Eastern and Ohio Oil Down

PITTSBURGH, Pa., June 14.—The Joseph Stern & Sons market report here, standard of Pennsylvania, has bounced back and settled at $4.50 a barrel. The price was cut 50 cents a barrel last week. The Ohio and Indiana grades were cut 25 cents a barrel. The Corning grade was cut 10 cents a barrel. The new price is $2.50 for Corning, $2.75 for Ohio and Indiana and $3 for Cabell. The Bradford Strip was cut 10 cents a barrel, leaving it at $2.25 a barrel.

The new price for Pennsylvania crude today is the lowest since $2.75 was held, and it is not the price for first sort.

Ohio oil was cut 25 cents for Lima, Indiana, Somerset, Plymouth and Western grades of crude on the 25 cent a barrel.

Delighted With Mexico City

(By PAUL BOOTH)

(Who is now in the southern part of Mexico.)

"The weather is wonderful. The altitude about 7,000 feet and the air just fresh enough to keep one full of the necessary pep and ambition, the mornings are very delightful and the evenings get just a little warm, but not hot, the evenings are superb, after dinner one feels quite comfortable wearing a light silk coat. An overcoat, however is not absolutely necessary.

"As to amusements here, there are certainly enough to keep one busy; football games are held Tuesday, Thursday and Saturday, at 3 p. m., on Sundays they start at 5:30, this is a gambling game, minus the part mutuel system. They play in singles and doubles and it is very interesting to watch, it is not necessary to gamble, but one can bet if desired.

"They have tennis, golf, baseball, soccer football, racing, polo and bullfights. There are many other diversions; also as to places to visit, you have the National museum, which covers the republic from its earliest days and which would take a month's careful inspection to really cover. There is the National theater, various music halls, plazas, concerts, parks, boulevards, riding tracks, walks, lakes with boating, etc. The parks and plazas are wonderfully pretty and contain flowers, shrubs and trees of all descriptions, birds abound everywhere. I have never elsewhere seen so many flowers in many colors, nearly all residences have climbing vines of all sorts almost always in bloom, with large blossoms in reds, whites, blues, pinks, purples, etc.

"Mexico City is rich in historical lore as it was perhaps the most advanced city on the American continent, dating back for centuries. A lover of historical data, suggestions and surroundings, will have a picnic here. A few days ago I was out about six miles from the heart of the city and watched where they are excavating some pyramids, etc.

"The best train service from the States is by way of Houston or San Antonio to Brownsville and Laredo respectively. The Houston sleeper leaves at 9:30 at night and the San Antonio sleeper leaves at 10:30 a. m. From San Antonio one arrives in Laredo about 5 p. m. and there is about two hours for necessary inspection before leaving for Mexico City. Then one rides through Monterey, Saltillo, San Luis Potosi and Queretaro. This trip requires about 60 hours, and arriving in Mexico City about 7 a. m. the third day. The Houston sleeper goes through to Mexico City also and connects with the Laredo train at Monterey.

"Hotel accommodations are among and one can also rent apartments if desired, rentals are not exorbitant. The cafes are well appointed, the food is very good although the service is a little slower than what we are used to in the States. Of course you realize that this is true in any Latin city, they make eating an art and do not have the hurry and rush with which we inflict ourselves. The cafes carry the finest liquors of all kinds and have wonderful music, fresh fruits are had the year around.

"I am completely in love with the city and the people here.

"Expenses are no higher than in the States and I find most things proportionately cheaper. The railroad fares are cheaper as are the Pullmans and dining service. One hundred dollars United States currency each will carry all expenses of trips from home to Mexico City.

"A passport is required which is issued in foreign consulates or the home office, requiring about two weeks time. This should be secured before leaving the States for the Mexican consul has to be referred to Mexico City for approval, by Mexico government of the application of Washington."

The Texas company is interested in the Mexican concession, the United States government will be represented in Mexico City by Hugh Wallace, ambassador, and Fletcher, minister, and there is no doubt but that American capital will be found more welcome by current precedent as to treatment.

There are more than a million people in the city and the population is increasing. They have very good police regulations. The street railways are far superior to those in Texas. The streets are well paved and clean. Residences are wonderful homes of rich and refined people. Stores are modern and quite expensive. Prices are about double to what they were before the war. Clothing is expensive, prices range from $35 to $75 for a good suit. Shoes are well made and cheap, from $6 to $8 a pair. Silk stockings are $3 a pair. Food is good and cheap. Restaurants are wonderful establishments and prices are very reasonable. Tipping is not allowed to exist. Taxi cabs are reasonable and when charging extra passengers make reductions. Taxi cabs are $1.75 United States currency, not from one a new Ford. Gas is average, about all the cities here are considerably less than anywhere in the States.

