MINES AND MINING STOCKS—FINANCIAL AND COMMERCIAL

STRIKE IN THE MOUNT MASONIC

Park City Property Has 400-Ounce Rock in Its Tunnel.

COPPER IN THE STAR CON.

IMPORTANT DISCLOSURE REPORTED ON 700 LEVEL.

The ledge was cut in the Mount Masonic company's property at Park City Monday, and Superintendent George M. Hasson, who was in the city yesterday, states that conditions augur well for making a big mine. Where cut, the vein, which is a contact between lime and quartzite, is four feet wide. Clinging to the footwall is about six inches of fine chloride ore, selected samples of which show 400 ounces silver and 14 per cent lead.

To reach the vein the tunnel was driven a distance of 625 feet. This opens the ledge at a vertical depth of something like 400 feet and approximately 650 feet on its dip. Drifting will now be the order of the day, and Superintendent Hasson is confident of breaking into a big ore shoot before long, as the entire four feet of ledge matter is very highly mineralized as it is.

This property lies between a group of claims patented several years ago by Senator Thomas Kearns and the railroads running into Park City. The mouth of the company's tunnel is only a few hundred feet distant from the railroad tracks and just north of the town. The development of the ground was first undertaken by the Corona company, which was afterwards reorganized as the Mount Masonic. It is south of the Steele Consolidated, in which Judge Morris Sommer lost his life a few months ago. The making of a mine there means the bringing out of a section that has long been considered valuable, but which, up to the present time, has not made the showing that the general mineralization of the hill indicated it ought to do. Further developments will, therefore, be watched with more than passing interest.

COPPER IN STAR CON.

Important Disclosures Reported on 700 Level of Property.

While the management of the company is keeping very mum on the subject, the news has leaked out that disclosures of importance have just recently been made in the Star Consolidated company's mines at Tintic. From a source entitled to consideration, but which The Herald is not at liberty to use at this time, it is learned that a strike has been made on the 700-foot level of the property, which is significant because of the fact that the ore carries fine values in copper, as well as gold and some silver.

Within the past few days one man has broken down a carload of this ore, and it is now said to be headed for market, along with three cars of the ordinary second-grade rock, such as has been coming along at intervals ever since the present management got control of the mines. The new strike, it is believed, is going to prove very important to the Star, as it is something different from anything ever found in the mine before.

The stock of the company has been in quiet demand for several days, and, from about 13 it has advanced to nearly 16c, the evident intention of those on the inside being to pick up cheap stock and then release news of the strike.

PIOCHE WILL BOOM.

So Declares Peter Porter After a Week's Trip Around the Camp.

Peter Porter returned from a week's trip to Pioche yesterday morning. He went down especially to make an examination of a certain piece of property which, if his samples pan out right, may be taken hold of. On that subject, however, Mr. Porter declined to talk.

While in camp he took occasion to inspect several properties, among them the Half Moon, Abe Lincoln, Mendah, Prince and others. He found conditions very interesting and regretted that he could not spend another week in the district.

"There are some mighty fine properties down there," said Mr. Porter, "and if the San Pedro would now jump in and build a branch from Caliente it would be no time till the camp was enjoying a boom. The boom is coming, anyhow, but the railroad company could materially hasten its arrival by providing rail connection with the camp.

"There are quite a number of mines which could supply a good tonnage now, and the number would be rapidly increased, and those working modest forces might double up and make things hum if they had the assurance that their ores could be marketed without having to stand a long wagon haul."

BIG COTTONWOOD LOCATIONS.

Several Promising Claims Secured Near Mouth of Canyon.

A group of nine claims has just been located in Big Cottonwood canyon, about one mile above the Telluride company's power plant, and the owners are so confident that they have a good thing that men have been placed at work and a company is to be formed to handle the ground right. The owners are Benjamin Rose, M. A. Godwin, I. R. Sheets and E. C. Prebble.

Croppings from one of the ledges assayed 2.6 per cent copper, 1.2 ounces silver and 28c in gold per ton. The owners declare that selected specimens of the quartz shows free gold in abundance, and they expect to develop something big. The claims are located on the north side of the canyon, where the sun has kept the ground free of snow and allowed uninterrupted prospecting.

