Burbank Producers Have Their Day Before Shut-down Committee

It was Osage day yesterday—all day—in the rooms of the Mid-Continent Oil & Gas Assn. in the Cosden building. The shut-down committee heard the objections of various Burbank producers to the shut-down order at the morning session and in the afternoon met in closed session to make conclusions and drew up resolutions on the situation. Requests were made for approval of the committee to drill approximately forty additional wells, the lease owners making the plea that their properties were being drained. The committee finally recommended that the department of Indian affairs permit the completion of seven wells, two of which, it is understood, already are in the sand.

It was also recommended that, in view of the fact that owners of leases adjoining tracts to be sold later are curtailing drilling, it would be only fair to postpone the sale of this adjoining acreage.

Henry McGraw of the Gypsy Oil company was the most vigorous of the representatives of Burbank lease owners in his effort to have the drastic shut-down ruling eased down a bit. It was his contention that his company spent something more than four million dollars at recent sales with the idea of drilling up the tracts rapidly before the gas pressure got off the pool. He also stated that he felt the committee should have conferred with representatives of his company before recommending such drastic action.

McGraw Objects to Drainage.

McGraw pointed out that the Gypsy company has 960 acres of leases on which there are 96 possible locations. At present, he said, there are only 25 producing wells on these properties and 25 drilling. Of the drilling wells, he said, they would have to drill 20 to the top of the sand and completed only five.

"While I am not opposed to a shutdown of drilling," he said. "I do object to my powerful neighbors taking the oil which I have already purchased."

J. George Wright, superintendent of the Osage Indian agency at Pawhuska, was present at both morning and afternoon sessions. The Roxana, Marland, Carter, Gardner and Louis Friedman organizations were among the producing companies represented. All of these have production in the Burbank area.

The recommendation of the shut-down committee regarding exceptions to the shut-down ruling follows:

"The committee having listened to the complaints of various producers in the Osage nation to the effect that the order issue by the department, as it now stands, was endangering the value of their property by reason of drainage from adjacent properties, finds that in the case of the Gypsy Oil company in the judgment of the committee they should be permitted to drill wells Nos. 6, 7, and 8 in the southeast quarter of section 19 township 27 range 6 east and well No. 9 in the northwest quarter of section 29 township 27 range 6 east, and having carefully considered other requests to drill wells in the said area respectfully decline to recommend the allowance thereof.

"And in the case of Phillips-Skelly leases in the same general area, the committee recommends for the same reason the allowance of wells No. 7 and No. 8 in the southwest quarter section 19 township 27 range 6 east and well No. 6 in the northeast quarter of section 29 township 27 range 6 east.

"And the committee respectfully submits that the order should be enforced as to all other wells according to its terms.

"Committee on shutdown and storage.
"M. M. DOAN,
"Chairman."

W. G. Skelly, president of the Skelly Oil company, who is a member of the shut-down committee, did not make a single request for exceptions to the ruling in favor of his company and its partner, the Phillips Petroleum company. The committee, however, recommended that they be permitted to complete two wells in order to equalize the situation created by the Gypsy request.

Sale Postponement Asked.

The resolution urging that the sale of Osage leases contemplated to occur in November or December be deferred as long as possible follows:

"Whereas, the shut-down committee met on the 9th day of October, 1922, in conference with Osage operators and J. George Wright, superintendent of the Osage Indian agency, and his assistants, for the purpose of discussing and working out a plan of carrying out the order of the secretary of the interior promulgated on October 5, and

"Whereas, the committee has heard statements by a number of Osage producers and Wright and feels that it is fully advised in the premises,

"Now, therefore, it is resolved that this committee accepts the invitation of the secretary of the interior and the superintendent to co-operate with them in the administration of the shut-down order promulgated October 5 and hereby declares its willingness and tenders its services in such advisory capacity. As a preliminary step in the matter of the administration of the shut-down movement, this committee recommends that the Osage sale contemplated to occur some time in November or December be deferred as long as possible and that when said sale is held that such tracts as adjoin the prolific areas, such as the Burbank field, be withheld from this sale.

