November Colds.

This is the month when most of the colds start. You ever hear people say their cold hangs on all winter? It would be a terrible thing to think of a November cold extending along until March. It is useless, for our La Grippe Tablets will break up a cold with a very few doses and leave no bad effects whatever. We recommend it continually to our customers for we have more faith in it than in any other cold remedy which is at our disposal.