Corporation Commission in Command in Hewitt Field

The corporation commission of Oklahoma has finally decided that it has jurisdiction and has taken command of drilling operations in the Hewitt field. This field has been the most aggressive in drilling to the deeper pay and in increasing the production of the wells by every possible means of any of the well known fields in the entire mid-continent field.

When the first well was drilled by the Texas company it was noted in this column that the new well indicated a pool that would be a market breaker, and this is the reputation it has today on account of the aggressive drilling by large interests in that field.

Wirt Franklin, well known operator of Ardmore, and W. G. Skelly of Tulsa have been the leaders in asking the corporation commission to regulate drilling in that field, and to this request the corporation commission has finally acceded. It looks at this and as though the order comes a little late, and is like locking the door after the horse is stolen.

There are, however, some wells being drilled to the deeper sand and the owners are expressing the opinion that the order will not apply to them as they claim to be entitled to get their share of oil before the wells on the adjoining property have completely drained the lower sands. It is all interesting and the committee will doubtless have its hands full satisfying everybody.

The committee designated to take charge of drilling is as follows:

Frank Goddard, of the Humble Oil & Refining Co., chairman; G. W. Mehaffey, F. M. Jackson, Wirt Franklin and W. G. Skelly.

Oil Concerns Paying Gross Production Tax on Osage Oil

PONCA CITY, June 14.—The oil companies are paying the 3 per cent gross production tax to the state on production in Osage county under the provisions of the new congressional act which extended the Osage trust period to 1946. It had been rumored that the oil concerns were not favorable to the tax and perhaps would appeal it to the courts. In conference today with officials of the Maryland Oil company here, one of the big concerns in the Osage, it was learned that the rumor is not correct, but that the companies are paying the tax as it falls due.

The payment of this tax by the oil companies and that also by the Osage Indians of 3 per cent on their royalty oil means for Osage county the Osage will bring in all the northwest for good roads, as a considerable part of the gross production tax goes to road fund of Osage county. One-third of the state gross production tax, paid to oil men, comes back to the county and is split illegally between the road and school funds of the county. All of the 3 per cent paid to the Indians on their royalty oil goes to the county for roads.

The daily oil production in Osage county today is around 50,000 barrels, and at the present price of $1.50 a barrel, the total daily value is $75,000, of which one-sixth or $12,500 goes to the owners as royalty. On this they pay 3 per cent gross production tax, amounting to $375 daily, all of which goes into the Osage county road fund. The oil companies pay 2 per cent tax on the remainder, or $62,500, or $1,875 daily, of this one-third comes back to Osage county, or $625 daily, and one-half of it or $312 is goes to the road fund. Thus Osage county, at the present time is accumulating a road fund of $687.50 daily from oil taxes.

Okmulgee District About Normal

By C. I. O'NEILL

That there is no overproduction of high grade crude oil, such as is produced in the Okmulgee district, and that if the importation of Mexican oil was properly controlled that the oil industry of the United States would quickly readjust itself to a normal basis, is the opinion of the property committee of the Okmulgee District Oil and Gas association after a study of figures relating to storage, stocks and consumption of oil, which are now available.

Figures relating to the storage situation in Oklahoma and Kansas as published recently show that there is enough empty storage in the two states to hold the entire production of Oklahoma and Kansas for 34 days. This report also shows that there is not 525,000 barrels of crude in storage in Okmulgee county and no oil in storage in the Osage, notwithstanding the fact that these are two of the largest producing fields in the state. The report credits Okmulgee county with 448,000 barrels in storage, all on the lease of the Kingwood Oil company in 16-11-11. This is apparently an error as the Kingwood has not 385,000 barrels in storage in the Deaner pool. The report further shows that there is 40,284,483 barrels of oil in storage in Oklahoma and 31,975,647 barrels of empty storage. One-half of the total oil in storage in Oklahoma is in the Cushing pool and more than one-quarter is stored at Healdton and the Glenn pool.

A proper deduction from the storage figures in the report referred to would be that the high grade crude produced in Okmulgee is being marketed as fast as produced notwithstanding the exaggerated reports of overproduction.

