SQUABBLE GULCH IN TUSCARORA

Reminiscences of Days When "Men for Breakfast" Was in Vogue.

MINES IMMENSELY RICH

ONLY 1,000 FEET IN FAMOUS GULCH HAS BEEN WORKED.

Occasionally one is reminded of the stirring olden times by some occurrence of the present, says the Nevada State Journal. Of that time when Mackay, Flood, O'Brien, Grayson and others were taking their millions from Nevada's great mines; when it was both customary and proper to have a man for breakfast, and considered absolutely necessary that one or two men at least should die with their boots on before a camp was conceded to have real merit; when mining stocks went by leaps and bounds from a few cents to $1,000 a share, and one might be a pauper today and rolling in wealth on the morrow; when stages drawn by six wild broncbos and twenty-four passengers on board, rolled and rocked o'er the hill and dale, and the stage robber and his black mask were of frequent occurrence.

Yes, it was the day that the man behind the gun, at $5 per diem, held his mine against all comers, by right of might. The vigilante flourished in all his glory and yet it was then, and only then, that one saw real life, nature unadorned, as it were; though a man was indeed a man whatever his garb or condition.

Then it was that many Nevada camps were producing their millions and the Comstock mines, the Eureka mines, and the famous Grand Prize, Belle Isle, Commonwealth and others of Tuscarora were in the zenith of their glory, or perhaps in the throes of endless litigation; the shareholders trying to skin each other, or else all combined in a design against the public and when jealousies were easily aroused and the publican and the sinner had a part to play, and played it to an eternal finish.

When one hears of an important development near the old Commonwealth the mind naturally takes on a retrospective vein and again is presented a different scene and an older time and the sharp crack of the drivers whip is once more heard as he reins up his leaders and cuts off a corner in the early eighties.

Perhaps no section is more prolific of such scenes than the old Tuscarora camp and so it was in Squabble Gulch, as well as elsewhere, for when a rich mine was discovered it aroused the cupidity of all comers and a legal scramble at once commenced.

North Belle Isle Episode.

A case in point was when a strike was made in the North Belle Isle and all adjacent territory became immediately valuable. The stock in that company without warning and almost in a night jumped from 15 cents to $10 per share and never before or since was witnessed such a scramble for mining ground.

Three hardy spirits, some of them now deceased, armed with a complete set of surveyor's instruments, in the dead of night, between the hours of 3 a. m. and 1 a. m. known in mining parlance as the "graveyard shift," and at a time when all was quiet entered an old incline under Seventy-six hill, which connected with the North Belle Isle and surveyed out the monster ore bodies in the latter mine, and early the next morning within 900 feet of the main shaft of that mine, started a shaft and almost at the grass roots disclosed a shoot of fabulous richness. Then the fight began and thereafter Squabble Gulch was famous in the annals of Tuscarora.

Soon after followed the location of such mines as the Big Nine, Little Six, McVistal, May Queen and others, and consequently law suits innumerable were the order of the day and such lawyers as Critchlow Thornton, Robert Clarke, Dorsey and others were active in the battle for blood, the incentive probably being a contingent fee. About this time Ed Lafferty, a waiter in a restaurant, sold out of Squabble Gulch and made a raise which swelled his head to such an extent that he believed he could do business with the best of them and, at George W. Grayson, was one of the richest and most active operators in that section. Lafferty singled him out as a victim and immediately started for San Francisco to break Grayson, and being a kindly disposition Grayson proceeded at once to break Lafferty and the latter was soon walking the streets wondering just how it was done.

The Commonwealth, North Commonwealth, Found Treasure, Del Monte and others were struck about this time and litigation instituted then has been continuous to the present time and has prevented the exploitation of these large ore bodies known to exist in the territory lying west of the Nevada Queen.

Little Ground Was Worked.

Only about 1,000 feet of the immense territory in Squabble gulch has been worked, though west of these values are known to exist. The Star Spangled Banner, for instance, produced $50,000 almost in fifty minutes, certainly in an incredibly short time, and then faulted.

There is 4,000 feet of virgin ground there, commencing at the Central Con. on the east and extending to the Banner on the west, which territory is known to carry the east and west vein and wonderfully rich shoots of both the Queen and Commonwealth.