BUYS INTO THE SANDSTORM.

Salt Lake Company Gets Davis Interest in Rich Lease.

The Sherman-Goldfield Mines company of this city has just acquired the interest of J. R. Davis in the Loftus-Davis-Mayne lease on the famous Sandstorm mine at Goldfield, Nev., and an option on a big slice of the Lucky Strike, as well. Judge W. A. Sherman, who has recently made his headquarters at the camp in which the mine are located, engineered the deals for his company and, as the Sandstorm lease is one of the richest in the district it means that Judge Sherman and his associates stand to make a fortune. Commenting on the deals Sunday the Tonopah Sun says:

"The Sherman-Goldfield is a corporation recently organized for the purpose of acquiring and developing meritorious mining properties in the Goldfield and other southern Nevada districts, and is composed principally of wealthy Salt Lakers, who for years have made mining a business. Prominent in the company are Judge W. A. Sherman and L. L. Terry. Judge Sherman is widely known as a successful operator, and for many years has been prominently identified with the mining interests in Utah and Idaho. He states that the showings already made in the Goldfield district are amazing, and considers the opportunities for successful mining wonderful indeed.

"With the transfer of his personal interest in the famous Sandstorm lease to this company, Mr. Davis does not entirely sever his connection with it, as he is one of the company's officers and stockholders, and as before will have charge of developments on the lease.

"Another deal of importance which the company has made during the past few days is an option on a large interest in the Goldfield Lucky Strike, which adjoins the Lone Star group on the north. Developments on this property will also be in the hands of Mr. Davis, whose ability is well known.

"The Goldfield Lucky Strike property is owned by the McLaughlin brothers of Goldfield, and by Frisbie & Lawson, the mining brokers of Tonopah, and was lately experted by Mr. Davis, on whose recommendation the Sherman company took it up and will start immediately to develop it."

MINING STOCK EXCHANGE.

Market in Good Form and Trading Brisk and Snappy.

Trading was brisk and snappy on exchange yesterday. A total of 46,816 shares of stock, the selling value of which was $9,424.12, changing hands. The market showed good and the participating stocks covered a wide range.

Bullion-Beck Tunnel sold at 6c, Butler-Liberal at 14c and 13¾c. May Day rose from 6¾c to 7¾c, while Mammoth was let down to $1.16½. New York danced around the 46c mark, while Star Con. was stiff at 15¼c and 15c. Silver Shield opened at 13¼c, advanced to 15½c, and then slacked up, closing at 13c, seller five days and 14c cash. Tetro held its own, while Utah showed strength at 47c to 48c, with Yankee steady at and a little above 35c.

Daly-Judge sold at $6.50 and a few shares of Daly-West were picked up at $15. Wabash sold 100 at $1.95 and 100 at $1.90.

A little activity was shown in a number of Tonopah stocks and there was considerable sparring for some in the lists which failed to score.

Following is the list of final quotations and record of sales made:

SHAFT CONTRACT AWARDED.

Dugway Property to Resume With B. L. Cutler in Charge.

B. L. Cutler was yesterday awarded a contract to sink the shaft on the St. George Copper company's property at Dugway 100 feet or to a connection with the contact vein which was developed on the opposite side of the hill through a tunnel. The shaft is now down 160 feet and it is calculated that another 100 feet will carry the bottom into good ore.

Mr. Cutler, who was formerly in charge of the property, has just returned from a several weeks' trip to the Goldfield country. He went in overland from here and reports that he and his partners were fortunate in getting hold of some most promising ground about twelve miles a little east of south from Goldfield. His partners are now doing the location work on the claims and from surface prospecting they are all satisfied that something big is going to be developed in the near future. The boys have their own assay and blacksmith outfit on the ground and are prepared to work intelligently. As soon as he has completed his contract with the St. George company Mr. Cutler will return to Nevada. He likes the country and says there is every chance to make good money in it.

GATHERING AT PIOCHE.

Court There About to Wrestle With Fay Mine Tanglers.