"Committee of shutdown and storage, M. M. Doan, chairman; W. H. Gray, H. N. Cole, W. G. Skelly, Burt H. Collins."

The Osage ruling as originally promulgated by Commissioner Burke stated that no new wells shall be started in the Osage except offsets to producers, and, of the wells already drilling, none shall be completed into the sand except those which are offsets to producers.

No further word had been received yesterday from Secretary of the Interior Fall regarding the details of the shut-down rulings on other lands controlled by the government, although he stated in his message to Chairman Doan Saturday, that such instructions had been issued.

The shut-down committee is doing wonderful work, in the opinion of a great majority of the producers. Now that the Osage shutdown has been ordered, they say, producers in restricted territories should begin to realize the necessity for more vigorous action in the same direction. The government has blazed the trail, now the producers should follow.

E. W. Sinclair Spends Day Here With Official Party

E. W. Sinclair, president of the Sinclair Consolidated Oil corporation and former chairman of the board of directors of the Exchange National bank, spent yesterday in Tulsa with a party of Sinclair officials. Their stay here was a short one, but they will return in about three weeks after making a tour of properties in Texas and Louisiana. From here they will go to Houston and later to New Orleans. They visited the Burbank pool Sunday and on their return will make a more casual survey of Oklahoma and Kansas properties.

Sinclair officials in the party besides Sinclair are Al Watts, J. M. Cudahy, Archie Roosevelt, J. R. Simpson, vice president, and Charles Parmalee. They came to Oklahoma direct from the east and are traveling in a special car.

Marketers Gathering for Chicago Convention

Special to The World.

CHICAGO, Oct. 9.—Petroleum refiners and marketers from all parts of the country began to arrive this afternoon for the opening session of the convention of the National Petroleum Marketers association at the Congress hotel tomorrow. The convention will continue until Friday. Exhibits are in place and it appears that the convention will prove a record-breaker, both from the point of attendance and the amount of business accomplished.

Most of the conventioners will arrive tomorrow morning. Many of the Tulsa visitors, it is expected, will arrive on the special train of the Kansas City Oil Men's club, which will arrive in the morning over the Chicago, Milwaukee & St. Paul.

Burbank Pool Storage Situation Interesting

There were 1,246,146 barrels of crude oil in storage in the Burbank pool on October 6. The largest amount was held by Phillips & Skelly, with 692,492 barrels in tanks on that date, and only 16,559 barrels of available room. As these interests have been running about 12,000 barrels to storage daily, their storage was all filled before the end of last week. They, however, are rushing work on their tank farm in 28-27-5 and they will have to run oil into the pipelines for only a short time.

The Gypsy company on October 6 had only 62,571 barrels in storage and had 279,801 barrels of empty storage.

A new record in Burbank production was set in the week covered by the report, the daily average having been 82,624 barrels, a gain of 4,594 barrels daily over the previous high week, which ended July 5. The increase over the week just preceding was 5,082 barrels. The production in the week ending July 5 came from 427 wells, while last week's output was from 953 wells, indicating the rapid decline in the per well average.

These figures on production also indicate that Burbank will decline rapidly under the shut down. The field has barely held its own in the last three months in spite of the most vigorous drilling campaign it was possible to inaugurate.

Feel "Old?"

JUST TRY THIS

85 cent Bottle FREE

(32 Doses)

Just because you start the day worried and tired, stiff legs and arms and muscles, an aching head, burning and heating down pains in the back—worn out before the day begins—do not think you have to stay in that condition.

Be strong, well, with no stiff joints, sore muscles, rheumatic pains, aching back or kidney trouble caused by body toxic acids.

If you suffer from bladder weakness with burning, scalding pains, or if you are in and out of bed half a dozen times a night, you will appreciate the rest, comfort and strength this treatment should give.

We want to prove The Williams Treatment gets results in Rheumatism, Kidney Irritation, Bladder Weakness and all all scents caused by excessive uric acid, no matter how chronic or stubborn.

If you send this notice with your name and address we will give you an 85 cent bottle (32 doses) free. Please send 10 cents to help pay postage, packing, etc., to the The Dr. D. A. Williams Co., Dept. Y-1502, F. O. Building East Hampton, Conn. Send at once and we will mail you by parcel post one regular $1 size bottle all charges prepaid. Only one free bottle will be sent to the same person, address or family.—Advertisement.

