WEDNESDAY, : JANUARY 18, 1893.

THE NEW ERA.

Tuesday, the 17th day of January, 1893, will go down to history as one of the most eventful of all days in Hawaiian annals. The people, weary of the conspiracies, usurpations, scandals, and encroachments upon their rights and liberties which have marked the last years of the Hawaiian monarchy, have asserted the prerogative inherent in every people to determine the form of their own government, and have done away with the monarchy.

The reasons for this action are so obvious as to need no statement. They have been lived by us all. Year after year, we have had to patch up, and patch up, the free Constitution which a Monarch has been busy in tearing down. The proclamation issued from the Government Building yesterday afternoon contains a concise sketch of the political development of the last few years, which everyone should read and re-read. It shows that the spirit of the people which for years ago I met a government of the people who tried to govern which everyone some people down to the level of average intelligence as much about the average of yesterday was civilization as the people. I'm very sorry he told me the inevitable consummation of these years, something which bitter experience has at last convinced everybody to be a necessity. The necessary has been perceived—the great mass meeting of Saturday perceived it—and it has become fact.

The change which has taken place, though carried out by the foreign population, is not in the interest of any class, section, creed or nationality, but will inure to the benefit of all. Many of the native leaders have themselves perceived this to be a fact, and some few of them have had the courage to express it. The Hawaiian monarchy perishes by its own fault. It dies for lack of the vital virtues which alone can keep any system of government in being. If its ruler had possessed the qualities which belong to constitutional kingship it might have lived and flourished for years. But those to whom the sovereignty in these latter days has fallen did not possess the qualities referred to. They were usurpers, and they usurped once too often.

Hawaii will not lose her real independence by becoming a member of the American Union. The rights of the meanest citizen will be guaranteed as they never have been before. The people rule in the United States and they will rule in Hawaii when she is an integral part of the Union. Every native-born Hawaiian will be entitled to all the freedom, all the immunities and rights enjoyed under the American Constitution by the whole body of citizens. There is no colorable ground for pretending that the movement which was carried to a successful issue yesterday is for the benefit of white men only. It will benefit all, and the rank and file of the people more than anybody else. The United States of America is the country of the poor man—the one country in the world which affords everybody an equal chance. Under its broad ægis this weary nation will at length find peace.

It is a matter for profound thankfulness that the blow which was struck for popular right yesterday has not cost a single life. There is no feeling of bitterness toward Hawaiians, but on the contrary—one of aloha only; and none would have regretted the shedding of Hawaiian blood more sincerely than the very men whose energy has in a single day established a government which is now not merely the only actual but the only recognized government in this city. Every decent man of foreign blood in this country wishes to live on terms of peace and friendliness with the native people, and the form of government now sought to be established is the only one, as years of rude experience have taught, under which the harmony which all desire can be attained. The United States has been for fifty years an unfailing friend of Hawaii. On the day when the connection of a half century becomes closer, and Hawaii enters into the family of States, as a territory or otherwise, her political troubles will be at an end. Her credit will be secure, her industries will revive, and she will enter upon the career of prosperity, which the bountiful gifts of nature have marked out as her own.

Let those then who have carried this movement so far, quit them like men and be strong. To courage and pluck all things are possible, and if this community shows by its course during the days to come, that it possesses these qualities, the blessings which it has won cannot be wrested from it.

WRECKED BY A CYCLONE.

A dispatch from Managua, Nicaragua, of December 7th, says: The Prefect of Cabo has rendered a report to the Secretary of the Interior of the effects of the terrible cyclone that visited that place on the 19th of December. The report says:

"This town was almost totally destroyed by a horrible hurricane that during sixteen hours caused the most terrific havoc to the residents. The cyclone was so intense that water from the ocean inundated the streets and houses, and the [illegible] caused the destruction of nearly all the national edifices and dwellings. The overflowing of the Segaria river was also a powerful agent in the annihilation of this pretty town. The impetuosity of the current tore up by the roots colossal trees and floated them into the town, where they did untold damage by acting as battering rams on the buildings already dissolving to their foundations.

"It is impossible to describe with exactness the heartrending picture that was presented during this memorable night. The cyclone increased in intensity as the hours advanced. The waves washed the streets, causing at an early hour the destruction of all the lamp posts, thereby increasing the horrors of the situation by the loss of all the light in the town. The great wharf which had just been completed was torn from its foundations and cast upon many buildings, crushing them to atoms. The darkness, the rain, the ocean waves and the great quantity of trees and lumber floating around made it impossible for the people to move about. Cries of agony were heard in every direction.

"The Inspectors' Building was the house of refuge for the greater part of the people who had at an opportune moment, abandoned their homes and also for the stragglers who were brought there by the police. The building was entirely full of suffering people. The cries of the women were agonizing in the extreme. At times there were persons of both sexes, who believing their salvation impossible in the storm-battered edifice, desired to cast themselves into the raging torrents that surrounded us on all sides. At 3 o'clock in the morning the cyclone had completed its destructive object. The wind blew a gale and the rainfall was torrential, and had the situation at this period been prolonged the people in the building would have died from cold, the air being at a freezing temperature. At daybreak the situation was more favorable, but still the streets ran torrents and heaps of debris alone marked the place where edifices before stood. The cyclone caused still greater destruction at Sanoy Bay. All of the houses occupied by fishermen were destroyed. Two people perished and many were badly bruised, and may die. The destruction is general in the entire district, and the people are suffering for want of food and medical attention."