Modena, Feb. 1.—G. Pray Smith passed through here yesterday en route to Pioche, being interested in the action brought by R. M. Johnson against Messrs. Short and Elliott, in which the former seeks to establish possessory right to the Snowflake mining property at Fay. Mr. Smith's interests are bound with those of the defendants.

With the adjudication of all the legal difficulties with which various properties at Fay, Nev., have been beset for the past year, that camp is destined to forge to the front at a remarkable rate. It is stated on good authority that an abundance of capital is ready to be invested there as soon as all the legal obstacles have been removed, and this term of court at Pioche it is thought will accomplish this.

Joe Hunt arrived yesterday with 8,000 pounds of lead-silver and copper ore for shipment to the sampler at Murray—completing a thirty-ton carload, Christian & Orr being the consigners.

It is reported by what appears to be good authority that the Johnny mill is to be dismantled and moved from Stateline to Tonopah.

Utah Stocks in Boston.

(Special to The Herald.)

James A. Pollock & Co., bankers and brokers, yesterday received over their private wire from Paine, Webber & Co., one of their Boston correspondents, the following copper quotations, comment and record of sales of Utah stocks on the Boston market, with range and closing quotations:

Boston, Feb. 1.—The market today failed to show the continued buying power which was expected, and, outside of Trinity, which was very active this morning, the majority of stocks were dull and slightly weaker. Local traders have lost the enthusiasm which they had for Allouez, and will be inclined on the next upward movement to take hold of Atlantic, Winona, Massachusetts and Michigan rather than any stocks under the Centennial management. Quotations:

	Sales.	Op.	High.	Low.	Close
Bingham	62	$32¾	$32¾	$32¼	$32¾
Boston C.	1,000	6	6	6	6
Con. Mercur	250	.37	.38	.37	.39
Daly-West	355	15½	15½	15¼	15¼
Utah	505	42½	42½	42	42
U. S. Mining	745	22¼	22¾	22⅛	22¼

Ore and Bullion.

Ore and bullion settlements in this city yesterday, as reported by McCornick & Co., amounted to $144,500, as follows: Silver, lead, gold and copper ores, $72,500; base bullion, $59,000; gold bars, $13,000.

Metal Market.

Silver, 60⅝c per ounce.
Copper (casting), 14½c per pound.
Lead, in ore, $5.50; New York, $4.60 per 100 pounds.

Mining Notes.

J. M. Callow went to Butte on a two weeks' trip Tuesday night.

The Pioneer sampler of Sandy yesterday reported two cars of ore from Nevada and three from Tintic.

Two cars of ore from Nevada and two from Tintic were reported at the Taylor & Brunton sampler yesterday morning.

Manager S. M. Levy of the Annie Laurie will leave for camp again this morning, after having spent a few days in attending to business on this end of the line.

Samuel McIntyre, president and general manager of the Mammoth, returned from an extended trip to his Ballock (Nev.) ranch Tuesday night and left for the mine yesterday afternoon.

President John Dern and Director Arthur W. Chesterton of the Consolidated Mercur returned from their visit of inspection to the company's properties on Tuesday night, very well pleased with conditions.

W. B. Jeffs, one of the directors and heavy shareholders in the Columbus Consolidated Mining company, came in from Michigan Tuesday night with the intention of spending several days between here and camp.

Boston News Bureau: The United States Mining company's dividend of 50 cents per share is payable Feb. 15 to stock of record Feb. 3. Books will be closed Feb. 4 to 15, both days inclusive. No statement of earnings was given out. A director says: "The only statement to be given out is that of the dividend."

Professor W. H. Tibbals is in receipt of a letter from E. J. Waugh telling that he has secured a year's lease on a most promising group of claims at Bullfrog. Fifty-dollar ore is obtainable on the surface, and Mr. Waugh thinks that development in some of the several ledges will show good news to report within a very few months.

Captain T. F. Singiser, president of the American Flag Mining company, is back at his desk again, after a two months' absence, considerably improved in health. The captain left here a couple of months ago for the hot springs sanitarium at Mt. Clemens, Mich., where he went in the hope of getting rid of his rheumatism. His time has been spent between that place and his home in Iowa, and he returns feeling that, with his strength built up, he will get along all right from now on.