Ticker Dope

NEW YORK, Oct. 9.—In connection with activity and strength in Texas company stock the financial district hears talk of important developments pending in connection with Texas and another large oil company. Banking houses say much of the buying in stock Friday and Saturday when over 90,000 shares were traded in, was for important people. From a financial and trade point of view, Texas company has never been with complete unit fits in with its domestic marketing operations and should largely increase its profits from operations in that district. Earnings for 1922 will be far above those of last year. In financial position, Texas company is better than most companies.

Mammoth oil company which has 2,005,000 shares of no par value was listed on New York curb today starting at 42½@43.

Developments since first of year have greatly strengthened physical and financial structure of Sinclair Cons Oil company an entirely new situation has been created and company occupies a phenomenal position in history of corporation progress. Interest has been centered in Teapot dome which H. F. Sinclairs Mammoth Oil company is developing for U. S. navy.

Shearson Hammill selling Texas company on scale up.

Dow Jones says: Sinclair current earnings would justify an increase in common dividend next year. There has been considerable buying of stocks on this theory. Net earnings before interest and depreciation in first half 1922 were approximately $19,500,000. Estimates place Sinclair's cash on hand at $70,000,000, due to fact that 7½ per cent bonds will be converted into preferred and common stock bonds are selling at 110 and callable at 92. Operation of Teapot dome will ad largely to earning power of sinclair. Increased earnings also expected from company's foreign fields of production and distribution. Recently interests closely identified with company have been heaviest buyers of Sinclair common.

NEW YORK, Oct. 9.—Mammoth Oil is an unknown quantity as yet but some promoters believe to be one of greatest oil properties in the world as I understand, Sinclair holds 51 per cent and Standard Oil Indiana 49 per cent and are preparing to spend $25,000,000 for pipeline from wells to Kansas City. Either its a big proposition or some of best oil men in business have been fooled.

NEW YORK, Oct. 9.—Declaration of 100-per cent stock dividend by National Fuel Gas company is expected to be made shortly. Company is owned by Standard Oil money although it is not directly a subsidiary.

NEW YORK, Oct. 9.—General Asphalt is reported to be bought for account of important oil interests. In this connection rumors have been current that this concern may soon dispose of its South American oil equities either to large American or European interests.

It's reported that the demand for the road construction material made by this company has been steadily expanding during the current year.

By it's exceptional strength and activity around highest levels of the year, United Fruit stock is reported from well informed quarters to be reflecting semi-investment accumulation for important interest which are expecting a material elevation above current levels on account of increasing earnings, following improvement in the Sugar situation, valuable oil interests and general business revival.

NEW YORK, Oct. 9.—An advance of more than $50 a share to 667 in Vacuum leads to belief that announcement will be made shortly regarding recapitallization of company. Directors meet Tuesday and it is believed readjustment will follow the lines of Standard Oil, New York, effect of which to split shares 12 for 1, through the medium of a 200-per cent stock dividend and reduction of par value from $10 to $25.

Closing Stock Letter, October 9, 1922

Another day of excitement in high-priced stocks today. 80 NJ, American Car & Foundry and similar stocks being features. Gossip to account for these great advances is that there may be tax laws passed taxing surpluses and undivided profits so that distributions will be made before the new laws are passed. We believe there is heavy profit taking, going on in the market during these days of large trading, although the street is full of bullish rumors.

REPRESENTATIVE

Of eastern capital, now in city desires to communicate with persons or corporations needing additional capital or having production for sale. Properties must have merit to receive consideration. State fully in letter what you have and what you want. Address Representative, P. O. Box 874, Tulsa, Okla.

Estimates of Daily Averages Crude Oil Production

The American Petroleum institute estimates that the daily average gross crude oil production in the United States for the week ended September 23 was 1,507,050 barrels, as compared with 1,493,700 barrels for the preceding week, an increase of 13,350 barrels.