It is just north of Squbble gulch that the All Alone claim is located, made famous by the fact that the patent was set aside in a Nevada district court. The Found Treasure apexed on the All Alone ground. The All Alone had 284 feet on one side of its vein and 316 feet on the other, and this odd way of locating caused the setting aside of the patent as regarded the sixteen feet.

Everybody Took Sides.

These conflicting interests caused a great deal of ill feeling and everybody took one side or the other, and as Parson Brown about that time had "a call" to the charge of the Methodist Episcopal church at Tuscarora and being of an energetic turn of mind, it was not long before he aspired to be a factor in the community. He was especially fitted for this, having formerly been a "back-stop" baseball player. As it happened the parson was opposed in his opinions by George W. Peltier, at present a Sacramento banker, and W. C. Price, now a resident of southern California, but both at that time being the leading men of the camp both as mines and merchandising.

Peltier, who was of a sporting turn, imported a baseball team and, not to be outdone, up bobs Parson Brown with an opposition team of local men, but once in a while the parson was handicapped by a funeral the same day as the baseball game, and then he would hurry up the funeral service and rush across lots to take his position as pitcher, and as a truth chronicler we are compelled to say that the parson's nine nearly always won the game.

About this time an attempt was made to blow up Peltier and Price with dynamite, and the following Sunday Parson Brown declared from the pulpit that Peltier and Price blew themselves up for an excuse to get out and quit the camp, and, as a matter of fact, he was so plausible in his arguments that quite a number were convinced that it was true; and the paramount question at that day was who blew up Peltier and Price, and not who struck Billie Patterson. It was indeed an awful time, and midnight assaults, kidnaping, etc., were always in order. It was claimed that Peltier and Price spirited away one Three-Fingered Jack to the county seat under the pretense that they desired to prevent his being lynched.

Even among the women there was trouble, and of course two kinds of teas were in order. The women who were followers of the parson held pink teas, to which the women of the Peltier side sought in vain for admission.

TINTIC MINING NOTES.

Balhinch to Resume—Machinery for the Copper Jack.

(Eureka Reporter.)

Bullion-Beck Tunnel stock, after climbing to 72½ cents per share, took a slight tumble on Tuesday, and since that time it has been dropping. There is no apparent reason for this, as the ore body at the mine is becoming larger with every shot. The initial dividend of the company was checked out on Wednesday.

We have been informed this week that there is a dividend coming up on Mountain View Mining company stock, but nothing of a definite nature can be learned just at present. The control of the Mountain View company, in fact all of the stock excepting that owned by Mrs. T. Sullivan, John Hannifin and James P. Driscoll, is held by Mr. Dubois and associates, who also control the Yankee. The Mountain View ground is now being worked through the Yankee, if reports are correct, and it is also rumored that sufficient ore has been taken out to make a dividend possible at this time. We cannot verify the story and simply print it for what it is worth.

The machinery at the Martha Washington mine, which was purchased some time ago by C. C. Griggs, George Hanson and J. C. Jensen, was this week transferred to the Copper Jack Mining company, operating in the Erickson district. Just as soon as convenient this machinery will be moved to the Copper Jack ground and used in the development of the property. It will be remembered that the property of the Martha Washington Mining company was sold under sheriff's sale about a year ago. J. M. Taylor was the purchaser at that time, and he afterwards sold the machinery, buildings, etc., to Messrs. Griggs, Jensen and Hanson, who in turn transferred it to the Copper Jack company, in which they are heavily interested.

Arrangements were completed this week for the reopening of the Balhinch property in North Tintic, and yesterday work was commenced. Eugene Sanchi has been out from Salt Lake during the week and secured the services of H. Gusbaldi of Eureka, who will serve the company as superintendent. Years ago this property produced over $35,000 worth of ore for its owners, Messrs. Riter and Brown, but since that time no ore has been shipped from the mine. The Helen Mining company was formed about six years ago and commenced the development of this ground under a lease and bond and afterwards the company was organized under the name of the Balhinch Mining company. The tunnel is now in a distance of 250 feet and a shaft has also been sunk to a depth of 200 feet. Considerable drifting has been done on the tunnel level, and some ore has been encountered, although not in sufficient quantity to make a shipment. It is on the tunnel level that the work will now be continued. It is understood that outside capital has been secured and that an effort will again be made to place the mine inthe list of producers. It is generally considered as one one of the best mining propositions in the state.