Cheated Death.

Kidney trouble often ends fatally, but by choosing the right medicine, E. H. Wolfe of Bear Grove, Ia., cheated death. He says: "Two years ago I had Kidney Trouble, which caused me great pain, suffering and anxiety, but I took Electric Bitters, which effected a complete cure. I have also found them of great benefit in general debility and nerve trouble, and keep them constantly on hand, since, as I find they have no equal." Z. C. M. I. Drug Dept.

NEW TELEPHONE BOOK IS BEING HURRIED UP.

Notwithstanding a healthy growth in subscribers was provided for with last issue of the directory, it has so far exceeded expectations that the supply of books is exhausted, and the new book is being hurried to completion. It will show over 7,500 subscribers in Salt Lake—a growth of over 1,600 since July 1st, 1904, and over 200 for the half month ending January 15th, 1905.

ROCKY MOUNTAIN BELL TELEPHONE COMPANY.

HAVE YOU

Ordered a copy of Polk's Salt Lake City Directory for 1905? This work will soon be in press. Better order now, as the edition will be limited to actual subscribers. Price $6.00 per copy. A map of the city goes with each book.

WERE TOO TOUGH FOR DIGESTION

Offerings in Wall Street Made the Market Heavy.

PROFIT TAKING GENERAL

CLOSE WAS HALTING AND IRREGULAR.

New York, Feb. 1.—The heavy engagements of gold for export to Paris tomorrow were made the nominal occasion for selling of stocks today, but taking of profits on yesterday's feverish and volatile advices was an obvious motive in many parts of the list. The weakness of these stocks was offset by strong advances at other points, according to the usual method of supporting the market to facilitate the taking of profits by professional operators. But the not very striking advance in such stocks as Reading and Missouri Pacific amongst the usual favorites, even supplemented as it was by the rise in a lengthy list of specialties, proved a poor substitute as a stimulating factor for yesterday's movement in the Vanderbilts.

The mass offered to the market for digestion proved under these circumstances somewhat heavier than could be comfortably absorbed, and the prevailing tone was heavy. Large exports of gold were expected this week and the prospect has occasioned little concern, owing to the actual embarrassment found in securing employment for the accumulating bank reserves at this center, in spite of a considerable activity in the issues of new securities and investment in existing bond issues. But an outgo for a single day of upwards of $9,000,000 in the precious metals and the slight impression caused by the enormous supply of exchange on the market are impressive facts. The insatiable demand of the Paris market for gold is the more notable in view of the rapid recuperation of London's supply, that capital having received $5,065,000 from Egypt and the largest single consignment ever received from Cape Town within the past week. Yet the principal demand from Paris continues to be diverted upon New York.

It is evident that the only change in conditions that is likely to put a stop to the movement will be an advance in interest rates which will offer a sufficient inducement to keep the gold at home rather than send it abroad to secure the additional advantage offered there.

Quite as influential a factor in the stock market was the action of the Vanderbilt shares and of the more sober consideration given of the recent rumors regarding a wholesale consolidation of that group with the Harriman properties. Yesterday's action towards the concentration of operating control in the Vanderbilt group and the known extension of Rockefeller holdings in New York Central, while of admitted importance in the standing of these securities, was not felt to be sufficient to explain the violent movements in the group.

The rise of 25 points effected yesterday in Chicago, St. Paul, Minneapolis & Omaha, which was partly lost before yesterday's closing, was completely yielded at one time today on transactions as small as those of yesterday. Its parent stock, Northwestern and New York Central, were also subject to the pressure to get out at the high level of prices. There was no difference of opinion as to the favorable showing of the quarterly report of the United States Steel corporation, but its securities were also subjected to an natural process of realizing, with the good news all public. The strength of the local tractions seemed to be associated with a threat of a strike by subway employes. The wide movements in specialties were not affected by special news developments. The halting and irregular tone of the market continued throughout.

Bonds were irregular. Total sales, par value, $5,965,000.

U. S. bonds were all unchanged on call.