The following are estimates of daily average gross production for the weeks ended September 23, September 16, 1922, and September 24, 1921:

Daily Average Production.
(Figures in Barrels)

Daily Average Production (Figures in Barrels)	1922 Sept. 23	1922 Sept. 16	Difference	1921 Sept. 24
Oklahoma	400,850	400,600	50	399,850
Kansas	86,900	86,850	250	94,700
Nth Texas	87,350	84,350	3,000	83,750
Cst Texas	141,600	144,400	2,800	94,300
Nth La & Ark	139,750	133,700	2,050	159,800
Gulf Coast	113,350	107,800	5,550	106,000
Eastern	115,300	117,800	2,500	130,000
We'n Mont	83,250	78,100	5,150	49,700
Cal.	320,350	322,000	1,650	320,000
xTotal	1,507,050	1,493,700	13,350	1,158,050

xDaily average production.
xDaily average production declined approximately 100,000 due to strike of oilfield workers.

The estimated daily average gross production of the Mid-Continent (light oil) field, including Oklahoma, Kansas, north Texas, central Texas, North Louisiana and Arkansas, for the week ended September 23 was 807,450 barrels, as compared with 809,800 barrels for the preceding week, a decrease of 2,350 barrels.

The estimated daily average gross production of the Gulf Coast (heavy oil) field was 113,350 barrels, as compared with 107,800 barrels for the preceding week, an increase of 5,550 barrels.

The combined daily average gross production of the southwest field fas 920,800 barrels, as compared with 917,600 barrels for the preceding week, an increase of 3,200 barrels.

Oklahoma-Kansas shows a daily average gross production of 487,550 barrels, an increase of 3,100 barrels and central Texas a decrease of 2,800 barrels; north Louisiana a decrease of 1,100 barrels, and Arkansas a decrease of 1,850 barrels. In Oklahoma production of the Osage nation is shown as 115,450 barrels against 116,550 barrels, and output of the Lyons-Quinn pool was 16,400 barrels, against 16,500 barrels. The Mexia pool, central Texas, is reported at 88,500 barrels, against 59,200 barrels; Haynesville, north Louisiana, 55,200 barrels, against 54,900 barrels, and El Dorado, Arkansas, 28,150 barrels, against 30,000 barrels. In the Gulf Coast field, West Columbia is reported at 28,800 barrels against 28,000 barrels, and Orange county 14,700 barrels against 15,500 barrels.

The estimated daily average gross production of the Wyoming and Montana field was 83,250 barrels, as compared with 78,100 barrels for the preceding week, an increase of 5,150 barrels.

Atlantic Refining Company Abandons Mexico

Atlantic Refining company is abandoning operations in southern light oil fields of Mexico. This action follows that of Standard Oil company (New Jersey) in withdrawing from that field because of failure. Both these companies have lost heavily there and their policy coincides with the viewpoint of the Standard Oil generally that investment of additional money in the Mexican field is not advisable.

Production in Toteco Pool Drops

TAMPICO—Production in Toteco pool in 24 hours ended at 7 a. m., October 4, dropped to 49,000 barrels, the lowest output for the pool yet reached. Gulf Oil produced 21,000 barrels, Mexican Petroleum 25,000 and Mexican Seaboard 13,000.

Texolean Getting Well North of Midwest Pool

The Texolean Oil company test in the southwest corner of the southeast of 36-11-9, which is northeast of the original Midwest discovery well in 2-16-9, is making ten million to 12,000,000 feet to gas and is spraying oil. The sand was found at 3,147 feet and it was drilled to 3,160 feet, where it was shut down to await the erection of tankage. It looks like an excellent well.

Slick District

Gypsy Oil company well in the northwest of the northeast of 4-15-8, topped the sand at 2,920 feet and still drilling.

Greenwood County, Kansas

Rogers, Bitler & Nie No. 1 Allen in the southwest of the northwest of the northwest of 18-23-11 is estimated to be making 180 barrels natural in the sand from 2,190 to 2,241 feet. This well will be shot.

Paulhaymus and Associates No. 3 in the southeast of the southwest of the southwest of 34-24-9 found the sand from 2,230 to 2,300 feet and is estimated at 250 barrels.

