LATE TELEGRAMS.

[SPECIAL TO THE HERALD.]

The Present Rain Storm Up the Coast.

SAN BUENA VENTURA.

SAN BUENA VENTURA, Jan. 2.—Ventura's New Years opened gloriously. After twelve hours and a half of a gale from the southeast, the rain at seven o'clock yesterday morning commenced descending in torrents, accompanied by thunder, lightning, and occasionally hail. All day long and during most of the night it poured unceasingly, giving up to nine o'clock this morning 3.39 inches for the twenty-four hours. It has now temporarily ceased, but with no indications that the storm is over. During yesterday the lightning followed the wires into the telegraph office, making a long repair, and thence through the operator, disabling all companies by burning. Fortunately the operator was not at her desk at the time, and the only damage done was the melting of a portion of the brass work on the switch. Had she been in her accustomed place the result might have been fatal. This rain comes exactly at the right time for our farmers and, unless followed by hot norther's from the desert, insures a good crop.

SANTA BARBARA.

SANTA BARBARA, Jan. 2.—It commenced raining early yesterday morning and rained almost steadily all day and last night. There fell 2.06 inches up to this morning.

LOMPOC.

LOMPOC, Jan. 2.—About two inches of rain have fallen here up to this morning.

SAN LUIS OBISPO.

SAN LUIS OBISPO, Jan. 1.—A heavy southeast wind set in yesterday, increasing through the night to a gale. Up to this time (12 M.) 1.50 inches of rain have fallen, making a total for the season to date of 5.58 inches. It is still raining, with a light southeast wind, with a good prospect of continuing through the day and night. Farmers and all others are jubilant over the very flattering prospects, as twice as much grain is already sown as in any previous year.

Miscellaneous Items.

Malone has bought a silver mine. That man always wants to run something with assessments in it.

Courier-Journal: Mr. Conkling is said to be at the theater often. Not a few persons would like to see Roscoe go [illegible] on Freddie Gebhardt.

Mrs. Ray, the first woman who went to Leadville, dug in the mines, scoured the plains as a scout, took in washing now has a fortune of a million and a pretty daughter to will it to.

The Czar of Russia has revoked the privilege given to the Lutherans of the Baltic provinces by his father of bringing up their children in their own faith when married to a Russian subject of the Greek faith.

Jay Gould's bright son has been lavishing diamonds on Langtry. Thus do we see the kindly dispensation of nature which will prevent the old gentleman from securing and holding all the real estate and movables of the country.

Prominent people who subscribed to the $50,000 fund for building a road from that city to connect with the Atlantic and Pacific, are withdrawing their subscriptions from the bank, having lost all faith in the promoters of the project.

In some places in Europe steel bars are used in preference to bells, supplanting them sometimes altogether in church steeples, and producing very pure, distinct and melodious sounds. An English writer even advocates their general use on the ground that, while in point of sonorousness they are equal to the common bell in certain other respects they are to be preferred to it. Their weight will be light in comparison with the ponderous objects they are to replace; they will not burden the steeple so much, and, consequently, will give more scope for architectural design; their winding and hanging up will not be so difficult, dangerous and expensive; they are not liable to crack, as is the case with bells, and are, therefore, adapted for use in any climate; they can also be operated by a simple mechanical contrivance. They are also much cheaper than bells.

It is reported that an inexhaustible supply of water has been obtained in an artesian well bored in Colorado, about one hundred miles east of Denver, and the San Francisco *Call* remarks that this intelligence is of vastly more importance than if the eight feet of gravel which serves as conduct this stream of water was filled with gold dust. There is a vast region between Denver and Salt Lake which is sterile for lack of water. That a large portion of this region will yield to cultivation, if water can be obtained for irrigation purposes, is certain, and the needful supply seems to be assured.

"Look here," said the Governor to a high State official, "when are you going to pay me that ten dollars?" "Upon my honor, Governor, I don't know." "Why, sir, the other day, when I mentioned the fact of your indebtedness, you asked me where I would be Tuesday. Wasn't that a promise that you would pay me on Tuesday?" "No, sir." "Why, then, did you want to know where I'd be Tuesday?" "Because I wanted to know where you'd be, so I could make arrangements to be somewhere else."

Mr. Tennyson has experience behind the scenes of theatres. During rehearsals of "The Promise of May" he was shown a dressing-room at which he gazed musingly, and remarked: "Here, then, the ladies put on their feelings." Rosy cheeks sometimes turn in the same direction as those of stockbrokers or members of Congress.

A Wisconsin millionaire divided his estate among his three children, with the proviso that half of each portion is to be kept by trustees until the child to whom it is left is 30 years old, and then is not to be delivered until proof is given that at least one-half of the portion previously paid has not been squandered.

LINES OF TRAVEL.