NEVADA CON. COMMENT.

Reasons Why Western Men Are Investing in Company.

Commenting on the listing of Nevada Consolidated in Boston the other day, Hayden, Stone & Co.'s market letter says:

"Since we first became interested in this property the ore developments have been most surprisingly favorable, both as regards the extent of new ores developed and blocked out, and as regards the average values of new developments. J. Parke Channing examined the mines two months ago that the company had blocked out 5,000,000 tons of ore of an average value of 2.4 per cent copper. Other engineers who have visited the property more recently have not hesitated to declare that the company had at least 15,000,000 tons of ore in sight. And these same engineers who have recently been there have been willing to say that in all human probability the tonnage will exceed 50,000,000 tons, although no such amount is as yet technically in sight.

"As to values, the change has been quite remarkable. Average assays for some time in very important workings have been well up between 3 and 4 per cent. The significance of this change needs no comment.

"Western mining people are willing to buy such properties and pay higher prices for them than are eastern people willing to pay. Nor are they seemingly tempted into selling by the statement which is being passed around that the Nevada company is expected to earn only $1 per share from the installation of the first unit in its reduction plant. That is a matter of small consequence. An English engineer who visited the property not long ago, and who with himself and friends has taken a large interest in it, has urged most emphatically that the company proceed without delay to the installation of a plant with a capacity for handling 10,000 tons per day. While we think that the plans as originally laid out by Mr. Channing and by the engineers in charge of the work, will be followed out closely, such suggestions as the foregoing indicate some very interesting possibilities as time goes by."

OFF FOR DEEP CREEK.

M. R. Evans Sends Men and Supplies to Do Assessment Work.

M. R. Evans started a team out for the Deep Creek country yesterday loaded with provisions, tools, etc., and within the next day or so he will leave himself. Mr. Evans and associates own quite a lot of unpatented ground in the Dutch Mountain end of the Deep Creek range, and some also in the Thurber and Dolly Varden districts, just over the line in Nevada, and it was to look after the assessment work upon that parties have been dispatched to establish camps.

For many years Mr. Evans and his partners have been taking care of holdings in that region, though the advent of a railroad has been so long delayed that many fine claims held years ago have been abandoned and left for others to take up and work. As Mr. Evans has more than once expressed it, there is so much good ground in that country that it has been the hardest kind of work for him, knowing that he was unable to carry it all, to know which to keep and which to relinquish.

Mr. Evans' experience in the Deep Creek region has been the experience of many others and now that a railroad across the desert to the ranges in which nature has been so lavish in distributing the precious metals in combination with homely lead and copper, the expectation is that there will be something doing by and by.

WIDE WEST CUTS LOOSE.

Cherry Creek Mines Being Equipped With Machinery.

The Wide West mining company has placed an order with the C. T. Carnahan Manufacturing company of Denver for a six-drill Rand air compressor for its Wide West mines at Cherry Creek. An order has also been placed with the Risdon iron works of San Francisco for the machinery and equipment for a twenty-stamp quartz mill, which will be installed on the present site of the five-stamp mill, which the company has found to be inadequate to handle even the first-class ore from its mines, says the White Pine News.

The company has 300 tons of ore on the dump which will net a handsome profit, but which has been laid aside until the capacity of the mill has been increased sufficiently to handle all the ore extracted from the mines. More than 10,000 tons of high-grade free milling ore are blocked out in the mines.

The mines have hitherto been worked by tunnels, but arrangements are being made to install a hoisting plant, and as soon as completed work will commence on the sinking of a 300-foot shaft from the lower tunnel level.

Superintendent J. H. Leishman took charge of the property a little over three years ago and has opened it up in a manner that can leave no doubt as to the permanency of the ledge or of the values it carries. Notwithstanding numerous costly improvements and much "dead" work done, the mine has paid regular dividends for the past eighteen months, a record that forces appreciation from the stockholders. The mines will be worked on an extensive scale during the coming summer.