Mid-Kansas Oil & Gas Co. well in the northeast of the northwest of the northwest of 3-25-9 is making 300 barrels natural in the sand from 2,235 to 2,310 feet.

Rogers, Bitler & Nye have a rig up in the southeast of the northwest of the northeast of 26-23-10.

Missouri Oil company has a rig on the ground in the northeast of the southwest of 23-23-10.

Johnson & Vickers are moving in a rig on the southeast of the northeast of section 13-23-10.

Near Weleetka

Fisher and Umbrees in the northeast of the northwest of 36-10-11, which was brought in several days ago, at a depth of 3,104 feet, is being cleaned out and swabbed, and is estimated to be making 240 to 250 barrels daily production. The well still has about 2,000 feet of oil in the hole. The sand was topped at 3,102 feet, and is just one foot in.

Gypsy's Burbank Completions

Gypsy Oil company No. 1 in the southeast of 19-27-6 topped the sand at 2,826 feet and after a shot of 180 quarts, is making 1,200 barrels. Total depth 2,975 feet.

Gypsy Oil company No. 8 in the northwest of 29-27-6, is estimated to be making 900 barrels in the sand from 2,904 to 2,971 feet, after a 150-quart shot.

Gypsy Oil company No. 12 in the northwest of 29-27-6, is good for 1,200 barrels in the sand from 2,878 to 2,951 feet, after being shot with 170 quarts.

Gypsy Oil company No. 8 in the southeast of section 19-27-6, topped the sand at 2,900 feet, and had first oil at 2,905 feet. Total depth 2,975 feet. Made 1,700 barrels natural, and after a 180-quart shot, production increased to 3,000 barrels.

Waite Phillips Company Has Another Good One in the Burbank

Waite Phillips company well in the southeast of the southeast of 36-27-5 was drilled in Saturday afternoon. It found the top of the sand at 2,919 feet and drilled 57 feet in. Has 2,800 feet of oil in the hole, and as there is not sufficient gas to carry the oil out, the well will not be shot.

Deep Test Near Council Hill

The Beggs Oil & Gas Co. has resumed drilling on its well located in the northeast corner of the northeast of 10-12-15, where it is going to make a 3,000-foot test.

Stephens County, Texas

Texas company No. 2 Wilson in 2098, T. E. L. survey, Caddo district, Stephens county, Texas, topped the lime at 3,267 feet and after a shot of 570 quarts in the sand from 3,278 to 3,453 feet the initial production was 90 barrels. Total depth, 3,498 feet.

Young County, Texas

Roxana Petroleum company No. 1 Whittenburg, in the Bunger field, Young county, Texas, topped the sand at 3,762 feet drilled just two feet in, and oil is estimated to be making 190 barrels of oil, and 1,750,000 feet of gas.

Jennings and Vicinity

Earl L. Beard on the McAr block 3, Teriton, topped the Skinner sand at 2,451-75 feet. The well was shot with 40 quarts.

Thornton and associates, on the McNeal block 1, Teriton, hit the Skinner sand at 2,461-90 feet. The well has 3,000,00 feet of gas and will make 100 barrels.

Josie Oil company on the Scott in 22-20-6 struck the Peru sand at 2,744-90 feet and have an 8,500,000 gas well.

Fisher Oil company is down 200 feet in its No. 6 on the Beasley in 19-20-8.

Rochan Oil company has a rig up for its No. 7 on Coats, 15-20-6.

Ed Reese is drilling at 700 feet in his No. 2 on the Miller in 4-20-7.

Smith & Steinberger are drilling at 300 feet on the Smith & Steinberger fee in 22-20-7.

Fisher Oil company No. 5 in 19-20-8 is drilling at 500 feet.

Burkett & Gowland on the Storm in 19-20-8 are down 950 feet. Charles H. Burton is drilling at 450 feet on the Hardy in 20-20-8.

Prairie Oil & Gas Co. has a rig up for its No. 2 on Ham 15-20-7.

Black & Bleslyn are down 300 feet in their No. 1 on the Beasley in 19-20-8.

Prairie Oil & Gas Co. is drilling at 1,700 feet on the Burton in 15-20-6.