J. Emery McLean, an employee as proofreader in the publishing house of the American Bible Society in New York, reads proofs in 242 languages. He is a native of Canada, 30 years of age, 6 feet 2 inches tall, and draws as salary $21 a week. In a summary of his most difficult work, Mr. McLean says: "The Chinese, Japanese and Calmnc or Western Mongolian have become more or less familiar to us all in books; but the sight of the Chippewayan always makes me feel as if I needed a new set of jaws. The ancient and modern Armenian languages are each a cross between the razzle-dazzle and the ta-ra-ra-boom-de-ay dances.

There have been eight deaths in the White House since its erection: President William Henry Harrison, Mrs. Tyler, wife of President John Tyler, who became President through W. H. Harrison's death; President Zachary Taylor, "Tad" Lincoln, son of the President; Mr. Dent, father of Mrs. Grant; Minister Allen, of Hawaii; Mrs. Harrison and Dr. Scott.—Phila. Record.

A QUESTION OF HEALTH

By last steamer our stock of Dr. Jaeger's Underwear for men has been replenished.

We are now prepared to fit any one be he a dude or heavy-weight.

You've been suffering long enough from that horrid cold; you've spent a small fortune for patent medicines and doctors' advice for that chronic rheumatism. Let us prescribe for you, we know what ails you. You're wearing underwear of dead vegetable fiber, no wonder you're sick.

Let us advise you to make a change. You should wear under garments of pure animal wool. Nature so intended it, but you've been running contrary to nature until at last, she has broken down. Do you wonder at it? Let us tell you something: Animal wool is the material devised by nature for animal covering and possesses, as the simplest experiments will prove the valuable quality of not attracting or retaining the noxious mal-odorous matters, which the animal body exhales. Moreover being a slow conductor of heat animal wool does not chill even when damp. Some friend will perhaps tell you that woolen under clothing is too hot for this climate. Don't be misled. That all-wool clothing protects the body from chill is intelligible to every one, but it is a common error to suppose that such clothing is hot in summer. Heat is felt to be oppressive when the natural action of the pores is hampered and the exhalation cannot escape.

If the covering is impervious there is a strong desire to throw everything off from the stifled skin; but the wearer of porous woolen covering through which the skin can breathe is no more oppressed by it than is a cricketer by his flannels, which every athlete knows to be the coolest, safest, most comfortable wear for violent exercise in hot weather.

If you value your health, don't delay, but encase your body in garments of pure animal wool as made by Dr. Jaeger, and for sale by

M. McINERNY.

E. O. Hall & Son, L'd.

January, 1893.

Do you want the wheels of your buggy, brake or dray to run smoothly this year? Of course you do, you ain't in love with a hot box and a wheel that won't go round. Just try a bottle of Climax Axle Oil and see how it works. It is far better than castor oil, which is generally used, and is sold for just half the price. This oil has been well tried here and no one once using it will go back to castor or axle grease. We can sell it to you by the bottle, gallon or 5-gallon tin. If you still prefer castor oil or axle grease we have them both in any quantity.

We have just added 51 doz. Paint Brushes to our stock, and can now furnish you any kind from a cheap white-wash to a fine all-bristle paint or varnish Brush.

We also have a new lot of Carriage Gloss Paint, and your buggy will need touching up when the weather gets settled.

Galvanized Iron Padlocks are much better to use out of doors than the ordinary japd. iron locks. Our new lot has just been opened.

Gentlemen who shave themselves know how important it is to have a good strop, and we are selling a new style Strop, which several [illegible] say beats anything ever brought here. This strop is purchased by the Commissary-General, U. S. A. for use throughout the entire army of the United States, and is supplied to the entire corps of Cadets at the Military Academy, West Point. Try one of these strops and you will never use any other.

The patent Clothes Rack we sell is just the thing to use this wet weather. You can set it up before the stove in a moment, dry out the clothes you got wet in that last shower, and in another moment you can fold up your rack and stand it up behind the door.

Garden Trowels we have been out of some weeks, but the last steamer brought us a new lot, also Pointing Trowels, Disston's Saws, Butchers' Spring Balances, assorted Tailors' Chalk, Brown & Sharp Horse Clippers.

We now have a new lot of steel and brass, long spout Locomotive Oilers, the last lot having all been sold the day they were received.

A new lot of Binoculars and Field Glasses, you will find well worth looking through. We have them all prices; also yacht and pocket Compasses, Maximum and Minimum Thermometers.

Brush Door Mats, just the thing for this season of the year.

We are almost out of those Linen Lariats, but have several dozen already invoiced which we expect on the next steamer.

We will have a Gil Net on the next steamer 1000 ft. long by 9 ft high. This one is sold to arrived but we can take your order for any size net. We lately sold a large net which paid for its entire cost in two hauls. Who says fishing don't pay? We have just received a new lot of fine Linen Gilling Cord for repairing nets.

Hall's Cane Knives, plain or hooked are useful at this time of year, as the cane must be cut. This brand of knives is made especially for this market, and lasts twice as long as many of the lighter made knives of poor metal.

Don't forget that our stock of Lubricating Oils is very large and varied. Anything from pure Strained Sperm to Carbox Oil in barrel, case, or gallon, or bottle lots. Our stock of SHIP CHANDLERY has been added to quite extensively of late and is now the largest and most complete in these Islands.

A Tonic

Dr. Ephraim Bateman of Cedarville, N. J., says of

Horsford's Acid Phosphate.

"I have used it for several years, not only in my practice, but in my own individual case, and consider it under all circumstances one of the best nerve tonics that we possess. For mental exhaustion or overwork it gives renewed strength and vigor to the entire system."

A most excellent and agreeable tonic and appetizer. It nourishes and invigorates the tired brain and body, imparts renewed energy and vitality, and enlivens the functions.