EXPORT TRADE IS INCREASING

China and Japan Buying Enormously in the United States.

FIGURES FOR TEN MONTHS

COPPER EXPORTS A COMPARATIVELY NEW FEATURE.

Washington, Dec. 24.—No feature of the export trade of the United States for 1905 has shown a larger growth than the trade with China and Japan, says a bulletin issued by the bureau of statistics of the department of commerce and labor. In the ten months ended with October exports to China aggregated more than $50,000,000 in value, against $20,000,000 in the same months in 1904. Exports to Japan were $46,500,000, against a little less than $22,000,000 for the same period in 1904, and $16,000,000 in the corresponding months of 1903. No other country of the world to which our exports are sent shows gains approximating those of China and Japan.

The growth in exports to China from the United States is especially marked in copper, cotton cloth, flour sewing machines, locomotives, leather, paper, canned beef, manufactures of tobacco and lumber, though cotton cloth and copper are by far the most important of these items.

To Japan the growth occurred in flour, carriages and other vehicles, raw cotton, agricultural machinery, sewing machines, locomotives, leather, paper, canned beef, tobacco and lumber. Cotton cloth exports to China in the ten months ending with October aggregated in value $37,405,450, against $9,937,07 in the same months of 1904.

Copper exports to China are comparatively a new feature of our trade with that country, the amount in the months ending with October having been $11,330,407, against $611,677 in the same months of last year. The copper is used in making new copper coins. Flour is about the only important article of export to China showing any material reduction this year, while manufactured tobacco shows a material increase.

Cotton exports to Japan for the ten months ending with October aggregated in value $13,784,359, against $2,715,529 last year. American cotton is popular with the Japanese spinners because it has a long staple, but the cotton grown in India and China, which has a shorter staple, is considerably less in price, and in the years of high prices of cotton in the United States Japan purchased little cotton in this country, but draws largely on India and China.

A PROPHETIC POET.

A Banquet Reminiscence of Ten Years Ago.

(Chicago Tribune.)

An insurance agent, who has some leisure time on his hands these days, was killing a vagrant hour or two yesterday by looking through his scrap book. While his eye was roaming carelessly over the pages filled with reminiscences of years ago he struck something that made him sit up and take notice. The "something" was a five-verse "pome." When he read it through the first time he frowned, for the "pome" hit a sore spot. Then he tackled it again, and a grim smile crawled across his face.

"What do you think of that?" he said as he passed the book to his chum. "That darned poem," pointing to the jingle that had arrested his roving gaze, "was given publicity at a banquet of life insurance men in New York ten years ago. It was regarded as a rich and rare joke by us when it was read. But I shudder to think of the classification the average policyholder would give it today."

The chum silently absorbed the jingle and turning to the owner of the scrap book remarked:

"Prophetic cuss, wasn't he?"

Here is the product of the prophet:

IF I SHOULD DIE TONIGHT.

If I should die tonight,
The New York Life would look up my account,
And find by closest scrutiny the least amount
It could be held for, when demand was made
For some return for all my premiums paid;
'Twould think five thousand dollars far too much
To draw from out its treasury for such
As I—if I should die tonight.

If I should die tonight,
The New York Life would never think of all the years
Through which I helped support the now departed Beers;
Nor count it more than a piece of rare good luck
That my small premiums helped as well the living Tuck;
Nor think of the long line of agents who've grown rich
Out of commissions—some small part of which
Would cease—if I should die tonight.

If I should die tonight,
I cannot bring myself to think of Archie Welch,
Completely overcome by grief he could not squelch;
Nor at the sudden shock the news would give his nibs
Who superintends the finances—the gifted Edward Gibbs—
But I should rest assured that John McCall,
Drawing his salary, would rise above all,
And never care a d—, —if I should die tonight.

If I should die tonight,
The New York Life would doubtless wish I were alive;
For then it would not have to pay those thousands five.
If it could choose, it would not have me dead,
But keep me living that I might be bled;
For I am more than certain that the New York Life
Would rather have me pay than pay my wife—
And that's the way I feel tonight.