The Kanola Oil company on Colburn in 19-20-8 is drilling at 1,400.

Gilbert & Martin on the Storm, block 1, are down 1,450 feet.

Smith & Steinberger are drilling at 300 feet in their No. 1 on their fee in 22-20-7.

Westerly on the Wallace, 27-20-6, is drilling at 1,000 feet.

Eaton and associates are drilling at 850 feet on the Langston, 30-28-8.

Bliss, Parris & Whitten are drilling at 2,100 feet in No. 1 in the northwest of the southwest of 13-20-7. They had a showing for a 25-barrel well in the Cleveland sand.

Indian Territory Illuminating company is drilling at 3,300 feet in the northeast of 33-20-6, H. Caesar allotment.

Westerly Oil company is drilling at 2,960 feet on its test on school land in the northeast of the southeast of 33-20-6.—Jennings News.

NOTICE OF SALE OF PRODUCING OIL AND GAS LEASE BY GUARDIAN.

Notice is hereby given that in pursuance of orders of the County Court of Tulsa County, Oklahoma, entered on the 27th and 28th days of September, 1922, in the Matter of the Guardianship of George Herbert Ward, a minor, the undersigned, as guardian of the estate of said minor will sell at public sale to the highest and best responsible bidder, subject to the confirmation of said County Court, on the 11th day of October, 1922, at 10 o'clock a. m., in open court in the Court Room of the County Court at Tulsa, Oklahoma, a lease for oil and gas mining purposes upon the following described land situated in Tulsa County, Oklahoma, to-wit:

The East Half of Southeast Quarter of Southwest Quarter, and Southeast Quarter of Northeast Quarter of Southwest Quarter of Section 12, Township 21, Range 12 East, containing 30 acres, more or less, according to the Government Survey.

For a term of one year, and as long thereafter as oil or gas is produced in paying quantities, bearing a royalty of one-eighth of the proceeds of all oil and gas. The sale will be had for cash, or if the purchaser desires, one-third of the purchase price may be paid in cash and one-third one year from date of confirmation, and the balance in two years therefrom, such deferred payments to draw interest at 6% per annum, payable annually, and to be secured by a first mortgage on the oil and gas lease sold.

There are six Bartlesville Sand wells on this land, making about 9 barrels gross. A fifteen-year Departmental lease recently expired and the old lessee will have the right to remove all surface equipment and pumping outfit.

Developments in the vicinity of this land indicate that production might be encountered in the Burgess or the Wilcox Sand. None of the wells now on the land have been drilled to the depth of either of these sands. Copies of the old lease and the pipeline runs for the past several years may be seen at the office of Moss & Owen in the Palace Building, Tulsa, Oklahoma. The undersigned lives on the land, which is about one mile North and one-half mile East of Sperry, and will at any time give any person interested such information as he has pertaining to the production.

J. J. WARD,
Guardian of the Estate of
George Herbert Ward, a Minor.

Steinberg Bros.

A CLEAR COMPLEXION

Ruddy Checks — Sparkling Eyes—Most Women Can Have

Says Dr. Edwards, a Well Known Ohio Physician

Dr. F. M. Edwards for 17 years treated scores of women for liver and bowel ailments. During these years he gave to his patients a prescription made of a few well-known vegetable ingredients mixed with olive oil, naming them Dr. Edward's Olive Tablets. You will know them by their olive color.

These tablets are wonder-workers on the liver and bowels, which cause a normal action, carrying off the waste and poisonous matter in one's system.

If you have a pale face, sallow look, dull eyes, pimples, coated tongue, headaches, a listless, no-good feeling, all out of sorts, inactive bowels, you take one of Dr. Edwards' Olive Tablets nightly for a time and note the pleasing results.

Thousands of women and men take Dr. Edwards' Olive Tablets—the successful substitute for calomel—now and then just to keep them fit. 15c and 30c.—Advertisement.

With the Oil Men

Richard H. (Dick) Earnest, former general manager of the Manhattan Oil company, has returned with Mrs. Earnest from a motor trip to Los Angeles. They left Tulsa about the middle of August and went by way of Denver and Salt Lake City. On the return trip, which required 10 days, they took the southern route. Dick says he enjoyed the trip, but will take the train next time.