The present condition of the oil industry and the reasons constantly claimed for that condition would lead the average person to believe that there had been a marked falling off in the consumption of oil during the first two months of 1921. As a matter of fact the case. According to the United States geological survey the United States consumed 154,284,000 barrels of oil in the first four months of 1921 as compared with 147,174,000 barrels in the first four months of 1920, a gain in consumption of 7,110,000 barrels, or nearly a million and three-quarters barrels per month.

The United States geological survey in its regular monthly bulletin points out that during April production of petroleum in the United States continued to increase, the daily average for the month being the new record figures of 1,141,000 barrels, on the same place with the production of record breaker in the estimated daily consumption of crude during April, showing that the United States consumed an average of 1,129,333 barrels daily during the month.

It is claimed that the official government figures show that the United States is the much also domestic production this month records, consumed 32,000 more barrels of oil each day than it produced.

A combined comparison of conditions in the United States in the months of April, 1921, and April, 1920, as prepared by the United States geological survey gives the following results in round figures:

April, 1921: Oil produced in the United States, 36,000,000 barrels, oil imported into the United States, 9,000,000 barrels, oil exported, 500,000 barrels, stocks on hand last day of month including Mexican petroleum held in the United States by importers, 185,000,000 barrels, estimated consumption, 42,000,000 barrels, number of producing wells completed during the month, 1,224.

April, 1920: Oil produced in the United States, 35,000,000 barrels, oil imported into the United States, 8,200,000 barrels, oil exported, 600,000 barrels, stocks on hand last day of month including Mexican petroleum held in the United States by importers, 122,000,000 barrels, estimated consumption, 41,000,000 barrels, number of producing wells completed during month, 2,090.

The outstanding facts in these comparative figures are the 40 per cent decrease in the number of producing wells, the increase in consumption of 1,000,000 barrels in April, 1921, and the big gain in production and importation in April of this year. The total stocks on all stocks in the year between April 30, 1920, and April 30, 1921, was but 37,000,000 barrels less than one month's supply at the present rate of consumption.

Ticker Dope From New York

By HOUSTON FIBLE & CO.

NEW YORK, June 14.—A Texas oil trade authority adds Gilliland Oil to the reported merger between White and Simms companies, saying "plans being discussed looking to a consolidation of Gilliland, Simms and White oil companies into a great organization, under the laws of Delaware, in the not distant future. If the suggested plans are carried out the authorized capital stock of the big combination, which has large proved oil lands in Texas and other states, will be approximately $100,000,000, which would enable the new enterprise to acquire other properties."

Midwest Refining steadily adding to its facilities, and now owns at Casper and Grey Bull two modern refineries with a combined capacity of approximately 30,000 barrels of oil daily. Last year Standard of Indiana took over 203,052 shares of Midwest Refining, giving two of its shares for one of the latter company. In anticipation of a continued increase in Wyoming oil production Standard of Indiana now plans to expand its refining facilities, particularly at Casper. Standard of Indiana is now the greatest gasoline manufacturer in the world and produces between 22 and 23 per cent of all the gasoline made in this country.

NEW YORK, June 14.—Prairie Oil & Gas Co. declared extra dividend of 2 per cent in addition to quarterly dividend of 3 per cent, both payable July 20, to stock record June 30. In the last two quarters extra payments of 2 per cent were made.

NEW YORK, June 14.—The market acted better today than for several weeks past. What appeared to be a raid on the Mexican oils took the edge off the market near closing time, but as a whole the list closed fairly firm compared with two days past. The rally is likely to continue tomorrow.

NEW YORK, June 14.—Statements to the contrary notwithstanding, there are certain oil producers who declare that proposed Mexican oil tax has been grossly exaggerated. One oil company claims final interpretation of the intentions from the Mexican government will be the additional tax will amount to a few cents a barrel only.

Wealthy Heiress Will Wed Owner of Oil Land Around Tulsa Says Chicago Report

Miss Dellora Angell, of Lake Forest, Ill., who inherited $37,000,000 from her aunt, Mrs. John W. Gates, is to wed C. Wilson Campbell, Los Angeles oil promoter, according to reports from Chicago announcing the engagement. Miss Angell met Campbell while at school in California last winter. He is a graduate of Ohio State university and owns oil lands around Tulsa, Okla. The bride-to-be is 18 years old and will receive a quarter of her inheritance when she is 20, another quarter five years later and the remainder when she is 30. The young woman also inherited and received $100,000 from the estate of Charles W. Gates, her cousin and son of John W. Gates.