If I should die tonight,
'Twould not disturb the New York Life, although for thirty years
I have been paying premiums—it would shed no tears;
Its business would go on—its sharp trustees
Continue managing its assets as they please.
They will not be disturbed to know that I am gone:
For every moment there's a sucker born
Some one would take my place—if I should die tonight.

FOUR FEET OF GALENA.

Strike Reported in W. A. Wilson's Wood River Mine.

M. H. Lipman brought to town today the news of a strike of four feet of ore in the Eureka group of mines, at Bullion, says the Woodriver Times. The ore is cube galena of the usual average here, and runs into money fast, being worth about $100 a ton. A thirty-ton carload of it will bring $3,000.

The strike occurred day before yesterday, on the 200 level, and one man took out seventeen sacks of first-class during his shift yesterday. This, if confirmed, will be the biggest strike made in the Wood River mines in years.

The Eureka group of mines is owned by W. A. Wilson, E. M., of Salt Lake, and his associates.

Dr. Cook's Certain Methods
The Most Reliable, Quickest and Safest Ever Perfected.

MY SKILL has no equal in the cure of Pelvic and private diseases of men, because I have advanced With the rapid upward march of medical science, and made a specialty of the diseases I treat. My modern methods are every day proving that they are positively the safest, quickest and most reliable that have ever been perfected for curing
BLOOD POISON, SKIN DISEASES, SORES, ULCERS, STRICTURE, VARICOCELE, NERVOUS DECLINE, PILES, FISTULA, RUPTURE, HYDROCELE and DISEASES of the KIDNEYS and PROSTATE.

There is absolutely no patchwork about the results of the course of treatment I give for each of the diseases I make a specialty, for soon after beginning my treatment every symptom of disease disappears and the trouble never returns.

IMPORTANT—I will cure you for less money than you can be treated for by any other specialist in Salt Lake. You will have to come to me sooner or later in order to be properly cured; why not before you have lost your money in doctoring with cheap, or dishonest, unskilled specialists?

CURE OR NO CHARGE—My patients receive a written contract, guaranteed by a deposit of $500.00 in the bank, to cure and render entire satisfaction or refund money.

CONSULTATION FREE, CONFIDENTIAL and INVITED—A personal, thorough and searching examination is required, though if inconvenient to call, write me for information. Office hours: 9 a. m. to 8 p. m., excepting Sundays, from 9 to 12:30. Address or call

And in accordance with the law and an order of the board of directors made on the 14th day of November, 1905, so many shares of each parcel of such stock as may be necessary will be sold, if not paid before, on the 5th day of January, 1906, at 10 o'clock a. m., at C. M. Nielsen's office in the Constitution block, Salt Lake City, to pay delinquent assessment thereon, together with cost of advertisement and the expense of sale.

PETER NIELSEN, Secy.

TWIN FALLS LAND AND WATER COMPANY.

NOTICE OF SPECIAL STOCKHOLDERS' MEETING.

A SPECIAL MEETING OF THE stockholders of Twin Falls Land & Water company is hereby called to be held at the office of the corporation, 214 Atlas block, Salt Lake City, Utah, at 10 o'clock a. m. on Tuesday, December 26, 1905, for the purpose of considering the adoption of certain amendments to the articles of incorporation of said company, whereby the provisions of a certain contract between the Bull-Kimberly corporation, Walter G. Filer, Trowbridge & Niyer company, Twin Falls Land & Water company and Stanley B. Milner, shall be adopted, and the obligations and restrictions thereof, so far as the same pertain to or affect the said Twin Falls Land & Water company, shall be made a part of and incorporated into said articles of incorporation. Said contract above referred to is dated November 28, 1905, and, among other things, restricts the execution of any mortgage, deed of trust, lien or other encumbrance by said Twin Falls Land & Water company, whereby the contracts for water rights and other securities of said Twin Falls Land & Water company now held by it or hereafter to be acquired shall be in any manner encumbered contrary to the provisions of said contract.

By order of the board of directors.

F. H. BUHL, President.

Dated November 29, 1905.

Notice to Contractors.

