fresh attempt along this line is being made.

Made Good By Giving Service

Milan R. Bump.

Milan R. Bump, chief engineer of the Doherty organization, was elected president of the National Electric Light association at its forty-fourth convention held in Chicago May 31st, 2nd and 3rd.

Mr. Bump is the fourth Doherty man twice honored with the presidency of the largest electrical association in the world, the others in the Doherty organization having a similar distinction before him being Henry L. Doherty himself, Frank W. Frascaroli, vice president of Cities Service company, and Hudson H. Scott, general manager of operations of the Doherty organization.

Mr. Bump has been a Doherty man for something over 17 years. He worked for Henry L. Doherty when the Doherty organization was not an actuality but merely a mental incubation, he was active in its birth and has been a big factor in its wonderful growth. He was the first cadet engineer of the Doherty organization and later organized the cadet school at Denver from which has grown the training schools at Toledo, Ohio, and Bartlesville, Okla. These three schools have since become famous for their work of taking graduates of technical colleges and preparing them with intensive courses along engineering lines and in the oil business for executive positions.

Mr. Bump is an exceedingly young man to hold the high position he does and he has been looked upon for some years past as an authority in matters relating to all phases of the public utility industry.

Mr. Bump was born at Rock Falls, Wisconsin, on March 16, 1881. Eight years later the family removed to Spokane Falls, in the then territory of Washington, where young Bump received his early education, graduating from the local high school there in 1898. Four years later he received the degree of electrical engineer from the University of Wisconsin. His first job was with the Madison Gas & Electric company, of which Henry L. Doherty was then general manager. He went to Denver in 1904 as cadet engineer on special work for Mr. Doherty, who was then in charge of the Denver Gas & Electric Light company, and later became head of the company's gas department. From 1906 to 1908 he was chiefly on the road examining properties which proved to be the nucleus of the present nationwide Doherty organization. He was sent to Joplin, Mo., in 1909 to attend to the organization of the Empire District Electric company, to build the Ozark Dam on the White river as well as several power plants in that vicinity. Conditions in Joplin in those days were none too pleasant to look upon and the service could not have been worse. Bump got to work at once and it was not long before he had won back the good will of the people. Always plunging away for better organization and better service, he finally built up the big system which resulted in the Empire District Electric company of today, one of Cities Service company's largest utility subsidiaries, having utility and ordice of transmission lines.

It was not long before Mr. Bump's ability was recognized by his superiors and in 1911 he was called to the New York office as chief engineer of the whole Doherty organization, the position he now holds. In the past year, in addition to his supervision of the engineering department, Mr. Bump has been acting in an executive and advisory capacity in connection with the oil activities of Cities Service company and is now looked upon as an expert in the petroleum industry, as well as in the public utility field.

Mr. Bump is a hard worker always but he is one of that type who gets a great deal of enjoyment out of work. He is a fine fellow to be a square deal for all and is never too busy to see those who seek his counsel, even to the youngest employe. Advancement within the organization is his motto and he is a great booster for the young man who tries. He is the life of any banquet or convention he may attend and without a little talk from him at the get together meetings of the Doherty men they are not complete.

In addition to the National Electric Light association, Mr. Bump is a member of the American Gas association, American Electric Railway association, Natural Gas association of America, Electrochemical Society, Society for the Promotion of Engineering Education, National Geographic society, Associate American Institute of Electrical Engineers, American Association for Advancement of Science, and the Doherty Men's fraternity.

Forgotten or unexploited since early in the eighteenth century, valuable sulphur ore deposits have been rediscovered in eastern Finland.

Pressing buttons connected with a new spot light projector causes liquids to flow before the lens and produce lights or any desired colors.

What Is Ahead of the Railroads?

OUR statistical department has prepared a concise but comprehensive analysis of the railroad situation that should be read by all who hold or contemplate buying railroad securities.

It will help you to get a clearer view of the future of these securities, as it contains much data relating to physical conditions and legislation, as well as finances.

PHARAOH WED HIS QUEEN FOR LOVE

Mummy of Queen Ti Brought to Georgia School Museum

ATLANTA, Ga., June 4.—The mummy of the immortally famous mercenary, wife of the Egyptian king Amenophis III, who died more than 3,000 years ago, has been brought to the museum of the Emory university, one of the three institutions of the Methodist Episcopal church south. The mummy, by perhaps a wide stretch of imagination, is believed to be the oldest human being in Georgia. The mummy was brought here by the W. A. Shelton expedition to Egypt, backed by Emory university and some interested men of other cities.

Queen Ti, the name of the bride of Amenophis III, was famous in her time through the fact that she, alone of marrying her, defied the world in choosing a bride for love and thereby disregarding royal traditions. She was considered a woman of rare beauty. Her son, Amenophis IV, abandoned the gods of his fathers and made altars to a new and a new God.