Sam Martin of the production department of the Texas company returned Sunday from a week's trip to the company's properties in Greenwood county, Kansas, and left last night for another jaunt into Kansas—Butler county this time.

Utah Ordered East.

LONDON, Oct. 9.—The American dreadnaught Utah which has been at anchor at Gibraltar nearly a week awaiting a destroyer flotilla from the United States has been ordered to proceed immediately to the near east, said Central News dispatches from Gibraltar today. American naval officers who are on leave have been ordered to report to the Utah at once.

Bill Hart Seriously Ill.

LOS ANGELES, Oct. 9.—The condition of William S. Hart, screen star confined to his bed as a result of an attack of typhoid fever, with complications, as described as still critical today by Dr. L. Joseph Roth, one of the physicians in attendance. His sister, Miss Mary Hart, is in constant attendance at Hart's bedside.

Jail Nearly Completed.

Special to The World.

PRYOR, Oct. 9.—The new twenty million Mayes county jail is nearing completion and will soon be ready for the prisoners, who have been scattered in various prisons, Wagoner, Muskogee, and other places. The structure is across the street from the new $165,000 courthouse recently completed. The old steel cells were taken from the old jail and are being used in the construction of the new building.

Willie's caugh grew worse and worse,
There were noises in his chest;
Then we called the doctor in—
Shook his head; "Send Willie west."

BETTER THAN WHISKEY FOR BAD COLDS

New Elixir, Called Aspironal, Medicated With Latest Scientific Remedies, Used and Indorsed by European and American Army Surgeons to Cut Short a Cold or Cough Due to Cold and Prevent Complications.

Every Druggist in U. S. Instructed to Refund Price While You Wait at Counter if You Cannot Feel Relief Coming Within Two Minutes.

Delightful Taste, Immediate Relief, Quick Warm-Up.

The sensation in the drug trade is Aspironal the quick-acting cold and cough reliever, authoritatively guaranteed by the laboratories; tested, approved and most enthusiastically indorsed by the highest authorities and proclaimed by the common people as ten times as quick and effective as whiskey, rock and rye or any other cold remedy they have ever tried.

All drug stores are now supplied with the wonderful new elixir, so step into the nearest drug store, hand the clerk half a dollar for a bottle of Aspironal and tell him to serve you two teaspoonfuls. With your watch in your hand, take the drink at one swallow and call for your money back in two minutes if you cannot feel relief coming within the time limit. Don't be bashful, for all druggists invite you and expect you to try it. Everybody's doing it.

Take the remainder of the bottle home to your wife and babies, for Aspironal is by far the safest and most effective, the easiest to take and the most agreeable cold and cough remedy for infants and children as well as for adults.—Advertisement.

THE BANKERS LIFE

of Des Moines, Ia.

WANT A RESIDENT AGENT

In every county in eastern Oklahoma

Unusually favorable policies to the insured. Especially attractive to business and professional men. A good man of standing can make a desirable connection.

OZARK GATEWAY IS VINITA'S TITLE

Craig County Business Men Proud of New City Slogan

Special to The World.

VINITA, Oct. 9.—This city is to be heralded over the country as "The Gateway to the Ozarks," according to action taken at the noon luncheon of the directors of the chamber of commerce, when Dr. Felix M. Adams, superintendent of the Eastern hospital for the insane, was appointed chairman of a committee to place road signs, issue pamphlets, and generally publish to the world this city's peculiar location as the gateway to the hill country.

Vinita men have long taken a great interest in the Spavinaw hills in Delaware county a few miles to the southeast of this city, and there is scarcely a day during the summer but that some Vinita people are in one of the club houses in the Spavinaw country. There are the finest streams there to delight the fisherman, and the huntsman finds an equal joy there.

The Tulsa water project to pipe the clear sparkling water from the Spavinaw river to that city at an expense of $2,000,000 has drawn much attention to that part of the country, as has also the proposition to place an immense dam across Grand river near Ketchum and furnish power for all northeast Oklahoma. Doctor Adams will let the public know that the best way to reach the country is by way of Vinita.