OFFICE OF THE BOARD OF PUBLIC Works, Salt Lake City, Utah, Dec. 12, 1905: Sealed proposals will be received at this office until 3 p. m. Thursday, Jan. 4, 1906, for constructing storm sewer on Ninth South street, Salt Lake City, and at that time and place will be publicly opened and read.

The approximate quantities are as follows:

Earth excavation for sewer, 4,000 cubic yards.

Earth embankment in old canal, 7,600 cubic yards.

33x36-inch concrete sewer, 50 linear feet.
33x42-inch concrete sewer, 100 linear feet.
36x54-inch concrete sewer, 1,200 linear feet.
48-54-inch concrete sewer, 1,200 linear feet.
Wooden flume, 8,000 feet, B. M.
Brick masonry, 3 cubic yards.
Setting iron and steel, 1,000 pounds.
Setting steel reinforcement, 50,000 pounds.

Specifications to bidders, together with specifications and forms of contract and bond, can be obtained upon application at the office of the board of public works or city engineer.

The right is reserved to reject any and all bids.

By order of the board of public works.

E. A. WALL, Chairman.
GEORGE W. RITER,
City Engineer.

Annual and Special Meeting.

NOTICE IS HEREBY GIVEN THAT there will be a special and general meeting of the stockholders of the Continental Life Insurance & Investment company at the company's office in the Atlas block in Salt Lake City, Utah, on Tuesday, the 9th day of January, 1906, at ten o'clock a. m. of said day, for the following purposes:

1. To elect seven directors to fill the places of the seven directors whose terms of office expire at the time of said meeting and to fill any other vacancies on the board of directors, and to elect other officers of said company.
2. To transact any other business that may properly come before said meeting.
3. To vote upon amending section viii of the articles of incorporation so as to create the additional offices of second and third vice president, and if such offices are created, to fill the same.

Dated Salt Lake City, Utah, December 13, 1905.

CONTINENTAL LIFE INSURANCE & INVESTMENT COMPANY.
HIRAM TYREE, President.

And in accordance with law and an order of the board of directors, made on the 7th of November, 1905, so many shares of each parcel of such stock as may be necessary, will be sold at the office of the company, 225 Commercial club building, Salt Lake City, Utah, at the hour of 10 o'clock a. m., on Tuesday, Jan. 23, 1906, to pay delinquent assessment thereon, together with the cost of advertising and expense of sale.

ERNEST WILLIAMS, Secretary.
Salt Lake City, Utah, Nov. 11th, 1905.

IN THE JUSTICE'S COURT IN AND for the Salt Lake City Precinct, County of Salt Lake, State of Utah. Before Dana T. Smith, justice of the peace. M. J. Faulkland, plaintiff, vs. John Doe Rosenzwig (whose other and true first name is unknown), John Doe Rosenberg (whose other and true first name is unknown), and H. W. Katz, partners under the firm name and style of Rosenzwig, Rosenberg & Co., defendants. Summons.—The State of Utah to the defendants: You are hereby summored to appear before the above entitled court within ten days after the service of this summons upon you if served within the county in which this action is brought; otherwise within twenty days after the service, and defend the above entitled action brought against you to recover the sum of thirty-two and 50-100 dollars, besides interest and costs of suit, upon a contract to deliver a certain lady's suit of clothes, and in case of your failure to do so, judgment will be rendered against you according to the demand of the complaint.

DANA T. SMITH,
Justice of the Peace.
123 Commercial Block.

Special Stockholders' Meeting.

THERE WILL BE A SPECIAL MEETing of the stockholders of the Petro Mining company at the offices of the company in rooms 305-8 Auerbach building, Salt Lake City, Utah, on Friday, Dec. 29, 1905, at 2 o'clock p. m.

First—To ratify the action of the board of directors of the Petro Mining company, taken on Nov. 25, 1905, in accepting a proposition from the Utah Apex Mining company to pay to the Petro Mining company $30,000 for all the real and personal property of every kind and nature owned by the Petro Mining company, and authorizing the president and secretary to make the necessary transfers, for and in the name of the Petro Mining company, to carry the said sale into effect.

Second—To transact any other business which may properly come before the meeting.

Done by order of the president and board of directors, at Salt Lake City, Utah, this 27th day of November, A. D. 1905.

F. M. OREM, Secretary.