The records received by Emory indicate the tablet found by Professor Shelton beneath the great palace in ancient Babylon, on which a Babylonian king wrote his most famous deeds in order that they might be preserved through the ages. Scientists in his home translated only a few words on this table, according to Doctor Shelton. Only rare other similar tablets buried by ancient kings have been discovered, it is said.

Among various other interesting articles in the Emory collection is a piece of rope grass rope, similar to that now in use by Japanese today, only this piece, perfectly preserved was taken from a tomb after lapsing there several thousand years. There are also bronze trinkets, small tools and weapons and many jars and vases.

In the Oil Fields

Estimate of Daily Average Crude in Production

The American Petroleum institute estimates that the daily average gross crude oil production in the United States for the week ended May 28, was 1,326,090 barrels, as compared with 1,328,570 barrels for the week ended May 21.

Daily Average Crude Production.
(Figures in Barrels)

	May 28	May 21
Oklahoma	297,100	281,010
Kansas	98,800	100,150

Public Auction on Tuesday, June 14, 1921. Osage Oklahoma Oil Leases by U. S. Government.

At Pawhuska, Oklahoma, June 14, 1921, about 10:00 a. m. in one of the auction rooms will be offered for sale leases in the Osage Nation, Oklahoma, covering 40 per cent payable on date of sale, balance in three annual installments with acceptable security. Within the area advertised there are about 2,000 oil wells producing from 1,100,000 barrels, the total daily production for February being about 3,000,000 barrels and about 200 wells now drilling. All lands now leased are open for gas. For blue prints showing area and other data, tracts now leased and producing wells, and 60 tracts and for well logs of producing wells 75 cents, and for further information write to H. S. Bennett, Superintendent, Osage Agency, Pawhuska, Oklahoma.

ORDINANCE NO. [illegible]

An ordinance to apportion levy and cause special assessments for payment of the cost of constructing a sanitary sewer in SEWER DISTRICT NO. 177 in the City of Tulsa, as created and established by Ordinance No. 1234.

BE IT ORDAINED BY THE BOARD OF COMMISSIONERS OF THE CITY OF TULSA, OKLAHOMA:

SECTION 1: That there shall be, and there is hereby apportioned to and levied upon and assessed against the several lots and parcels of land in said SEWER DISTRICT NO. 177 in the City of Tulsa, Oklahoma, as benefited by the construction of said sewer, the amounts respectively as follows, to-wit:

Addition	Lot	Block	Amount
Factory	1	2	$195.60
"	2	2	187.95
"	3	2	187.95
"	4	2	187.95
"	5	2	187.95
"	6	2	187.95
"	7	2	187.95
"	8	2	187.95
"	9	2	187.95
"	10	2	187.95
"	11	2	187.95
"	12	2	187.95
Sunset	1	2	184.14
"	2	2	90.07
"	3	2	221.12
"	4 (N 58')	2	75.66
"	4 (S 100' of E 25')	2	72.03
"	4 (S 100' of W 25')	2	77.11
"	5	2	90.07
"	6	2	220.74

SECTION 2: That the assessments hereby levied on each of the above mentioned lots and parcels of land are hereby decreed to be a lien upon such lots and parcels of land to the same extent as other taxes and shall be collected and enforced in the same manner as other taxes are and for the City of Tulsa, Oklahoma, are collected.

SECTION 3: That all assessments hereby levied shall be divided into three (3) equal annual installments as authorized by the laws of the State of Oklahoma for such cases made and provided; that the assessments shall bear interest at the rate of eight (8) per centum per annum, payable annually at the time of the payment of the several installments of the said assessments, from the date of the taking effect of this ordinance; that the first installment of said assessments, together with the accrued interest on the deferred installments shall be payable on the 15th day of December, 1921, and the remaining deferred installments with the yearly interest on the unpaid installments, shall be payable on the 15th day of December of each succeeding year until all shall be paid.

Provided, however, that any of the owners of the lots or parcels of land so assessed may at any time during the period (14) consecutive weeks following the day of the first publication of this ordinance pay to the City Auditor of the City of Tulsa, the full amount of the assessments so levied against their said lots and parcels of land, thereby relieve such property from the lien of such assessments.

SECTION 4: That this ordinance shall be published for twenty-nine consecutive days in the Tulsa Daily World, a newspaper published in Tulsa Oklahoma; that the publication of this ordinance as required by law shall be taken and regarded as sufficient notice to all persons interested in the assessments hereby levied by the terms of this ordinance.

SECTION 5: That all ordinances or parts of ordinances in conflict with the provisions of this ordinance, insofar as such conflict exists, are hereby repealed.

SECTION 6: That an emergency exists for the preservation of the public health and safety, by reason whereof this ordinance shall take effect from and after its passage, approval and publication.

PASSED and the emergency declared upon its passage and approved this [illegible] day of May, 1921.

SIGNED this 6th day of May, 1921.

T. D. EVANS, Mayor.

Attest:
MRS. FRANK SEAMAN, Auditor.
FRANK S. DAVISON, Attorney.
