VISCOUNT CHINDA TO VISIT BRYAN

JAPANESE AMBASSADOR AWAITING OPPORTUNITY PRESENT PROTEST

RECOMMEND NEW TREATY

SUGGESTED BRYAN MIGHT TAKE THIS METHOD OF SETTLING THE DIFFERENCES THAT HAVE ARISEN

By Associated Press

WASHINGTON, D. C., May 7.—First among Secretary Bryan's callers when he reaches Washington tomorrow will be Viscount Chinda, the Japanese ambassador. He has been assured that the ambassador is waiting an opportunity to deliver in person to the secretary of state a protest from his government against the California alien land legislation.

But is is believed now the efforts of Chinda will be to get from the secretaary some idea of what the administration intends to do after governor Johnson signs the land bill.

Before answering, Bryan will confer with Wilson.

It has been suggested that to avoid a Japanese protest Bryan might recommend a new treaty with Japan to replace the one of 1911 which has been unsatisfactory to both parties. A new treaty, expressly disclaiming the rights of citizens of either country to acquire real property in the other, might meet the needs of the case and save Japanese pride by removing the grounds for the charge of discrimination.

It is pointed out that this plan would work a hardship upon American interests now established in Japan.

ST. LOUIS GIRL WEDS TITLED ENGLISHMAN.

ST. LOUIS, Mo., May 7.—Sir Wilfrid Peck, typical young Englishman of title with a passion for globe-trotting and big-game hunting, today claimed a St. Louis girl, Miss Edwina Thornburg, for is bride. The wedding took place this afternoon at the First Presbyterian church, and was a most brilliant affair. The Rev. Dr. W. J. McKittrick, pastor of the church, officiated. The bride had her sister, Mrs. John H. Holliday, as matron of honor, and two of Sir Wilfrid's sisters were among the bridesmaids. Mr. Arthur Benyon of London acted as best man. Following the ceremony at the church a large and brillant reception was held at the home of the bride's mother, Mrs. William C. Stribling.

The wedding of Miss Thornburgh and Sir Wilfreg Peck is the culmination of an interesting romance. The pair first met while Miss Thornburgh was traveling in Europe. An acquaintance and courtship followed and soon the engagement was announced. Sir Wilfrid was hunting in India when he received a cablegram from Miss Thornburgh naming the wedding day. He caught the first liner from Calcutta and arrived in London on April 14. In London he found a great array of wedding presents waiting for his bride, including thousands of dollars worth of gold and silver plate from relatives and friends.

Sir Wilfrid had the presents packed in two large boxes, intending to bring them to St. Louis to display at the wedding and then take them back to England. But on his arrival in New York he found that he could not bring them into the country without paying duty amounting to almost fifty per cent of their value. So he left them there, and will reclaim them before he departs with his bride for England a few weeks hence. The couple will make their home at Sir Wilfrid's estate in Devonshire.

FARMERS PROTEST AGAINST TARIFF

OBJECT TO REDUCTIONS ON COTTON MANUFACTURED GOODS

AUSTIN, May 7.—At the meeting today of the 300 delegates here attending the district conference of the Farmers' Union, resolutions were adopted protesting against certain provisions of the Underwood tariff bill now pending in congress. Special stress was laid on the proposed reductions to be made on cotton and cotton manufactured goods, the farmers claiming this will result in a decline in the prices of these products and commodities.

The Texas delegation in congress was urged to be slow in the adoption of these schedules and if possible to oppose them.

John Mitchell, Leader of Miners

NEW YORK, May 7.—John Mitchell, the noted labor leader, and one of the few who have not been denounced by capitalists as agitators, has become a political football in New York State, and is being kicked around from Governor William Sulzer to Charles F. Murphy, boss of Tammany Hall, and back again. Tammany Hall, which all through its career has made it a habit to cater to labor leaders, has actually trampled on one of the most promient of them. However, this is not because any one in that organization has objected to Mitchell—Tammany would be glad to have him within the organization.

But Governor Sulzer and Murphy are now in open warfare. The governor nominated Mitchell for state commissioner of labor without the indorsement of the leaders of his party. He named some others for office who were disliked by the leaders. Thus, Murphy, who controls the State Senate, has seen to it that the governor's nominations were rejected. Mitchell was a mere political victim. Rather thna to give in to the governor Tammnay took the chance of alienating the thousands of friends Mitchell has among organized labor men of New York.

Mrs. John Kamb Is Given Fortune

Mrs. John Kamb, a pure type of an Irish lassie, awoke one morning in her home in Washington to learn that there was $18,000 in a Washington bank for her and a deed for a home.

"The fairy women sent it to me," she explained.

Months ago there arrived in Washington a mysterious Mlle. Suzanne Frochard. She was ill and she needed friends. But seemingly she had not money. That didn't keep Mrs. Kamb from pouring out her sympathy and doing as much as she could. Later Mlle Frochard recovered. She said that many years ago—she is now an old woman—she was taken from a convent by Turkish soldiers and sent into the harem of the Sultan of Morocco. After four years she escaped. Her father had died in Toulon, leaving her a good property. In Mexico she increased this by fortunate mining investments.

Apply Psychology to the Job Hunter

Dr. Leonard P. Ayres has just written for the United States Bureau of Education a summary of practical psychology, that is psychology as applied to the man who wants a job. Psychology, he insists, may determine wheter or not a candidate for a place as motorman on a street car or a chauffeur is worthy of the job. He calls attention to the fact that Professor Musterberg of Harvard tested motormen in Boston and found out by psychological tests that 2 5per cent of the candidates had to be eliminated. S. E. Thompson used psychological tests "called reaction time tests," in selecting girls to pick flaws in th esteel balls used in ball bearings.

Dr. Ayres sees great possibilities in psychological tests for choosing the right presons for jobs. He says:

"When the best possible adjustment shall have been attained between work and workmen each one will have his full opportunity to [illegible] at least [illegible] for commonwealth and common weal. The task of the world will be better done and the workers will receive greater rewards, deeper joy and fuller satisfaction in their doing.
