STATE NEWS

WILL OPEN UP FIELD

Drilling Machine Now on Ground and Development Work Will Follow.

Mt. Pleasant, Aug. 13.—Progress is being made toward the development of the oil fields owned by the Mt. Pleasant Oil & Gas company, located near this city, and something definite is now assuredly a matter of only a few weeks.

The drilling machine, ordered in April from Akron, O., reached this city Tuesday. It was unloaded yesterday and this afternoon and tomorrow will be taken to the scene of the future operations. It is called a Star drilling machine and is complete in all respects, having the driller, derrick ropes, a twenty-horsepower engine and all other accessories. It cost the company purchasing it $3,200 f. o. b. Mt. Pleasant. It is said to be one of the largest and best machines of the kind in the state.

It is expected that a week's time will be required to get the driller in place, arrangements made for running it, securing water, etc., so it will be the latter part of next week before active drilling is under way.

According to estimates, about fifty feet per day will be made by the drill. This would require about thirty days to get down to where the oil bed should be found, according to the expert's estimate, which is that the oil will be found 1,500 feet below the surface. The company has an expert driller, a resident of Salt Lake, who has had much experience in matters of that kind, to operate the machine for them. The gentleman is on the ground now overseeing the setting up of the machine.

Reports from Chester last evening were that the danger of damage from the grasshoppers this year is over in that section. The damage done so far this year has been, thanks to the determined stand taken by the residents there, merely nominal. The hoppers have been kept in the meadows below the town, where wild or natural grass grows, and the grain fields have thus been protected altogether. According to the reports, the hoppers have been present there this year in as great numbers as ever before and but for the effective work would undoubtedly have taken everything, besides gaining a foothold which would have meant the destruction of all crops in this part of the valley for several years.

THREE MASKED MEN ROB GAMBLING HOUSE AND SALOON AT BAKER CITY

Baker City, Ore, Aug. 13.—Three masked men entered the Miners' Cabin saloon this evening at 9 o'clock and robbed the gaming tables in the back room and the cash register in the front room of $380 cash. The robbers entered the gambling room through the rear door. As the leader of the gang entered the front room J. T. Donnelly, cashier of the First National bank and Bela Kadish, a mining operator, who were having a lunch in the room, observed the masked man with the gun as he pushed through the door. Donnelly and Kadish made a dash for the front door with the robber in hot pursuit. He covered Donnelly with his gun and tried to prevent him from leaving the building. Donnelly refused to halt and the robber did not fire at him. Kadish dodged behind the two large slot machines.

The robber ran behind the bar to the cash register and was taking the money out when Ike White, an architect, who was standing in frot of the bar, picked up a cracker bowl which he threw at the robber, striking him on the shoulder with such force that the fellow dropped a portion of the money on the floor. The robber turned and ran out the back door where he was joined by his pals and they made good their escape. There were about forty people in the saloon and gambling room at the time. In the gambling room the other two robbers worked swiftly but quietly. None of the men said a word. The entire transaction was over in less than three minutes. The officers can get no trace of the robbers tonight.

Reflections of a Bachelor.

(New York Press.)

A woman has ideas till she gets married; a man after he gets married.

The average man saves money one place so as to be able to put it where he is squandering it somewhere else.

It takes a woman to convince herself that what is a scandal for some other woman to do is only an indiscretion when she does it.

The man who couldn't guess to save his life what kind of stockings his wife wears can always tell what kind any woman has on he sees get on a street car.

A girl has such will power about some things that she will let a man go on making love to her when a mosquito is biting her knee without ever letting him know it.

FIERCE RACE RIOT.

Many Injured in a Pitched Battle at Whiting, Ind.

Chicago, Aug. 13.—More than a score of men have been arrested for inflicting severe injuries on at least half a dozen men in a fierce fight in Whiting, Ind. The trouble was an outgrowth of a factional quarrel between members of the Slavic races, laborers for the Standard Oil company. Warrants for fourteen others will be served today.

The riot was the culmination of a series of battles, in several of which serious injuries were sustained. The police cannot learn the cause of the quarrel. They understand it originated in Europe, and that the Slavs are fighting for a principle.

On one side are Servians, Hungarians and Croatians. On the other are those designated only by the generic name.

Following several battles in saloons and picnics a party of Slavs and another of the allied races met yesterday in Schraag avenue, a street dividing the settlements. Scores engaged in battle and hundreds watched the fight. The police made a dozen arrests, and a number of the Servian faction were arrested later on warrants.