With the Oil Men

Doctor Edington, who is an old friend of Major Niles, is in the city from Mexico, and says that the government has issued a decree going into effect July 1, restricting the use of any other money than Mexican money but will allow gold to circulate as usual. But the doctor says that this decree is likely to cause a great deal of trouble, as the Mexicans have become accustomed to United States currency and silver. He says that another decree by the Mexican government which prohibits the notary publics from making transfers or assignments of oil lands. The reason for this according to the doctor remains a mystery. He has not received word as to the new tariff for export of oil, and is not willing to say anything on that subject for publication either. "It is one question, says the doctor that I am not informed as to the provisions of the new law which went into effect after I left Mexico."

James K. Crawford is back from Arkansas and is of the opinion that his well, located in the northwest corner of 21-2-11, which is 15 miles west of Pine Bluff, will make a paying proposition, and says that the Cap Rock was found at 2,042 to 2,064, and below this the well was drilled only a foot and the casing was cemented at 2,066 feet. As soon as this has hardened the well will be drilled in. Mr. Crawford also announces that he is starting a test 4½ miles north of Sheridan, the county seat of Grant county, which is located in the southeast corner of the northeast of 18-1-13. He also states that the country looks like an oil country, and he is of the opinion that there will be a real pool uncovered.

Third Attempt to End His Life Was a Success

HOUSTON, Texas, June 14.—After a four hour battle against life, Charles S. Shapley, 39-year-old business man, died at a hospital here this morning from the effects of poisoning.

Shapley first jumped into the taxicab. He was rescued but sprang from the ambulance which was taking him to the hospital. He cut a great gash in his head, was picked up and taken into the hospital. When attendants began work on his head he declared, "It's no use. I've taken poison." He died in a few hours.

He was said to have brooded continually over the death of his wife a year ago.

Beer for the Sick Is Drawing Nearer Now

WASHINGTON, June 14.—Beer for the sick was nearer today. Revised regulations governing permits for manufacture and sale of beer for medicinal purposes were ready for Revenue Commissioner Blair's signature.

All doubt of the administration's purpose was removed today when it became apparent that many months may elapse before final action can be taken upon the anti-beer bill of Congressman Volstead.

ASKS TULSANS TO SEEK OUT GUILTY

Jury Should Have Aid of Citizens, Says Short; Poundstone Honored

Punishment of the guilty by the city will go a long way towards righting Tulsa in the eyes of the world, Assistant Attorney General George Short told members of the Civitan club at its weekly luncheon Monday in his talk upon the race riots, and Tulsa citizens can very materially aid in the accomplishment of this by giving the grand jury the information that they may deem necessary they should have. Regretting the culmination of the trouble of that night, the speaker nevertheless stated that for those men who defended the town against threatened trouble by the black he had nothing but praise, but that he believed that the lawless men engaging offenders both black and white should be apprehended and punished.

Although Tulsa is one of the youngest cities in Civitan in the United States, it was signally honored at the first annual convention of Civitan by a place upon its national board of directors. M. L. Poundstone, who was the delegate from Tulsa to the convention at Birmingham last week, was named a director along with Ernest Greenwood of Washington, D. C.; J. P. Taggart of Savanah, Ga.; J. H. Cabaniss of Birmingham; R. P. McGowan of Birmingham; Harold Wilson of Miami; A. D. Adams of West Helena, Ark., and Reed Lawson of Birmingham. The president of the national association elected at Birmingham is Dr. C. W. Shropshire of Birmingham, and other officers O. E. Andrews of Chattanooga, Dr. J. P. Runyan of Little Rock and Leighton F. Smith of Baltimore, first, second and third vice presidents; Claude A. Hagan of Birmingham, treasurer, and John V. Mix of Birmingham, secretary.

Oklahoma gave Chattanooga a stiff fight for the 1922 convention, a fight won by Chattanooga.

American China Mission Wrecked by China Rebels

LONDON, June 14.—The American mission at Wu Chang, China has been wrecked by Chinese rebels, according to a news agency dispatch from Hankow today. The Chinese insurgents, the dispatch said, looted and burned much property. There were many Chinese casualties but so far no foreign casualties have been reported.

ATTENTION

Here is the chance for parties with small capital to get into the oil business on the ground floor. We have for sale a few undivided 32 interests in a well to be drilled on an 80-acre lease on a good structure, and close to production. This week only.
